[775] [614] 372 784 756 776 [614]

A variety of taboos were connected with the fire, whose "master" spirit was an old woman. The shaman's duties among the Nivkhi were connected with "healing" and with the constant struggle with the evil spirits, milk and kinr, which caused illness and death. The shamans had their own helping spirits (kekhn). However, shamanism was not greatly developed among the Nivkhi. It is interesting that the shamans did not take any part in the clan cults.

538 Folk Arts

The traditional poetic works of the Nivkhi are varied. There are songs of various kinds, tales, proverbs and sayings, and also myths, reflecting the most ancient ideas about the origin of the world, of nature, of various natural phenomena, and of spirits. There are also epic and historical tales (tyl'ugd), describing hunting feats, wars between clans, etc. The Nivkhi myths also include the Tunguso-Manchurian myth about the three suns. According to one of the Nivkhi myths, people descended from trees: the Nivkhi descended from the larch, the Orochi, from the birch.

531 Among the decorative arts, the most developed were carving on wood and bone, embroidery and appliqué on robes made of fabrics and fishskins. Most of the articles of daily use—wooden troughs, spoons, dippers, birchbark boxes, knife handles, spear-tips, pillows, blankets, robes, hats and mittens—were covered with spiral-ribbon designs, executed with great taste and skill. Wood-carvings also decorated barns, burial huts and dwellings. In motif and style, the Nivkhi design is related to the design of the Ul'chi and Nanays. The principal motifs of the ornamentation of clothing and birchbark utensils were symmetrical combinations of bent lines, often almost spiral, and stylized representations of birds. Appliqués from fishskin, fabrics and birchbark were cut out according to birchbark or leather patterns, transmitted from generation to generation. Robes, birchbark boxes and hats, and other articles had standard combinations of ornamental motifs, reproduced on articles of specific groups. The main colors in appliqués of birchbark, fishskin and fabric were black, white, red and blue. Appliqué on birchbark, fabric and fishskin was women's work; carving on wood and bone was done by men. Many women were famed for their skill and craftsmanship.

[462]

The origin of the Nivkhi ornamental art, as well as the art of other Amur peoples, has not yet been sufficiently established. Some of the motifs (such as roosters, dragons and monster-serpents) were unquestionably suggested by Chinese art and mythology, but underwent considerable local transformation; others (spirals) probably date back to neolithic times.

[177]

9: Hawes--163-164 T-3 (1901) 1903 Gilyak-1-2
116, 762, 775

"Resuming our journey again, we were still casting about for a low, level, sandy bed, and the twilight was fast gathering, when my attention was called from the terrestrial to the supernatural. From out of the now dark and gloomy forest came a half moan, half cry.

It was uncanny beyond words. A cry from the unknown, a moan from the depths of undisturbed regions. Our Gilyaks ceased paddling, and we asked, 'What is it? It must be some animal. Perhaps it is in the claws of a bear.'

'Kaukray! kaukray! (1) No! no! It is no animal. It is the shade of a dead man wander-

1. A Gilyak word, meaning "no" or "nothing."

ing in the forest.'

For the Gilyaks not only believe in a future world, but their conceptions really connote immortality. The members of their race on the mainland, who live on the banks of the Amur, hold that the spirit of the departed one reaches after several days' journey a great village in the centre of the earth called Mligh-vo, where life is much the same as on earth, with this difference, that there the hunting and fishing are unstinted. In fact, it is the familiar [164] 'happy hunting ground' of the Indian. A distinction is made between those who die a natural and a violent death, for the spirits of the murdered and suicides fly to heaven (tlo) tirect, thus avoiding the long journey, and therefore not requiring food

Section 13 (1)

1. The table of contents for this chapter is missing in the manuscript.

The bear festivals. Their cultural character and social signifi-
ance. -- The bear festivals among the Amur Gilyak. Cere-
nonies and entertainments before and during the killing of the
ears, as well as during the consumption of them. Burial of the
ones and skulls of the bears. Modifications among the Olcha,
s well as among the Gilyak on Sakhalin and the Ainu.

The bear plays an outstanding role in the life of all the
eoples of the Amur region and Siberia up to Kamchatka. But
mong none of them is this the case to the extent that it is among
he Gilyak. The huge size that it attains in the Amur region (2),

2. See my measurements of bear skulls in Vol. I, pp. 8 ff., of this work.

s vicious nature, which, perhaps because there it does not find
nywhere near the abundance of food that it does in Kamchatka,
nakes it not hesitate to attack even human beings, and its
equent occurrence at all times make it the most feared beast
f prey of the region. It is therefore not surprising that the
nagination of the Gilyak is much occupied with it and sur-
ounds it, in life as well as after death, with fearful superstitious
deas. For instance, there prevails among them the belief that
he soul of a Gilyak who was killed in a fight with a bear moves
nto the body of this beast of prey, which may have chiefly
risen from the fact that the bear in its mode of life and its
earing reveals many a similarity with them, in that it, like
hem, feeds largely on the salmon ascending the river in masses,
n berries, plant tubers, and the like, like them it prepares a
lace for itself for the winter in caves under snow-covered twigs,
ike them it stands upright in combat, etc.

/744 cont./

778 run out on either side into two points, one of which represents a
751 lizard, the other a snake, the similar shapes of both ends facing one
532 another alternately. Unfortunately the specimen under discussion is somewhat worn by frequent use and is lacking the lizard at the one end.

778 The other amulet is an iron semicircle, from which hang
776 figures of different significance made of the same metal, specifi-
532 cally: at the one end, a crude human shape and a roughly triangular piece that, according to some of the Gilyak, is supposed to represent a ptarmigan, and at the other end an identical alleged ptarmigan and a heart; in the middle, finally, a roughly human shape with two heads, which is supposed to represent the kins, the evil, destructive power, that is, the devil. According to the re-
[753] ports of the Gilyak themselves, they believe that sickness is nothing but the kins gnawing at a human being and finally fatally devouring
[761] him. That is the end of all who /745/ die of sickness. It is no
775 wonder that with such a belief the Gilyak do not claim heaven for
766 the souls of those who die of sickness, but have them wandering on earth, while the souls of all the murdered and even of suicides fly
776 to heaven. According to Gilyak belief, the earth is the abode of countless kins or devils who hide in the forests and mountains, as well as in the water and everywhere. The kins are represented with
[532] two and three heads by the Gilyak, perhaps in order to indicate
[778] with the extra ones, in contrast to man, their power over the latter (1).

1. According to the Gilyak, one of the heads on these two or three-headed forms is a human head. This therefore indicates that the kins has seized the human being.

778 I do not know the significance of the alleged ptarmigans,
532 if that is what they are. The heart, however, has reference to the purpose of the whole semicircle Namely, it is to be worn around
[751] the neck against chest ailments, coughing, and the like. The name kissj, however, which was given to me for it, seems to have a

/749 cont./

Idols and Amulets Combining Human and Animal Figures and Others

19. Gilyak. The belief in the transmigration of souls with reference to the bear may be the basis of a number of pictorial representations among the Gilyak -- amulets or small idol-images that are worn around the neck in case of sickness. Among them one finds double figures of a human being and bear. This is ordinarily a small piece of wood which at one end branches out into two parts, one representing a human head, the other a bear's head. I acquired specimens of this type from Kalm and Allof. The former, in addition to the two representations mentioned, also has a human face on the single end (Plate LVII /p. 1257/, Fig. 8), while the latter ends there without any carving. On both, however, the division of the points marked with human and bear heads continues for a while in the form of a groove which gradually tapers off at the single end. The Gilyak explained to me that this groove continues to separate the human half from the bear half until they merge. (Bm. II, p. 59.)

20. Gilyak. In the forest near the village of Chiare, not far from the place where corpses are buried, several idols of the Gilyak were placed under trees in the customary manner, that is, standing upright close to the foot of a tree and hidden with sticks and other pieces of wood (see Plate LXV /p.1265 /, left). For instance, there was the double figure of a tiger (att) and /750/ a human being, with the nose of the latter being represented by a bear (Plate LXVI /sic; see Plate LVI, /p. 1256/, Fig. 2). Another idol bore on a human body provided with movable arms and legs an att head with a four-toothed comb on it (Plate LVII /p. 1257/, Fig. 2).

Finally I found here the representation of an animal reminiscent of a crocodile or alligator. It was evidently an amphibian, and the wide snout was densely studded with teeth. The natives called it chaż, or, as an idol, chaż-kägn, but knew nothing about the animal which the figure represented, in that they had neither seen such an animal in the water or on land nor heard it mentioned in their traditions. They simply said that this

/761 cont./

II. Conceptions of the Amur Peoples concerning Life after Death and the Corresponding Treatment of the Dead

Fate of the Souls after Death

42. Gilyak. The (Amur) Gilyak (according to Surgin's account) believe that the soul of anyone murdered, not excepting suicides, flies to heaven, while persons who die a natural death journey on the earth or under the earth. This flying up to heaven is most likely represented by the flying figure of the wagn, which resembles a flying human being with the characteristic bird's or fish's head. (Bm. I, p. 53.)

43. Gilyak. The (Amur) Gilyak Jutschin dictated to me an interesting song, for which, through further questions, I obtained a most instructive commentary in part. The song had been sung by the Gilyak Orkin from Magho to his wife, Rschyvguk, from Wair, whom he had abducted (*). Orkin was still alive at my time,

* See the Gilyak text in the appendix to Vol. III of this work, "Linguistic Findings, Compiled by Dr. W. Grube," p. 41 /the book translated here does not contain this appendix/.

but his wife had died.

The chief content of the song seems to refer to a "village Mlygh-wo," and I therefore inquired as to what kind of a village it was and where it was located. I learned that it was the place in the interior of the earth to which the souls of all those who die of sickness migrate, while those of murdered persons (**) fly to heaven.

** According to another report, also the souls of suicides (see Appendix 42 above.)

These were deciphered by Klaproth and the Archimandrite Avvakum. One inscription reads: "Temple of eternal peace", the other is a Tibetan translation of the Sanskrit sacred formula: "Om mani padme hum", i. e., "O jewel in the lotos! Amen!" The temple was supposed to have existed in the time of G nghis Kahn. Neighboring Gilyak come to these pillars and offer sacrifices, that is, they decorate them with wood chips, pour millet or spirits on the earth, etc. Thereupon they promise themselves an abundant yield of fish.

Near the village of Vaida high above the water is to be seen a thin, dry tree trunk parallel to the water level and jutting out of the steep rock wall, with branches radiating out in a circle. This tree trunk is held to be sacred by the Vaida-Gilyak. It is also often decorated with wood chips and above its roots, on the edge of the river bank, the bear festival is held. The above-mentioned church bells also belong to the sacred objects. [RCH: see category 116, p. 257] [242]

Almost all Gilyak believe in a future life, which may be gathered from the customs relating to the burial ceremony. Life in the hereafter is pictured exactly like the present life, except that it has neither age nor death. A deceased aged person regains his youth there, a married couple is united anew. There is neither hell nor paradise. (1) The

1. A similar belief is said to exist among the natives of Kamchatka.

fate of evil persons differs from that of good ones only in the fact that the souls of the former do not immediately reach that world, but must roam about on the earth for a while, usually in the form of an animal, particularly a dog. This is the Gilyak purgatory which certainly cannot be called the most absurd idea of purgatory. "The beyond" is put not below, but above somewhere in heaven.

However, even among these savages there are sceptics, or rather unbelievers. Thus a Sakhalin-Gilyak, after a pause, told a visiting Russian priest who sounded him out on religious matters: "What business of ours is God! If we have enough sable and fish we shall live, if not, we must go hungry." Another Gilyak in the vicinity of Sofiyskoye positively denied immortality in speaking to Russian peasants, pointing to a fish and saying: "just as this fish will disappear if I put it to death, so also man disappears."

782 Next to the sacrificial objects a one to two meter lo
775 stick carved in curly design is dug into the ground;
they call it nau. From this moment on the whole tri
is safe [762] from being haunted by the dead child,
tonhr ehlian, without further prayers or sacrifices.
753 If the relatives neglect to follow these rules, whic
845 are designed to appease the awe-inspiring spirits of
776 the mountains and to win their favor, they evoke the
anger. Several diseases which attack the parents an
relatives of the twins are considered to be symptom
of their revenge (tohr ehlian). These usually are
certain diseases like deformation of the jaw-bone,
squint-eyes, stiffening of the neck or any kind of
convulsions. The appearance of such diseases is
considered to be a consequence of the mountain
spirit's dissatisfaction; in such cases one says
"tonhr ehlian singrund", that is "the twin child is
tormenting".
784 The Gilyak are so afraid of these dangers that
845 young women and girls are strictly forbidden to liste
777 to reports about such happenings; by these precautio
they believe, they will be able to prevent the birth o
twins. Women are neither allowed to borrow house-
hold articles nor to accept gifts from friends who ha
given birth to twins. In this case old soft objects are
considered to be the most dangerous ones. Hard
objects, however, especially tools made of metal, d
not transfer the bad luck of the former owner to the
new one.
842 It is altogether a trait characteristic of this north
777 tribe that they believe in the possibility of the
transference of physical peculiarities from one man
to another man by way of his tools. This gives us an
explanation for the superstitious remedies they use
for overcoming a woman's sterility. The woman who
cannot bear children must ask another very fertile
woman to lend her the waistband of her trousers and
she has to wear it up to the moment of the desired
success. A Gilyak told me that fertility can be
transferred from one person to another like a
contagious disease, for example by way of a vessel
which had been used by the sick person.

"For four days the corpse of the dead woman

SPIRITS AND GODS--conception of supernatural beings of a higher order than disembodied souls; indications of their genetic relationship to ghosts; prevalent types of supernatural beings (e.g., guardian and familiar spirits, tutelary divinities, tribal gods, nature spirits and gods, angels, animal and totemic divinities, fairies and sprites, demons, mythical monsters, deified heroes and saints, divine tricksters, occupational or functional deities, creator gods, rulers of the spirit world, high god or supreme being); attributes of individual deities and of categories of divine beings (e.g., name, sex, form, character, powers, functions, symbols); hierarchical arrangement (e.g., polytheistic pantheon, dualism, henotheism, monotheism); etc. See also:

000 to it. In spite of the fact, however, that the material presented by
114 Shternberg convincingly testifies to the rudiments of class differentia-
565 tion among the Gilyak, he did not discover this, because he looked through the spectacles of the Populists and saw in the appearance of class differentiation the manifestation, not of the immanent economic laws of every society, but merely the effect on the Gilyak of their neighbors -- the Russians.

* 114 A significant part of the monograph is devoted to the re-
797 ligion of the Gilyak. /xxx/ Here the conceptions of Shternberg
614 about the masters, first stated by him in "Sakhalinskie giliaki," are unwound in all their breadth. "Each element has its 'master'
• [776] who is a 'god,' but, just as in each clan there are outstanding persons, wealthy men, of whom one is the richest ('the master,' according to the everyday terminology of the Gilyak), so are there 'masters' among the spirits, who, according to the beliefs of the Gilyak, also live in clans. With this concept Shternberg stresses the reflection of the social structure in the religious views. The views of Shternberg on the relationship of totemism to clan society also deserves attention. According to Shternberg, "... it was not totemism, i.e., not belief in descent from one or another form of animal, that created the clan gods, which is the accepted way of thinking, but the other way around: the clan gods created totemism.
[262] One cannot explain the interdictions among the totemists against using the meat of totems in their food by anything except a fear of killing some kind of clansman turned into a totem animal."

* 114 Shternberg contests the opinion that fear created god and
[77] advances his own understanding that the cult of a number of ani-
[825] mals (e.g., the bear and swallow) is caused by their seemingly protective relationship to man.

[756] In "Giliaki" Shternberg also, for the first time, formed his opinion that the shaman is divinely selected.

* 114 "Obraztsy materialof po izucheniiu giliatskogo yazyka i
197 fol'klora" and Materialy po izucheniiu giliatskogo iazyka i fol'klora constitute the second group of Shternberg's works on the study of the Gilyak; included here also is the summary of a paper at the Fourteenth Congress of Americanists in Stuttgart, "Bemerkungen

/55 cont./

776 Other gods distant from him, the sun and the moon, for
782 example, just like the tly-nivukh'i, interest him little, for
these gods are not closely related to his life and needs. On the
other hand, the Gilyak is in constant communication with such
gods as the master of the taiga, the sea, and the fire, turning
to them sometimes with sacrifices, sometimes with prayers.
Usually both acts are joined together. For an ordinary sacri-
fice neither solemnity nor any special objects are necessary.
The principle /56/ of sacrifice is exchange, and therefore one
cannot give the god of the sea fish, nor the god of the taiga the
meat of animals.

782 If the Gilyak sails on the sea and is afraid of a storm, he
1484 respectfully lowers a leaf of tobacco or a handful of rice over
the side and says: "Please make the sea calm, so that I may
arrive home alive and healthy." Whenever the Gilyak sets out,
he takes along in a special sack his favorite objects for sacri-
fice, sweet herbs, sarana, and so forth -- since the gods are not
demanding.

123 Some kind of candy delivered to the deity may sometime
776 stand one in very good stead. I experienced this once myself.
It was in August, 1894. With great difficulties, almost with-
out provisions or supplies, and with one piece of brick tea and
some biscuits, I reached the Head of the earth. When I un-
expectedly informed my companions that I had decided to
betake myself up to the top of the "Head" in order to collect
plants and remove some stones, my companions were overcome
with panic. They adjured me to renounce my "insane" in-
tention, which had to lead to our common destruction, offer-
ing as proof the example of two Russian seamen who had at-
tempted to go up to the top of the small god, Lazarev Cape,
perished, and were buried there. The captain of my boat,
Gibel'ka, an intelligent and loyal Gilyak from the settlement
Tangi, who had become quite attached to me, was especially
agitated.

/56 cont./

123 "What are you afraid of?" I said to him. "You will stay,
776 be alive, go back home, everything will be fine and do not
782 worry about me." "No, friend," replied Gibel' with anima-
tion, "that is a bad law; we have traveled together, worked
together, written together, searched together for the stone
ax, looked at people together, passed judgment together, and
now I will go back home and are going to die here? Is such
the law? And what will the most great chief say? 'Why,'
he will say, did you not see to it that the "tyan'gi" (gentle-
man) traveled well?' He will say that I killed you. That
will be a great sin. No, you had better not touch the god of
the earth; he is terribly big, strong, and he can get terribly
angry."

123 Seeing that I was adamant, Gibel'ka, after some thought,
776 said: "You have nothing to give the Head of the earth, such
782 an important 'tyan'gi' and yet to have nothing to give. If
we give him a present and say a good word, perhaps he will not
become angry." Then I remembered that a few pieces of
candy that I use for slaking my thirst when climbing a moun-
tain were left in my pocket and, showing them to my elated
companions, said that I /57/ would take them to the angry god
and say a good word. My companions calmed down somewhat,
and I set out on my way. In the evening when I came back
loaded with a collection of herbs and minerals, my companions
surrounded me with joy and began to inquire about what word
I said to the Head of the earth. I was forced to recite for them
impromptu prayers in their national style. "Lord of the Earth,
you are very big and strong and can become terribly angry.
All people know you. I came from a distant land, from a
most distant land I came in order to look at you; please make
it so that I and my companions are healthy and return home,
and do not die of hunger on the way. Please feed me well!"
When, exhausted and starving, we returned that very day to
the settlement of Nyur very close by, and Gibel'ka, while the
tea was being boiled, told the amazed listeners about my
sacrifice and about the eloquent prayer, something extraordinary
happened. All the people looked with tender emotion, while

/57 cont./

123 the women rushed to their storehouse to fetch the precious buda
776 reserved for sacrifices, in order to feed me and my companions
782 and thereby fulfill the will of the Head of the earth. Thus,
thanks to the piece of candy, I, in the opinion of the Gilyak,
not only saved my life, but unexpectedly obtained for my
companions and myself a dish which we had not seen for a long
time.

782 The Gilyak also has live sacrifices, the objects of which are
dogs. A dog is killed, by strangulation, before the season of
sable hunting, during the bear festival, before departure for a
long journey, during sickness, and generally on the solemn oc-
casions of life. Before it is killed, it is fed, and at that time,
depending upon the circumstances, it is given one or another
[776] mission. Thus, during the bear festival, the dog will be told:
"Follow your bear to the highest mountain. May the master
love you. Change this hair and come down next year as a bear
[755] so that I may see you." When a dog is killed on the occasion
of sickness, it is asked to be the intercessor for the sick man
before the god to which it is being sent.

Thus the victim is a simple envoy, whose soul, after its
death, will reach the master who lives on the highest mountain.

775 Clan gods constitute a special category of gods. As a
614 matter of fact, these gods play a most important role in the life
of the Gilyak, and it is most often to them that the Gilyak
offers his sacrifices. In each element there is a clan god. The
clan gods are of particular /58/ interest, because in this tribe
we can most clearly trace the very genesis of this very common
fact of primitive religion. Even among the Greeks and the
Romans the worship of clan gods was a common phenomenon.
The clan gods of the Gilyak are not supernatural mythical be-
ings, as among the Greeks and the Romans, but their very own
clansmen who, for a variety of reasons, have entered the clan
775 of one or another god "master." A particularly fortunate com-
614 bination of circumstances, if I may express myself thus, is re-
766 quired to attain such an honor. If, while hunting, a Gilyak was
killed by a bear, if he fell prey to the waves on the water, if he
was murdered or burned to death through his own carelessness,
if, according to the shaman's explanation, a woman died from

/72 cont./

G An indirect confirmation of our hypothesis as to the
776 origin of the above-mentioned prohibition among the Gilyak
761 is to be found in an interesting legend of the Orochi and the
262 Orok, whose religious views are very similar to those of their
G1 Gilyak neighbors. According to this legend, a certain Orochi
776 woman was once abducted (in other words, eaten) by a bear
761 and bore two children by him. The woman was subsequently
262 often encountered by the Orochi in the forest in the form of
773 a she-bear who warned them not to shoot her. It happened,
however, that she was shot by accident. That it was actually
she was clear from the fact that women's ornaments were
found in her viscera, a bracelet and so forth. Dying, she
requested in her testament to the Orochi who killed her that
in the future, upon killing a bear, the ritual that is usually
observed now during the festival be observed, for any bear
that is killed may turn out to be her descendant and, conse-
quently, a clansman of the Orochi.

G
• 776 Let us return to the gods. Up until now I have men-
tioned the gods that are beneficial to the Gilyak. Besides
these, however, there are other supernatural beings who are
evil and harmful to him. These devils are "mil'ki" and
"kinr'y." These beings appear in all kinds of forms and
are classified according to their degree of harmfulness. They
appear sometimes in the shape of a Gilyak, sometimes in the
shape of animals, from the bear to the toad and lizard. They
are encountered on dry land and in the sea, under the ground
and in the sky.

/73/ Some of them constitute special clans of insidious
creatures, destroyers by their very nature. Others are in-
dividual degenerates, "the prodigal sons" of the clans of
beneficient beings, who only in exceptional cases become
enemies of man. The first, of course, offer the most danger.

G Some devote themselves exclusively to robbing the
776 Gilyak on the road (the spirits of loss -- ger-nivukh'i); others
761 ravage storehouses, snares, and traps and harm him in all
753 sorts of ways, while still others make attempts on his very

/73 cont./

• 776 life, causing sickness and death. But for them, people would
761 not die. Natural death is impossible. Death is the result of
753 the scheming of these insidious creatures. Therefore the Gilyak
will never touch a sable that died in the taiga, even though his
skin is very valuable and very well preserved, for a devil as-
suredly rests in a sable that has died. Just as he, the Gilyak,
lies in wait for a beast and tries in every way to kill him, so
an evil spirit lies in wait for the Gilyak himself at every step,
753 in order to devour him. Sickness is no more than an evil being
776 who made his way into the body of a Gilyak and is slowly
eating him. Nightmares and dreams in which the sick man
dreams that somebody is strangling him, pressing from within,
easily provide grounds for such a notion. If some organ is not
functioning in the proper way, as, for example, in shortness of
breath, it is easy to imagine that some kind of being has got
inside and is interfering with breathing, and so forth. It is
imperative to expel such a creature. This expulsion is effected
in various ways, beginning with the simplest and ending with
the most complex.

755 Here is an example which quite graphically illustrates
the "psychology" of the expulsion of devils. One woman, who
was subject to attacks of sudden hysterical psychosis, was placed
in my presence on a high platform, generally used to clean
fish, and a fire was ignited under it with all kinds of rags,
canine feces, and stinking garbage. The devil inside the
woman could not, of course, bear the horrible smell and
prudently left the heart of the woman, who was thus saved.
But not all devils are so sensitive to a bad smell; others re-
quire stronger methods. Such devils must be frightened by
extraordinary noise, by frenzied shrieks, by the frightening
appearance of the expeller, and by other such terrorizing
methods, hence the necessity for the devil-expeller to beat
his tambourine, make noise with rattles, shriek in an unnatural
voice, and put himself in a state of frenzy, to which end /74/
he swallows smoke, drinks sea water, puts himself in a state
of stupor with the smoke of bagul'nik (Ledum palustre), chews

/74 cont./

755 the disgusting bitter root of that plant, eats hot coal, etc.
Even such strong measures, however, do not always prove ef-
fective. Sometimes the evil spirit does not give in to any
human terrorizing, and not only that, but sometimes he even
carries off the soul of the sick man into the kingdom of the
shades. Then the aid of the higher beings is indispensable.

[756] Such aid can be proffered only by specially chosen
men, by specialists-expellers, i.e., shamans.

756 Among the Gilyak, shamans do not constitute a class,
• 776 as among more cultured barbarians. Among the Gilyak, the
shamans are chosen ones, who in night visions or in a trance
receive a revelation from the god-protector about their high
calling. From that moment the shaman has gods-assistants,
executors of his commands. These gods-assistants are of two
kinds: the kekhn and the kenichkh. The first perform his most
important tasks. By force or trick it is they who pull the devil
out of the organism of a sick man. They also carry the
[774] shaman's soul in search of the stolen soul of a sick man, making
their way with it even into the kingdom of the shades. As for
the assistants, they are happy spirits who play with the shaman
and help him only in tricks. The kekhn are creatures of the
most varied breeds: there are kekhn-wolves, eared seals, eagle
owls, reindeer, hares, celestial creatures, etc. Each kekhn
has his master, who himself personally, very rarely comes to
assist, sending his subordinates. The kekhn are capable of
assuming any form and consequently can go anywhere neces-
sary to save the sick man.

755 The shamans have three main methods of curing. One
consists of hearing the patient out, falling asleep, and then,
combining the dreams he has had, giving this or that advice.
Having, for instance, seen a skewbald dog in his dream, he de-
cides that for a cure it is necessary to sacrifice a dog, etc.
Another method is the ordinary method of kamlaniye normally
described by ethnographers, namely, expelling the devil by
means of frenzied shrieks, beating the tambourine, in a word --
[776] terror. Since, however, you frequently can do nothing with

/74 cont./

755 only noisy terror, during kamlaniye the above-mentioned
● 776 nikhti kekhn are called on to help. In point of fact, calling
on the spirits is at the present time the essential part of
kamlaniye. The entire power of the autohypnosis which the
755 shaman creates in himself with frenzied shouts, narcotics, the
776 deafening sounds /75/ of the tambourine, wild dancing is used
787 to evoke in himself that high degree of sensitivity due to which
he sees and hears his spirits-protectors. We can fully believe
that he actually hears and sees them. And with his faith he
hypnotizes those around him. I hope that no one will suspect
me of a partiality for the shamans, but I can calmly testify
that in my presence the ecstacy of the shaman and the mysteri-
ous condition in which the frenzied chosen one thrashed and
shrieked brought the Gilyak to such a state that they had
hallucinations and saw everything that the shaman himself
755 saw in his trance. The shaman skillfully has recourse to first
776 one, then another of his kekhn, depending on the circum-
stances. Thus, if the devil has stubbornly settled inside the
organism and does not want to leave, the shaman calls on the
ar-rymnd-kekhn, which turns into a fiery ball and makes its
way into the belly of the shaman and from there to the most
distant parts of his body, so that during the seance the shaman
emits fire out of his mouth or nose or from any part of his body.
After being thus filled with fire, he touches the sore spot with
his lips and lets in fire, which conclusively drives out the
devil. The meaning of this device lies in the same primitive
principle of terror -- in this case, frightening with fire, which
I mentioned at the beginning. Generally the kekhn are quite
a shrewd people. Thus, when a kekhn makes his way to the
master of the sea for the small soul of a drowned man, which
lies on a bed in the yurt of the master himself, he takes along
a white reindeer. Of course, the sea people, who have never
seen such a strange beast, run out of the yurt in order to look
at it. This moment is utilized by the kekhn to steal the
little soul of the drowned man.

/75 cont./

755 It is evident from the following how realistic the
● 776 Gilyak's attitude toward the kekhn is. A large piece of new
calico (per) is spread out on the floor of the yurt, inside be-
fore the threshold, and the kekhn will rest on it during the
seance. A bowl with sarana, sugar, the prized dish "moo'."
potatoes, and other dainties to which the spirit-healer will
treated in the intermissions of the kamlaniye are placed in a
corner on a shelf. Over the bed of the sick man, a thong is
hung in a circle, and a sharp knife with a nail in it is placed near
the bed. The kekhn binds the sick man's soul which found
its way into the mlyvo (the settlement of the dead)and, clasping
it under its arm, brings it back into the yurt, then throws it
into the kettle, and fastens it with the nail. It must not be
placed on the floor or on a plank bed, because it can run
back through the floor.

/76/ The third method of curing is at a distance.
755 When a man suddenly falls sick at a place where there is no
shaman or on the road, he goes outside at night when the
shamans sleep, throws a sacrifice to the gods, and shouts
with all his might: "Chamnay, nikhovlatyngra n'onyuya,"
i.e., "Shaman! I am sick, help me!" The shaman is then
776 supposed to begin the kamlaniye quickly and sends his kekhn,
● 776 and the sick man not only hears the sounds of the tambourine,
but in the gloom of night even sees the form of the spirit which
[056] has been sent. Upon returning to his village, the cured man
will tell the shaman, with tender feelings and gratitude, the
details of the wonderful night.

756 Although the shamans do not play as big a role among
[191] the Gilyak as among the natives of the banks of the Amur
River, the faith in their supernatural powers is boundless even
here. I was often shown places from which shamans were
lifted into the air like birds by the power of a spirit and flew
up to attend to their affairs in the region of the sky dwellers.
I was no less frequently told of cases where a shaman resur-
rected the dead, killed at a distance, created trout, etc.
[070] Once I myself became the object of a legend about the

/78 cont./

756 island, his young son, Koynyt, had two souls already, even
774 though he was as poor as Job.

774 The difference in the number of souls according to
rank applies only to the so-called large souls, i.e., souls equal
to a man's body in size and during his life pervading the entire
organism. But, in addition to these large souls, each man also
has small souls located in the head of the large soul, after whose
death the small soul turns into a large one and becomes a dupli-
cate of the deceased one. It is of extreme interest that the
Gilyak visualizes the small souls in the shape of an egg, an
idea which is so characteristic of the psychology of primitive
man /79/ for whom the mysterious processes of embryology
lead to the idea of the immortality of the soul just as inevitably
as the speculation on the fact of the growth of a plant from a
seed thrown into the soil led the Christian thinker to it.

During the life of a man, this small egg-like soul
[087] plays an enormous role. It is this small soul that appears to
the Gilyak in his dreams, all that the Gilyak sees in the course
of his dreams and that is accepted by him as living reality,
all this is performed by this little soul.

But shamans, no matter how many souls they have,
776 are not omnipotent... There is a time when the mightiest
● 776 shamans together with all their kekhn are powerless to help
[056] man in his struggle against the evil spirits that reside in him.
This occurs most often when a man's tormentors are the evil
genii of the mountain or the sea. After destroying the body,
these lords frequently carry away even the soul of the dead man.
Freed of its corporal burden, however, the soul can take care
of itself; it learns to escape from its pursuer and hide nearby
among the friendly mountain or sea people. After some
time the soul-twin, having assumed human form, travels into
a new land, mysterious to us, but well-known to the Gilyak --
mlyvo (literally, "settlement of the dead"). Normally,
however, the evil spirits, having killed the body, leave the
soul in peace, and it may set out for the new world unhin-
774 dered. It is very easy to get to the mlyvo. Somewhere on
774 the surface of the earth there is an opening (mortal men do

/86 cont./

*614 with full right call the Ainu their founders. And so it is
397 everywhere.
193

Ordinarily, however, the composition of the clan is
homogeneous, cases of /87/ adoption are quite rare, and
the earlier phenomena of endosmosis and exosmosis have
long effaced themselves behind the mists of legend, and
they show no influence on the integrity of the conscious kin-
ship within the clan.

2. One fire. The common clan fire is the symbol of
*614 clan unity. As among all primitive peoples, fire is a clan
397 deity to the Gilyak. It is worth there also according to
● 796 one conception, the old woman of the fire, the ancestress of
the given clan; according to others, an old man and woman
with their descendants. The role of these "masters of the
fire" is not only in the beneficial activity of the benevolent
burning element. As the divine ancestors of the clan, they
are held in respect not only by their living clansmen, but
also by those who, having gone to the other world, have be-
come the clan gods of other elements, the forest, the sea,
etc., and through these they can exert a mighty influence
in all spheres of human existence.

Thus, the master or mistress of the fire is not only a
deity that warms man and protects his domestic hearth from
any evil machinations of the spirits, but is also an inter-
mediary (1) between the clansmen and all the numerous deities

[191]

1. In the Vedas, fire (Agni) also
plays the role of intermediary be-
tween human beings and the gods;
he intercedes for human beings,
he is herald and priest.

who influence the fate of man.

/87 cont./

*614 On all the important occasions of life, in case of sick-
397 ness, on the hunt, before setting out on a dangerous journey,
● 796 etc. -- the clansman throws into the fire his modest sacri-
782 fices -- a leaf of tobacco, sweet root, a drop of arrack --
and asks the old woman of the fire to fulfill his request.
And she knows all the means necessary to insure that a petit-
ion to one or another clan deity -- if they are outside the
sphere of her immediate influence -- reaches its destination.

In order to understand the real basis of the "clan"
*614 attitude toward the master of the fire and his functions, it
397 is necessary to keep in mind the following: 1) the deceased
796 are given to burning, i.e., to the common master of the
795 fire, who can receive his favorites into paradise, so that
these latter in turn become "masters" of the clan fire: 2)
in particular all those who perish by fire and lightning (2)

[191]

2. It is curious that a similar view
exists among the Buryat: a man
who perishes from lightning becomes
a powerful and beneficent spirit to
whom sacrifices are made and prayers
are raised.

become such masters; 3) the concept of /88/ an "old woman"
(mistress) of the clan fire, instead of a "master," is a faint
echo of the maternal clan; 4) the "universality" of fire,
its ability to spread quickly, in many tongues (tongues of
flame), which all primitive people (compare the Rig-Veda)
understand in the most realistic sense -- give the "fire" spe-
cial advantages over the other "masters" -- namely, the
rapid and eloquent transmission of messages and petitions;
finally, 5) the fire is a warming and purifying substance,
i.e., a substance that drives away evil spirits.

/184 cont./

*835 levirate. Then, in order that the
woman remain in the clan of her
deceased husband, she is given, ac-
cording to the decision of the clan
council, to any clansman of an
ascending or descending degree of
kinship with her late husband.

634 Ordinarily the very idea of sexual connection with persons
*835 of the forbidden categories evokes an instinctive disgust.
● 796 In the rare instances where feelings of love arise between such
persons, the Gilyak regard it as the inspiration of an evil
[825] spirit, as a phenomenon unnatural not only in men, but in
beasts. We have seen that in such instances they even slay a
[827] fornicating dog. The attitude toward people is entirely the
same. Ordinarily lovers in the forbidden categories slay
[533] themselves by mutual agreement or under the direct urging
of their relatives. In one last song of such an unhappy pair,
the woman sings of how /185/ her elder sister called her a
"bitch" for her love for her uncle, and called the latter a
"devil," and how all -- her mother, father, and sisters --
urged upon her: "slay thyself, slay!" Incidentally, the ob-
ject of her criminal passion, her uncle, could be of her age,
could grow up far apart from her, and the love between the
criminal pair might seem perfectly natural in our eyes.

*835 The feeling of sexual repulsion toward persons of the for-
bidden categories has been transformed into an instinct, like
the very similar feeling toward one's mother or own sisters in
our society. The impression of an instinct is also produced
on us by that amazing ability of the Gilyak to suppress in
himself the feeling of jealousy, an ability which he manifests
when the question of the promiscuity of husbands of his individual
spouse arises. Without these instincts, or in any case the
noteworthy virtues of self-control and self-restraint, the
realization of the sexual norms would be impossible; un-
restrained jealousy would result in the destruction of group

/309 cont./

764 Two men, friends of the deceased, sit to watch, do not
764 move, do not speak, tie up all the dogs, and wait. In the yurt
774 a shaman shamanizes, calling on the sorcerer who drowned the
787 man to eat from the kinyn n'kch: "Go eat human meat!" He
rushes from beyond the mountains, from beyond the valleys.
Amid complete silence a wave splashes, a whirlwind rushes th
a bird swims up, a black dog runs up. Suddenly the wave has
approached the very cup; the deceased either moves, makes a
sound, or sits up. Now it is necessary to pierce the deceased o
(to hit?) the cup with a dolphin harpoon which has been in con-
stant use, or a spear, and it feels as if the spear has struck into
the man, and there are traces of blood on it. On the following
day the sorcerer has a wound or a sickness from which he dies.
Then the dead man is buried, while the cup is kept for two
summers and then thrown away. The cup may also be destroye
right away. They do not make it very pretty. Then they mak
764 real toinfir and sacrifice from them down to the third generatio
774 Shamanistic kamlanie. Shamans are 1) toldokh urly cham;
787 2) pa'tkokh urly cham; 3) kurdokh urly cham; 4) pang:ar
n'vyush -- fortuneteller. At home a shaman directs his questio
2) to which particular pal (i.e., pal of one's own or of a differen
[155] clan), and so forth. If cannot drive away the evil spirit, but
can find out what spirit is there and also give indications with
regard to stealing and fish. A man receives his pang also durin
sickness. He may even be a shaman, but frequently bad sham
steal (tempt away) their major kekhn from them. There are s
764 who have pang:kh, but not each one has them. There are
● 797 shamans who have kitus, something like an earthworm.

/49 cont./

771 For him, the prototype of everything that exists is, naturally, man, as the creature whom he knows and understands best. Everything reduces itself to man: everything visible in nature is a form in which is invested god-man. With such a world view, the religion of the Gilyak represents a combination of pantheism, the cult of animals, fetishism, demonism, polytheism, etc., all of them against the general background of anthropomorphism.

772 776 The Gilyak calls the universe "kurn," but with this same word he denotes the concept of a personal, man-like god. With the word "pal'" he denotes mountain and the god -- "master" of the mountain; with the word "tol'" -- the sea and the god of the sea. The universe is only the form which has been assumed by great image of the personal god, "kurn."

823 The Gilyak calls his native island "mif" (the earth). It is a living, divine creature, whose "head" (Cape Marii) and "chin," "Pytykry," lie in the Sea of Okhotsk, while its "legs" are two peninsulas in the Korsakov okrug which lie in La Pérouse Strait.

[782] I myself have made some trips across the "Chin," have seen how respectfully sacrifices were made by my companions and prayers were delivered to the earth concerning our successful journey. I made my way up to the top of the very "Head" [778] of the earth, which, according to the beliefs of the Gilyak, does not leave unpunished a sacriligeous offense against it by the feet of mortals, and saw the majestic bald spot of this divine Head, covered with sharp stone teeth instead of hair /50/ (the result of weathering), which bring superstitious terror on the Gilyak... The majestic crest of the top of the high cape looking out on the boundless sea is indeed very imposing!

Moreover, the parts, even the smallest ones, of this grandiose being -- the "mif" -- are the same kind of living independent creatures as the divine whole. Here is the majestic mountain Engel'spal', which rises alone over the northern dunes; it is the living reindeer of the god of the universe, "kurn," on which he traveled over the island, putting it into its present state, habitable for man. The valleys were

/50 cont./

823 formed where his sacred feet stepped; from the lashes of his whip appeared the rivers... Here is Kryuspal', a marvelous cone, one of the highest peaks of Sakhalin, which impresses everyone approaching the island from the sea with its grandeur, a lonely, stern demon of the sea, who, in a fit of anger, killed his children and compelled his wife to run hundreds of versts away from him and form another cape in a new place. And even the lonely cliffs sticking out of the water all along the shore of the island -- all of this is alive, gods who ran away from their clans under the influence of internecine wars.

82 774 776 All the rest of nature is equally alive: the menacing "tol'" (the sea), the somber forests of the mountainous island, the fast mountain rivers, etc. When cutting down a tree, the Gilyak is afraid to destroy its soul and places upon its stump a special being, the "inau" (chekhn-kun-inau), soul-creating "inau" (1), which returns soul and life to it. The mountains,

[777] [778]

1. A sharpened stick. The cult of "inau" has been borrowed from the Ainu, and I shall discuss it separately /in an untranslated section/.

the ocean, cliffs, trees, animals -- this is only a mask under which the gods conceal themselves from the curiosity of man. The peculiar profundity of this sort of metaphysical analysis by 825 the Gilyak is striking. Once when a Gilyak began to explain to me that the small kosatka (Orca gladiator) accompanying a large one in the sea constitutes in fact only the sword of the big kosatka, and I expressed my bewilderment at this, he began to prove that it only seemed to me that that is a kosatka, but in fact it is the sword of the large kosatka-"master," just as that the latter in reality has the form of a real Gilyak, and that which seems to us to be a sea animal is only the boat of this Gilyak-kosatka (2).

2. Kosatki travel in the sea in packs, within which are distinguished the older -- leaders, and the younger -- soldiers. In an attack,

/54 cont./

825 [766] The Gilyak never directs his harpoon at a kosatka, and when its dead body is thrown up on the shore, they solemnly bury it in a balagan especially built for this and decorate it with "inau." It is not only these large beasts (the bear and the kosatka) that the Gilyak regards with a feeling of religion, however. Signs of the deepest respect are shown toward any animal that falls prey to the Gilyak. The heads of captured seals are decorated with "inau" and solemnly lowered into the sea. The heads of belugas are put out on poles on the seashore, and likewise the heads of other animals.

825 776 The animals whom the Gilyak worship, however, are not independent gods and not even deities in general; they are merely the subordinates of the real deities, the "masters" of this or that element, this or that animal. These "masters" in their form and likeness are those same Gilyak who, according to need, assume the form of this or that animal. These gods live in the forests, the mountains, and on the bottom of the seas and lead the same kind of life as the Gilyak themselves, have wives children, and clansmen. Like the Gilyak, they are mortal. For each of the elements one of these gods, "yz'" -- master, is in command. It is these masters who send the Gilyak all that he needs each season: sables, bears, salmon, seals. The notions about these "masters" of each element, however, should not be understood in a strictly monistic sense. It is just the same among the Gilyak: in each locality there are simply rich people and among them one kind that is richest, just as, in addition to the great gods-masters, every territory, every stream, each has its own "master" who takes care of those Gilyak closest to him (see below on the clan gods). [614] The term "master" is strictly an everyday term. /55/ In each clan every man who is outstanding for his intelligence, courage, and cunning, and consequently richest, is called "yz'" (master), and the most outstanding of them is the leader of the clan.

825 776 554

/55 cont./

776 825 For the Gilyak, the most important gods-"masters" are Pal'-yz' -- the master of the mountains and of the taiga, and Tayrnadz, the same as Tol'-yz' -- master of the sea. The first lives on the highest mountain, and with him, whole settlements of his clansmen. Bears serve him as dogs. All the beasts of the taiga are subordinate to him, and, at his discretion, he distributes them to the Gilyak. It is he who orders the sable to dress himself in a new skin and hurry into the noose of the Gilyak; he, again, orders the bear to offer a good spot for a true blow. The god of the sea, Tayrnadz, lives on the bottom of the Sea of Okhotsk. He is a very old man with a white beard, who lives with his old wife in an underwater yurt. In the yurt there is a huge number of boxes with all kinds of spawn, which he throws by the handful into the sea from time to time. It is he who, at the appointed time, sends the countless detachments of salmon, without which the life of the Gilyak would be impossible; it is he who sends out the kosatki to establish order in the sea and drive all kinds of sea animals toward the Gilyak.

776 Besides these most important gods, there is a great number of less important ones who watch over the Gilyak. In the house of the Gilyak the master of the fire and the mistress of the threshold, keep vigil over him. Some kind of "master" watches at every stream, looking after the well-being of the Gilyak...

Not all the gods, however, are on such close terms with man. The sky is inhabited by whole tribes of tly-nivukh'i, heavenly people, who only rarely interfere in the affairs of the Gilyak, and then to no purpose, for a joke; for example, out of mischievousness a heavenly man will lower a fishing rod with hooks to the earth in order to catch some Gilyak. This does not always work, however. For example, the young [538] Gilyak, Il'k, from the village of Arkovo told me that tly-nivukh once caught his father with a golden hook, and he just saved himself by grabbing a tree, thus getting away with only a scare and a torn coat.

/315 cont./

42 Sacrifices (sacrificed dishes -- chmáus) are placed on the
82 appropriate half; if there is not enough space, then on the appropriate nau (tol or pal'). /316/ /Sketch of the house-plan appears here./

42 /317/ Tyvyz -- "master" of the house; he lives either under
176 the post (10) or under a stone (19). Sometimes he is an old man, sometimes an old woman or a young woman.

The master of the house and his family occupy the tol' erkh pusk; if the family is large then also the kemfakh (3) and ponakhfakh (4). The bear's head is placed in the middle (25).

356 In autumn, during cleaning, everything is abundantly fed:
382 the walls, the floor, the supports under the plank beds, the edges of the plank beds, and so forth.

Rites upon the completion of a house. When a new house is completed, they place two sticks, one in the front and the other in the back (of the house), and on a thread stretched between them are hung images of the sun (keng) and the moon (long chakh). They are not renewed later.

42 When the house is completed, sacrifices are made: They
82 prepare mos' 1) alys -- berries, 2) rak: -- a porridge of rice or wheat, and feed the four corners (chonkh), four posts (mon'-nakh), and the two posts in the middle -- the front one, amkhas', and the rear one, kemkhas', in which the master lives; they also feed the crossbeam -- tyjf (edz:). Here the old man says: "Urla dyf muja' nolagu kýnynguch: humguja', ta sikhydz kh:olaf ta humguja'" -- be a good house (sit firmly). Make it felicitous for my
56) children, and so that there be no kind of sickness." In autumn the house is cleaned, plastered with clay, and they sacrifice -- tyv arnydz:.

42 Tyv yz' bakh -- a stone before the threshold or beyond the
78 threshold, or a piece of pig iron; under it sits the "master," who
76 guards against the entry of the milk'.

Lym yz' -- threshold. Beyond the threshold, under the
42 ground, they place different foods (chyudz:) -- for the earth --
82 the master and the tol fynydz:.

The shaman calls up his kekhn and treats them to fat, sugar, d vodka. "Children, leave from the window!" shouts the aman. After /310/ a while the window crackles, and the kitus' ters. The kitus' lives, not with the shaman, but beyond the nges, beyond nine ranges, beyond nine streams; there are ol'tsy (pákhtigraf) there. The master there is an old man. he house is of iron and stone and has gates: the first gates are arded by a boa; the second by crocodiles (there are small zards-crocodiles -- mèng:aj here); the third and last gates e guarded by a tiger. Pal'-g:an=haluvidz:(?), i.e., a small ger, sits in front of the threshold and guards. With this old an lives the chief old man pila k:ak hejmar (pal yz', pallung vukh -- the mountain master-man). Near the pila-khas' (a post hich supports the matká) in each yurt there must be a stone for e kettle (nichvakh) and another stone at the threshold. This orm is kept under the first stone. In this house there are vari- s animals: simple frogs -- rall, and the frogs of this particular use, mifpidz:. This little worm was given by the shaman his own little worm for safekeeping. The shaman: "Massi legible), go there, request it of the boa and tiger, the ardians of the gates." Sometimes the boa will continue to be bborn for days on end; they promise it a black dog, dog ood, a double portion of potatoes, a beautiful inau, etc. The l-yz' is promised a spear and so forth. "I shall give thee mor, I shall give thee a spear, a large kettle with four handles, piece of Chinese silk cloth, a furry black dog, and yet another g with spots and speckles I shall sacrifice." "Pet'gir: chkhuz' khtá k:akh chkhuznykhta' pilavyn' noz' nykrvyn' tata arbgir, k:angir ygrluk an'chi kurgur g:angir ch'khyz' nykhta." then agrees and begins to ask the kitus' to come out. The tus' slowly crawls out, the massi wraps it up in white silk d brings it to the shaman. The shaman then says: "Having oved away from the window, sit, the worm is coming, having oved away from such and such a window, sit. "Pakh jenverkhnga e, kitus' pryjvura! Kembakh pakh jenverkhnga fivé." And ere the worm, like an arrow, pierced the window and straight the shaman. The shaman took it.

/311 cont./

756 Before becoming a shaman -- pokhtyrdz:-cham -- a shaman who can lead a soul into the next world (from pokhtyrdz: -- to lead a soul into the next world), he is ill and tormented until out of his mouth come pulk (Goldi tulin) -- a shaman's copper mirror, tovz (Goldi pún'chu) -- a piece of copper for a shaman's fumigating smoke, then horns -- murki', and, finally, a lakhch -- a knife of palm /pal'my/. The lakhch of the Gilyak shaman is his own work, but he does not have horn, and he buys [776] pulk. Uz'mu kekhn -- the spirit protector of the shaman, ajami [774] among the Goldi, lives in the uz' of the shaman. Uz' -- one of the three souls of the shaman, literally, the pith of a tree.

VIII.

778 824 Beliefs and Rites Connected with Hunting and Fishing

[782] Chédzigr-turi, toigo. Chédzigr -- tree (a larch) which is placed in the taiga beside the hunters' balagan and before which they sacrifice to the master of the sky. Every year they place a new chédzigr, but the old one cannot be touched, not even touched with one's hands. /312/ If it falls down by itself, it will be carried to a storage place -- chédzigr nan'gof (1). In the

[184] 1. In another place it is said that the chédzigr is not repaired until it falls down.

settlement of Kal'vo on the chédzigr, on its crossbar -- two figures, yzikh -- peasant man and woman. A chédzigr is fed on the first 778 day of the month anlong (December) and a second time in July. 782 Everyone sits in a circle, and an old man takes a small amount 824 of food from each, makes chukh-chugind -- a sacrifice -- and places inau. The inau are made out of mountain ash.

/312 cont./

Only representatives of the clan, k:khal n'akhr:, gather at the place where the chédzigr stands. They bring rice, buda, a pig, and vodka. Before the tree there is a bench /labaz/ for dishes. The pig is slaughtered, and its blood is sprinkled around with the comment: "Kur, indyjá -- god, look!" No images of any sort are made on the tree.

The tree is also a road. Everybody gives to the tly-n'ivukh; the sacrifice goes along the tree, then along the thread which goes from the tree and serves as a trail. They start a fire in order to tar the pig. They do not feed the fire, but they do protect it, do not stamp it out. It is absolutely necessary that the sun shine during a sacrifice, and therefore it is occasionally necessary to wait. When a balagan is placed in a new place, they make a new chédzigr.

Tlyrokh -- Sacrifice to the sky. Everyone assembles in one yurt. Early in the morning they set out in search of a larch (for the chédzigr), while the women prepare various dishes; then the tree which has been brought in is made fast, and all the dishes are carried in Chinese or Japanese dishes. There are villages where the tlyrokh is never made; in Tevkh only a red dog pag:r kh:an:, is slaughtered instead of a pig and a cock. They tie it up to the chédzigr, strangle it, cut out the heart and throw it upward, treat one another with vodka, and rub the chédzigr with vodka. They celebrate once a year in January -- chamlong. The "word" during tlyrokh: "n'jongarja kinynguch: humguja', kholafti lygyguja'," i.e., "please, that I live well, that there be no sickness."

Then they make a new birch bowl (han'gar:), place it on the ground, and put the sacrifice in it. Ski, a stick, and a crossbow (narródz:) are placed there; the "word" (prayer) is not said, and they quietly leave. At home they "make" a fire, and when everything is cooked, all the sacrifices are placed between coniferous branches and then placed between two forked pieces of wood (tuurg'a'vk); the fork is thrown into the fire and taken back. This fork is placed under the head at the end of a hunt to protect against the milk'a (the evil spirit). In /313/ the

/313 cont./

morning it is necessary to take back the ski and stealthily. These things are placed so descend the tree, and by these objects they of the Tly-n'ivukh and "if he has a good hea "risk" /fart/ or not. "After all, five of us g thing while another goes on and on pursuing What is the reason for this?"

During a takh -- smallpox epidemic Gilyak assemble, make a sacrifice -- bow, and berries. First the 120-year-old man Zy lage of Dyl'myu sacrifices. They pray befo This old man remembers four big takh.

Pal likes a tree with different peculia occasions such objects are selected. A sacr to one's clan Pal-yz' (the master of the mou not made to Pila-yz' (the great master). H seen on a knoll. The Building of a House, Its Plan, and Rites Connected with the House

342 [087] Before laying down the first row of logs, they try sprinkling flour: if in the morning there is an imprint of a human foot, this is good; if of a human hand or of a beast, this is bad, and then they change the place. If there are no imprints of any kind, this is also good.

342 354 Explanation of the plan of a house (see drawing). 1. Shy -- door. 2. Tol-erkh pusk fakh -- window facing the hearth of the "master" of the sea. 3. Kem-fakh -- second window to the left of the door. 4. Ponakh-fakh -- window over the middle plank-bed. 5. Pal-erkh ponakh-fakh -- window facing the master of the mountain. 6. Kyly nakh fakh (mat'k:as' n'ekh fakh) -- window alongside the long plank-bed. 7. Mat' k:as' akhr fakh -- window near a small post. 8. Pal-erkh pusk fakh -- window on the side 342 of the mountain. 9. Kangyl -- the place for tying dogs. 10. Tly k:as' -- large post. 11. Kil erkh mat' k:as' -- small post. 12. Tol erkh mat' k:as' -- post on the side of the sea. 13. Mat k:as' -- small post. 14. Hytyfi mat k:as' -- middle small post. 15. Pi'la digr-irku k:as' -- large elongated post under the matka. 16. Pal erkh' mat k:as' -- small post on the side of the mountain. 17. Kylyná mat' k:as' -- long and slender little post. 18. Shyvos n'ich fakh -- small stone near the threshold. 19. Pi'la k:as' nir fakh -- small stone at the threshold on the level of the floor. [354] 20. Pi'la digr -- elongated matka. 21. Pal erkh tuur -- hearth of the master of the mountain. 22. Tol erkh tuur -- hearth of the [335] master of the sea. 23. Tyjf -- cross log, foundation of the house. 24. Kylzhutá -- the middle of the plank bed where they put a person who has been wounded by a bear. 25. Uig dz:onkh -- tabooed [078] corner for the bear's head and so forth. 26. Ke dz:onkh -- upper corner. 27. A dz:onkh -- lower corner. 28. Pal erkh pusk dz:onkh -- corner on the side of the mountain for tabooed things. [076] 29. The floor is divided into two halves: a) pal erkh kyl, and b) tol erkh kyl. On each half is placed only that which has to do with the appropriate spirit, with tol or pal'.

/318 cont./

"Make a battue, drive him toward this grass figure. Ah! He has turned into a mouse." The chorus: "He is going there. He turned into a human form... he turned into a bird. He got into the post!"

Finally, there is no other place, and he has to get into the chkhnaj -- the grass figure, whether he wants to or not. When he has entered it, the hand of the person holding the thread appears to shake. The shaman shouts: "Hit him!" And that one hits. They light a candle, throw light on it, and inspect the grass figure: it again does not have its head toward the threshold. The shaman searches for him again. He finds him. Again the same thing. Finally, the chkhnaj has its head toward the threshold, which means that the evil spirit has gone out. The shaman leaves his massi to keep watch overnight. In the evening of the following day the shaman calls the real "master," but that one answers that he was late. The real "master" is generally hidden under the earth; the shaman looks for him and addresses to him the request: "Here they have built an isba, be the master, they will feed you, watch over it, protect it!" Finally the master has appeared in the middle of the floor and stuck out his head. "Come out," says the shaman, "do not be shy, say what you want, we will prepare everything!" The master answers: "Kill the dog, rub the corner with its blood, boil its meat so that the dog steam fills the house. Boil kosterka. Boil mlyk marcho (a fish with two fins at the tail), boil the white lin'ka, the puchka, the head of the Siberian salmon, treat each post to the steam, do thus, make a fumigating smoke with marsh tea, drive in a piece of pig iron several pieces by the threshold and in other places of the floor, then the floor will be iron. Strengthen it thus."

Miscellanea

823 The cliff Uj-parne, in the form of an isolated stone pillar, is between Khez' and Chil'mi. Formerly one could hear how the
[782] master of the cliff beat on a tambourine. Three times (a year)
776 they made sacrifices to him and addressed to him the request:
"Pkhys'kyr ururngjd! -- do good for us with your risk!"

731 During a pila-dakh (smallpox epidemic) they bring fire-
958 wood and water to the sick, but do not themselves enter the house.

When they learn that it is all over in all the settlements
731 (i.e., the epidemic is over), then the dead are taken out of their
753 graves and burned; they are afraid of burning them earlier for
766 they believe that smoke spreads infection. The only thing that is allowed is the smoking with marsh tea in the yurt.

538 The Female Character. Proverbs. 1) The female character is
562 like a whirlwind, similar to the wind. 2) With just a tug you will change the female character. 3) A woman is like a fire started in a clear field; the wind blows and it is out.

158 Meryachen'e. In Charbakh two people suffer from the disease
[143] meryachen'e -- two women; this sickness is inherited in the female line. Those who suffer from meryachen'e repeat literally everything, even in a foreign language; they repeat even actions. The attacks come during a fright. The sick woman is then unconscious, but later she comes to. If attempts are made to compel her to repeat something many times, she is ready to attack with a knife. In their youth they did not suffer from meryachen'e.

There are other such sick people in Tymvo and Pronga.

Separate Materials on the Ethnography of the Sakhalin Gilyak

I.

Religion

773 Cosmogony and the spirits-masters. Kurn, the master of the uni-
776 verse, created everything; in the past everything was water; he "made the earth, the stream, and the tree." "Working" the earth, Kurn lost his reindeer, which turned into Lavro-pal. The large rivers are the tracks of his reindeer, while the small streams (were formed) as he waved his lash at the reindeer -- tlangi-z'ach:.

821 The sky -- tly -- is like our earth, but it moves, turns first
[822] with one end, then with the other. When the sky moves away from us with its sunny end, night falls.

The stars: the largest are as large as a yurt. They are white, and therefore they cannot be seen during the daytime; in the light of the sun they become pale.

The sun: shines at night in Mlyvo (the world beyond the grave).

793 People descended from a tree: the Orok from a birch, the
824 Gilyak from a larch, the Ainu from a fir.

The master of the mountains and of the taiga, Pal'-n'igyvyn,
776 looks like an Ainu. Each clan has its own Pal n'igyvyn.
614

821 Thunder lives in the water in winter, and Pal'-nivukh pierces him in the eye through the water; in summer thunder attempts to avenge this. Since Pal'-nivukh has the ability to turn himself into the most minuscule creatures and to get under the skin (?) (1)

1. Illegible. S. Sh.

of a person, a Gilyak, when his finger itches during a thunder-storm, immediately lets some blood; otherwise thunder will kill the man in order to kill Pal'-n'ivukh who has gotten into the finger (a story by Gibel'ka, heard by him in Nyyde).

/320 cont./

821 The god of the wind -- Layzn (the evil wind -- Lamangnd);
[782] no chukh-chugnd (sacrifices) are made to him. He is shot at with bows; he is not shot at with rifles for fear of evoking thunder and a storm. The wind comes about thus: "Layzn, just like man, blows from his mouth."

773 The bear, the sable, the fox, the otter, and the squirrel
825 were created by Pal yz'n (the master of the mountains).

Tuurmam -- the god of the hearth, the mistress of fire,
776 the old woman -- is one among all the clansmen. The head of Tuurmam is curly, the snout red, /321/ the hair short (there is no braid), the height that of a man, the clothing -- fish skin, lives in the fire.

Tajrnandz: the only one who sends fish; he is a large and robust man. All his dogs are white. He rides through the air,
[821] along the Milky Way (Tairnandz: -- tif); he lives there. He also makes thunder. Each kikhal has its own Pal-n'ivukh, its own Tol-n'ivukh, even its own milk'i, but there is one Tairnandz:. They set up three trees for Tol-n'ivukh: a fir, an asbberry, and a rose willow. Strips of bark are cut out of these trees and their branches are bound with sedge. One chikhnaj has saranka attached to it.

Oskyz'n master of the hare, big like a cow, long nose. They throw the head of a hare, with puchka tied to it. Tlangi-yz'n -- master of the reindeer, looks like a reindeer. Mekvon'-gi -- master of the kabarga.

Evil spirit -- Ge-n'ivukh. His yurt is an earthen mound near Tekhrvo. He comes to the Gilyak, opens a window (kugutf), extends two fingers, and asks for something. If something is given to him he leaves. If one gives him a hot coal, he does not understand what is happening, throws the coal back and forth from one hand to the other, and says: "as' kavkhaj, khavrkhaj, avguja" -- "it is hot, if you do not have (anything), do not give!" Ge-n'ivukh likes to kidnap people, especially children. The only way -- is to inflict a wound upon oneself, for Ge-n'ivukh is afraid of blood. Pumkin's brother sat in his balagan guarding reindeer and suddenly saw two ge-n'ivukh. He began to shout and inflicted a wound

/321 cont./

776 upon himself. Ge-n'ivukh beats the seals. He is seen from a distance, but up close he disappears. He does not drive away sickness. In appearance he is "just like a Gilyak."

777 Talismans. Gibel'ka became rich in the following way:
His eldest brother, Amgunka, found a piece of red material under a log in the taiga; from that time on he began to get rich. Gibel'ka stole this talisman from him, and then a chikhnaj fell from the sky, and he began to get even richer.

Taru -- talisman -- is an object which falls to a lucky person (kyz narla n'ivukh) and which increases the number of things in his possession (for instance, two fur coats instead of one), such as: a May beetle, a piece of gold, a larch with fir cones, a climbing lizard, a worm.

Aleksey caught a goya with three worms adhering to it by suction, and after this there was a lucky catch of fish.

755 Father Konki is very old and by now remembers nothing.
But on the basis of dreams he advises the sick -- to make chikhnaj, feed them, and carry them into the taiga.

In recent times he has not had visions and therefore thinks that he will soon die.

/322/

756 Shamanism. A kekhn answers the shaman's questions about sick-
776 ness and medication, but nobody hears his answers. The mighiest master is T'lykekhn (the spirit of the sky). He travels on foot through the sky and with a rope leads the shaman through the air wherever he wishes. The shaman does not take his kekhn along to Mlyvo (the world beyond the grave). The kekhn of Koynyt (1)

[115] 1. The author's storyteller -- a youth who subsequently became a shaman. S. Sh.

comes to him only in a dream or during a seance. He sends him to various gods with tasks, for example, to learn what sacrifices to make. So far he has only pal-n'igyvyn (kekhn). His kekhn is small, with a human face and a body covered with hair.

/322 cont./

756 Chamkh, the father of Koynyt, my storyteller, was a
776 shaman in Ady-Tymi. He had four souls: one from Pal, another from Tol, a third from Tly, and a fourth from Mly-yz'n.

Shamans make chikhnaj (a wooden image of pal-n'igyvyn),
776 inspired during a seance, and feed them. The feeding consists
782 of giving sugar, saranka, and so forth, but they are eaten by the shaman; it only appears to those around as if he eats it, however, while it is eaten by the kekhn himself. The chikhnaj must be fed or else it will gnaw a person.

755 When one is dangerously ill, then the yurt begins to shake
776 and becomes full of openings and through the openings, like mosquitoes, many kekhn fly and shout: "Believe me, me!" And then the shaman falls down as if he were drunk. Then he eats marsh tea and drinks sea water -- he gives this to his kekhn. He swallows fire. Kekhn love songs.

755 If a person is near death and a milk has carried his soul to
756 Mlyvo, a kekhn kills him, and the shaman sets out for there for the
776 soul, and, if he succeeds in getting the soul, the sick man will
774 live. The kekhn shows the shaman the road (to Mlyvo). The shaman gets to Mlyvo directly through an apperture; the same earth as here, the same sky, and many villages are there. If the soul is outside, it can still be obtained; if it is in the yurt, all is lost. If the shaman himself enters the yurt, he will die. In Mlyvo the soul of the shaman is like a bird and flies around the subterranean world.

Parnkhasind (an Orok word) is done only by the Omyr, i.e.,
755 by the Orok. They ask the chikhnaj whether the sick man will recuperate or not. If the chikhnaj rocks from side to side, he will recuperate; if not -- he will die. All this is done under the smoke of marsh tea. When the shaman beats his drum, the kekhn advises the making of chikhnaj, and if somebody's soul comes into it, then the sick man will live. If he will live, the chikhnaj is fed; then when in the shaman's opinion it is time /323/ to lose him, he comes and arranges for the milk to go from the sick man into the chikhnaj, and the sick man then recovers. (see "Fortunetelling with a Stone").

/323 cont./

756 When shamans fight, the one who has more souls wins. The
774 killing of one shaman by another is accompanied by the acquisition
776 of the kekhn of the opponent. During his supposed death, the soul
578 of the shaman travels over islands of the sea (tol). On these islands, which are of various colors, the houses are of stone tol-kekhn. Sometimes his soul goes into the mountains to the abode of pal-kekhn. The shaman kekhn fears only Pal milk and Tol milk, but not the milk of sables, foxes, otters, and rats (1).

1. Concerning the rat, see Chapter VII, "Miscellanea." S. Sh.

Among the kekhn there are variously colored eared seals, iron trout, and tigers.

756 How the shaman Chomkx resurrected a woman (the settlement of
539 Rykovskoye). A husband and a wife were fishing. The wife fell sick and died before morning. The husband said: "All you shamans are deceiving me. Now my wife is dead. Well, make her live!" The shaman became angry and said: "I shall shamanize all night; if before morning she moves her left little finger, she will live." That is what happened.

756 A shaman stabbed himself and shot himself in the mouth, and "nothing."

756 A female shaman has more spirits than a male shaman.
84 She kills her shaman competitor, sending her kekhn to rub her
762 competitor's eyes with the menstrual blood of shankh-cholch. A
578 feature of this blood is that a drop in food makes a person waste
833 away. Copulation during the menstrual flow also leads to local ataxia.

756 The kamlanie of a female shaman, who, according to her
796 own words, was milkternd (mad) after the birth of her first daughter.
558 She first made inau and then rubbed her face, breast, and so forth with marsh tea, lighted it on the hearth, and warmed her tambourine... Then she bound her legs and arms with shavings and girdled herself with shavings. She yawned. Moderate blows... The sounds grew stronger. She sighed loudly and whispered. She

/324 cont./

755 During the seance of the curing of a sick man, a looped thong -- tshyng -- is tied over his bed, and on the floor before him is placed a kettle (nich) with a nail (trofrvat). With this thong the kekhn catches and ties up the sick man's soul in Mlyvo, places it under his arm, brings it to the yurt, sticks it in the kettle -- otherwise it will depart through the floor into Mlyvo-khuty -- and pierces it with the nail. The nail and the thong are taken by the shaman.

756 The kenchkh and shaman conjuring. The kenchkh helps the
789 shaman only in conjuring -- lernd; the shaman pierces his breast
776 with a knife, but in reality he pierces the kenchkh (chekokhis' per'pind). They bind the shaman's hands behind him with a thong, and the kenchkh comes and unties it and throws the looped thong to its Gilyak owner. The shaman's robe, fully buttoned, slides off over his head and flies (sits on a plank bed).

The shaman puts a noose made out of a slender thong on his neck, and two men on each side pull the noose tight while he continues to sing songs. Finally the shaman's head falls to one side and his torso to the other. Then the Gilyak begin to tap, while one beats a tambourine. Finally, one hears stamping outside the door and in comes ken'chkh-yz'n in the shape of a large cow. He walks up to the big kettle, drinks up all the water, eats all the meat of the shaman, and new meat and a head grow. Then the soul of the shaman gets up on the crossbeam over the hearth and begins to sing Kyu-kyu songs. Then the head grows onto the body, and the shaman again comes back to life. In 1897 /325/
956 there were shamans in Pylvo--1, in Tekhrvo--1, in Tyrmych--2, in Chayvo--2, in Kekhrvo--2, in Ornyr--one female shaman, an old woman. The biggest shaman is the old man Kymysk in Tyrmych.

/325 cont./

755 Improvisation of a storyteller-shaman. To compose, tyl'gund, is
538 not allowed; it is a sin. This is a legend, truth.
538 N'as'tund may (be told) by a n'as'tun'-n'ivukh (storyteller)
776 or a shaman, who is helped by a special kind of kekhn (mif-n'ivukh-kekhn, who sits on the tongue of the speaker. When inquiring about the possibility of improvisation, Koynyt (a shaman) said, "I can," and began to improvise.

With my own eyes I saw that this was inspiration by the richness and elusive quickness of the flow of words and the force of the speech. Tyum listened with ecstasy and with interest asked for explanations.

756 Even before that he sang songs. The melody of the song
533 was far from that which accompanies n'as'-tund; there is a great
538 deal of grace and tenderness in it.

In places a quiet tenor vibrates beautifully with the sounds of a cello and in places flows into the thinnest pianisimo, while shrieks and artificial throat vibrations sound with tremendous dissonance. The entire song is sung without stopping for a breath, and at the end of a stanza the shaman comes to the end by abruptly cutting off with the words "hand furu" -- "thus it is said." Frequently, he finishes his song covered with perspiration.

Declamation and singing in narration. 1. In a nas'-tund: a) first humming, b) then -- monotonous, vibrating, doleful singing with all one's might, ending in c) fortissimo with exhaling.

2. In descriptions -- a single-tone recitative.

536 3. Dramatism: the artistic communication of conversations in a rhythmic recitative is especially good. If one becomes accustomed to it, it is very melodious.

4. Those present support him with yells: "Ola! epoj, epoj!" etc.

756 The kenchkh is a bird which comes on the wind. They pull
776 on a thong with the kenchkh during the song. Two men (one a shaman) cast a rope, and the kenchkh seizes it and pulls over the people.

/329 cont./

764 with embroidery, with otter fur, and so forth. A homkh --
349 muslin, mly (a small sack for flint), and a knife with a scabbard are tied to the belt of drel'. Vessels, food, and so forth are set in place. In the corner they place an image of the pyk (cuckoo) on a wooden support, and a wooden cup -- nirng, into which they put rice, is placed in front of it. During the building of a raf, all the belongings are broken, and everything that is broken is placed inside the raf, or, if it does not fit inside, next to it; all kinds of ornamented things may be put in the raf.

764 The raf, the sewing, and so forth are done on the spot.
765 They lay a fire, begin to prepare various dishes, and bring vodka.
First they themselves eat, and then they place the food in the
231 raf mu nig'yvyn arind. The pryski is untied in the morning, brought to the raf, and fed while they are eating. In addition to the boiled food, rice, buda, peas, and tobacco are sprinkled in the raf and around it. On the following day someone must come and eat up the remains of the boiled food.

/330/ After this, the mu n'igyvyn is fed no longer, though they come to look, smoke, and, frequently, to drink vodka. This continues for from two days to two or three months. The
231 pryski is then returned to its original place. It may not be sacrificed or eaten; one may not make a fur coat of its skin, either for kinsmen or for someone from the k:khal.

766 After death of a murderer, at his cremation, they set
764 up a takhch (see below, pp. 475-476), and then they make a raf anyway.

775 The soul and the world beyond the grave, Mlyvo. Every man is
761 killed by a milk (evil spirit), who carries away his soul. The soul
776 is afraid and hides with Pal-n'igyvyn or Tol-n'igyvyn, depending on which milk killed the person. The soul will return to Mlyvo in at most three years. If an old man died, he will arrive there old, if young, then young. After death in Mlyvo, the soul goes to another Mlyvo, and the soul of a woman to still a third Mlyvo, and then is born again. The soul of a man is completely similar to the man.

/335 cont./

392 of the fire, the tugurmam, lives there). Then they feed the four
782 inau. Furthermore, a hole is dug at the left front corner of the hearth, and they put sacrifices there, saying, "Ugur n'ri', nekhlang kun k:kholaf khavryr hunivaguja" -- "after eating well, make your children live without sickness," and after these words the hole is filled up. Finally, they feed the kel'laung ankh --" the birch looking into a behind." At night, when everybody has gone to bed, it is necessary to burn a fir and say a prayer.

When the hearth is renewed in the winter quarters, small inau are set with sacrifices. In the evening they place three firs, tie them up with saranka and puchka, and then, when everyone has gone to sleep, they throw sacrifices up through the pipe; one is thrown by the woman, another by the men. Before the beginning of the festival, the hearth is cleaned, covered with fresh earth, and lighted with the clan steel.

776 The spirits living in the house. Tav yzin -- the master of the house --
342 four chkhnaj, two male, two female, all pila hejmar -- old men. Tavyzing tugur yzing. This yzing was a tribesman in the past. His soul lives in the yurt in the tugur (flint box).

When the yurt breaks, the tugur must not be touched.
688 If one breaks the tugur (box), he pays a fine.

Lymyz'n-mam -- mistress of the threshold. She is in fish skin, hunchbacked, gray, lulls crying children. When the ceremony of stamping the threshold is held, when a woman leaves for another clan, she sits in the corner at the entrance, near the cups which are placed on both sides of the threshold.

IV.

Women, Childbirth, and Children

832 Means for love. There is medicine to make another person
825 fall in love with one. The brain of a cuckoo is mixed into tobacco (then a man soon dies), or a cuckoo feather is sewed in a dress. The girl then goes around like a mad person.

/336 cont./

854 A newborn baby is washed with his mother's milk for 15
347 and then with cold water from the mouth. For the first year th
whole body is washed twice a day, and then only the face.

854 Protecting the child. A stick on which the cradle is hung --

342 787 Sanctifying the house. On the eve of sanctification, on the day of the completion of the building, with the setting of the sun, a reliable man must make his way there and be attentive for a cracking sound or streaks of light.

342 787 789 [776] If a cracking sound is heard during the sunset, or purple streaks of light are noticed, this is a bad sign. If the cracking is at dawn or the streaks of light are bright light -- this is a good sign. The bad sign means that not a real "master," but a devil -- kins has settled in the house. Then the shaman must be called, and he makes a chkhnyr chkhnaj, a grass figure, and drives out the demon. A real "master" is fed two times -- in autumn (cleaning) (1) and another time when one wishes. They

342 776 782 [392]

1. Evidently speaking of the cleaning of the hearth by feeding the "master" of the fire.

feed all the posts, the door posts, the threshold, the matka, the stone under the threshold near the door, where the old man or the old woman lives, guarding the house against the entering of the evil spirit.

342 789 [534 756] /318/ Driving out the evil spirit takes place in the following fashion: a grass figure -- chkhnaj, on three legs, is placed in the middle of the yurt. A man holds it by a string tied to his hand; in his other hand he holds a club. A shaman shamanizes with a tambourine. The evil spirit must hide. The shaman enumerates the walls, boxes, and various things in the yurt from which his kekhn must drive out the evil spirit, and he does not mention only one corner -- it is there that the evil spirit is hiding.

342 756 789 [776] The shaman then says: "gy, gy (i.e., 'good'), in such and such a corner there is no evil spirit." And all answer: "Gy-gy, gy-gy, such and such a corner does not have evil spirits." Finally the shaman says: "The kings has hidden in such and such a corner. Massi (apparently the spirit -- assistant of the shaman), go and get him, and the rest make a battue!" "There, he went out, he went out as a dog..." (speaking to the kekhn, i.e., to the spirit).

/343 cont./

773 the women boiled the grandchildren, ate them, ran into the taiga, and disappeared.

778 Chnyr-chkhnaj. If a loss has occurred, they make chnyr-
776 chkhnaj, a figure of grass, and beat it (thresh it); if the chkhnaj
789 is good, the lost thing will be found on the following day. If it is not known what milk caused the harm, chnyr-chkhnaj is hung up over the plank bed and fed.

585 For stealing bear meat or a fishing rod, the face is maimed.

158 Kleptomania. There are thieves-kleptomaniacs, for example, Sentukh from Ady-Tymi. After his brothers threatened to kill him, he ran away to /344/ Lungvo. There he and his
(774) wife continued doing the same. He has one soul -- a rat sitting in his belly. The things that tempt him shine in the dark for him. The Gilyak confined themselves to depriving him of the things.

756 The shaman Koynyt's father, from Tro, once noticed that
774 his trousers had disappeared. He began to shamanize, found a rat in the belly of a woman, killed it, and on the following day the woman died.

583 Over an insult it is necessary to fight with sticks (chkharkirvand) or pay tkhusind, or take something by force. Frequently they kill over an insult.

787 Fortunetelling with a stone parnkhasind, with a kettle. The parnkhasind replies thanks to the chekhn. If the kettle swings straight, one has hit the mark; if to the side -- one has not hit it. If one has hit the mark, he must make a wooden chkhnaj, hang it around his neck, and feed it.

177 deception and exploitation everywhere, but by degrees they will end up by making use of the same weapon. The Sakhalin Gilyak have a good chance of maintaining themselves longest of all since they are farthest from the center of settlement. But Russian influence makes itself felt even on them. From all the settlements they go out to work for wages and go to make their purchases at Nikolayevsk, and every Gilyak who returns from work to his native settlement brings back the same atmosphere as the youth who returns to a Russian village from work in the big cities. Moreover, work in the towns, with its varying fortunes, ever more /364/ and more destroys that primitive equality which constitutes the dominant feature of the simple economic life of such peoples as the Gilyak. Together with the wealth that they have amassed in the new environment, people bring back the economic customs of that environment. But for the present, let us not look into the new phenomena in the life of the Gilyak; let us turn now to their still unshaken foundations.

III.

Religious Views

706
372
[771]

Though the dominant feature of the polytheism of the Gilyak is its anthropomorphism, the worship of the powers of nature lies at its foundation. Thus, among them, fire is a deity, "a small-small deity," it is true, but one nevertheless. To the question "why?" a Gilyak replies: "But without fire how can one live?" It is considered a sin to put out a fire in the hearth; even damaging the fence of a hearth is a sin. During the season of seal hunting, or when a newborn child is in the yurt, and in many other cases, it is considered a sin to carry the fire out of the yurt. It is to fire, as to a divine element, that the Gilyak entrusts the bodies of his dead. In the hierarchy of deities, however, fire is far from occupying first place. The fact that obtaining fire is within the power of man greatly diminishes its majesty in the eyes of the

[688]

/364 cont./

Gilyak. Finally, the hierarchy of the deities is based on the number of benefits received by man from each of them, and the sea and the taiga give the Gilyak more than fire does. Imagining the elements and the powers of nature as divine, even often referring to them as gods, a Gilyak at the same time believes that each element has its own master -- nivukh, who is a god -- "kur." These nivukhi are real Gilyak, not only in their striking similarity but even their dress (let us remember that "nivukh" also means "Gilyak"). These are not a product of the imagination, "one can see them." "A certain man," -- a Gilyak acquaintance told me seriously, "once met the master of the sky ("kur"). He was riding on a sled pulled by wolves, but, upon encountering the Gilyak, the wolves turned upward and disappeared in the sky with their rider. One can hear about many "nivukhi," that a Gilyak of such and such a settlement has recently seen "him" in this or that place. Like the Gilyak, the nivukhi have children, perhaps there are whole clans ("khal") of them, and, like the Gilyak, finally, they are mortal. The god of the taiga and of the mountains, the master and the father of all forest beasts, is called "Pal'-nivukh" (pal' -- mountain, taiga). All the sacrifices /365/ at the bear festival belong to him. It is he who orders the bear to bite "very hard," in case of a violation of the ritual of the festival. The god of the sea, the father and master of all inhabiting it, is called "Tolles," "Tol'-nivukh," and is just about the most powerful deity of the Gilyak; it is he who sends illness and healing. The sun, the moon, and the stars are all deities of the Gilyak, and the first two are spouses; the sun is the wife; the moon, the husband; and, of course, on these heavenly bodies are gods -- masters. "Have you never seen a Gilyak said to me with assurance, "the nivukh on the moon when it is large? He is fully a Gilyak!"

There is among them an idea of something like devils "nenkharmu". This is a whole khal', living in the sea and dangerous for the Gilyak when they are hunting seals. They ride about in boats and when they see a boat with Gilyak killing seals, they loudly ask: "What are you doing here?" Woe if the Gilyak reply

/365 cont./

776 that they are killing seals; in such a case the boat is destroyed. But if, in reply, the Gilyak display a hare's tail, the devil goes on his way without further consideration.

776 The relationship between the Gilyak and all his gods -- 782 nivukhi -- is quite clear. It is they who provide him with sables, 22 foxes, bears, fish, seals, and so forth. Sables and bears are just as much the property of Pal'-nivukh as fish and seals are the property of Tol'-nivukh, and as sled dogs are the property of the Gilyak. The gods specifically give a portion of their property to man. It is not an accident that the fish appear with such amazing regularity during the appropriate seasons, it is not an accident that sable is dressed in an expensive fur during the hunting season, it is not an accident that swans, geese, and ducks molt in the summer and become an easy catch for the Gilyak. All this is done by the 776 gods for man; he lives only by these gifts. It is clear that the 782 Gilyak should not remain in debt to their benefactors. And so they give the gods a portion of everything that they avail themselves of: saranka, roots, tobacco, sugar, and so forth. When I once expressed a desire to take part in the sacrifice to Tol'-nivukh at the beginning of the seal season, they asked me: "But will you give the god bread, potatoes, etc.?" Sacrifices are the exchange of portions with the nivukhi. That is why the sacrifice may never consist of the same objects for which sacrifices are made; for example, among the dishes offered in thanks for the seal, this last does not figure, although it constitutes an indispensable dish of the Gilyak themselves on the evening of the sacrifice. Thus, the bear at the well-known festival is in no way a sacrifice, as some think, /366/ for not a single piece of its meat is apportioned to the god, and the Gilyak does not understand allegory: to sacrifice -- means giving the god something real. And actually, at this festival, the master of the bear, Pal'-nivukh, is given a sacrifice of saranka, "moss," yukola, and other viands. The principle of exchange in sacrifices is not contradicted by the fact 825 that the Gilyak offer to the "master of the sea" fish bones and the 826 head and eyes of seals. The explanation for this is very simple:

/366 cont./

776 the god gives meat to man, and the bones are returned as the 782 creative element for future fish and seals. For the same reason 224 the Gilyak carefully buries the eyes in the sand of the shore, and 825 any undeveloped fetus found in the uterus of a seal. To the Gilyak a sacrifice is not a ritual or a routine matter, but serious business on which his welfare depends. In addition to the solemn sacrifices offered at the opening of the seal season, the Gilyak with special solemnity gives presents to his god at the beginning of the sable 342 season. He offers this sacrifice all by himself in the taiga, at the side of the same small balagan which serves as a night shelter the whole time he watches over his snares and traps. Besides his usual gifts, he sometimes sacrifices a dog for this occasion. After striking the sacrificial animal in the heart, he gives its blood to the god, but eats the meat at a solemn feast with his kinsmen. He usually gives frequent gifts to his gods, although just a little at a time, believing that a hundred fish mean as little to a god as a handful of rice or saranka means to a Gilyak. Offerings made during a journey can be touching. I remember that once during a journey to northern Sakhalin we came to the crest of a mountain ridge unexpectedly, and suddenly there unfolded the magical panorama of the mountains. The "Head of the earth" towered majestically before us. My Gilyak companions were deeply moved. One of them took from his sled his cherished little sack with saranka, tobacco, sweet roots, and so forth, and, moving off about 30 steps to the right, he squatted down, buried a handful of each in the snow, and repeated his prayer for a long time. When he got up, he moved the same number of steps to the left and did the same. Then, his face suffused with emotion, he returned to us and distributed the remains of his sacrifice. He had prayed that we be granted a happy journey. Later, he was able to boast that his prayers had 771 been heard. There is a tremendous difference between the religious feeling of a Gilyak and the religious feeling of not only a Christian, Jew, or Moslem, but even of a Buddhist. "Contrition," the striving of the soul toward the deity, in our meaning, all seem to be incomprehensible things to a Gilyak. For him, in religion everything is simple /367/ and clear; there are no doubts and no 781 suffering. He does not understand religious ecstasy.

/367 cont./

022 suffering. He does not understand religious ecstasy. Shamanism, 782 with its ecstasy, seems to me to be a borrowed phenomenon. It 224 does not fit in with the religious beliefs of the Gilyak. It is true 1554 that he believes the shaman, trusts him to cure the sick, superstitiously fears him, believes in his predictions and in the power of his magic, believes, for instance, that the shaman can kill any man no matter how far away from him this last may be (thus they say that the Rykovo shaman killed the Nikolayevsk one by shooting a bird that was flying past); shamanism, however, is not typical 756 of Gilyak religious views. It is perhaps appropriate to mention at this point that shamans do a great deal of harm to their worshipers. 1554 In the case of the unsuccessful outcome of their treatments, they often pass the blame onto quite innocent people, whom they subject to physical violence and to cruel persecutions if the patient 158 dies. Also, by suggesting to their patients that their illness is the 1782 result of possession by devils, they cause serious psychic disturbances in people whose nervous state is healthy. The prayers of the Gilyak are quite characteristic, simple and clear like their beliefs. "Kur, pongukhla!" (Oh, God, please!) -- the Gilyak limits himself to this when he asks for something from his god.

776 The Gilyak have a hazy conception, or better a feeling, about 577 a supreme deity, the father of all men and of all that exists, but for him it is just a vague feeling for which he does not have a clear formulation. The gods have a relation, not only to the material 577 life of man, but also to his moral life. Moral principles of com- 573 munal living, helping one's neighbors, and respect for the life 1776 and property of another enjoy divine sanction. Violating them leads to punishment in this life (sickness, premature death) and in the future life. A hunter is supposed to take a reindeer from a Gilyak; "If a rich man abuses a poor man, it is a great sin, but if a poor man abuses a rich one (in the material sense, if he borrows and does not repay, deceives him, etc.), that is not a sin!" This statement sounded all the stranger to me, because the Gilyak who made it was a very rich man himself, a big dealer, who did not hesitate to oppress the poor in any way. I do not undertake to judge how much this outrageous sophism has been in vogue among the Gilyak, or whether it is the result of Russian influence, or simply a popular

/719 cont./

*776 that led him to it and was the cause of it all. It itself thus recog- 825 nizes the toad as the culprit. The Gilyak, on the other hand, have shown it only kindness: they have received it as a guest in their houses, put it in the seat of honor, offered it some of all the foods, in general did everything only with its knowledge and permission, and their women show it a final act of kindness by consciously dying the tears in its eyes. Therefore on guilt for its fate or responsibility for it falls on them. At the same time a second symbolic 776 act is carried out on the bears, the explanation for which, it seems to me, must be sought somewhat further afield. In addition to the tschudbas, a second head-band is put on them: a strap tied crosswise, on which are found one or two agate balls about one and a half inches large, which rest on the forehead and a little to one side (2). The small bear was given a band with one agate

2. See the woodcut, p. 1163.

bail which lay above its eyes in the middle of its forehead; the large bear was given two such balls, that is, in addition to that one, a second one which rested over the right parietal bone, and, finally, a band with two agate balls in the middle of the forehead, one directly over the other, was put on the medium-sized bear displayed in another house (that of its owner). On this point it seems that if more balls than bears are available, there is room for choice and only the ball in the middle of the forehead is obligatory. These agate balls are of Chinese ("Manchurian") /720/ workman- 776 ship and are highly prized and never sold by the Gilyak. Their 197 exotic origin seems to me to suggest an explanation for the entire procedure. /Illustration appears here./ During the many years of frequent intercourse between the Gilyak and the Chinese on the Sungori, it could certainly not have escaped them that the Buddhist divinities of the latter as a rule had a bump or swelling on the forehead above the eyes, indeed, it is possible and probable that they viewed this as a sign of the special holiness of the divinities 782S concerned in the eyes of the Chinese. If one now considers the 776S striving of the Gilyak to imitate Chinese ways, it is quite

/720 cont./

*776 825

Bears' head-bands with figure of toad and agate balls.

*776 conceivable that they are trying to imitate this Buddhist forehead 197 swelling likewise on the head of the bear venerated by them in 577 superstitious fear and likewise regarded to some extent as divine, 825 and that they do this with the agate balls which are furnished 776 them for this purpose by the Chinese themselves. Thus, according to Gilyak ideas, the bear is to some extent moved up among the divinities and therefore a formal bear-cult is practiced.

With the putting on of the snout and head bands, or the 776 toad and agate ball bands, all the honors imaginable have been 577 showered to the bear and now, in the awareness of their complete 445 innocence, the Gilyak may, with a clear conscience, give them- 577 selves up to the pleasures of the table. A great number of wooden bowls were immediately brought into the house on a sled and arranged on the floor around the bears, while the participants in the feast took their places, sitting cross-legged, on the bench of honor. First, a ski, which probably was one of the sacred 1262 utensils since it /721/ had been propped up against the étagère the whole time, was used to present pieces of frozen sturgeon to the guests. While they were still eating it simple circular

1. Religious Conceptions of the Amur Peoples. -- Idols, Amulets -- Shamans.

Religious Conceptions

G 776 1. Gilyak. It is very difficult to obtain information con- 124 cerning the religion of the Gilyak. I learned the following from Jutschin and Labgun (*). They call "God" yŭgzy (**) and designate

G 361 * From the villages of Patchá and Wass) at the mouth of the Amur.

G 104 ** Wherever the author used ŭ and ŷ from the Russian alphabet, they have been replaced by y and ja /according to the system used here, these letters would be transliterated as y and ya, respectively/.

G 776 him as the good one, kŭngulŭsch, an attribute that means the 782 same as good (nontz). They did not understand my question as to 1535 whether "God" lived in heaven, or where else? -- and said only that they did not know anything about God (idol) in their yurts. I all the more doubted the assertion repeatedly given to me by the Gilyak that they did not have any idols, since I myself have human and animal figures carved in wood from the village of Kulk (**). But they

G 361 *** On the left bank of the Amur, below Nikolayevsk, also Kuégda, Kuégra, Kŭegri-wo, see pp. 448, 535.

/739 cont./ But they
insisted on it and went on to say that the god of the Manchu was
called Nikhi and that the Manchu have carved in wood, human
figures in various positions, with a pipe in the mouth, the arms
akimbo, and the like. The Manchu bowed before these idols, but
the Gilyak did not do this when they went to the Manchu.

I required further as to whether and how the Gilyak pray,
but always received the answer that they do not pray. My next
question therefore was whether they had an evil god (or spirit) be-
side and beyond the good god, a question which seemed to surprise
them, and I realized that the placing together of words "good" and
"evil" seemed absurd and contradictory to them. Hence they
replied in the negative. But since the Gilyak /740/ are full of
superstition, I can only explain as follows the contradiction be-
tween their idea of "God" described here and the evidence for vari-
ous idols and their shamanism that I found:

Among the Gilyak there is an obscure and hazy conception
of "God," of a supreme being, who is called "Nikhi" or "Wind
One" in full measure and without any admixture of evil and who
is revered by humans being. But this conception is a wholly
abstract, completely empty one and does not at all fit into the life
into the customs and practices of the Gilyak, there is nothing con-
crete about it for them, and therefore they only know the word
"pray," but not the act itself. Also, they know nothing about
"God," in view of the complete emptiness of the concept, except
that he is "Ungusi Tech, the Good One." In the real, concrete life,
however, the Gilyak experience much that is bad and evil, and
there are many forces of nature which, especially in hunting and in
fishing, are often obstructive, menacing, and even fatal to them,
such as the often unfettered power of the elements themselves, the
often fatal strength of beasts of prey, the occasional and to them
inexplicable absence of fish, and the like — forces against which
man, and all the more a primitive people completely dependent
upon Nature, must feel his powerlessness. He cannot always
escape such forces of Nature and they do him harm; to him,
therefore, they are so many evil events which he views (from the
general, egoistic-teleological, primitive viewpoint of man) as

/740 cont./
powers always only directed against him and superior to him in
strength, and which he more or less personified, mainly in wood, human
crude representation. This feeling of his own helplessness in the
face of the forces hostile to him, and yet the inalienable wish to
avoid their harmful encroachment upon his life — there cause,
together with the inevitable, involuntary, and unconscious view
that in the action of these powers, as in his own action, there is
a cause-and-effect, cause-and-consequence relationship, lead
him to a series of conclusions from which his own acts and the
action of the powers hostile to him are brought into a causal nexus
And this is the origin of his many-shaped superstition which gives
rise to customs and special performances that are intended to
facilitate the protective, that is, the devil. According to the re-
spons of the Gilyak themselves, they believe that sickness is nothing
but the kins gnawing at a human being and finally fatally devouring
him. That is the end of all who /741/ die of sickness. It is no
wonder that with such a belief the Gilyak do not claim heaven for
the souls of those who die of sickness, but have them wandering on
earth, while the souls of all the murdered and even of suicides fly
to heaven. According to Gilyak belief, the earth is the abode of
counless kins or devils who hide in the forests and mountains, as
well as in the water and everywhere. The kins are represented with
two and three heads by the Gilyak, perhaps in order to indicate
with the extra ones, in contrast to man, their power over the
latter (1).

1. According to the Gilyak, one of the heads on these two or three-headed forms is a human head. This therefore indicates that the kins has seized the human being.

I do not know the significance of the alleged ptarmigan,
if that is what they are. The hearr, however, has reference to the
sex purpose of the whole semicircle. Namely, it is to be worn around
the neck against chest ailments, coughing, and the like. The
name kinj, however, which was given me for it, seems to have a

The Nivkhi

Feeding a bear.

the sea. Both the Nivkhi dwelling and every river had its ys', who look carefully
of man. The ys' was thought to be initiated by "ancestors" who lived in
people—the sun and moon—had no close relations with man, but the Nivkhi
were always on friendly terms with the ys'. "Descendants" from time to
sea animals, etc., the Nivkhi had to "give" them in return—to sacrifice
to them. The cult connected with the "ancestors" of nature was of primitive
clan character.

The "mountain man," the "sea man" and the bear, in the Nivkhi
thinking, were common to the clan. And the bear festival (chkhyf-in-
khavo—"bear game") was a clan festival. The clan which celebrated the
festival assumed the expense and work of arranging it. This festival was
connected with the idea of the dead, which was well developed. Every man
a dead clan kinsman. Buildings were made for the dead in the forest
placed in a particular place. The buildings were also cleared by members of
the clan concerned. The bear was taken out and fed on a clean trough for
the government. The bear was reared for several years. Before the festival,
all the clan members of the Nivkhi, in accordance with their master's
master's family prepared food for the holiday (usually held in February).
Such a plentiful meal—abundant enough even with one or several pairs of two-
hung with ritual shavings (inau) and covered with carving. The bear was
and between symmetrical combinations of bone, horn, and wood
sarkha—people of the clan in the relationship of "son-in-law" to the clan
holding the festival. The festivals sometimes lasted several days and con-
sisted of a complete ceremony of killing the bear with a bow and arrow,
ritual feasting on the bear meat, the sacrifice of dogs, and so on. The
bearskin with the head was lowered into the pit through the smoke vent
in a high pole. In the interior of the dwelling, eating, bear meat was served
shooting matches with bow and arrow, fencing with sticks, and dancing.
After the festival the head and bones of the bear, the ritual utensils of
others were put away in the special clan storehouse. Wherever a Nivkhi
lived, he retained his contact with the clan storehouse, which he visited
brought the skulls of the bears he killed.

The burial rites, the clan deities, the ritual dances, the
Tungusu-Manchurian of the Amur region. The Nivkhi characteristically

Peoples of Northern Siberia and the Far East

parties to agree. When agreement was reached, the bilay—sivak came to the
offending clan with men of the victim's clan, bringing a bear, and a bear
expected among the representatives of the two clans. Then each clan repre-
sentative killed a dog, and peace was considered restored. After that, the
ransom was paid: it consisted of coats of mail, quivers, silk materials and
other valuable objects.

The Nivkhi had a classificatory system of kinship, but, in distinction to
the Tungusu-Manchurian system, the specific term of kinship among them
lasted always for periods of one, rather than different generations. As
shown by the kinship terms, the Nivkhi family was developed even in
the 18th century some remnants of group marriage. The Nivkhi retained until the end of
the 19th century some remnants of the same generation, and were categorically
forbidden among persons of different generations.

All the members of the clan were divided into four age groups: 1) grand-
fathers and great-grandfathers; 2) fathers and mothers, their brothers
and sisters, and the fathers of the mother's sisters and the brothers of the husb-
bands of the mother's sisters; 3) children of the fathers (sons) and of
the mothers (daughters); 4) children of the children.

Trade with Chinese and Russians, the transformation of fur-hunting, and later of
fishing into commercial activities directed to commercial ends stimulated
the disintegration of the clan order among the Nivkhi, which developed
first among the Amur Nivkhi. The latter had early began to trade with
the Chinese, from whom they received the tobacco, tea, sugar, the fish-hooks, and
buttered furs and beings backbones for ten, tobacco, fabrics and metal
utensils. The Nivkhi also hunted sables, the Chinese, and with other
neighbors. Members of the Tuvinian clan, for instance, were for a long time
the middlemen between the Nanhiu Nivkhi and the Chinese. Thus, long before
russian colonization, the Nivkhi began to be divided into rich and poor.
The rich could have several wives and keep slaves. The poor had a lesser
price always included large quantities of imported valuables. But commodity
relations developed slowly, since the clan still played a role in the medium of fur
and, to a lesser extent, fish. The mass of the Nivkhi continued in a subsi-
stence economy.

Slaves did only housework. They could set up their own households
and marry. Descendants of the slaves, however, belonged to the lowest group
were considered free. On the whole, slavery was not widespread among the
Nivkhi, as it was among the Tungusu.

At the end of the 17th and in the 18th centuries, the Manchus established
the Amur Nivkhi, as well as the Nanhiu Nivkhi, under their clan order,
and gosyanda—village elders.

Beginning in the last century, the disintegration of the Nivkhi
subsistence economy proceeded more rapidly. After the Nivkhi had been
become a part of Russia, they were disoriented; a new form of exploitation
appeared, in the institution of "half-shares." Nivkhi switched the simple
of production fell into the position of "half-shares." Nivkhi had been
was divided according to the number of working hands, or shares. Thus
the single-members of others had to yield half of their catch to the "half-shares."

Before the Revolution, the Nivkhi were officially considered Orthodox
Christian, but their village remained pagan. They thought of the island
of Sakhalin as an anthropomorphic creature, the island of Sakhalin
"Ivan," mountains, rivers, water, rocks, and the like. Almost every village
their thinking on yr'—"master" of other nature. Thus, there were Pul-yr'—the "master"
shoreline—the "master" of the sea, Ch'ut-yr'—the "master" of
of the mountains and the taiga, and Tuyrasdi, or Tol'yr'—the "master" of

225 For some time after the seal-hunt at the air-holes, when
226 the ice begins to recede from the shore, the Gilyaks get out in
252 boats and "feed the sea" out of murtx (except for scooping
water of the boat), pieces of jelly called [79] mox. (1) porridge

1. Jelly is prepared by grinding a mixture of boiled skins of Siberian salmon, seal fat and water. As soon as the grinding is done, a lot of berries are added to jelly. Now, suppose you cook seal meat, eat it and pick your teeth with a little stick, then the sea will show how you picked your teeth with the little stick.

During the spring seal-hunt on Tebes, where the Gilyaks
jump from floe to floe chase a seal and kill seals with har-
poons, those at home must not break any objects - say, plates
or bowls, for otherwise the floe will break and the hunter,
say, the father, brother or son, may drown. Therefore those
at home must be very careful.

On the day when the hunting goes wrong at home, the hunter
will not get his seal. Then he returns home angry and tries
to find out who disturbed the "friends" of their quarry.

Rovgin told me all this in order to prove to me the existence
of kins, 'god', a point on which he was at first in the dark. The
Gilyaks are a sea-faring people. 20 versts from home, know what is going
on at home? he told me. "Surely kins must be telling him
about it. That is why we pray to kins (according to the
beliefs of the Gilyaks, spirits are human beings like them-
selves and have their own dogs.) For this purpose they wind
puchka on fish-tail bones (mamye) which they then throw into
the sea before offering to the spirits. The Gilyaks believe that
the dogs of the spirits, with eat the bones and, having had
their fill, will not touch the refreshments meant for their
masters.

When all gifts are ready, a hunter carries them to the sea.
Women are not present at sea offerings. On reaching the shore
the hunter selects a suitable place, at the very
edge of the water; one twig is a keylak-yks twig and the other
is a qaak-yks (frozen twig). A small distance away from
these he sticks another pair of small twigs at the edge of the
water. These peculiar gates are called tayr. The offering is
thrown into the sea through the tayr. First to be emptied are
the ul-yhr, (2) that is, troughs from which drowned men are

2. Ul-yhr is made in memory of a man drowned in the sea. The first ul-yhr "should be lost" quickly as the Gilyaks put it. Then they make a second one which

225 has long something in front of the seal. The seals will also
226 kill of a theft in the "friends" of murtx. If the wife at home has sexual
787 relations with another man while her husband is away on a
786 hunt, the seals on the floe will likewise engage in sexual inter-
787 course. When they witness some wrong, some sin, for
ple Gilyaks will, after returning home, beat up their wives
and hunter on find out the wrongdoer. In the village what has
added to the jelly. Now, suppose you cook seal meat, eat it
and pick your teeth with a little stick, then the sea will show how you picked your teeth with the little stick.

225 (86) During the spring hunt the Gilyaks of the village Kul-
226 kin-Tebes use different types of seals. They also catch no occasional
825 dolphin. They distinguish the following varieties and ages of
seals: 1. Nevgu-a 'present-time animal', i.e. a siwuch born in the
given year.
2. Tayr-a literally: 'last year's animal', i.e. a two year
old siwuch or one born in the previous year.

/338 cont./

752 789 thank you!" If they do not exchange them, then one of them will drown. After this they become friends. One must rescue [572] an alien khal, and even good Russians (not the tramps), but a [614] drowned person from another clan is not cremated, but is sur- [628] rounded with sticks. [766]

After the rescue and the shavynd procedure, the shaman must /339/ carry out his procedure: he sends his spirit kekhn to Tol for a small soul, which lies there on a small bed.

When a person who was drowning returns in a boat rescued from death, he and his wife must break the old chumashka and make a new one. If it is not broken, husband and wife will die.

766 A man who drowned or one who was eaten by a bear will [772] be a god.

A drowned person is placed in a boat; the kinsmen get into another boat and float without rowing; they let the first boat, with the deceased, go ahead, and the deceased is cremated where it carries him to the bank. Hooks are used for pulling the body onto the bank. Inau are placed near the place of cremation. When the Tymovsk Gilyak travel to Tro, upon seeing the inau they throw chukh-chugynd (sacrifices) into the stream.

752 A person who has been rescued from death by a bear sacri- 782 fices a dog to Pal-n'ivukh and makes chukh-chugynd.

/337 cont./

Gibel'ka's wife gave birth to twins; one of the twins was a bear.

A representation of twins -- tongch: -- is placed in a little storehouse. If one of the twins dies, they place one tongch:, while if both die, then two joined together on the sides. Chukh-chugynd is given to them at the full moon and at the new moon. Kinsmen and strangers sacrifice down to the third generation.

When a twin dies, he goes to his father, Pal-n'gyvyn, who gave birth to him, appearing to his mother in a dream.

A dead twin is not cremated, but is seated in Turkish fashion in a specially built little house, in which a wedge is driven to support him.

He is dressed in a white shirt and trousers and is surrounded with shavings -- inau. The mother of twins is likewise not cremated after death, but is dressed in white and buried, also with inau placed around. According to B. Pilsudski, the same is done with the father of twins.

The tongch: helps catch bears and in hunting in general. The tongch: is fed in case of sickness, especially tuberculosis (Slyavo).

Infanticide. Infanticide is committed sometimes in secret or even upon the order of the father of the underage husband of a woman.

A woman who was accused by a shaman of poisoning a boy, the son of another woman, was beaten, and, after they cut off her braids, she was thrown into a funeral pyre.

Illness. Illness is sent either by Pal-n'igyvyn or by Tol-n'igyvyn, but each of them takes a milk not from his kingdom.

/338/ A milk can be of different shapes and often is red as blood and hard as stone, but when he enters a person, he becomes lively, "as if he were walking."

A violently insane person is imprisoned in a cage (in summer) and fed; he must not be killed.

Kkhmas'ind -- to be sick from not getting what one saw and wanted. Either the one who did the seeing or his family becomes sick. Then it is imperative to get at least a small crumb of what one saw and to touch it, and the person gets well.

462 fragments. Finally she threw into the water grass mu

Now Xitkun's wife bent and picked up as many pebb
372 there were sivuch heads. At home she threw them into
782 fireplace. These pebbles are called uskis 'pay' (j-usk
225 'to pay,' s - suffix of the implement of action).

776 There arises the question why this pebble is called
and why the Gilyaks pay for the hunt to the master of f

Of some help in answering this question may be the
ing opinion of the Gilyaks of which I was told on Sakhal
1927 by the Gilyak Murmur of the village Chayvo. Mur
informed me that while the hunter is still asleep the m
of the fire hunts seals for him. If the master of the fir
fails to kill a single seal, then the hunter will fare no
"We sleep, fire first kill seal. Fire seal not kill, we a
not kill."

The ceremony of throwing the heads into the sea co
the seal hunt.

115 A seal hunt. (1) Suppleme
225

1. This is a translation from the Gilyak language
The text was taken down in the village Hiski, 40
versts from Kul, on July 10, 1931, and was told
by old man Jajpan.

225 In the spring we came to a summer village, we were
fering hunger, we caught only fish, catching bullheads o
hooks, only ate. Then the sea ice moved. The pilaŋ sa
"Let's hunt seals. How many will go? Six gathered to g
"Women make mos, make muvi." Then we slept. In th
morning we got up and ate."Prepare your things, harpo
tips, harpoon shafts, oars, small benches, and put eve
thing in the boat." Then we brought out things to the bo
and put them down. All got down into (entered) the boa
Then we pushed off the shore. Five rowed. Then, rowi
we got to sea. After we got to sea, we came alongside
shore. When we came alongside the shore, we pulled o
boat and lighted a fire. The fellows said: "Big man (2)

chinations of a devil, which, taking up its abode
n. But sometimes devils seize people and, holdi
e relations with them, or force them to work for

predominantly of a practical disposition and are not fond of rumination. Moreover, they do not yet have firm beliefs and their prophets, the shamans, often misuse their imagination so boldly that their assertions contradict those of other shamans or of everyday experience. From conversations, from customs and actions, we may conclude that the Gilyak believe in a supreme being, in many lesser spirits, both good and bad, and in immortality, but they have not emerged from fetishism.

God (kush or kur) made everything, he lives in heaven and never appears. He is held to be good, but otherwise nothing is said of his characteristics. In one village, however, I heard that God is very angry if a shaman is put to death. In this we may already see something like priestly self-glorification. Kush is not worshipped, in fact, one does not bother much about him, only now and then something is sacrificed to him, but it is questionable whether this is meant for him or for his subordinate spirits. For instance, when a Gilyak crosses a dangerous passage on his journey, he pours a bowl of spirits on the earth or in the waters: this is the sacrifice to God. Sometimes one of the best dogs is sacrificed to him, whereupon it is eaten. Near a village a stake is sometimes rammed into the earth and beneath it millet or fish are buried, or tobacco and such things [240] are tied on top, - all this is meant to be for the supreme being. Such a stake remains standing until it rots.

The bear usually appears as the executor of divine ordinances, and he punishes the bad people during their lifetime. As a matter of fact, there are a number of superstitious ideas connected with the bear, and thus he may be regarded as a "sacred" animal, but nobody regards him as a god or demigod.

The Gilyak do not bother much about the tiger, for they seldom encounter him. But the Goldi and Manchurians regard him as much more than a wild animal. He is regarded as having some mysterious power, he is spoken of with a certain caution and referred to as "the honorable colored one". (1) It is also said of him that he only attacks bad

1. Barabach, Journey on the Sungari. 1874. (Published in Russian).

people. However, if the tiger creates too much havoc and kills the cattle of the Manchurians, they set traps for him

825 and if he gets caught, he is killed. But even after that he is
789 handled with respect, that is, his corpse is laid before the
273 house of the idols and left there until it begins to decay.
Besides the skin, the bones and the gall are immediately sold, for the former are held by the Gilyak to make a man brave, and the latter is used for all kinds of medicaments.
776 Of the numerous spirits whom the Gilyak are supposed to
782 know about, some are good and protect man, but the majority are more or less evil, and must therefore be propitiated with gifts. The chief of the evil ones is called Kins (on the island of Sakhalin: Kinsh) and to a certain extent corres-
778 ponds to the devil, Ahriman, etc. of other peoples. "Spirit"
782 and "idol" are both called kegn, for the idols are not only
532 symbols, but at times also the dwellings of the spirits or kobolds. Usually they are kept in the storage huts and only hauled out on special occasions. If an idol is "heavy" it means that its inhabitant, the kobold, is at home, but when it gets "lighter" than usual, the spirit is roaming about somewhere. The offerings here also consist of millet, tobacco, etc.; very often the face of the idol is smeared with cranberry juice, which seems to have a powerful effect. Wood chips are also hung around its neck. The idols have different appearances. A guardian spirit, for example, [24] lives in a wooden cone that is placed somewhere in the vicinity of the yurt when it is built. If the yurt must be taken down, the idol remains, and at the new dwelling a new one is made. Some idols are crude imitations of humans, others have the shape of a bear and are sewed into bear skin, still others have the shape of a bird, etc. Some human-like idols represent children, others old people. Some have hands and feet, others only a head which sits on a body showing a navel. Small idols are sometimes worn as talismans. These also usually have human forms, but some look very
789 different. Thus the talisman against a difficult birth is a
844 figure carved of wood, representing a double acorn.
Besides the idols, there are some more or less strange-
778 looking objects not made by the Gilyak themselves, which
782 have a mysterious significance for them. Such an object
177 stands on the so-called Tyr (1) about 80 versts from

1. From the Gilyak village Tyr.

Nikolayevsk-na-Amure. On a high, precipitous river bank a Bhuddist temple formerly stood; of this only a few stone pillars remain, bearing Chinese and Mongolian inscriptions.

846 given birth to a child does not leave her place, the hut; only during the most severe spells of frosty weather is she allowed to go to the dwelling place, in case she herself is the housewife. If she is not the housewife she cannot expect to be taken into the house
846 by another woman. Mishaps occurring to weak women
776 in confinement who were left to themselves in the hut are attributed to evil spirits. In order to keep these spirits out of the "house of birth", in which one of the most important and mysterious natural events takes place, a large axe is placed at the entrance of the hut designed to banish the evil spirits. But this convenient and easy way of protection is not always sufficient. I recall a Gilyak called Kan coming hurriedly to me for help [760] because his wife, who was compelled to do all the work in the narrow and disgusting hut, even to sewing and chopping wood, had, inadvertently, hurt his newly born son's head. On another occasion, the hut in which the wife of a Gilyak friend of mine was in confinement caught fire when she had started a fire in order to warm her chilled limbs. The fact that such mishaps do not occur as frequently as one should expect is due to the admirable strength of character and fortitude of the Gilyak woman who, even worn out and sick, never loses her presence of mind and her ability to work. It is the might of her motherly love which, in such moments, increases her will power and her fortitude to a degree unknown and incomprehensible to men.
847 Unmarried Gilyak women, fearing the disgrace
163 which they would have to suffer, sometimes effect artificial miscarriages; they use the same means which are said to cause natural miscarriages. But their skill in committing abortion is not great, for there are many cases of infanticide.
Once in a while it happens that a Gilyak woman gives birth to a dead child; but that happens so infrequently that I could not be shown a single woman to whom that had happened.
814 The Gilyak very much dislike talking about sexual
864 matters and about facts connected with them. That is probably the reason why the appearance of a new member of the family is explained to children in such

834 a way that every discussion of the fact is precluded.
864 If the baby was born in the summer, the children are
told that it was taken from under the roots of a tree
or trunk; if a baby was born in winter, one pretends to
have found it in the snow.
845 Twin births.
163 No tribe on Sakhalin Island has reported the birth
of triplets to any woman at any time. That is why
there are no legends about such an event either.
Not infrequently twin births take place among the
natives. They contend that in each one of these cases
both children are of the same sex. I personally came
to know two living twins of the Gilyak tribe who were
between forty and forty-five years old. In regions
rather well known to me there occurred three twin
births in a population of more than 300 persons
within a decade, but all these twins died immediately
after birth. When I left in 1905 there were five month
old twins living in the family of a Gilyak friend of
845 mine. Only in a single old Gilyak song which I wrote
539 down are twins of different sex mentioned. The
776 brother is in love with his sister and, in this song,
asks her to take his heart into her hands, or else he
will die.
The Gilyak are convinced that one of the twins is
the son of the god of the woods and mountains, pal-
ni-rookh (mountain man), a mighty deity now
benevolent, now malevolent towards the poor, weak
Gilyak. [761] (1) That is why the child of the pal-ni-

1. I was, however, given another explanation by a Gilyak: one of the twins is said to be an offspring of the mountains, the other one an offspring of the sea.

rookh, should be given back to his father right away.
But, not being certain which of the children is not an
offspring of human beings one prefers to treat them
both equally.
845 It is a custom among the majority of the Gilyak to
766 cremate dead bodies (2), but twins are not allowed to

2. In general, only those Gilyak tribes

845 dwelling to the top of a near-by mountain; there, for
766 the last time, choice food is offered to the figure.
782 Next to the sacrificial objects a one to two meter long
775 stick carved in curly design is dug into the ground;
they call it nau. From this moment on the whole tribe
is safe [762] from being haunted by the dead child,
tonhr ehlian, without further prayers or sacrifices.
753 If the relatives neglect to follow these rules, which
845 are designed to appease the awe-inspiring spirits of
776 the mountains and to win their favor, they evoke their
anger. Several diseases which attack the parents and
relatives of the twins are considered to be symptoms
of their revenge (tohr ehlian). These usually are
certain diseases like deformation of the jaw-bone,
squint-eyes, stiffening of the neck or any kind of
convulsions. The appearance of such diseases is
considered to be a consequence of the mountain
spirit's dissatisfaction; in such cases one says
"tonhr ehlian singrund", that is "the twin child is
tormenting".
784 The Gilyak are so afraid of these dangers that
845 young women and girls are strictly forbidden to listen
777 to reports about such happenings; by these precautions,
they believe, they will be able to prevent the birth of
twins. Women are neither allowed to borrow house-
hold articles nor to accept gifts from friends who had
given birth to twins. In this case old soft objects are
considered to be the most dangerous ones. Hard
objects, however, especially tools made of metal, do
not transfer the bad luck of the former owner to the
new one.
842 It is altogether a trait characteristic of this northern
777 tribe that they believe in the possibility of the
transference of physical peculiarities from one man
to another man by way of his tools. This gives us an
explanation for the superstitious remedies they use
for overcoming a woman's sterility. The woman who
cannot bear children must ask another very fertile
woman to lend her the waistband of her trousers and
she has to wear it up to the moment of the desired
success. A Gilyak told me that fertility can be
transferred from one person to another like a
contagious disease, for example by way of a vessel
which had been used by the sick person.

171 among the Goldi, are in use throughout the Gilyak people
751 and are essentially the same as those discussed earlier
301 (Number XIII, p. 207) [see Goldi source 18: Genest--
Analyst]. The Gilyak on Sakhalin Island whose houses
372 Jakobsen entered were likewise highly indignant whenever
462 he left the house with a lighted pipe or when his companions
776 extinguished the fire burning in a hut by pouring water on it.
For in their opinion such things tended to conjure up des-
truction not only over the inhabitants of the one hut but over
the whole tribe. The inhabitants of one house in the village
of Varki below Nikolayevsk predicted the same result when
Jakobsen was about to light a fire for making the tea, and
they forced him to wait till the house-wife saw to this task,
since, in their opinion, this was a job only to be performed
by her. Plainly this conduct has its basis in the sacred
position of fire. [380] Though this no longer leads to a
personification of a fire god among the Goldi and the Gilyak,
it no doubt existed among them at one time as it still does
today among the Buryat.
776 The system of gods of the Gilyak is in no way behind that
171 of the Goldi in variety. Human and animal figures in color-
825 ful diversity serve as representations of celestial beings.
796 Here, too, there is a great similarity to the religious con-
ceptions of the Goldi; the most important difference seems
to me the one that was touched upon earlier (XIV, p. 223),
[see Goldi source 18: Genest--Analyst] the fact that the Goldi
pay zealous homage to the tiger while the Gilyak do honor to
796 the bear. It is true, though, that this homage is disastrous
415 to the bears since it means keeping a number of these
531 animals imprisoned in the cages in every village and killing
231 them at a bear festival. Before the festival the bears are
fed plentifully for an extended time by means of large wooden
spoons prepared especially for the purpose and decorated
796 with ingenious carvings. These bear festivals are usually
held late in autumn and in winter and they are affairs of
the greatest importance to their celebrators. I will now
give the description of the festival that Jakobsen had the
opportunity of observing in person.
796 On the 7th of February, 1885, the traveller arrived in
622 the early morning at the Gilyak village Vaida about 30 versts
574 above Nikolayevsk, where, as he had been informed, a
festival was to take place on that day. From several other
villages, some of which were considerable distances away
large numbers of guests had come in already, and the whole
place was astir in anticipation of the festival at hand. The
opening of the bear festival is in the hands of the village

796 on a bed of fir twigs as on a bed of state and the participants
in the festival visit it for the last time. After two or three
days they pull off its hide and the meat is distributed among
796 the guests who eat it with relish. There is a strange con-
825 tradiction in these bear festivals. On the one hand, they hono
531 the bear as a celestial being, as is proved not only by its
pictures serving as idols and amulets but also by the tender
attentions that they show the animal during its imprisonment.
For this speaks also the solemn way of killing it, as well as
the ceremonious procedure used in treating the corpse; also,
the circumstance not mentioned above, that the traveller was
not allowed to take with him one of the willow sticks of the
fence which was later used for the bed of the dead bear. He
would all the sooner have done so since the stick was distin-
796 guished by tasteful carving. On the other hand, they are not
825 afraid to kill this animal that they honor as a divine being,
756 and by a death, even, that is only the conclusion of a rather
barbaric torture. Furthermore it is a curious circumstance
that during the whole course of the festival, as far as Jakobs
was able to observe it, the shaman was not even visible, eve
though the latter plays such an outstanding role at all the
796 religious ceremonies of the Amur peoples. What, besides, i
782 the purpose of leading the bear out on the ice of the river?
776 [in the bear festival; see p. 381--Analyst] Should it suggest
the idea that the animal is to be offered as a sacrifice to the
river honored as a god? And if this is really the case, what
a strange idea it is to sacrifice one god to another and to eat
him up in the end. And why don't they kill the bear on the
river bank and let at least its blood flow into the water, just
as the fish gods are entrusted to its waves? What, further-
more, is this sacrifice meant to effect? and what is its
nature? Are we to imagine it as a sacrifice of thanks offered
up to the river dispensing blessing and nourishment, or as a
sacrifice of expiation by which the river is supposed to be
made favorable to the dwellers near it, because the latter ar
well aware of their dependence on the river and its power to
bring them destruction? In the former case one would think
that the celebration would take place as soon as possible afte
the time fishing ended, that is, about September or beginning
October, while these festivals actually are not till later. Th
second assumption does not agree, again, with the circum-
stance that the nature of the festival is a thoroughly joyful
one, as is proved, at least to my mind, by the description
of it given above. This is not contradicted, either, by the
solemn silence which reigns during the lethal shot and the
796 preparation for it. For it is by no means necessary to see

22: Knox T-2 (1866) 1870 Gilyak

756 tume. Both doctor and patient are generally decked with wood-shavings while the work is going on.

Sometimes an effigy of the sick person is prepared, and the spirit is charmed from the man of flesh to the one of straw. The shaman induces him to take up lodgings in this effigy, and the success of his persuasion is apparent when the in-

PRACTICE OF MEDICINE.

valid recovers. If the patient dies the shaman declares that the spirit was one over which he had no control, but he does not hesitate to take pay for his services.

A Russian traveler who witnessed one of these exorcisms said that the shaman howled so fearfully that two Chinese merchants who were present out of curiosity fled in very terror. The gentleman managed to endure it to the end, but did not sleep well for a week afterward.

776 The Gilyaks believe in both good and evil spirits, but as the former do only good it is not thought necessary to pay them any attention. All the efforts are to induce the evil spirits not to act. They are supposed to have power over hunting, fishing, household affairs, and the health and well-being of animals and men.

777

777 LUCK AND CHANCE--concept of good and bad luck; ideas about chance and probability; things associated with good or bad luck (e.g., lucky objects, luck-bringing formulas, lucky and unlucky numbers, propitious and unlucky days); techniques for controlling luck (e.g., wearing of luck amulets, reciting of lucky formulas); conception of fate; etc. See also:

cont./
er has her own fire. After childbirth a woman washes herself
ree days and then moves to her yurt, but for seven days
s apart and eats from a separate kettle. For ten days after
irth, it is not permissible to drink cold water or to eat raw
ut if twins were born, then it is permissible. When a child
, they bring in two sticks, put them into his hands and lift
p. Similarly, sticks will be placed in the infant's hands
he falls ill, and he will be compelled to lift himself up (1).

1. On another page of the same notebook, we find the following notation: "These sticks kyz′ nyngydz′ (from kyz′ -- risk, luck, and nynydz: -- to seek)," which probably refers to the above-mentioned sticks.

/306/ If two children were born, they make two pairs of
two k:ong z′akh, two sticks made of rose-willow, cut as
pylng z′akh), two small bows (pudz:) and arrows of a special
(m′erlar), and attachments for the cradle -- pitus′. When
repare food, these trees -- ola′ bituz′ -- must be fed
ment of Kal'ma).
While a child is growing up, his umbilical cord -- kylmyr
at home, and then he himself must carry it into the forest
ng it on a tree. O′ging chkhnaj is a figure that they make
child is suddenly frightened during his sleep. The chkhnaj
figure made when a person himself, without the shaman,
at which he dreams.
The child's excrement is poured out near a fir tree (both
nd female); after being cut, hair is also thrown here (it is
missible to cut the hair of twins). One must watch care-
see that no female blood drops on the urine or the refuse,
the child is lost. The child will die if the tree growing
broken. This tree is called pila uigf, and the place
d ki markf -- literally -- "urine pouring out place."

/321 cont./
776 upon himself. Ge-n′ivukh beats the seals. He is seen from a distance, but up close he disappears. He does not drive away sickness. In appearance he is "just like a Gilyak."

● 777 Talismans. Gibel'ka became rich in the following way: His eldest brother, Amgunka, found a piece of red material under a log in the taiga; from that time on he began to get rich. Gibel'ka stole this talisman from him, and then a chkhnaj fell from the sky, and he began to get even richer.

Taru -- talisman -- is an object which falls to a lucky person (kyz narla n′ivukh) and which increases the number of things in his possession (for instance, two fur coats instead of one), such as: a May beetle, a piece of gold, a larch with fir cones, a climbing lizard, a worm.

Aleksey caught a goya with three worms adhering to it by suction, and after this there was a lucky catch of fish.

755 Father Konki is very old and by now remembers nothing. But on the basis of dreams he advises the sick -- to make chkhnaj, feed them, and carry them into the taiga.

In recent times he has not had visions and therefore thinks that he will soon die.

/322/
756 776 Shamanism. A kekhn answers the shaman's questions about sickness and medication, but nobody hears his answers. The mightiest master is Tlykekhn (the spirit of the sky). He travels on foot through the sky and with a rope leads the shaman through the air wherever he wishes. The shaman does not take his kekhn along to Mlyvo (the world beyond the grave). The kekhn of Koynyt (1)

[115] 1. The author's storyteller -- a youth who subsequently became a shaman. S. Sh.

comes to him only in a dream or during a seance. He sends him to various gods with tasks, for example, to learn what sacrifice to make. So far he has only pal-n′igyvyn (kekhn). His kekhn is small, with a human face and a body covered with hair.

Section 3: "Ethnographie, auf Grund des von Dr. Karl von Scherzer gesammelt. Materials bearb. von Friedrich Müller /Ethnography, on the Basis of Material Collected by Dr. Karl von Scherzer and worked up by F. Müller/," Vienna, 1868, p. 158. In the last-named work the heating by pipes is called "Russian type," though this is by no means a national Russian arrangement.

by means of which an evenness of temperature is attained in the house to an extent inconceivable in the primitive dwellings of the Amur peoples.

352 354 512 171 513 [177] Finally, the fact that the heated sleeping benches are used by the Gilyak and all the other Amur peoples in exactly the same way as by the Chinese also /353/ argues in favor of the Chinese origin of them. According to U-tschen, the Chinese always lie crosswise on the kang (1), with their feet

1. Cf. Wassilijef's translation of U-tschen's writing, op. cit., p. 98.

toward the wall (2), and the same is also observed by the Gilyak

2. Pallas, op. cit. In the Amur region, too, I have never seen Chinese sleep otherwise on the kang.

and the other Amur peoples with superstitious strictness, whereas in the earth yurts, one sleeps in the opposite position, with the head toward the wall. In a Gilyak winter-house on the Amur, [123] when I once placed my head against the wall, as in the earth [984] yurt, in order to have a support for my pillow, it aroused gen- ● [177] eral indignation among the Gilyak, and the cry "uitsch, uitsch," which means the same as "misfortune" or "unlucky, forbidden," rang out on all sides. The reason why the Chinese always assume this position on the kang is said to be that the part of the sleeping bench that joins the wall is especially warm because of the pipe

/61 cont./

96 The eve has finally arrived. This day is called Nau-vakhnku,
78 the day of the preparation of the inau, i.e., sticks with sharpened ends, which play an important religious role in the festival. These sticks, of various forms and sizes, represent orators-intercessors, which, together with the slain bear will set out to go to the master of the taiga and remind him of the needs of the Gilyak, and will be his talismans as well. Each kind of inau is made in pairs; each pair is spouses, so that they will be happier, and so that they will propagate and multiply. Some of the inau are hung as ornamentation on the posts of the arena; some are attached to them at the bottom. While the
6 preparation of the inau takes place, the clan elder, together
4 with the master of the bear, and several clansmen ride out
4 to greet the so-called narkh'i. These narkh'i are honored guests and play a very important role in the festival: the killing of the bear is left to them alone, to them /62/ alone is given all the meat of the killed beast and even the skin. The narkh'i are not arbitrarily chosen people, but of necessity representatives of that clan into which the daughters of the master of the bear, as well as the women of his clan in general, marry.
6 Most often, therefore, a narkh is a son-in-law /zyat'/ of the master of the bear /see navkh, p. 82/. The narkh'i in turn take along their sons-in-law and decide among themselves which one of them is to kill the bear. If several bears are killed at the same time, narkh'i are invited from all the clans from which the clan arranging the festival has taken wives, so that sometimes up to ten clans participate in such a festival. It is these narkh'i whom the master of the bear must solemnly greet and lavishly entertain when he meets them, and transport them with honor to his village.

96 The following day is the day of the killing. It is called
3 Na-khan-ku (the day of the killing of the bear) or Chkhyf-aryn-ku (the day of the feeding of the bear). Early in the morning the bear is taken out of its cage in the same way as to take it for a walk. A large woven belt to which are tied bags full of assorted viands is put on it, and it is tied up near a yurt and given the opportunity to enjoy the last hours of life remaining to it in this

/66 cont./

796 fed, and then, exchanging farewell glances with the dogs, they silently leave. Upon passing over the threshold, it remains for them to conclude the last ceremony, which bears the characteristic name of "lymyzyn zychyvynd" -- "the stamping of the threshold." This ceremony consists in placing nich'i (a kettle and an ax) on both sides of the threshold, the nich of the departer -- on the inner side, and the nich of the host on the outer side; the departer must first step over the inner nich with one foot and then over the outer one with the other.

796 On this same day the last act is concluded -- the sacrifice
782 of the dogs. The dogs presented by the narkh'i, as well as the dogs sacrificed by the master for this occasion, are led out to the plot of ground where the bear was killed and tied up to those same trees /67/ to which the bear was tied. The head of the bear with all the presents given to it, is also brought here. Each pair of dogs consists of a male and a female so they will be
● [778] happier on the journey. Pairs of inau of the same kind as those that were prepared for seeing off the bear and equal in number to the number of pairs of dogs are then stuck into the ground in the neighborhood of the trees. The heads of the dogs are ornamented with shavings, which are painted with the juice of berries and attached to them. Before they are killed, the dogs are fed with choice viands and are exhorted in the following way: "Go, go to your master, take yourself up to the highest mountain, change your skin, and next year come down here, come down here as a bear so that I may have a look at you, do this, come down, farewell, travel well!" After this, they kill the dogs by strangulation. This procedure is carried out somewhat peculiarly. Two men seize a dog by its hind legs and forcefully pull the unfortunate animal as far as possible away from the tree to which it is tied with a tightening noose. At that time, two other men seize the two front paws; a fifth presses on the dog's neck, accelerating the process of strangulation, and a

/96 cont./

*614 But if they are lucky enough to overtake the bear-
825 "murderer" or his "clansman," they wreak upon him their
672 most extreme wrath. As their first responsibility they knock
766 out his teeth with an ax, and, while they are skinning him, they stab him with knives from all sides and heap on him the choicest verbal abuse. Having stripped off the bear skin, they wrap the body of the murdered man in it (if his body has remained uneaten; otherwise it is replaced by a half-length representation in wood) and, seating him in a squatting position on the sled, place the bear head under his seat, and in this way, with loud howls mixed with exclamations in honor of the murdered man and in deprecation of his murderer, they bear him to the settlement. If the bear has not been found, they place under the seat of the dead man a half-length representation of a bear, while the body is arrayed in a cloak of shavings (1). Not far from the

● [778]

1. Shavings are regarded by the Gilyak as sacred, as an object of magical power. The cult of the sharpened pieces of wood (inau; see the section on religion) plays an enormous role in the religion of the Gilyak. Ordinarily they bury chosen ones in cloaks of shavings. Such an honor, for example, is accorded to the mother of twins or triplets, who is regarded as a being of a higher order. Among the poor this finery takes the place of the magnificent traditional funeral garments of Chinese silk, which causes one to think that at a remote period garments of shavings were generally used and that antiquity has invested them with a halo of sanctity.

Amur

/306 cont./

● 778 A child's amulet -- ola bituz consists of two slender fir
824 trees -- prung, which are uprooted on the day of birth of a boy; their crowns are bound with birch bark. Then they are reinforced encircled with simple sticks, and bunches of leaves of Ledum palustre -- the marsh tea (tykr) are attached to them, as well as the sharpened head of k:khong z'akh, the head of a pike (ius), and hooks for the boy's clothes. If the boy dies, all this is thrown away, but if he survives, everything goes to the next child (settlement of Kal'ma).

VII.

Religion

774 The soul and the ceremonies after the burning of the corpse. The soul -- cheg:n, chekhn, yrykh, uz'(the pith as in a tree). A man has three souls: one major one -- cheg:n, and its two
[756] shadows, assistants. When the cheg:n of a shaman is wounded, the shaman dies.

774 If in sleep something is dreamed clearly and comes true,
787 it is the activity of the chief soul, and if it does not come true, then of the shadow-assistant. There are interpreters of dreams. If one sees a cow, there will be a storm; if a red berry, he will soon fall ill.

765 In the morning on the next day after the cremation of a
[764] dead man, his family arrives, rakes together the ashes, encloses them with wooden boards on four sides, and covers them with fir branches, and on top with drel', then birch bark and wooden boards, which are then attached to the ground with wooden /307/ hooks. The skull bone (chongr nynyv), which is picked up from the ashes, is wrapped in white, placed between two wooden boards, and fastened together with an umbilical cord ("the root from which man is born"); this is the way they make the mu n'ivukh k:ak. Some place the bone in the upper part, others --

/311 cont./

756 Before becoming a shaman -- pokhtyrdz:-cham -- a shaman who can lead a soul into the next world (from pokhtyrdz: -- to lead a soul into the next world), he is ill and tormented until out of his mouth come pulk (Goldi tulin) -- a shaman's copper mirror, tovz (Goldi pŭn'chu) -- a piece of copper for a shaman's fumigating smoke, then horns -- murki', and, finally, a lakhch -- a knife of palm /pal'my/. The lakhch of the Gilyak shaman is his own work, but he does not have horn, and he buys [776] pulk. Uz'mu kekhn -- the spirit protector of the shaman, ajami [774] among the Goldi, lives in the uz' of the shaman. Uz' -- one of the three souls of the shaman, literally, the pith of a tree.

● 778 824 Beliefs and Rites Connected with Hunting and Fishing

[782] Chédzigr-turi, toigo. Chédzigr -- tree (a larch) which is placed in the taiga beside the hunters' balagan and before which they sacrifice to the master of the sky. Every year they place a new chédzigr, but the old one cannot be touched, not even touched with one's hands. /312/ If it falls down by itself, it will be carried to a storage place -- chédzigr nan'gof (1). In the

[184] 1. In another place it is said that the chédzigr is not repaired until it falls down.

settlement of Kal'vo on the chédzigr, on its crossbar -- two figures, 778 yzikh -- peasant man and woman. A chédzigr is fed on the first 782 day of the month anlong (December) and a second time in July. 824 Everyone sits in a circle, and an old man takes a small amount of food from each, makes chukh-chugind -- a sacrifice -- and places inau. The inau are made out of mountain ash.

824 /312 cont./
● 778 Only representatives of the clan, k:khal n'akhr:, gather 782 at the place where the chédzigr stands. They bring rice, buda, [614] a pig, and vodka. Before the tree there is a bench /labaz/ for dishes. The pig is slaughtered, and its blood is sprinkled around with the comment: "Kur, indyjá -- god, look!" No images of any sort are made on the tree.

The tree is also a road. Everybody gives to the tly-n'ivukh; the sacrifice goes along the tree, then along the thread which goes from the tree and serves as a trail. They start a fire in order to tar the pig. They do not feed the fire, but they do protect it, do not stamp it out. It is absolutely necessary that the sun shine during a sacrifice, and therefore it is occasionally necessary to wait. When a balagan is placed in a new place, they make a new chédzigr.

796 Tlyrokh -- Sacrifice to the sky. Everyone assembles in one yurt. 782 Early in the morning they set out in search of a larch (for the chédzigr), while the women prepare various dishes; then the tree which has been brought in is made fast, and all the dishes are [184] carried in Chinese or Japanese dishes. There are villages where the tlyrokh is never made; in Tevkh only a red dog pag:r kh:an:, is slaughtered instead of a pig and a cock. They tie it up to the chédzigr, strangle it, cut out the heart and throw it upward, treat one another with vodka, and rub the chédzigr with vodka. They celebrate once a year in January -- chamlong. The "word" during tlyrokh: "n'jongarja kinynguch: humguja', kholafti lygyguja'," i.e., "please, that I live well, that there be no sickness."

Then they make a new birch bowl (han'gar:), place it on the ground, and put the sacrifice in it. Ski, a stick, and a cross-bow (narródz:) are placed there; the "word" (prayer) is not said, and they quietly leave. At home they "make" a fire, and when everything is cooked, all the sacrifices are placed between coniferous branches and then placed between two forked pieces of wood (tuurg'a'vk); the fork is thrown into the fire and [789] taken back. This fork is placed under the head at the end of a [776] hunt to protect against the milk'a (the evil spirit). In /313/ the

/313 cont./
796 morning it is necessary to take back the ski and so forth quietly 782 and stealthily. These things are placed so that the Tly-n'ivukh descend the tree, and by these objects they find out the nature of the Tly-n'ivukh and "if he has a good heart," if he will give "risk" /fart/ or not. "After all, five of us go, one caught some thing while another goes on and on pursuing but gets nothing. What is the reason for this?"

731 During a takh -- smallpox epidemic -- in Tyr all the 782 Gilyak assemble, make a sacrifice -- bow, present rice, roots, [165] and berries. First the 120-year-old man Zyavkayu from the vil lage of Dyl'myu sacrifices. They pray before the tree chédzig This old man remembers four big takh.

796 Pal likes a tree with different peculiarities, and on solem 782 occasions such objects are selected. A sacrifice is always made to one's clan Pal-yz' (the master of the mountains), but they a not made to Pila-yz' (the great master). He is most frequently seen on a knoll. One must not shout to him. There is a conversation going on on the other side -- that is Pal-yz'. Pal -- mountain master -- likes a black dog; Tol -- sea master -- a [372] white one. Each large house has two fires, Pal-tuur and Tol-tu [354] If a person has one stove, it is only Tol-tuur, and if he must b bear meat, he goes to a clansman of that khala who has two stoves.

● 778 Tol-takhej -- a takhej of larch; a hammer, chong-chtá 782 is hung on it. Near it is a halynyr (bench /labaz/)on which are 224 placed the carcasses of dolphins, kaluga, and reindeer. And h 225 they invariably boil the dolphins, here the bones are left to lie except the skulls and heads, which are carried away to k:khork n'angof, i.e., a place where they put skulls. During the fynyn only two dishes are placed on the halynyr -- mos' and muvi (kissel/ a jelly-like dish/). It is also from here, in the presen of the entire khala, that they throw a little of everything into Amur, but say nothing -- otherwise another misfortune will occur. -- Then on the takhej they hang tobacco, ag:a (akhyd a bunch, yukola -- pys' and announce that everyone should co out and feed it. This is the main office of Tol. People are se

/546/

Needless to say, there are a number of superstitions connected with seal-hunting among the Gilyak. Thus, the lych, like the above-mentioned odn-tschongr (1), always bears on its

1. See p. 808 above.

Use of the lych for seal-hunting among the Gilyak.

upper side, near the point, a crudely carved face, whose presence is regarded as essential for the successful use of the weapon. Furthermore, superstition requires that, first of all, and before any use is made of a slain seal, its eyes be gouged out with a knife, whereupon the eye fluid, caught in the hollow of the hand, is thrown into the water, and, furthermore, the snout, or, to achieve both things at the same time, the whole head, is chopped off and put into the water. The guiding thought in this is to leave the slain animal in ignorance about its murderer and thus to prevent any possible revenge by its manes causing ill-luck in seal-hunting in the future. The same conception is evidently the basis for the above-mentioned similar procedure of the Manegir with their slain sturgeon and hausen. The Gilyak, however, prize these fish too much to sacrifice the heads each time and may therefore come to terms with this superstition in another and less costly way. Perhaps they content themselves with gouging out the eyes, though I did not see this myself. Their above-described procedure with the

/563 cont./

it to come out from its hiding place (2). For the shamans among

2. Arth. Nordmann, "Ueber den Fischfang und die Jagd der am Amur wohnenden Giljaken /On the Fishing and Hunting of the Gilyak Living on the Amur/ (Bull. de la Soc. Imp. des Natur. de Moscou, 1861, Vol. XXXIV, Sec. Part, p. 251).

the Gilyak, quite apart from the character ascribed here to their songs, which in reality never at any time belonged to them, have nothing whatever to do with hunting, either for bears or for other animals. They never interfere with the pursuits of the practical life, fishing, hunting, trading, of this superstitious, to be sure, but vigorous and enterprising people, and, on the contrary, as we shall see in the following, practice their arts on entirely different occasions. The Gilyak, by the way, do not regard the capture of a bear as an offense perpetrated against it, because through this it is introduced to a life with abundant food, a good home, and many marks of respect. The spirits of revenge can be aroused only by its death and being eaten, and therefore the bear festivals, leading to this outcome, are surrounded by a number of rules of behavior dictated by superstition, whose observance is supposed to ward off misfortune. The other animals are given less consideration, but even with regard to them there are many rules that are not to be neglected without causing future mishaps in connection with the hunting concerned, and, along with this, depending on the kind of animal involved, more or less grievous injury to the profits. /564/ For example, I by accident came across the following superstition concerning the hunting of sables. When I entered the yurt of Miwwach on the lower Tymy on Sakhalin, I saw a sable hanging from the wall beam, which was still completely intact and evidently had just been brought in from a trap. As I was looking at the animal, the wife of the absent owner entered; obviously distressed because I had seen the

ont. /

l, she reached for a fur cap and hung it over it and then, while, she took it from the wall, wrapped it in birch and put it with the other possessions of the house. My to buy it were entirely in vain, despite the high price offered; I was told categorically that it was already ı" (unlucky) that I, a stranger, had seen the animal un- d, but the consequences for sable-hunting in the future be even worse if she were to sell it to me in an intact 1). The Gilyak in all probability behave in the same

1. This superstition, which I also found among the Goldi, is no less prevalent among the Siberian Tungus and was transmitted by them to the Russian hunters in Siberia. Gmelin (Reise durch Sibirien /Journey through Siberia/, Göttingen, 1752, Vol. II, p. 278) for example, wrote of the Russian hunters from Kirenskoi Ostrog setting out in troops to hunt sable: "as soon as a sable is caught, it must be put away properly without anyone's having seen it, for they believe that if anything good or bad is said about the captured sable the rest of the catch will be spoiled."

ward the other precious fur-bearing animals, in connec- ith which they are evidently governed by the same super- belief which I have already discussed above (p. 851) in ng about seal-hunting. The utilitarian standpoint with to this superstition is also evident in the fact that it does end to worthless animals whose capture means nothing Gilyak, for fresh specimens of squirrels and Mustela just taken from the trap were relinquished to me by yak without further ado. If, on the whole, the traveler across far fewer Gilyak superstitions concerning hunting individual animals hunted than is the case with regard

225 mu-ziyəd on the boat supports the assumption that at one
789 time or another the Gilyaks, it seems, regarded a boat as
774 a living thing. Mu-ziyəd on the boat serves, it seems, as a
751 means of guarding the boat against and protecting it from misfortunes.

782 Aside from mu-ziyəd, t'aj is performed on the boat. T'aj
778 means 'image', 'figure,' 'picture.' With shavings (inau) of
532 a branch of rowan (qosk-ɣəks) the pilaŋ makes two figurines.
225 One of the figurines is placed at the prow of the boat and the
789 other - at the stern. I once saw such a figurine on the neck of a representation of the bird ugŋ, placed by the Gilyaks at the bow of the boat. The figurine placed at the bow has its face turned to the sea. We shall come back to these t'aj elsewhere.

782 There is one other ceremony performed on the boat. Before
789 setting out on a hunt the Gilyaks expose the boat to smoke.
225 They light fires of spruce and bogulnik on both sides of the
372 boat and they try to build the fires so that the smoke hit the boat. The pilaŋ takes a branch of spruce or of bogulnik and, starting from the bow and going towards the stern, hits the outside and the inside of the boat as well as the rowlocks with the branches so as to elvlaf-pək-əzd --"lose bad places (evil)". Then the hunters push the boat past the fire into the sea and are off.

225 I watched Gilyak Xitkun who, having already returned from
502 a hunt, put out to sea with the hunters a second time. Five
554 hunters were at the oars. Propelled by strong and simultaneous strokes of five pair of oars the boat took lightly and quickly to sea. Xitkun, firmly gripping the rudder, set the bow of the boat northward, towards the cape barely visible in the distance. The Gilyaks rowed calmly and quietly. They need fear nothing. At the stern of their boat sits an exper-
777 ienced pilaŋ, tested in trips. At the bow are placed a representation of the sea bird ugŋ and the figunines t'aj. They will vigilantly look out for and protect their course.

When the boat became a tiny spot in the distance and its outlines blended with the water, the women who saw off the hunters left the shore for home.

225 After leaving the village the hunters turn northward. They
823 first go to Uiɣ-krə "sacred cape." (1) Once there, they pull
766

the boat out of the water. The pilaŋ picks up a scoop containing the usual refreshments called for by the occasion and

527 the natives of the Amur. An old Goldi who finally obtained
361 them gave them to his daughter when she married a Gilyak
534 from Kola. The daughter probably left them to the community, for now they do not belong to an individual, but they are regarded as sacred. During the bear festival they ring incessantly, and on other extraordinary occasions the shamans make use of them in different ways.

527 Finally, many visitors of the bear festivals are also to be
524 seen playing cards and checkers. Both games the Gilyak
177 have taken over from the Russians and Chinese, but the
777 Chinese passion for it they have fortunately not imitated. They do not play for money, and they play without great emotion. Russian as well as Chinese cards are used. (1)

1. The Chinese playing cards are about seven centimeters long but only two centimeters wide, and are decorated with various figures. About 120 cards are used in the game.

Finally, we must add that, according to the belief of the Gilyak, the village in which the most bears have been celebrated and consumed, has the greatest prospect of abundance. The pelt and the skull of the dead animal are kept and represent a sort of talisman.

527 Occasionally the Gilyak also have a pig festival, that is,
782 the comsumption of a pig (if they can get hold of one) is accompanied by ceremonies. The pig is not brought into the house through the door but through the window; on the floor, besides the pig, are placed all kinds of delicacies, such as millet porridge, berries, etc., as well as all the idols that the people happen to have. [238] Then the idols are bowed to and the feast begins.

On the island of Sakhalin there is a festival known as cheung which falls around Easter. It consists merely of a feast, at the beginning of which bits of food are thrown in all directions, probably in order to ask the gods for abundance.

764 The burial ceremony is identical with that existing among
the ancient Slavs (1), that is, the corpses are burned. The

1. The Arab Ibn-Foslan who traveled through present-day Russia in the years 921 and 922 witnessed cremations among the tribes living on the banks of the Volga (called Itil by him). Spiess, Vorstellungen vom Zustande nach dem Tode. 1877.

The mother delivers the child herself, and only if the mother is entirely too weak does the midwife help at the delivery.

The Gilyak do not know how to give obstetric help to a woman in labor. If a woman is not able to deliver the child she dies, and, in this case, the child will perish too. But that happens very rarely. During a more than ten years' stay in the region of the river Tym I heard only once that a woman died during the delivery.

Among the Gilyak the first childbirth is considered to be the hardest. It is especially hard and painful for very young women who are not fully developed physically.

Girls are strictly forbidden to laugh when people talk of delivery or confinement, and they are supposed to stay serious during the act of birth. If they fail to do so, in the future they will go through very hard deliveries and suffer exceedingly great labor pains.

In order to speed up the discharge of the placenta chiplings of a certain wood (sambucus racemosa) are put into the mouth of the woman in labor. The bitter disgusting taste of the wood causes vomiting which, according to the belief of the Gilyak, should accelerate the discharge of the placenta (ehlaud cuind, that is: the child's food). But, if the placenta nevertheless is not discharged after a while the woman dies. This [758] happens rarely but does occur once in a while among the Gilyak. The placenta is wrapped in a towel and hung up on a tree in the wood not far from the house.

If a child is born with a caul which, however, happens very rarely, the caul is not thrown away but is carefully dried and kept with other household articles. For the Gilyak believe that this caul which in the language of their tribe, is called ehlan ok (the suit of the child) brings luck to the whole family.

The newly born child is not simply called a boy or a girl. If a girl was born it is, for the time being, called mukin ehlan, that is: tailless child (mukind usually is the name for a dog with a very short tail). But if a boy was born his relatives say: moi ivend panend, that is: one who has a penis was born.

622 to be killed by the consent of their owners, for it is not the
574 village as such but individuals in it who are the owners of
the captured animals. Once an agreement has been reached
796 on this point the animals intended for slaughter are led from
777 house to house several weeks before the fixed date and must
spend a night in each, in order to bring its inhabitants luck
796 by their stay. During this time the animals get only a little
food, but at the end of it they are indemnified for their in-
voluntary fast by being taken throughout the night from house
to house and fed the choicest tidbits, namely, fresh and dried
fish, berries and a thick gruel prepared from millet.

796 While making the rounds through the village, the bears are
563 irritated by being pricked, and they are enraged by a mock
hunt staged on them with lances. The bears are ones that have
been captured young in the woods or bought full-grown from
the Chinese or Manchu who are also quite numerous in the
796 Gilyak territory. During the mock-hunt the Gilyak naturally
take the precaution of tying the animals in such a way that
they cannot easily get at their tormentors. Close behind the
front legs they tie a strap around their body to which are
attached rings through which are run iron chains. To these
chains, in turn, they fasten thick belts of seal hide and of
considerable length, in such a way that some go forward and
others backward. A number of Gilyak take hold of these belts
and in this way they are able to force the bear to stand com-
pletely still by alternately tightening the belts depending on
whether the bear is turned frontwards or backwards when it
wants to attack its leaders.

796 Outside the village there is a kind of fence made of sturdy
417 willow sticks, which has an opening for an avenue that is also
fenced in on both sides with similar willow sticks. Inside
this enclosure the bear, after it has finished its tour through
796 the village, is tied between two tree trunks. There it is left
541 to itself for a while, while the inhabitants of the village amuse
231 themselves with the dog race almost always held at these
437 celebrations. In the village visited by Jakobsen they also had
a track especially constructed for this purpose, which, how-
ever, was not very long. After the dogs had been led to the
track by their owners and placed next to each other, they
were let loose at intervals of a few seconds, but they all
arrived at the finish about the same time. There is, by the
way, no idea of winning prizes at this race, since such do
not even exist. Rather, it might be called a purchasing race
since the race serves to place the good qualities of the dogs
in the right light and thus to arouse a desire for buying. The

22: Knox I-2 (1866) 1870 Gilyak

These buildings were the receptacles of dried fish for the winter use of dogs and their owners. The elevation of the floor serves to protect the contents from dogs and wild animals. I was told that no locks were used and that theft was a crime unknown.

The dwellings were generally divided into two apartments; one a sort of ante room and receptacle of house-keeping goods, and the other the place of residence. Pots, kettles, knives, and wooden pans were the principal articles of household use I discovered. At the storehouses there were several fish-baskets of birch or willow twigs. A Gilyak gentleman does not permit fire carried into or out of his house, not even in a pipe. This is not owing to his fear of conflagrations, but to a superstition that such an occurrence may bring him ill luck in hunting or fishing.

It was in the season of curing fish, and the stench that greeted my nostrils was by no means delightful. Visits to dwellings or magazines would have been much easier had I possessed a sponge saturated with cologne water. Fish were in various stages of preparation, some just hung upon poles, while others were nearly ready for the magazine. The manner of preparation is much the same as in Kamchatka, save that the largest fish are skinned before being cut into strips. The poorest qualities go to the dogs, and the best are reserved for bipeds.

Though the natives do the most of the fishing on the Amoor, they do not have a monopoly of it, as some of the Russians indulge in the sport. One old fellow that I saw had a boat so full of salmon that there was no room for more. Now and then a fish went overboard, causing an expression on the boatman's face as if he were suffering from a dose of astonishment and toothache drops in equal proportions.

There were dogs everywhere, some lying around loose, and others tied to posts under the storehouses. Some walked about and manifested an unpleasant desire to taste the calves of my legs. All barked, growled, and whined in a chorus

/49 cont./

771 For him, the prototype of everything that exists is, naturally, man, as the creature whom he knows and understands best. Everything reduces itself to man: everything visible in nature is a form in which is invested god-man. With such a world view, the religion of the Gilyak represents a combination of pantheism, the cult of animals, fetishism, demonism, polytheism, etc., all of them against the general background of anthropomorphism.

772 776 The Gilyak calls the universe "kurn," but with this same word he denotes the concept of a personal, man-like god. With the word "pal'" he denotes mountain and the god -- "master" of the mountain; with the word "tol'" -- the sea and the god of the sea. The universe is only the form which has been assumed by great image of the personal god, "kurn."

823 The Gilyak calls his native island "mif" (the earth). It is a living, divine creature, whose "head" (Cape Marii) and "chin," "Pytykry," lie in the Sea of Okhotsk, while its "legs" are two peninsulas in the Korsakov okrug which lie in La Pérouse Strait.

[782] I myself have made some trips across the "Chin," have seen how respectfully sacrifices were made by my companions and prayers were delivered to the earth concerning our successful journey. I made my way up to the top of the very "Head" [798] of the earth, which, according to the beliefs of the Gilyak, does not leave unpunished a sacriligeous offense against it by the feet of mortals, and saw the majestic bald spot of this divine Head, covered with sharp stone teeth instead of hair /50/ (the result of weathering), which bring superstitious terror on the Gilyak... The majestic crest of the top of the high cape looking out on the boundless sea is indeed very imposing!

Moreover, the parts, even the smallest ones, of this grandiose being -- the "mif" -- are the same kind of living independent creatures as the divine whole. Here is the majestic mountain Engel'spal', which rises alone over the northern dunes; it is the living reindeer of the god of the universe, "kurn," on which he traveled over the island, putting it into its present state, habitable for man. The valleys were

796 231 Having bathed the bear and teased it to their satisfaction and made fun of it, they tie it between two posts and leave it alone. It generally uses this respite to give in to the instinct, now futile for it, to dig the ground with its paws for a lair.

The feeding of the bear continues for several years, until the cub becomes a well-fed, large beast, and then they begin the prefestival preparations. This means extensive preparations. For several days, one will have to feed and entertain with all kinds of delicacies, not only clansmen and villagers, but also a great number of guests from other places and, /61/ in addition, the numerous dogs on which these guests came. All this requires trouble, work, and great expense, because, besides dishes of local products, large purchases of rice, buda, flour, tea, sugar, and vodka or Chinese grain vodka are made. Here is [614] [182] displayed that remarkable clan organization of the Gilyak, so impressive in its harmonious combination of social solidarity and individual freedom.

796 621 476 There is no compulsory organ to assemble products, to compel, demand, or control. Conscious of its obligation to participate in the common religious affair, each family works with all its might, not out of fear, not from conscience, cooks all sorts of dishes, helps with the chores, and contributes its mite, according to its means, toward the expense of the purchases. The money and supplies are handed over to the master of the bear, who disposes of them without control. No one reprimands anyone, for each one strives to make the festival 796 come off most brilliantly. Several days before the festival, which is generally celebrated in February, a different kind of work begins -- the building of an arena for the killing of the bear. The arena consists of a small stamped-down plot of [778] ground, in which, depending on the number of bears that are being killed, is placed one or several pairs of sacred trees-posts hung with inau and covered with complicated ritual carving; a bear is tied between them. Up to this plot of ground is stamped a long, narrow alley, on both sides of which, in two rows, are set up 30 pairs of young trees: the first 15 pairs are fir; the other 15 are purple willow.

for the head. There is another justification for this custom i the winter houses of the Amur peoples. If one lies with his head against the wall, he exposes himself so that the rats, which are exceedingly abundant in these houses and which al ways run along the walls, would be constantly running over th face. This alone, however, would not make the Gilyak refus to allow even a stranger to assume this position on their kang if superstition did not demand strict observance of the traditional custom, and afraid of any violation of it, no matter by whom, as misfortune for all the inhabitants of the house.

Due to the lack of historical data, it cannot be determined when the Chinese winter-yurt reached the Gilyak on th Amur and, gradually spreading downstream, supplanting the earth yurt, reached the Amur-Liman, the coast of the Sea of Okhotsk, and the Liman coast of Sakhalin. In the reports of Pojarkof and Nagiba, who spent the winter among the Gilyak at the mouth of the Amur and along the Sea of Okhotsk in 164 45 and 1652 (3), there are, unfortunately, no hints which wo

3. See pp. 216, 219 ff. above.

permit conclusions about the nature of the Gilyak houses at th time. In the case of another Paleo-Asiatic people, the Kamchadal, we see the original earth-yurt completely disappear before an imported, foreign type of house construction within the short space of about 50 years. At the time of Kraschenin and Steller (in the forties of the previous century), all the Kamchadal still lived in earth yurts of the type described abo Even in 1779, when Clerke, the successor of Cook on the latt third voyage, visited Kamchatka, at least the south of the peninsula, between Peter-and-Paul's Harbor and Bolscherezk

4. Tagebuch einer Entdeckungsreise nach der Südsee in den Jahren 1776-1780 unter Anführ. der Capitäne Cook, Clerke, Gore und King, transl. by J.R.Forster, Berlin, 1781, p. 333.

/313 cont./

to shout: "Yrk-lu? -- Is it enough?" -- "Yrkrá! -- It is enough!" Everyone approaches by houses and feeds it, and each says his own: "Send the dolphin! Send the little fish!" After this everybody must return together at the same time, for otherwise it would be a heavy sin if they were to meet each other.

The customary takñej of a hunter is the individual uig. Anybody who touches it gives a dog. If a member of another clan has insulted a lezing (the place for the bear festival), the vopund kymlydz: assembles, and they judge him; they demand a bear or a luk -- a shaggy dog. Pyl-yz' -- the spirit of the master is fed each month. If they have caught a tasty fish, /314/ they cut themselves a piece and him a piece, and when his pieces have stood for half an hour, they eat them themselves.

When they build a pila uigryf (house in which the bear festival is celebrated), it is imperative to celebrate a bear festival. If there is nowhere to buy a bear, they must kill a luk: -- a shaggy black dog ("it is just like molk," i.e., like a bear). If the house is simple, they kill only dogs, two to four in number, without regard to kind. If a post falls on a lezing, they kill two black dogs. It is not at all necessary that a man be killed by a bear for a pila uigryf. After a bear festival, when the members of other clans are leaving for (their own) homes, the bear bones are tied together with a thong and their dogs are killed at a special chédzigr.

It is not permissible for a single clan in a single village to make two lezing, but there can be several uigryf. Any house where a bear festival takes place is an uigryf.

The Building of a House, Its Plan, and Rites Connected with the House

342 [087] Before laying down the first row of logs, they try sprinkling flour: if in the morning there is an imprint of a human foot, this is good; if of a human hand or of a beast, this is bad, and then they change the place. If there are no imprints of any kind, this is also good.

342 354 Explanation of the plan of a house (see drawing). 1. Shy - door. 2. Tol-erkh pusk fakh -- window facing the hearth of the "master" of the sea. 3. Kem-fakh -- second window to the left of the door. 4. Ponakh-fakh -- window over the middle plank-bed. 5. Pal-erkh ponakh-fakh -- window facing the master of the mountain. 6. Kyly nakh fakh (mat'k:as' n'ekh fakh) -- windo alongside the long plank-bed. 7. Mat' k:as' akhr fakh -- window near a small post. 8. Pal-erkh pusk fakh -- window on the side 342 of the mountain. 9. Kangyl -- the place for tying dogs. 10. Tly k:as' -- large post. 11. Kil erkh mat' k:as' -- small post. 12. erkh mat' k:as' -- post on the side of the sea. 13. Mat k:as' -- small post. 14. Hytyfi mat k:as' -- middle small post. 15. Pi'l digr-irku k:as' -- large elongated post under the matka. 16. Pal erkh' mat k:as' -- small post on the side of the mountain. 17. Kylyná mat' k:as' -- long and slender little post. 18. Shyvos n'ich fakh -- small stone near the threshold. 19. Pi'la k:as' nir fakh -- small stone at the threshold on the level of the floor. 20. Pi'la digr -- elongated matka. 21. Pal erkh tuur -- hearth o [354] the master of the mountain. 22. Tol erkh tuur -- hearth of the [335] master of the sea. 23. Tyjf -- cross log, foundation of the house 24. Kylzhutá -- the middle of the plank bed where they put a p son who has been wounded by a bear. 25. Uig dz:onkh -- tabooe [078] corner for the bear's head and so forth. 26. Ke dz:onkh -- upper corner. 27. A dz:onkh -- lower corner. 28. Pal erkh pusk dz:onkh -- corner on the side of the mountain for tabooed things. [076] 29. The floor is divided into two halves: a) pal erkh kyl, and b) tol erkh kyl. On each half is placed only that which has to do w the appropriate spirit, with tol or pal'.

Plan of the House of the Amur Gilyak

/Three letters in the terms above have been changed in the translation: ʒ = dz; χ = kh; ш = sh. The other letters are from the Latin alphabet; see the table on p. 36 (foreign text p. xxxix)./

the women boiled the grandchildren, ate them, ran into the taiga, and disappeared.

Chnyr-chkhnaj. If a loss has occurred, they make chnyr-chkhnaj, a figure of grass, and beat it (thresh it); if the chkhnaj is good, the lost thing will be found on the following day. If it is not known what milk caused the harm, chnyr-chkhnaj is hung up over the plank bed and fed.

For stealing bear meat or a fishing rod, the face is maimed.

Kleptomania. There are thieves-kleptomaniacs, for example, Sentukh from Ady-Tymi. After his brothers threatened to kill him, he ran away to /344/ Lungvo. There he and his wife continued doing the same. He has one son -- a rat sitting in his belly. The things that tempt him shine in the dark for him. The Gilyak confined themselves to depriving him of the things.

The shaman Koynyt's father, from Tro, once noticed that his trousers had disappeared. He began to shamanize, found a rat in the belly of a woman, killed it, and on the following day the woman died.

Over an insult it is necessary to fight with sticks (chkharkirvand) or pay tkhusnd, or take something by force. Frequently they kill over an insult.

Fortunetelling with a stone parnkhasind, with a kettle. The parnkhasind replies thanks to the chekhn. If the kettle swings straight, one has hit the mark; if to the side -- one has not hit it. If one has hit the mark, he must make a wooden chkhnaj, hang it around his neck, and feed it.

/369 cont./
799 baptism exclusively for the purpose of obtaining a certificate of legal marriage to such and such a Gilyak woman, certificates which give the right and opportunity to secure governmental assistance for the return of the wife in case of her abduction. I have, moreover, met a great number of baptized Gilyak from the mainland, and from my conversations with them I have been convinced that they do not have the slightest idea of even the ritual side of Christianity, let alone its substance. Nevertheless, the Gilyak is capable of grasping the idea of the one God with His attributes as taught by the Christian religion. I could say a great many things about the methods used on the part of converters of natives to Christianity, but this /370/ is not the appropriate place for it. As for the Sakhalin Gilyak, an especially talented missionary could perhaps make some progress; many generations will have to pass, however, before the Gilyak breaks his ties with the gods which provide him with fish, seals, and sable. The baptized Goldi and the Amur Gilyak are now pronounced skeptics in their attitude toward religion in general, but they continue to make sacrificial offerings as before. It must further be added that the Sakhalin Gilyak have no idols.

IV.

Juridical Life

581 Marriage. Despite all the remains and remnants of the old order of life of which I have spoken, the modern marriage of the Gilyak, from a juridical point of view, has a completely individualistic form. One cannot call it, in the strict sense of the word, either monogamy or polygamy, but one cannot call it communal, either.

583 584 In the eyes of the world every married woman is the wife of a given individual, and her children are the children of that individual. Violations of fidelity on the part of the wife bring 584 bloody retribution from the husband. The Gilyak who catches his wife in flagrante delicto with a stranger kills the seducer and beats

/699 cont./
After these preliminary and general remarks concerning the bear festival of the Gilyak, I shall turn now to a detailed description of it. At the beginning of 1856, I was visited /700/ at the Nikolajevsk post by the oft-mentioned Gilyak, Judin from Tebach, renowned among his countrymen as the organizer of great bear festivals. Since he was very favorably disposed toward me and even owed me a debt of gratitude, I asked him to give me an opportunity to attend one of these festivals from the beginning, whereupon I was told in reply that within the next few days such a festival was to take place at his house and that he had come to Tschorbach, as the Russian post was called by the Gilyak, precisely in order to make a few purchases for the forthcoming festival. With my friend and later colleague at the Academy, C. Maximowicz, who was a skilled draftsman and happened to be visiting me at the time, we set out for Tebach on January 9 (21). After spending the night in Allof, we entered Wair about noon on the following day, where we saw traces of bear festivals that had already taken place: one of the houses was distinguished by a tall, slender little fir tree which stood in front of its transverse walls on either side and had most of the bark and all the branches removed up to the top, where a scanty crown towered over the gable of the house. A cord ran from one little tree to the other, slightly above the ridge of the roof, and from it bundles of curled wood-shavings, the so-called zach of the Gilyak, hung down to the roof. A stick stuck in the snow near the house door likewise bore on its tip a fir branch and a bundle of wood shavings. There was a bright full moon when we drove up before Judin's house in Tebach, which was decorated just like the one in Wair. As we were driving up the long, bank steeply sloping down to the river, on whose ridge the village of Tebach lies, we heard noisy cries of jubilation, and now we saw a crowd of Gilyak moving about in front of the house. They were young men from the village and other guests invited to the feast, who, in a gay mood, were playing various games that are always associated with a bear festival. The games looked very similar

/704 cont./
796 described above. for the latter was done after the hind legs of the
231 animal had already been fettered in the cage. but here the bear could make full and free use of all four extremities and its teeth. While the procession halted outside the house. all the ropes and straps required for carrying out the feat were held in readiness. Seizing the moment when the mighty animal stood fully erect. one of the Gilyak threw himself from the front around its neck and embraced it as firmly as he could. At the same moment a second one muzzled the animal. Simultaneously several others seized the animal from the rear. pulled its hind legs from under it by means of nooses. and held them against the ground. The bear fell on its front paws. but here. too. someone was ready to press them against the ground with a pole and to fetter them. Thus through quick and concerted steps the animal was completely disarmed and fettered in an instant. and now the auxiliary ropes needed on its neck-band could be put on in peace and safety. As soon as this was done. all the Gilyak jumped off the bear. all the knots and nooses fastened around its snout and paws with special skill were loosened with one jerk. and the bear again stood there on its chain entirely free and unfettered. except for the neck and body band. roaring loudly. repeatedly shaking itself. Now. together with the small bear. it was led back into the house and regaled there with finely crushed ice and cowberries /Strickbeeren/. whereupon. after a short pause. the same procedure was again repeated several times. that is. the small bear was taken immediately from Judin's house to another one. but the large bear only after having been led in and out four times. or sometimes only twice.

796 Immediately after the bears had been removed. the male youth
338 of the village began to carry large and small sticks of alder and
998 mountain ash into the house and to deposit them at the place where the bears had stood. until there was a large pile of them. Everybody who had a knife. except for the women and girls. began to cut the sticks at one end. or. more properly. to whittle them. that is. to make the so-called nauwa (1) of the Gilyak out of them.

[104]

1. The s here is to be pronounced soft. like the French z.

998 /704 cont./
796 Many of them were whittled with the knife on only one side. but
231 most of them on two opposite sides. and some all around; indeed. from some of them very fine and gracefully curled wood-shavings (the repeatedly mentioned so-called zach of the Gilyak) hung down from the upper end of the stick to the lower one. This symbol. which among the Gilyak accompanies all religious performances based on the fear of the influence of evil spirits. such as the giving of offerings to the river (2) conjuring away storms (3). etc..

2. See pp. 802-804 above.

3. See p. 1088 above.

may not. of course. be absent from the bear festival. Thus we already see it exhibited over the roof of the house in which a bear festival is to be celebrated and at the same time a part of the bear cult is to be enacted. We were to /705/ encounter it in more copious masses as the bear festival progressed. For the moment. however. the whole heap of whittled sticks was again carried out. in order to be used on the following day. While the men. youths. and boys carved on the sticks. the women prepared a fresh supply of mosuj. into which this time they also mixed pulverized fir-needles (from Picea ajanensis. Fisch.. Gilyak twisk -- an activity which lasted until evening.

796 Meanwhile the leading of the bears in and out of the other
231 houses of the village went on without interruption. The Gilyak can never have enough of this entertainment. and they take as lively an interest in all the individual incidents that occur in connection with it as is shown among other peoples at. say. contests. festive games. or dances with the merry music. which in this case is provided by the roaring of the bears. Everyone has an opportunity as the head of the one or the other row of bear-leaders to display his prowess. intrepidity. skill. and presence of mind: the closer he allows the infuriated animal to approach him. the greater the danger to which he exposes himself. the louder is his share of the applause and the greater his fame and distinction among the people. Every detail is followed attentively and afterward

/733 cont./
796 out obliquely from the smoke vent and with a bundle of curled
342 wood-shavings hanging from its tip. such as I saw in the village
184 of Tyk. Here. the road carved out of birch bark probably also remains on the smoke vent. while the bear's head and skin is lowered through the smoke vent directly onto the platform of the hearth.

796 In the meantime. in the interior of the yurt there. the rack
184 for the bear's head. made. just as on the mainland. out of unpeeled alder poles and richly decorated with fir branches. has been readied. It stands close to the rear end of the hearth platform in the passageway between it and the rear bench. or bench of honor. that. in a place which corresponds exactly to the one which it occupies in the Gilyak houses built in Chinese fashion.

796 Since the hearth platform in a large earth yurt is quite spacious.
184 two separate firs can be kindled on it. corresponding to the two
354 hearths in the tschadryf. over which the kettles used to cook the
252 bear meat as well as for preparing the other dishes hang from the yurt beams. The fire closer to the bear rack is the kotr -- or

[824] tschchyf (1) -- tur. the bear fire. in which fresh branches of fir

[192]

1. As the bear is usually called on Sakhalin.

trees. and especially of the cedar shrubs so common in northern Sakhalin. are burned during the preparation of the bear meat and also at other times during the bear festival on account of the popular fragrance.

The wooden curls (zach). being regarded as a symbol of holiness. purity. and inviolability. are an essential ornament in the interior of the earth yurt. They always hang down in a long bundle from the center of each of the four crossbeams supporting the conical roof. and at the time of the bear festival there number is increased by four new ones. which /734/ are put in the four corners of the yurt. In the Gilyak houses. on the mainland one usually sees only two of them. and not always even these. suspended from the two supporting posts of the house. but their number seems to increase as one approaches the Ainu. among whom they are used under the name inau.

Ainu RX2

796 horizontally a few times and murmuring a few words which Schen
782 did not understand. This is repeated in front of the bear's cage,
[535] whereupon the women and girls execute a dance in front of it and in doing so turn toward the bear with caressing glances and movements. /Page 738 is blank, and the following unnumbered page is the title page for the appendix. "Excerpts from the Travel Books, Notebooks, and Journals Left by the Author."/

/739/

1. Religious Conceptions of the Amur Peoples. -- Idols, Amulets -- Shamans.

Religious Conceptions

796 1. Gilyak. It is very difficult to obtain information con-
124 cerning the religion of the Gilyak. I received it from the long
Jutschin and Labgun (*). They call "God" ŷŷigy (**) and designate

[361]

* From the villages of Patchá and Wassj at the mouth of the Amur.

[104]

** Wherever the author used ŷ and ŷ. from the Russian alphabet. they have been replaced by y and ja /according to the system used here. these letters would be transliterated as y and ya. respectively/.

him as the good one. kingullisch. an attribute that means the same as good (nontz). They did not understand my question as to whether "God" lived in heaven. or where else? -- and said only that they did not have any god (idol) in their yurts. I all the more doubted the assertion repeatedly given to me by the Gilyak that they did not have any idols. since I myself have human and animal figures carved in wood from the village of Kulk (**). But they

[361]

** On the left bank of the Amur. below Nikolayevsk. also Kuégda. Kuégra. Kuégri-wo. see pp. 448. 535.

/739 cont./ But they
insisted on it and went on to say that the god of the Manchu was
called Maü and that the Manchu have idols carved in wood, human
figures in various positions, with a pipe in the mouth, the arms
akimbo, and the like. The Manchu bowed before these idols, but
the Gilyak did not do this when they went to the Manchu.

I inquired further as to whether and how the Gilyak pray,
but always received the answer that they do not pray. My next
question therefore was whether they had an evil god (or spirit) be-
side and beyond the good god, a question which seemed to surprise
them, and I realized that the placing together of my words "god"
and "evil" seemed absurd and contradictory to them. Hence they
replied in the negative. But since the Gilyak /740/ are full of
superstition, I can only explain as follows the contradiction be-
tween their idea of "God" described here and the evidence for vari-
ous idols and their shamanism that I found:

Among the Gilyak there is an obscure and hazy conception
of "God," of a supreme being, who has the attribute of the "Good
One" in full measure and without any admixture of evil and who
is revered by human beings. But this conception is a wholly ab-
[682] stract, completely empty one and does not at all fit into the life,
into the customs and practices of the Gilyak; there is nothing con-
crete about it for them, and therefore they only know the word
"pray," but not the act itself. Also, they know nothing about
"God," in view of the complete emptiness of the concept, except
that he is "kingulātnch, the Good One." In the real, concrete life,
however, the Gilyak experience much that is bad and evil, and
there are many forces of Nature which, especially in hunting and in
fishing, are often obstructive, menacing, and even fatal for them,
such as the often unfettered power of the elements themselves, the
often fatal strength of beasts of prey, the occasional and to them
inexplicable absence of fish, and the like -- forces against which
man, and all the more a primitive people completely dependent
upon Nature, must feel his powerlessness, and cannot always
escape such forces of Nature and they do him harm; to him,
therefore, they are so many evil events which he views (from the
general, egoistic-teleological, primitive viewpoint of man) as

/741 cont./
tradition, reaching any pretensions of a religious one or completely
driving out and replacing that empty concept of God among the
Gilyak.

I realized that the wooden idols of the Gilyak do not
actually enjoy any very great esteem or reverence among them
[124] from the fact that the Gilyak from Kulk from whose deserted yurt
/742/ I had appropriated a collection of their idols in the summer
of 1854, did not seem to notice the loss upon their arrival in the
village, or at least did not consider it worth mentioning. In the
same village I also once saw a small boy come out of the house
playing with a wooden bear figure, a sign that these things were
not as inaccessible to him as they certainly would be if they en-
joyed special veneration. (Bm. I, pp. 22-27.)

Idols and Amulets in Human Shape

2. Gilyak. The various idols carved in wood, some-
times human or sometimes animal in shape, which served to ward
off danger, misfortune, sickness, and the like, were designated
to me by the Gilyak with the general names of kāgn and tschngai (i).

[199] 1. The word mafk also seems to refer to
idols in general.

In addition, however, special names for individual figures were also
given to them. I create myself a new idole human form
(Plate LIII /p. 1253/, Fig 1) or at least a bust of one is found as
a rule in the yurt of the Gilyak on the crossbeam of the roof-frame,
above the sleeping benches along the narrow side of the yurt away
from the entrance (that is, above the place where among the Olcha
and Goldi the similarly-shaped sīwa stand). Sometimes, however,
the Gilyak wear similar small idols on their chests, to which they
give the name panych (Plate LIII /p. 1253/, Fig. 5). If a Gilyak
is seriously ill, the shaman carves such an idol for him, or advises
him to carve one and to wear it so that he will become well. But
[756]

/742 cont./
it is not the general custom to wear idols around the neck. Often
it is not exactly an idol, but some other wooden kind of amulet, straps
knotted in a ball and the like, which is put around the sick man's
neck on the advice of the shaman and worn even after recovery.
[126] Such an amulet is called nqif and kisij. From Judin in Tebach I
obtained an amulet in the form of a carved bow with a human face
(see Plate LVII /p. 1257/, Fig. 9). (Bm. I, pp. 57, 58.)

3. Gilyak. The village of Pogbok on the west coast of
Sakhalin. In one yurt I saw my host cut long curls of wood-shavings
on a stick. When these were quite voluminous, he cut off the whole
bundle from the top of the stick and tied it together there. This
zach was intended for a sick woman in the yurt, who had pains in
her chest and sat there groaning and complaining. The zach was
tied round her neck, and she tucked the ends carefully in her
bosom, pressing them against her body. This was supposed to
be a remedy. In fact, after she had received this medicine, the
woman stopped groaning and behaved very calmly and quietly the
rest of the time. Thus, in this case, as often happens, a super-
stition may have a curative effect. The zach is therefore still
used on Sakhalin as an amulet /743/ against sickness and seems to
take the place of the various forms of idols and similar figures
which are used for similar purposes along the Amur and Liman.
(2 W.R. I, p. 6.)

4. Gilyak. The idol in human shape illustrated on Plate
LIII /p. 1253/, Fig. 1 was named to me by the Gilyak as mvihr.
It is distinguished in shape by having only one arm: the other one
was omitted intentionally. I was unable to learn what the circum-
stances were with regard to this representation. This idol, too, is
carved by a shaman, or upon the advice of one, for warding off
[126] sickness. I acquired it in the village of Kulk. In the same vil-
[352] lage among the belongings of the Gilyak there had been put away
for the summer in a storage chamber, I found carved idols of
another kind, but likewise of human shape. They were cylindrical
pieces of wood, on one side of which was a crudely represented
human face. The upper end of the wooden piece is conically
pointed and bears a sort of cap of thin strands of bark, which hang

/743 cont./
down to the forehead in front, but over the entire wooden piece in
[532] back and seem to represent hair. Below the face the hair is fas-
tened to the wooden piece by similar little bands of bark. Plate
LIII /p. 1253/, Fig. 2, shows such an idol. Several such idols
stood in a little house made out of boards and covered with loose
grass, which is shown on Plate LIII /p.1253/, Fig. 3. These idols
were named for me by the Alhof Gilyak as tybyx. The Gilyak
Surgin, however, did not know this name and used the expression
tyf-yzigy, i.e., house god. This was the first time that I heard
the word yzigy used in connection with the idols of the Gilyak, and
I believe that this was done only in order to make me understand.
I was likewise unable to find out whether by tyf, that is, house,
the yurt of the Gilyak or the little idol-house was meant. Since
the latter bears the name kāngn, I must relate it to the yurt of the
Gilyak, and it therefore seems that these idols mainly play the part
of lares or guardians of the house. (Bm. I, pp. 58, 59.)

[778] 5. Gilyak. In the Gilyak village of Patt (on the right bank
[184] of the Amur) I saw three idols standing outside a storage chamber,
[532] human figures hewn out of blocks of wood, very similar to those
[171] of the Olcha, though not with the particular expression which
seems to be characteristic of all the idols of the latter. When I
inquired, the Gilyak informed me that they revere these kāgn
like gods. In Patt, they said, they are also kept in the yurts, but
not among other Gilyak. I then had the idols in the yurt showed to
me: three large, wooden human figures with old, smoky zach
around their necks, as is also the custom among the Olcha, stood
there on the beams of the yurt above the rear sleeping-bench. --
[778] In the village of Kulk, too, I saw idols in the yurts, standing in the
[532] same place as in Patt. This is a very dark spot in the yurt, con-
[184] cealed from sight, and anyone who does not know that the Gilyak
[352] keep their idols there will not easily find them. Many a yurt may
therefore be furnished with idols, while seeming to me not to have
any. But many a one actually does not have any, as I discovered
in Wait. -- It seems to me that /744/ the farther downstream one
goes on the Amur the less esteemed or at least less obviously
revered the idols are. (I W.R. II, pp. 119, 137, note 5.)

/744 cont./
[778] 6. Gilyak. Through C. v. Ditmar, following his visit in
[755] Tebach for the bear festival, I obtained a series of Gilyak idols
[532] which in part refer to the festival itself, such as Fig. 3, Plate LVIII
[760] /p. 1258/. In part to other things. Subsequently, I learn about their
significance enabled me to obtain new insight into the religious
views of the Gilyak. These idols and representations of various
kinds are amulets intended to keep the various sicknesses away
from man or, if they have attacked him, to remove them. Most
of them are made with flexible joints and for that very reason are
supposed to remove the stiffness or sickness of certain limbs (*).

* See Plates LIV /p. 1254 / and LV /p. 1255 /.

For example, Figure 2, Plate LV /p. 1255 /, with a jointed body,
is intended for removing sicknesses of the back and body; the one
with jointed legs (knees), ibid., Fig. 4, for healing sicknesses of
these extremities. The large figure with jointed head, back, and
legs, Fig. 1 on the same plate, the tschalutscha-tschngai, is made,
as was mentioned above (**), in connection with the birth of children

** See p. 1046.

and held in front of them so that, by looking at it, they may be
spared ailments of the neck, body, or extremities. The small idol
with a cut-out in the chest and jointed arms and back, Plate LV
/p. 1255 /, Fig. 3, is intended for curing ailments of the chest,
coughing, etc., as well as ailments of the joints concerned.
[760] All these idols or amulets, the tschalutscha-tschngai not ex-
pected, are fed with berries and other things in order to pacify
their power or to win their favor, the wooden pieces bearing traces
of this. These representations, however, are not worn around the
neck, but are hung on the wall in the yurt.

Related to these idols are two amulets that have a similar
[778] purpose: they are the lalē and kisij (Plate LX /p. 1260 /, Figs. 1
[532] and 2). -- The former is an iron ring, open at one place, which is
[755] worn around the head to prevent headaches. The two opposing ends

/744 cont./
[778] run out on either side into two points, one of which represents a
[755] lizard, the other a snake, the similar shapes of both ends facing one
[532] another alternately. Unfortunately the specimen under discussion
is somewhat worn by frequent use and is lacking the lizard at the
one end.

The other amulet is an iron semicircle, from which hang
[778] figures of different significance made of the same metal, specifi-
[532] cally: at the one end, a crude human shape and a roughly triangu-
lar piece that, according to some of the Gilyak, is supposed to
represent a ptarmigan, and at the other end an identical alleged
ptarmigan and a heart; in the middle, finally, a roughly human
shape with two heads, which is supposed to represent the kins, the
evil, destructive power, that is, the devil. According to the re-
[753] ports of the Gilyak themselves, they believe that sickness is nothing
but the kins gnawing at a human being and finally fatally devouring
[761] him. That is the end of all who /745/ die of sickness. It is no
[755] wonder that with such a belief the Gilyak do not claim heaven for
the souls of those who die of sickness, but have them wandering on
earth, while the souls of all the murdered and even of suicides fly
[776] to heaven. According to Gilyak belief, the earth is the abode of
countless kins or devils who hide in the forests and mountains, as
well as in the water and everywhere. The kins are represented with
[532] two and three heads by the Gilyak, perhaps in order to indicate
[778] with the extra ones, in contrast to man, their power over the
latter (1).

1. According to the Gilyak, one of the heads
on these two or three-headed forms is a human
head. This therefore indicates that the kins
has seized the human being.

I do not know the significance of the alleged ptarmigan,
[778] if that is what they are. The heart, however, has reference to the
[532] purpose of the whole semicircle. Namely, it is to be worn around
[757] the neck against chest ailments, coughing, and the like. The
name kisij, however, which was given to me for it, seems to have a

/745 cont./
[778] more general meaning and to refer to amulets in general (Bm.
[532] pp. 30-32).

7. Idols in human shape among other Amur peoples. The
[778] wooden idols, sīwa, of the Samagir are shaped exactly like th
[532] of the Olcha and Goldi (Plate LIII /p.1253 /, Figs. 6-8) and m
[184] in the same place, propped upright on the sleeping bench along
the transverse wall of the yurt, away from the door. (I W.R.
[171] p. 77.)

8. Goldi. The same custom as among the Gilyak, wearin
[171] idols around the neck, probably exists among all Amur peoples
[126] Fig. 1 on Plate LIV /p. 1254 / represents such a small idol wo
in lead, which I obtained from a Goldi on the Usuri. (Bm. I,
p. 58.)

9. Samagir. I found a small idol hanging in a deserted
hunting-hut of the Samagir along the Gorin, and it reproduced
the human figure in exactly the same manner and with the sam
features as the large sīwa which one sees in the yurts of the Sa
Goldi, and Olcha. The single deviation was that it bore a wo
eyelet on the head, through which a strap was drawn for the pu
pose of wearing it around the neck (Plate LIV /p. 1254 /, Fig.
When this is done, my guide said, the sīwa is fed by the one w
it, in that the owner smears around its mouth a bit of everyth
he himself eats. When I asked what the sīwa actually is, he s
[755] it is everything, the well-being of everyone, and thus his, my
physical well-being, for example, the healing of his leg bitten
[000] of my dogs. I could not find out anything more (2). There is

2. The guide of the author also called sīwa the
little stick, mentioned on p. 1113, deposited
for a musk deer taken from a hunting tent on
the Gorin (1 W.R. II, pp. 84, 85).

[171] There is
[171] evidently connected with the sīwa the idea of the property of
[171] well-being of man under the influence of a power outside of hi
[171] and superior to him. This conception may not be very differe
[000] from that of the Gilyak. A /746/ fact which speaks very much

Sakhalin
Goldi RX2

/322 cont./

Chamkh, the father of Koynyt, my storyteller, was a shaman in Ady-Tymi. He had four souls: one from Pal, another from Tol, a third from Tly, and a fourth from Mly-yz'n.

Shamans make chkhnaj (a wooden image of pal-n'igyvyn), inspired during a seance, and feed them. The feeding consists of giving sugar, saranka, and so forth, but they are eaten by the shaman; it only appears to those around as if he eats it, however, while it is eaten by the kekhn himself. The chkhnaj must be fed or else it will gnaw a person.

When one is dangerously ill, then the yurt begins to shake and becomes full of openings and through the openings, like mosquitoes, many kekhn fly and shout: "Believe me, me!" And then the shaman falls down as if he were drunk. Then he eats marsh tea and drinks sea water -- he gives this to his kekhn. He swallows fire. Kekhn love songs.

If a person is near death and a milk has carried his soul to Mlyvo, a kekhn kills him, and the shaman sets out for there for the soul, and, if he succeeds in getting the soul, the sick man will live. The kekhn shows the shaman the road (to Mlyvo). The shaman gets to Mlyvo directly through an apperture; the same earth as here, the same sky, and many villages are there. If the soul is outside, it can still be obtained; if it is in the yurt, all is lost. If the shaman himself enters the yurt, he will die. In Mlyvo the soul of the shaman is like a bird and flies around the subterranean world.

Parnkhasind (an Orok word) is done only by the Ornyr, i.e., by the Orok. They ask the chkhnaj whether the sick man will recuperate or not. If the chkhnaj rocks from side to side, he will recuperate; if not -- he will die. All this is done under the smoke of marsh tea. When the shaman beats his drum, the kekhn advises the making of chkhnaj, and if somebody's soul comes into it, then the sick man will live. If he will live, the chkhnaj is fed; then when in the shaman's opinion it is time /323/ to lose him, he comes and arranges for the milk to go from the sick man into the chkhnaj, and the sick man then recovers. (see "Fortunetelling with a Stone").

/882/

775 This bird (the soul of the slain man) enters the avenger of
825 the slain man and instills courage in him. Its image (vagn,
[532] takhchynnga) is made out of the roots of the alder tree and placed,
with the roots upward, not far from the raf over the grave of the
[778] slain person. The chkhnaj of this bird must be made out of the
root, and a small knife must be placed in its mouth.

775 The resurrection of the soul. The soul of the deceased will sometimes be born again. If a boy is born with a sign indicating his origin from a person who has died, he will say, even before sustained speech, words that indicate his knowledge of the past.

775 When he attains intelligible speech, his father puts a hat on him
789 backwards and begins to ask him questions about the past, and then he says quietly, "Well, that is enough, forget the past," and puts the hat on him in the proper way. Then the boy forgets everything and will live for a long time. If the father does not do this, the boy will die. The procedure with the hat drives away the milk.

II.

Hunting and Fishing

224 Sacrifices to the sea -- Tol vyzn:d (fynydz:). 1. When winter
782 sets in and there is not a single unfrozen patch of water on the surface of the sea, the men of the same khal'a (women do not participate) set out in the dark of night for the sea, a hole in the ice, and through it each of them throws wood -- "wood fire," which has been started with a piece of tinder -- to the sea. Later on, at home, they "eat," i.e., feast.

2. In summer, people who leave the shore in a rowboat throw things out of a bowl for sea offerings -- tol n 'ich: -- to the master of the sea, Tol yz 'dokh.

To Tol they always sacrifice a white dog, a white fir, everything smooth and clean; to Pal and Mif, on the other hand, everything fanciful; to Kur -- a red dog, a red cock, a bright cup, vodka.

/337 cont./

45 Gibel'ka's wife gave birth to twins; one of the twins was a bear.

532 A representation of twins -- tongch: -- is placed in a little
078 storehouse. If one of the twins dies, they place one tongch:, while
082 if both die, then two joined together on the sides. Chukh-chugynd is given to them at the full moon and at the new moon. Kinsmen and strangers sacrifice down to the third generation.

775 When a twin dies, he goes to his father, Pal-n'gyvyn, who
787 gave birth to him, appearing to his mother in a dream.

66 A dead twin is not cremated, but is seated in Turkish fashion in a specially built little house, in which a wedge is driven to support him.

He is dressed in a white shirt and trousers and is surrounded with shavings -- inau. The mother of twins is likewise not cremated after death, but is dressed in white and buried, also with inau placed around. According to B. Pilsudski, the same is done with the father of twins.

78 The tongch: helps catch bears and in hunting in general.
24 The tongch; is fed in case of sickness, especially tuberculosis
34 (Slyavo).
82 Infanticide. Infanticide is committed sometimes in secret or
47 even upon the order of the father of the underage husband of a woman.

82 A woman who was accused by a shaman of poisoning a boy, the son of another woman, was beaten, and, after they cut off her braids, she was thrown into a funeral pyre.

53 Illness. Illness is sent either by Pal-n'igyvyn or by Tol-n'igyvyn,
76 but each of them takes a milk not from his kingdom.

/338/ A milk can be of different shapes and often is red as blood and hard as stone, but when he enters a person, he becomes lively, "as if he were walking."

732 A violently insane person is imprisoned in a cage (in
758 summer) and fed; he must not be killed.

753 Kkhmas'ind -- to be sick from not getting what one saw and wanted. Either the one who did the seeing or his family becomes sick. Then it is imperative to get at least a small crumb of what one saw and to touch it, and the person gets well.

/749 cont.

Idols and Amulets Combining Human and Animal Figures and Others

19. Gilyak. The belief in the transmigration of souls with reference to the bear may be the basis of a number of pictorial representations among the Gilyak — amulets or small idol-like images that are worn around the neck in case of sickness. Among them one finds double figures of a human being and bear. This is obtainable in a small piece of wood which at one end branches out into two parts, one representing a human head, the other a bear's head. I acquired specimens of this type from Kalm and Atlof. The former, in addition to the two representations mentioned, also has a human face on the single end (Plate LVII /p. 1257/, Fig. 8), while the latter ends there without any carving. On both, however, the division of the upper part with human and bear heads continues for a while in the form of a groove which gradually tapers off at the single end. This idol is explained to me that this groove continues to separate the human half from the bear half until they merge. (Bm. II, p. 59.)

20. Gilyak. In the forest near the village of Chiare, not far from the place where corpses are buried, several idols of the Gilyak were placed under trees in the customary manner, that is, suspended from one to the foot of a tree and hidden with sticks and other pieces of wood (see Plate LXV /p.1265 /, left). For instance, there was the double figure of a tiger (nti) and /750/ a human being, with the face of the latter being represented by a bear (Plate LXVI /sic. see Plate LVI, /p. 1256/, Fig. 2). Another idol bore on a human body provided with movable arms and legs an ant head with a four-toothed comb on it (Plate LVII /p. 1257/, Fig. 2).

Finally I found here the representation of an animal resembling a seal or a sea-lion, or a sturgeon. It was evidently an amphibian, and the wide mout was densely studded with teeth. The natives called it chak, or, as an idol, chak-idgu, but knew of no cultural implement and tool used for the same purpose. No amount of persuasion, however, helped in getting the woman who owned them to tell one or the other of these idol-bowls. She said that they were in ninsh and would cause her death.

/750 cont.

figure was made in case of backache, in order to rid oneself of this sickness (Plate LIX /p.1259 /, Fig. 9). (S.R. I, p. 15.)

21. Gilyak. In the village of Kalm I was able to buy many idols, all different and some of them very interesting. Sakhalin Gilyak, one side of human shape with a bear's head (Plate LVII /p. 1257 /, Fig. 3). It was named for me as ozlak, a designation that other idols in purely human shape also had. Another had the head of an owl (ti) on a human body (Plate LVII /p 1257 /, Fig. 9), in the case of a third one the owl sat on the head of the human being (Plate LVI /p. 1256 /, Fig. 9). several human figures had cavities in the body in bold food.

One idol consisted of a block of wood with a human face and a row of prongs on top of the head, each of which was provided with a human face.

I also bought here the bowl in which food served to the idols is put out in the shape of a bear's head.

Then there were idols of the white whale (pomi-nebo) with a human being on it (Plate LVI /p.1256 /, Fig. 3), as well as of the wolf, amulets with two heads, that is, of the bear and raven, etc., here.

In the village of Tchelimsk many idols with nash wound around them and hidden in a bowl made of wood on a shelf in the corner of a yurt I acquired a small tiger-idol with a human figure on top of it (Plate LVII /p.1257 /, Fig. 1), and furthermore an amulet with two heads, one of which represented a human being, the second a wolf, and the third another animal that could not be named for me. Next to the idols there were a great many bowls made of a hard wood, some of which represented a bear, various kinds, sometimes with a human face, sometimes with a toad, a lizard, and the like on them. These were all toil-ngir. Only one idol-bowl was completely different and consisted of two cups made out of a piece of birch bark and placed side by side in the form of an 8 (Plate LXI /p.1261 /, Fig. 1). This vessel was called tchelbyk-ngir and was used for the same purpose. No amount of persuasion, however, helped in getting the woman who owned them to tell one or the other of these idol-bowls. She said that they were in nash and would cause her death.

/750 cont.

several neatly carved and interesting idols were also sold to me in the village of Patti. On one the back of the head had the shape of a heart; on another two human figures stood on a block which represented two bears (Plate LV /p.1255 /, Fig. 3). The heart (nqil), by the way, is very often used on such carvings (see 13 /p. 1262/ above).

Among the idols here there was one with the head of a raven (ot sea bear /or seal/. The sea dog /harbor seal/ is also represented in idol form, but I did not obtain any (S.R. I, p. 15).

22. Gilyak. A figure carved in wood which was found not far from Tchchytyrakch at the mouth of the Amur roughly represents a human being with a head and a body made of a fish, with iron teeth in the upper and lower jaws. The eyes are represented by blue glass-beads. The front and rear extremities are attached to the sides of the fish's body. The former are only indently arms with hands on them, the latter legs with feet, similar to those of a human being. The former are stretched out forward, the latter are bent, approximately on a horizontal plane with the head, so that the figure seems to be represented in flight (Plate LXVI /p. 1268 /, Fig. 1). — Dzimar (see also in the preceding section in my mentioning the figure) told me that among the Gilyak of Patcha there is a legend which he was not distinctled to connect with it, since this village and the cape named have not for apart.

— The story goes, "the Gilyak of Patcha returned from fishing on two boats laden with fish. They were too tired to unload the fish at once and postponed the work until the next morning. The boats were merely pulled out and the fish covered with birch bark or the like. The next morning, when they wanted to set to work, they found the boats empty. All around, however, lay many scraps from the fish which clearly showed that someone had made a hearty meal of them. They also therefore set out again to fish and again returned with a full load. But again they postponed the unloading, and the same thing happened to them as on the day before. They went fishing for the

/751 cont.

third time and again brought back two full boats. But this time they decided to keep watch during the night in order to catch the destroyer of their catches. They succeeded and the culprit was caught. It was a strange shape with the head of a fish and human arms and legs. The monster was placed in a prominent place in the center for the bear and was fed with fish. It lived in this captivity for a year, and then it asked the Gilyak to free it. They took it to a cape on the Amur River between the village of Patchi and Cape Tchchytyrakch and tied it there to a well. But the monster bit the rope in two and disappeared, so that when the boat, however, was the representation of the khai (chai of the Gilyak) in wood hanging below the tool and the bowl, the imaginary animal with which I became acquainted among the Gilyak and called wapi, and which is carved by the Olcha a protection against sickness. The great similarity between the Gilyak nkgn and the ukwa of the Olcha is very striking and leads to the conclusion that there is a similar correspondence in the religious concepts and ideas of these peoples. (S.R. I, p. 15, Fig. 22-33.)

Shamans

/752 cont.

the disaster. Since then the once large village of Chaia has had only a few inhabitants. (S.R. I, p. 39.)

25. Olcha. Among the Olcha I saw an idol-belt, a sikwcha, provided with various sawa or representations of idols, to be worn. Unfortunately I did not obtain specimens of this belt (S.R. I, p. 75, Fig. 3). On either side of the leather belt two makes (ohnala), likewise of leather, were sewed on lengthwise, and between them on either side a fur carved out of wood was attached in the same direction. In front, in the middle, there was a toad of leather and on it a human figure in wood. The most interesting thing on the belt, however, was the representation of the khai (chai of the Gilyak) in wood hanging below the tool and the bowl, the imaginary animal with which I became acquainted among the Gilyak and called wapi, and which is carved by the Olcha a protection against sickness. The great similarity between the Gilyak nkgn and the ukwa of the Olcha is very striking and leads to the conclusion that there is a similar correspondence in the religious concepts and ideas of these peoples. (S.R. I, p. 75, Fig. 22-33.)

Shamans

/752 cont.

26. Ulcha. Among the Olcha the shaman is employed much less than among the Tungusic Amur peoples, the Olcha, the Gilyak and Kilie, and other, and therefore the shaman's implements are much less frequently found among them. Just as among the Amur people in general, so also among the Gilyak in particular, the shamanism is found more and more rarely downstream toward the Liman or toward Sakhalin. One scarcely comes across shamans and shaman implements from Wasi on and anywhere along the Liman. After repeated inquiries about them, I did not see any or hear of any. Thus shamanism seems to have moved downstream and to have had its origin further inland. (Bm. I, p. 76.)

/752 27. Gilyak. In the whole area of the Amur Gilyak there are only a few shamans who have a reputation among their countrymen. I was told that the most famous of them "a great shaman,"

/752 cont.

the disaster. Since then the once large village of Chaia has had only a few inhabitants. (S.R. I, p. 39.)

25. Olcha. Among the Olcha I saw an idol-belt, a sikwcha, provided with various sawa or representations of idols, to be worn. Unfortunately I did not obtain specimens of this belt (S.R. I, p. 75, Fig. 3). On either side of the leather belt two makes (ohnala), likewise of leather, were sewed on lengthwise, and between them on either side a fur carved out of wood was attached in the same direction. In front, in the middle, there was a toad of leather and on it a human figure in wood. The most interesting thing on the belt, however, was the representation of the khai (chai of the Gilyak) in wood hanging below the tool and the bowl, the imaginary animal with which I became acquainted among the Gilyak and called wapi, and which is carved by the Olcha a protection against sickness. The great similarity between the Gilyak nkgn and the ukwa of the Olcha is very striking and leads to the conclusion that there is a similar correspondence in the religious concepts and ideas of these peoples. (S.R. I, p. 75, Fig. 22-33.)

Shamans

/753 cont.

26. Ulcha. The Olcha assign an identical fate to those who die peacefully and those killed by human hand and erect no wagn for the latter, as do the Gilyak. According to the information of the Olcha Chomiambo the representation of the wagn is based on the bird hibo whose appearance in any village is disastrous for its entire population. For whoever sees it must die. Such a case had happened many years before in the village of Chaia, opposite Kiri (Kidur). The hibo had come and perched on the tip of a larch tree (Chaia name, Gilyak kuh), where the inhabitants of Chaia saw it, and all who saw it died, and only a very few escaped

/761 cont.

II. Conceptions of the Amur Peoples concerning Life After Death and the Corresponding Treatment of the Dead

Fate of the Souls after Death

42. Gilyak. The (Amur) Gilyak (according to Sargin's account) believe that the soul of anyone murdered, not excepting suicides, flies to heaven, while persons who die a natural death remain on the earth or under the khai (chai of the Gilyak) in wood hanging below the tool and the bowl, the imaginary animal with which I became acquainted among the Gilyak and called wapi, and which is carved by the Olcha a protection against sickness. The great similarity between the Gilyak nkgn and the ukwa of the Olcha is very striking and leads to the conclusion that there is a similar correspondence in the religious concepts and ideas of these peoples. (S.R. I, p. 75, Fig. 22-33.)

43. Gilyak. The (Amur) Gilyak Jutchkin dictated to me an interesting song, for which, through further questions, I obtained an explanation of the meaning of the song. The song had been sung by the Gilyak Orkin from Magho to his wife, Rechyguk, from Wait, whom he had abducted (?). Orkin was still alive at my time,

* See the Gilyak text in the appendix to Grube's and Jutchkin's work, "Linguistic Material, Compiled by Dr. W. Grube," p. 41 /the book translated here does not contain this appendix/.

but his wife had died.

The chief content of the song seems to refer to a "village Miygh-wo," and I therefore inquired as to what kind of a village it was and where it was located. I learned that it was the place in the interior of the strits to which the souls of all those who die of sickness migrate, while those of murdered persons (**) fly to heaven.

** According to another report, also the souls of suicides (see Appendix 42 above.)

/768 cont.

A rough little roof or a similar stick (wadikch) stuck in the ground is likewise said to be used in many places where the dead is buried. (Bm. I, p. 18.)

31. Gilyak. In September, 1894, the Gilyak of Kuft discovered two graves of Russian fishermen, raff, had been destroyed by Russian soldiers and the ground on which it had stood was dug up, and they came to complain about it. I then learned that the ashes of cremated corpses are under the little houses and variously called by Russian people, or Gilyak, the like are deposited there. Near Kuft, in the beach forest along the Amur, four or five small houses stood together and formed a burial place, while such structures are otherwise often found individually in the forest. The Gilyak said that in the village of Kuft there were little house the ashes of six children's corpses were in one vessel, over which the same number of table fun had been placed. Other little houses, in which the ashes of children dying of their children such as had taken place during the year. Now, since the house had been destroyed, they feared the return of the epidemic. (Bm. I, pp. 15, 16.)

32. Gilyak. Every spot where a corpse is deposited or a dead person's ashes are to be found is regarded by the Gilyak as sacred and inviolable to some extent. No Gilyak therefore would wantonly touch a raff. Moreover, the latter may never be transferred to another place. This would be uhech. There are, however, two cases in which the Gilyak from Kuft revealed and communicated about the plundering and destruction of their raff, they nevertheless decided not to transport the remains to the villages to which they themselves had moved from Kuft. (Bm. I, p. 56.)

33. Gilyak. If one investigates the interior of a little burial-house he always finds in it a longish little board in an upright position: hakk, also tar. The middle of it is pierced, and the hole has a peg, kytim, stuck in it; a strip of linen is wound around the board, and sometimes the lower end, too, is wrapped in linen, and decorated with tassels, hakk-or tarr-rawl (Plate LXVIII /p.1268 /, Fig. 2). Close to the board and likewise in an upright position there is a little stick, pyk-ngir,

/769 cont.

the village. The raff, then, is a memorial erected for the deceased.

The cremation site was very simply marked: the ashes scraped together, enclosed in nonsinged frame formed by four boards set vertically, and this covered with boards; around the boards of the frame, however, little sticks with nach were placed (see Plate LXV /p.1265 /, to the right, in the middle distance).

There was no nilyun; in Kalm. I learned that such is set up for a deceased person only if no snow has yet fallen at the time of death, otherwise it would be uhech to set up a nilyun; (S.R. II, pp. 4-6.)

57. Gilyak. According to Sargin's report, not every deceased person is given a raff. If a very young person dies, the corpse is not cremated, but simply wrapped and buried in the ground, and no raff is erected for it, for the soul of such a child does not wander, but goes to heaven. If larger children die, the corpses are cremated, and one raff is erected for two of them. Each adult gets a raff, men and women. If the corpse of a person who has drowned is cremated, but no raff is erected over the ashes; rather, a stick is stuck in the ground and a boat is placed next to it. If a Gilyak dies /?/ in the hunting grounds, and if the corpse is not cremated, but deposited in a structure which is especially erected out of beams crossing at the ends. Such a burial house is called tschchyb-ngych and usually is located in

* Tschchyf--the bear.

the forest where the deceased fell in the fight with the bear. The soul of such an unfortunate person does not go to heaven. The burial house has a small opening through which all kinds of food are deposited for the deceased, such as berries, fish, grasts, etc. Inasmuch as these these articles lie next to the corpse, they acquire a strong cautive power against various sickness, and ailing Gilyak customarily go to such a burial house and eat some of the food deposited there, which cures them at once. The depositing of food is such a structure goes on for months and years, and consequently also the visits to it are a cure. The corpse of a person killed by an ant (tiger and leopard) is taken to a similar burial house, supplied with food, and the latter is used as a remedy. (Bm. I, pp. 56-58.)

58. Gilyak. Between Hokk and Kalm (on the right bank of the Amur), I passed on the bank the tomb of a Gilyak who had met misfortune in the river. Here stood a small low house, in the manner of all Gilyak graves, surrounded by birch-bark baskets and bowls of various sizes, which were strung on the branches of birch. This is the usual period of mourning, also also for designating the grave sites of persons and animals (bears, etc.). Next to the tomb lay a boat, probably the one in which the accident had occurred (**). (S.R. I, p. 7.)

** Cf. Pl. LVII /p.1257 /.

59. Gilyak. The inhabitants of the villages of Kuk, Hokk, and Tchchiri (on the Amur) are accustomed to bury in the forest their corpses, but the other, including those of Tau-wai and the villages up to Chiare (Inel.), cremate them and erect raff for them. I personally saw many raff in Chiare. In the villages named, however, the population is in part Tungusic. (S.R. I, p. 8.)

60. Gilyak. Near Aly (on the Amur-Liman) I saw a fresh Gilyak grave. The raff was not yet erected, the ashes (of the cremated corpse) were covered with boards set vertically and horizontally, and at each of these two ends there was wood stag (nach). (2 W.R. II, p. 38).

61. Gilyak. If a Gilyak is murdered, his corpse is likewise (like all others) cremated, but no raff is erected over the place in the forest; instead, a wagn is set up (***). It is made out of a

*** See Appendix 22 /p. 1206/.

tree-trunk which is dug out of the soil with the roots. The various root-stretches serve to represent the head, arms, and legs of the

/771 cont./

wagn (†). The trunk is chopped off several feet above the roots,

† On the specimen given to the Academic Museum by the author one of the rear extremities was supplied by a piece of wood specially inserted, which subsequently fell off (see Plate LXVI /p. 1266 /, Fig. 1).

pointed (the top of the stump), /772/ and, with the pointed end, is sunk into the ground at the place where the ashes of the murdered person lie, so that the root, representing the wagn, projects above it. Since murder is not infrequent among the Gilyak, there are wagn in many villages on the Amur, for instance, in Wasuj, Kaki, Wair, Kalgho, Tebach, and elsewhere.

According to Surgin's information, a wagn is set up only for a murdered person who was killed by the hand of a Gilyak from another village. On the other hand, if one Gilyak kills another in the same village, the latter does not get a wagn. Similarly no wagn is set up if a father or mother kills the son, and vice versa, or a brother, or in general if one relative kills another. In such cases the corpse is simply cremated. The same is done with the corpse of a suicide; it is cremated, and no wagn is set up.

The bird's head of the wagn is said to be patterned after the wgn (Colymbus arcticus). This bird is regarded as sacred by the Gilyak and is kept, stuffed, in the same flying position as it has on the wagn. Much stuffed skins of Colymb. arcticus and septentr. are sometimes seen hanging on high frame-posts in Gilyak villages. In the representation for the wagn, the Gilyak give the head of the wgn teeth of iron, which are supposed to serve for him to take revenge on the murderer (1).

1. Perhaps the wagn, by its threatening aspect, is supposed to be a reminder of the obligatory blood revenge, and this is the reason that no wagn is set up in cases where revenge is deemed inadmissible -- as between relatives and the

/772 cont./

1. (cont.)
members of a village -- or -- as in the case of a suicide -- it is automatically omitted.

Since the soul of a murdered person flies to heaven, it does not need any of the articles such as are placed in the raff for the wandering soul of a person who died a natural death. (Bm. I, pp. 52-54.)

62. Gilyak. As the Gilyak (on the west coast of Sakhalin) told me, they burn their corpses and erect wagn over the ashes of murdered persons. (2 W.R. I, p. 8.)

63. Gilyak. The Tymy Gilyak assembled in Ngachd-wo (on the left bank of the Tymy on Sakhalin) said that they likewise usually burn their corpses, as is done along the Amur, in the Liman, and on the west coast of Sakhalin up to Arkai (excl.). A raff is erected over the ashes of the cremated corpse and, as along the Amur, has a kakk, pyk or tutut, and pyk-ngit or tutut-ngit in it. The pittysj is present in the raff and among the Tymy Gilyak bears the designation raff-nga, that is, burial-house storage-chamber, which wholly corresponds to its significance. Only the tucham-ngar is missing (†). (2. W.R.I, p. 45.)

* See Appendix 53 /p. 1233/, 55 /p. 1234/.

64. Gilyak. From Arkai on, along the west coast of Sakhalin, south to Pilja-wo, the last Gilyak village, the Gilyak are said not to cremate their corpses which is regarded as unech, but to deposit them in wooden coffins in small houses, just as among the Tungusic tribes of Manchuria and Sakhalin and the Ainu (2 W. R. I, pp. 8, 43.)

/773/ According to another report, the corpses are interred south of Arkai (2 W.R. II, p. 25).

65. Ocha. In the forest not far from the Russian village of Bogorodickoye in the vicinity of the Ocha village of Pulli (Pulu on the map, on the right bank of the Amur), there were two very gracefully worked Ocha tombs ornamented with various paintings

Idols in simple human form. 1, 2--Gilyak house idols. 3. Dwelling of the idols. Fig. 2 (reduced). 4. One-armed Gilyak idol. 5. Gilyak neck-idol. 6-8. House idols of the Goldi (reduced).

1. Neck-idols of the Goldi. 2. Same of the Samagir. 3-7. Gilyak idols for certain conditions or illnesses.

1-4. Gilyak idols for various illnesses. 5. Gilyak amulet.

Gilyak idols made out of combined human and animal forms. 1. Human being and tiger. 2. Human being, tiger, and bear. 3. Human being and bear. 4. Human being and owl. 5. Human being and white whale.

Gilyak idols made out of human and animal forms combined: 1--human being and tiger; 2--human being with tiger head; 3, 4--human being with bear head; 5--human being with owl head; 6--human back-joint with bear head and paw; 7, 8--Gilyak amulets with human and bear heads; 9--similarly, a bow with human head.

Gilyak idols in animal form: 1--bear, a toad in front of belt; 2--in the back, a lizard and two snakes; 3--bear, painted, dressed in fish skin; 4-6--tiger.

/746 cont. /A /746/ fact which speaks very much in favor of the religious conceptions of the Tungusic Amur peoples, whoever they are, in comparison with the Gilyak, is that the former are not nearly as apprehensively superstitious as the latter (1 W.R. II, pp. 85, 86).

Animal Idols

10. Gilyak. The bear plays the primary role among the animals that are represented in wood as idols by the Gilyak. The reason for this is the danger to which they are exposed in their fights with this beast of prey, for they are particularly fond of pursuing the bear (as was mentioned in connection with the bear festivals). The bear kägn or tschngai serve to prevent the injuries and fatalities which can be expected on these occasions. I have mentioned above the superstitious beliefs associated with the death of a man killed by a bear among the Gilyak (1). Hence one rarely enters a village

1. See p. 1127.

near which, upon closer inspection, one does not come across a few bear idols. And this is common to both the Gilyak and the Tungusic Amur peoples.

The bear idols are usually very crudely fashioned. The animal ordinarily appears to be sitting, sometimes standing. The idol pictured on Plate LVIII /p. 1258 /, Figs. 1 and 2, from the village of Kulk, is one of the best that I have seen. It is further distinguished by the fact that a raised band runs around its body, upon which other animals sacred to the Gilyak, or, more accurately, uncanny and portentous, are represented (these are most of the reptiles produced in Gilyak country): the toad -- mipitsch (2) on

2. Besides this representation I obtained two individual toad-idols of the Gilyak, carved in wood, which are illustrated on Plate LIX /p.1259 /, Figs. 7, 8.

/746 cont./

178 the front side of the bear-idol, the lizard mä(r)ngai on the back side
232 of it, and the snake kÿlanga, whose image is found on either side
325 between the first two. I often witnessed the awe and fear of the Gilyak before reptiles (*).

* See Appendix 20, paragraph 2 /p. 1204/.

Among the Gilyak, besides the bear, one finds idols of the att or märeder, with downright superstitious fear connected with it among them. But since the tiger and leopard, which are united under the same name of att or märeder, are rarely seen in their northern homeland and casualties caused by them are rare, the idols of the att are less common than those of the bear. The slight acquaintance of the Gilyak with these predatory animals causes them to make the idols of them poorly and superficially (3);

3. See Vol. I, pp. 92-94, of this work.

see Plate LVIII /p. 1258/, Figs. 4, 5, 6. Fig. 4 represents an att idol which I found in the village of Kuĭk. It bears none of the marks which characterize the tiger and leopard and are present on the representations of these animals among the Goldi. Only the general shape is similar to those figures. /747/ But that this figure is in fact supposed to represent an att is certain, since I obtained the idols from a Gilyak expert in this. (Bm. I, pp. 59, 61.)

232 11. Gilyak. A fish carved out of wood, which came from
325 the Gilyak village of Tebach, seems to serve less as an idol or amulet than as a piece of carving, as a representation, tschngai in general. It is supposed to represent the fish ngy-tscho, which is unknown to me. Even earlier I acquired from Tebach the figure of another small fish, the pilengat, Cyprinus carpio, which likewise had no significance other than that of pai (see p. 1090). Both are illustrated on Plate LX /p. 1260/, Figs. 4, 5. Later, I obtained another carved fish from Tebach, which was supposed to represent the pak(ch?)-tscho, i.e., a large pilengat-tscho. (Bm. II, p. 32.)

and went down again. Then we got a young man to take a white stone and put it in the sea-dish. Then we returned and went home. When we came home we put the stone in the fire place." (6)

6. The stone which they put in the fire place is a payment to the master of fire for the successful outcome of the hunt (cf. our article "Morskoĭ Promysel Giliakov Derevni Kul', [Sea fishing among the Gilyaks of the village Kul]).

182 The methods of beluga hunting as described by the Gilyak
225 Mytka in his account and pictured in his sketches are characteristic of the village Puir and partly of the village Lyangr. The hunt proceeds differently in other places. [114]

The account of the Gilyak Khor (from the village Chomi(?)) telling of a beluga hunt undertaken by him and his friend in 1930 supplies us with enough information to enable us to distinguish between the methods used by the Khor and those described above.(Khor's account was written down by me in the fisheries of Dzhaori in 1931) [For Mytka's account, see category 225, pp. 111-113; for Kor's account, pp. 114-116--Analyst.]

225 We present a translation of the account, striving to com-
103 municate the spirit of the original.

"During a run of herring, the four of us, two adults and two children, went in a boat to the Big Cape (Pila-kr÷) to hunt for belugas. When we approached the whirlpool (Polx), we came ashore and took out our things. The animal (that is, a seal, a beluga) was swimming up (1) to the shore. The

vater. The pilaŋ picks up a scoop con-
freshments called for by the occasion and

225 After they have killed a sivuch, they wash its head and its
782 snout with water. During the washing they use a special scoop
a- ain-du-muurs, literally, 'the animal face washing scoop,
i. e. the scoop used in washing the face of the animal.
The heads with piskar stuck in them are taken home.
225 After the first sivuch has been killed the pilaŋ performs
782 the ceremony of feeding the figurines tŋaj. (Regardless of the
425 number of killed seals belonging to other varieties, this
778 ceremony is performed only after the killing of the first
sivuch.) The pilaŋ cuts the breast of the sivuch and smears
the mouth of the figurines with blood taken from the heart of
the sivuch. [87] The Gilyaks say that if one were to smear all
of the face of a figurine, the latter could not "see." After
the completion of this ceremony the sivuch is regarded as
belonging to the pilaŋ. However, as far as the distribution of
the quarry is concerned, this sivuch is regarded as being not
different from the other sivuchs. This will become apparent
from the facts given below. True - as I was informed by a
Gilyak - this holds only if few sivuchs have been killed. With-
out drawing final conclusions as to the possibility of the pilaŋ
asserting his title to an extra sivuch on top of his share of the
quarry - for this we do not have sufficient data - we wish to
emphasize at this junction two incontestable circumstances.
First - the pilaŋ appropriates the first sivuch killed during the
hunt; second - this appropriation is effected under the guise
of a religious ceremony.
784 This latter circumstance clarified for me the essence of a
225 number of taboos among the Gilyaks.
183 Thus, for instance, young hunters (as well as women) are
626 supposed to observe a number of taboos in connection with the
262 meat of a bear. At the same time old hunters need not observe
those taboos. This is not the place for the enumeration of the
tabooed parts of the animal which the young hunters (as well
as women) are not supposed to eat. We shall only point to the
explanations given by the Gilyaks concerning some of the in-
terdictions. Thus, for instance, the young hunter must not eat
the heart of a bear, otherwise he will sustain a heart affliction
as soon as he comes on a track of a bear. And one cannot go
hunting bears with a heart so afflicted. The young hunter must
not eat the tongue of a bear, otherwise the bear will beat him
to death during an encounter. "Therefore tongue old men only
can eat." These instances illustrate the manner in which the
Gilyaks rationalize their taboos.
It would be ridiculous to look for special meaning in all
these taboos and their explanations. The meaning of these taboos
and their interpretation is simple--the taboos serve to keep

825 and if he gets caught, he is killed. But even after that he is
789 handled with respect, that is, his corpse is laid before the
278 house of the idols and left there until it begins to decay.
Besides the skin, the bones and the gall are immediately
sold, for the former are held by the Gilyak to make a man
brave, and the latter is used for all kinds of medicaments.

776 Of the numerous spirits whom the Gilyak are supposed to
782 know about, some are good and protect man, but the major-
ity are more or less evil, and must therefore be propitiated
with gifts. The chief of the evil ones is called Kins (on the
island of Sakhalin: Kinsh) and to a certain extent corres-
778 ponds to the devil, Ahriman, etc. of other peoples. "Spirit"
782 and "idol" are both called kegn, for the idols are not only
532 symbols, but at times also the dwellings of the spirits or
kobolds. Usually they are kept in the storage huts and only
hauled out on special occasions. If an idol is "heavy" it
means that its inhabitant, the kobold, is at home, but when
it gets "lighter" than usual, the spirit is roaming about
somewhere. The offerings here also consist of millet,
tobacco, etc.; very often the face of the idol is smeared
with cranberry juice, which seems to have a powerful effect.
Wood chips are also hung around its neck. The idols have
different appearances. A guardian spirit, for example, [24]
lives in a wooden cone that is placed somewhere in the
vicinity of the yurt when it is built. If the yurt must be
taken down, the idol remains, and at the new dwelling a new
one is made. Some idols are crude imitations of humans,
others have the shape of a bear and are sewed into bear skin,
still others have the shape of a bird, etc. Some human-like
idols represent children, others old people. Some have
hands and feet, others only a head which sits on a body show-
ing a navel. Small idols are sometimes worn as talismans.
These also usually have human forms, but some look very
789 different. Thus the talisman against a difficult birth is a
844 figure carved of wood, representing a double acorn.

Besides the idols, there are some more or less strange-
778 looking objects not made by the Gilyak themselves, which
782 have a mysterious significance for them. Such an object
177 stands on the so-called Tyr (1) about 80 versts from

755 softly or whispers magic formulas, walks back and forth
534 like a pendulum, far into the night. Sometimes he leaps
over a burning pile of wood, or he makes the sick person
755 run about if he is able. Some shamans impress their public
786 with more difficult tricks. They appear laden with chains,
778 whirl about like mad, and in a state of ecstasy may hurl
themselves into the fire and make believe it does them no
harm. Narcotic drinks are not given, but the sick person
sometimes gets certain herb infusions from which the
shamans expect healing effects. The magic feats are
corroborated with various prescriptions relative to the
spirits. For instance, an idol in the shape of a human being
is placed next to the sick person, its face smeared with
cranberry juice, and the sick person himself has wood chips
hung around his neck, etc. Or the shaman orders that the
clothes of the sick person be hung out in the woods and that
he be [244] dressed in others. This is done in order to
outwit the kobold who saw him only in his old clothes.
755 This medical magic is usually begun in the evening, at
789 twilight, when the imagination is more active and also when
deception can be more easily concealed. The shamans also
seek to consolidate their authority by means of various
magic tricks that otherwise have no practical meaning. For
instance, they swallow knives and needles. Not long ago
there lived a celebrated magician near Sofiyskoye who
gouged out his eyes and thrust a knife into his belly, which
was afterwards excreted. He was later exposed in these
juggling tricks by an itinerant Russian merchant. It was
shown that the knife blade, instead of penetrating his belly,
disappeared into his pants and passed into a receptacle.
After that the magician was completely discredited.
789 Finally, there are a few superstitious practices we must
372 mention. If a Gilyak goes on a journey he must drink some
271 water in the yurt shortly before he leaves; he does the same
thing as soon as he has returned. The hearth fire is also
to a certain extent sacred for the Gilyak; it is not carried
outside and the Gilyak do not like to have a traveler light
his cigar at it and then leave the house.
177 This chapter is also the place to say a few words about the
797 baptized Gilyak. There are not many of them, but no one
knows exactly how many, first of all because many of these
"Christians" let themselves be baptized several times, in
the city, for instance, as well as by their village divine.
From this we may see how much they really understand of

123 "What are you afraid of?" I said to him. "You will stay,
796 be alive, go back home, everything will be fine and do not
worry about me." "No, friend," replied Gibel' with animation. "that is a bad law: we have traveled together, worked together, written together, searched together for the stone ax, looked at people together, passed judgment together, and now I will go back home and are going to die here? Is such the law? And what will the most great chief say? Why, he will say, did you not see to it that the "tyan'gi" (gentleman) traveled well?" He will say that I killed you. That will be a great sin. No, you had better not touch the god of the earth; he is terribly big, strong, and he can get terribly angry."

123 Seeing that I was adamant, Gibel'ka, after some thought,
796 said: "You have nothing to give the Head of the earth, such
782 an important 'tyan'ga' and yet to have nothing to give. If we give him a present and say a good word, perhaps he will not become angry." Then I remembered that a few pieces of candy that I use for slaking my thirst when climbing a mountain were left in my pocket and, showing them to my elated companions, said that I /57/ would take them to the angry god and say a good word. My companions calmed down somewhat, and I set out on my way. In the evening when I came back loaded with a collection of herbs and minerals, my companions surrounded me with joy and began to inquire about what word I said to the Head of the earth. I was forced to recite for them impromptu prayers in their national style. "Lord of the Earth, you are very big and strong and can become terribly angry. All people know you. I came from a distant land, from a most distant land I came in order to look at you; please make it so that I and my companions are healthy and return home, and do not die of hunger on the way. Please feed me well!" When, exhausted and starving, we returned that very day to the settlement of Nyur very close by, and Gibel'ka, while the tea was being boiled, told the amazed listeners about my sacrifice and about the eloquent prayer, something extraordinary happened. All the people looked with tender emotion, while

/57 cont./

123 the women rushed to their storehouse to fetch the precious buda
796 reserved for sacrifices, in order to feed me and my companions
782 and thereby fulfill the will of the Head of the earth. Thus, thanks to the piece of candy, I, in the opinion of the Gilyak, not only saved my life, but unexpectedly obtained for my companions and myself a dish which we had not seen for a long time.

782 The Gilyak also has live sacrifices, the objects of which are dogs. A dog is killed, by strangulation, before the season of table hunting, during the bear festival, before departure for a long journey, during sickness, and generally on the solemn occasions of life. Before it is killed, it is fed, and at that time, depending upon the circumstances, it is given one or another
[796] mission. Thus, during the bear festival, the dog will be told: "Follow your bear to the highest mountain. May the master love you. Change this hair and come down next year as a bear
[155] so that I may see you." When a dog is killed on the occasion of sickness, it is asked to be the intercessor for the sick man before the god to which it is being sent.

Thus the victim is a simple envoy, whose soul, after its death, will reach the master who lives on the highest mountain.

Clan gods constitute a special category of gods. As a
796 matter of fact, these gods play a most important role in the life
614 of the Gilyak, and it is most often to them that the Gilyak offers his sacrifices. In each element there is a clan god. The clan gods are of particular /58/ interest, because in this tribe we can most clearly trace the very genesis of this very common fact of primitive religion. Even among the Greeks and the Romans the worship of clan gods was a common phenomenon. The clan gods of the Gilyak are not supernatural mythical beings, as among the Greeks and the Romans, but their very own clansmen who, for a variety of reasons, have entered the clan
795 of one or another god "master." A particularly fortunate com-
614 bination of circumstances, if I may express myself thus, is re-
796 quired to attain such an honor. If, while hunting, a Gilyak was killed by a bear, if he fell prey to the waves on the water, if he was murdered or burned to death through his own carelessness, if, according to the shaman's explanation, a woman died from

/59 cont./

614 as well as of the cult of ancestors, but I shall confine myself
191 here, for the time being, to what has been said. All the more since the institution of totemism has not assumed the same sharply pronounced form among this tribe that it did among other, specifically totemistic tribes, for example, the Australians, the North American Indians, the ancient Egyptians, etc.

Sacrifices to the clan gods are offered periodically. All
614 sorts of delicacies of the Gilyak cuisine are prepared by each
782 family prior to the day of the festival, and they are placed
796 in particular vessels reserved especially for this occasion. On the next day the entire male population of the clan sets out in boats or, in case of a disturbance on the sea, on foot in the taiga and stations itself on its clan plot of ground near its clan sign. The elder in the clan takes a handful from each dish and throws it, crying out at the same time, "chukh!" i.e., "This is for you!" After this the feasting, games, wrestling, and other such diversions begin. In the spring, with the appearance of the seals, the sacrifice for the "sea or river" man is arranged, consisting of the solemn throwing of viands into a hole in the ice. On the Amur these sacrifices are made from a boat immediately after the opening of the river; the boats are decorated with sacred shavings, and gay races in them are arranged.

796 The Gilyak have a great number of clan festivals, but
614 the most important of these is the so-called bear festival. This
628 festival plays a tremendous role in the social life of the Gilyak.
[570] In fact, it is not even a clan, but an interclan festival. The clan arranging the festival takes on itself only the expenses and trouble of arranging the festival; the most important role is played by the outside clans invited to participate in it. Since a year does not pass without such festivals occurring in one place or another, assembling representatives of many clans for a number of days, these occasions play the same role in the social intercourse of the Gilyak tribe as the Olympics and other games once played in Greece. The winter bear-festival is called a game (chkhyf-lekhernd -- the bear game).

/65 cont./

796 On this day, however, no one is allowed to taste the prepared
504 bear meat. This takes place on the next day, which is called the day of treating the narkh'i (narkh-arin-ku). The narkh'i seat themselves ceremoniously along the plank beds, while the host solemnly walks among the rows and distributes pieces of
[576] bear meat. More gracious hosts feed their guests with their own hands, sticking into their mouths /66/ a huge piece of fat; the guest bites off a piece, leaving it to his neighbor to finish
[614] what he has started. Only the narkh'i are allowed to eat bear
[614] meat; and his clan are denied this right; they are allowed to eat only a soup of rice or buda with the fat from the bears' carcasses. This soup is prepared and consumed in enormous quantities.

796 It is considered the greatest honor for the host to feed his
614 guests to satiety. His graciousness goes so far that when a
576 guest who has eaten too much of the fatty soup begins to vomit it, the host respectfully offers his mouth and drinks the vomit. It would be hard to imagine more refined graciousness. In intervals between feasting, dog races, games, fencing with sticks, and circle dancing are arranged.

796 All day the girls take turns playing music on the suspended
523 log and accompany their primitive music with humorous and at
273 times very frivolous songs. Not the least role in the feast is played by Russian vodka or Chinese grain vodka, which lifts
[554] the gaiety of the feasters to its apogee. To make one's guests drunk is considered the greatest honor. "At my house yesterday the narkh'i got drunk two times," the master of a bear once boasted to me.

796 Finally the last day of the festival comes, the day of departure of the narkh'i. Carcasses of bear meat and all kinds of viands prepared for their families and clansmen are placed
[788] on their sleds. At the last moment the narkh'i lead several dogs into the yurt and tie them around the plank bed of honor to the bear's skull. In addition, as a present, they put a spear, a thong, and other such items next to the head of the animal or stuck into it. Again, in farewell, the nark'i are lavishly

/66 cont./

796 fed, and then, exchanging farewell glances with the dogs,
they silently leave. Upon passing over the threshold, it remains for them to conclude the last ceremony, which bears the characteristic name of "lymyzyn zychyvynd" -- "the stamping of the threshold." This ceremony consists in placing nikh't (a kettle and an ax) on both sides of the threshold, the nikh of the departer -- on the inner side, and the nikh of the host on the outer side; the departer must first step over the inner nikh with one foot and then over the outer one with the other.

On this same day the last act is concluded -- the sacrifice
796 of the dogs. The dogs presented by the narkh'i, as well as the
782 dogs sacrificed by the master for this occasion, are led out to the plot of ground where the bear was killed and tied up to those same trees /67/ to which the bear was tied. The head of the bear with all the presents given to it, is also brought here. Each pair of dogs consists of a male and a female so they will be happier on the journey. Pairs of inau of the same kind as those
[778] that were prepared for seeing off the bear and equal in number to the number of pairs of dogs are then stuck into the ground in the neighborhood of the trees. The heads of the dogs are ornamented with shavings, which are painted with the juice of berries and attached to them. Before they are killed, the dogs are fed with choice viands and are exhorted in the following way: "Go, go to your master, take yourself up to the highest mountain, change your skin, and next year come down here, come down here as a bear so that I may have a look at you, do this, come down, farewell, travel well!" After this, they kill the dogs by strangulation. This procedure is carried out somewhat peculiarly. Two men seize a dog by its hind legs and forcefully pull the unfortunate animal as far as possible away from the tree to which it is tied with a tightening noose. At that time, two other men seize the two front paws; a fifth presses on the dog's neck, accelerating the process of strangulation, and a

/67 cont./

796 sixth sticks a sharp stick in its rectal opening to prevent ex-
782 cretion from the intestines. When the dogs are strangled, they are laid down on the snow with the same ceremony and in the same pose as the bears. A fire is ignited; they skin the killed animals and throw the meat into a kettle.

796 All participate in the feast of dog meat, both men and
[242] women, but only clansmen.

The following day the head of the bear and his bones, as
[166] well as the vessels, the arrows, the thongs, and so forth -- everything is transported to a traditional storehouse which
796 serves as a sepulcher for the remains of the sacred bear. At
774 this moment the soul of the bear finally sets out on the
825 journey to its "master." Burdened with the presents given to it and accompanied by the souls of the slain dogs friskily running alongside and by the souls of the sharpened sticks (inau), it reaches the highest mountain where its "master" lives, who is also the master of the taiga -- Pal'yaga.

796 What is the genesis of this strange festival which offers to many an amazing riddle.

796 In order to understand the idea of it, we must first of all
224 consider the fact that the bear festivals are celebrated not only on the occasion of killing a domestic bear, as people usually erroneously think, but every time that a Gilyak succeeds in killing a bear while hunting. True, in these instances the dimensions of the festival are less /68/ grandiose, but the essence remains the same. When the skin and the head of a bear killed in the taiga are brought into the village, a triumphal welcome is given with music and a solemn cere-
[782] monial. The head is placed on a sacred platform, is fed, and is given the same sacrificial offerings as upon the killing of a domestic bear; the narkh'i are similarly called together.
[166] Dogs are similarly sacrificed; the bones are preserved with the same ceremony and in the same place as the remains of a
796 domestic bear. Consequently the ceremonial of the great
825 winter festival is by no means the ritual performed at every killing of a bear, logically stemming from that respectful attitude toward the bear which I mentioned earlier.

/69 cont./

796 beast in the notion of the bear as a dog of the "master."
825 We should remember that the genesis of the cult of animals rests on the /70/ worship of the animal as such, without any allegorizing. "The reason of the universe," said the Avesta a long time ago, "is governed by a dog." But, as we have already seen, according to the subsequent evolution of the cult of the bear, in this last there may be concealed a "mountain man," a clansman of the "master of the mountains," or even a Gilyak's own kinsman turned into a "mountain man." Therefore one must show every courtesy to the one killed, feed its head, generously supply it for its journey with various kinds of provisions, not defile its body, not spill its blood upon the ground, and so forth -- all these are the inevitable consequence of viewing the bear as a higher creature. The importance of the holiday, however, is not exhausted with this display of respect for the higher creature. The soul of the slain bear journeys to its master, that master on whoh the welfare of man depends. It is the most apt occasion for sending to this distant lord various presents, such as dogs, arrows, bows, viands, and so forth. All this is repayed a hundredfold. Moreover, the bear itself, pleased by all the honors and the food, may turn out to be useful in petitioning for various favors from the master of the mountains.

From this it can be seen that the killing of the bear during
796 the winter festival is not a sacrifice to the gods, as, for in-
782 stance, Lang, a famous investigator of primitive religion, be-
825 lieves it to be, but merely provides an occasion for the
[114] sacrifices. The best proof is the fact that the Gilyak sacrifices to each god only that which the god himself does not have, and the master of the taiga has an abundance of bears. He needs dogs, fish, tobacco, sugar, thongs, and arrows -- and it is these objects that are given to him by the Gilyak; the bear is merely the honored envoy who carries them. It is a deity itself, albeit a small one, and therefore cannot itself
796 be a sacrifice. Finally, there is another important moment
825 in the holiday -- eating the body of the bear. As a general
861 rule, the greater part of the meat is given to the narkh'i, i.e., to the clan of the son-in-law /syat'/ of the master of the

/87 cont./

*614 370 796 ● 982 On all the important occasions of life, in case of sickness, on the hunt, before setting out on a dangerous journey, etc. -- the clansman throws into the fire his modest sacrifices -- a leaf of tobacco, sweet root, a drop of arrack -- and asks the old woman of the fire to fulfill his request. And she knows all the means necessary to insure that a petition to one or another clan deity -- if they are outside the sphere of her immediate influence -- reaches its destination.

*614 370 796 In order to understand the real basis of the "clan" attitude toward the master of the fire and his functions, it is necessary to keep in mind the following: 1) the deceased are given to burning, i.e., to the common master of the fire, who can receive his favorites into his clan, so that these latter in turn become "masters" of the clan fire; 2) in particular all those who perish by fire and lightning (2)

[191]

2. It is curious that a similar view exists among the Buryat: a man who perishes from lightning becomes a powerful and beneficent spirit to whom sacrifices are made and prayers are raised.

become such masters; 3) the concept of /88/ an "old woman" (mistress) of the clan fire, instead of a "master," is a faint echo of the maternal clan; 4) the "universality" of fire, its ability to spread quickly, its many tongues (tongues of flame), which all primitive people (compare the Rig-Veda) understand in the most realistic sense -- give the "fire" special advantages over the other "masters" -- namely, the rapid and eloquent transmission of messages and petitions; finally, 5) the fire is a warming and purifying substance, i.e., a substance that drives away evil spirits.

/89 cont./

*614 795 [766] cremation, and the oars are placed upright, facing each other, in order to be noticeable from afar.

clansmen serve as daily reminders of them.

*614 795 ● 982 796 But the bond of the clan with its divine clansmen is not limited to piety and grateful recollection; these tits are rooted in a more practical and stronger motive force -- the very instinct of self-preservation. For the Gilyak there is no more indubitable truth than that all his prosperity, all that nature gives him in return for his desperate efforts in the struggle for existence, all this is but the free gift of the gods, his benefactors; without their benevolence, all the efforts of man would be fruitless. And the gods-clansmen, as we know, take part above all else in this life-giving benevolence; they are the true sustpers of the clan, and there is no weightier obligation for any clansman than to promote this benevolence to the best of his ability. That is why the clan sacrifices and festivals, held once a year according to rule, /90/ for the mountain and sea people are most important acts of clan life, in which everyone, in the name of self-preservation, considers it his most sacred obligation to take the most fervent part.

In the section on religion we dwelt in detail on these periodic sacrifices to the masters of the sea and mountains. Without exaggeration one can say that the whole social activity of the Gilyak is principally devoted to preparation for the clan sacrifices and to preoccupation with celebrating them most magnificently. Wealthy and poor man alike, according to their abilities and means, are ready from fear but for conscience's sake, make all possible efforts, sometimes denying themselves their last possessions, in order that the sacrifices be as ample and varied as possible and that the festivals be as magnificent as possible; this is the general interest of one and all.

/90 cont./

*614 795 ● 982 796 In its evolution, this solidarity in the sacrifices to clansmen, fostered for ages, becomes the principle of the clan relation to the gods in general. When in wholly individual affairs, during illness, say, the Gilyak makes a sacrifice, he will without fail summon his absent clansmen, even from afar, so that they may enjoy the beneficial consequences of the sacrifice.

574 795 795 *[614] The principle of common clan deities, the sustainers of the clan, is the foundation of the institution of hospitality and the most extensive fraternal mutual aid.

It should be evident to anyone acquainted with the institution of hospitality among primitive peoples, even if only from travelers' descriptions, that it must be based on something more than mere social etiquette or even humanity sympathy for one's fellow creatures. The Arab, at his own hearth manifests the warmest hospitality to even his enemy concerning whom at any other place he has only one imperative -- kill, evidently is impelled by a more powerful motive, a motive which has behind it religious dictates. And this must be said about the basis of the institution among all other primitive peoples, including the Gilyak. The Gilyak considers it his obligation to extend hospitality, not only to the traveler, not only to the actually hungry man, but also in cases where from our point of view there is no necessity whatever for displaying this feeling. No matter how many times a day a neighbor may appear at his hearth, no matter what time of day it be, the guest is immediately offered all the wands in the possession of the host, not to mention the inevitable handful of tobacco for his pipe. /91/ If there is no extra tobacco, he just takes turn with the guest in drawing on a common pipe. These attitudes are most striking in the handling of rare, costly dishes and delicacies. If you bring the host a glass of vodka, he will never allow himself to drink it alone, he will merely put his lips to it, and then it goes around to all the dwellers in the house, although there may be dozens of them, including the children, even suckings. To do otherwise would be "a very great sin, one might die."

/92 cont./

*614 428 795 [556] worn on ceremonial occasions and in which the dead are garbed.

such as will inevitably find its way back to the clan of the testator, so that to the ymgi clan, i.e., the clan that takes its wives from the clan of the testator and consequently pays it bride price, can only be willed the so-called iron shagund, which in any case will return to the clan in the form of bride price, while to the akhmal'k clan, the clan of fathers-in-law, only fur shagund can be willed, since it will return to the clan in the form of the bride's dowry.

*614 796 4. One bear: the common obligation of the clansmen to share in the fattening of the bear and in the bear festivals, both on the occasion of the slaying of a domestic bear and the hunting of the forest beast. "Khal'-gu, ut-gu, nakh muvel"; "Clansmen, men, be guests!" -- with this summons the youths go around to the yurts, summoning the clansmen to the eating of the sacred meal of the bear slain in the forest and the viands jointly prepared for the occasion by the whole clan.

The importance of common rights and obligations with respect to the bear festival, as the exclusive privilege of the clan, proceeds directly from what we said regarding this in the section on /93/ religion and the clan gods. As

*614 796 ● 982 [1015] we saw, the bear festival is characterized by two basic features: first, by the honoring of the very person of the bear as a possible clansman of a "mountain" man and, consequently, a possible clansman of their own or his descendant, who had passed into the clan of the mountain masters; and, second, by the transmittal through him of various gifts to the mountain master and his clan and, consequently, to the god-clansman, their sustainer. Thus the bear festival has an incomparably greater significance for the welfare of the clan than other clan sacrifices and festivals, because the sacrifices go to the highest master of the mountains, to the chief disposer of

/93 cont./

*614 796 ● [782] all forest wealth and the most powerful deity, before whom the slain bear, comforted by the feeding and honors, will be their daily intercessor. That is why this festival plays such an enormous role in the life of the clan and is couched in such complex ritual, and why, despite the fact that guests from other clans assemble for it, it bears in essence such a rigidly exclusive clan character. Only clansmen may participate in the celebration of the festival, and as guests only "sons-in-law" /syat'ya/ are invited, in relation to whom, as we shall see, there exists the direct obligation of sustenance, i.e., persons to whom the benevolence of the gods-sustainers also extends. The bear festival is as important a element of clan ties in the social sense as it is in the religious one. The obligation to participate in the preparation of food and in the numerous expenses and tasks involved in the arrangement of the festival and the reception of guests creates the habits of social solidarity, common co-ordinated action toward a common goal, and common sacrifices for a common project. The periodic assemblies of clansmen, sometimes dispersed in distant places, constantly supports the ties and consciousness of the clan union.

*614 796 182 [688] Finally, the very content of the festival -- the day prefestival preparations performed jointly, the solemn meeting of the "guests," the common, noisy meals, social conversation, dances, songs, races, fencing, religious ceremonies -- all this unites, stimulates, refines, and beautifies life, giving the highest value to the clan union as the unique source of spiritual and social enjoyment.

*614 795 5. One devil, i.e., a common enemy in the person of a deceased clansman, a slain member of another clan, and so forth.

Just as a clansman, as we have seen, can under certain circumstances pass after death into the clan of benevolent /94/ deities and become the sustainer and protector of the clan, so can the converse happen: a clansman who became embittered when alive and separated from the clan, a

/96 cont./ Not far from the

*614 825 795 [766] native village a framework in the likeness of a bear hunter is set up, with openings for the proper sacrifices. On the outside, at the corners, four sharpened saplings are set up, while it is decorated on the inside with the sacred inau. Here are also deposited the remains of the murdered man and his murderer, in the same position in which they were brought from the taiga, as we described above.

A unique funeral feast with the carcass of the slain bear is held beside this framework. On both sides of a long uninterrupted campfire sit the clansmen with large pieces of bear meat in their hands. Each one cuts the meat into thin pieces, and as each piece is cut off he throws it from his knife across the fire to the one sitting on the opposite side of the campfire. The slice, caught on a knife, is slowly roasted in the fire (the greatest insult for the bear, whose meat may only be boiled), and then with a look of revulsion they each bite off a piece and scornfully throw the meat away, although ordinarily it is /97/ considered a great sin to let even the smallest piece of bone fall to the ground.

● [782] [787] After this procedure of "refined" revenge, a feast with sacrifices to the master of the mountains and the murdered man begins. First they throw into the fire the carcass, which has begun to be burned, then various viands. At night they place a guard of two men with spears over the framework, lest the spirit of the bear wish to take revenge. The sentries firmly assert in such instances that they heard the cries of the murdered man, "Ai, Bear!" and threw themselves with spears upon the invisible avenger. In the morning they will tell you, traces of blood are clearly visible on the points of the spears...

*614 795 782 787 766 With the end of the funeral feast, peace between the mountain men and the clan of the murdered man has been restored. The latter is accepted and will live to a ripe old age in the clan of the mountain people, while his clansmen for three generations will twice a year (summer and winter) make sacrifices; part to the master of the mountain, part to the divine clansman.

/105 cont./

*614 628 536 A procession of the avenger with the khlaj-nivukh at their head sets out toward the settlement of the foe, and out to meet them comes /106/ a similar procession of the clan of the slayer. At a distance of several dozen sagenes from each other, both sides stop, and out comes the closest kinsman with his khlaj-nivukh, and from the other side advances the slayer with his "intermediary," both armed with bows and spears. At a signal given by the khlaj-nivukh they begin to shoot arrows at each other or attack with their spears, adroitly dodging the arrows and blows. The duel, of course, is fictitious, although there have been instances where the opponents grew excited and the matter ended sadly. All this time the khlaj-nivukh's pacify their clients

● [782] insisting on reconciliation. In the meantime the clansmen lead a dog-sacrifice among their opponents and kill them with spears ("blood for blood"). Then the opponents hasten to embrace each other, and peace is concluded. The heart of the slain dog is sacrificed to the bird-avenger (see above while the meat is eaten at the feast that follows.

*614 628 Then the representatives of both sides set off for the yurt of the slayer, where the objects constituting the tkhusind are placed -- kettles, spears, sabers, silken materials, and so forth. All the clansmen participate in the payment of the latter, each according to his wealth, considering it a great sin to evade his proportionate share. On the other hand, the acquired tkhusind becomes the common property of the clan of the slayer /sic/. In part it replaces those valuables which were needed for the dead man in the "settlement of the dead"; in part it becomes a fund for the family of the slain and meets the clan requirements.

608 537 554 The negotiations over tkhusind for other causes, such as, for example, the abduction of a woman, the defilement of sacred things, and so on, are also conducted through the intervention of khlaj-nivukh's, but without any particular ceremony. The intermediaries judge the moot points in the presence of the assembled people, hear the opinions of those present, and the decision is, as it were, the verdict of the whole gathering.

/562 cont./

224 as a rule when an old she-bear with its one or two-year-old cubs is found in the lair. In this case, the all too dangerous battle to capture the old animal is usually not even undertaken, but rather it is enough to stab it at once, and only the cubs are [262] fettered and led into captivity. The bears killed in the wilderness in this or some other way are, to be sure, likewise eaten by the Gilyak, /563/ but, as far as I know, without special festivities, and this is not merely because the processions, so very essential in this connection, which are conducted with the imprisoned bears, must naturally be omitted, but rather perhaps also because the slain bear does not by far have the tastiness for a Gilyak palate and does not have the thick layer of fat of the animal kept imprisoned for some length of time and fattened on 224 184 a fish diet. Along the coast of the Sea of Okhotsk Middendorff (1)

1. Reise, etc., Vol. IV, p. 1381.

learned of another method of the Gilyak for capturing bears alive, which, however, could scarcely occur in the Amur region and on Sakhalin, with different natural conditions. It consists in putting, at places where deeply cut game-trails lead down from the heights of the steep coast to the sea and between two trees standing close to each other, on the latter large strap-nooses, in which the bear, since it does not find another path either to the right or left, must inevitably be caught. I do not know of any such localities in the Amur region, and, accordingly, I have never heard of such a method of catching bears there.

224 Many superstitious beliefs and customs are certainly asso- 78 ciated with the hunting of bears among the Gilyak, and their ob- 825 servance is considered necessary in order to undergo the dangers of the fight with it successfully and to master the mighty animal unharmed, but to be able to escape the revenge of its manes in 224 case of its death. But I cannot agree at all with the statement by 114 Nordmann that "lovely songs" are first delivered by a few shamans 756 to the bear tracked down in its lair, which are supposed to induce 533 825

781

781 RELIGIOUS EXPERIENCE--emotional reactions experienced in religious behavior (e.g., oppressive fear of malevolent higher powers, overwhelming awe of divine might, luxurious sense of dependence upon a benevolent and all-knowing superior, reassuring feeling of security through conformity, prideful conviction of right, grateful release from the burdens of a guilty conscience, groveling humility of self-abnegation, ecstatic release of mysterious inner powers, mystic sense of identification with or absorption in the divine essence, esthetic thrill in religious art, music, or ceremonial); evidence as to the predominant type or types of religious experience in the particular society; emotional needs satisfied through religious behavior; etc. See also:

/366 cont./

the god gives meat to man, and the bones are returned as the creative element for future fish and seals. For the same reason the Gilyak carefully buries the eyes in the sand of the shore, and any undeveloped fetus found in the uterus of a seal. To the Gilyak a sacrifice is not a ritual or a routine matter, but serious business on which his welfare depends. In addition to the solemn sacrifices offered at the opening of the seal season, the Gilyak with special solemnity gives presents to his god at the beginning of the sable season. He offers this sacrifice all by himself in the taiga, at the side of the same small balagan which serves as a night shelter the whole time he watches over his snares and traps. Besides his usual gifts, he sometimes sacrifices a dog for this occasion. After striking the sacrificial animal in the heart, he gives its blood to the god, but eats the meat at a solemn feast with his kinsmen. He usually gives frequent gifts to his gods, although just a little at a time, believing that a hundred fish mean as little to a god as a handful of rice or saranka means to a Gilyak. Offerings made during a journey can be touching. I remember that once during a journey to northern Sakhalin we came to the crest of a mountain ridge unexpectedly, and suddenly there unfolded the magical panorama of the mountains. The "Head of the earth" towered majestically before us. My Gilyak companions were deeply moved. One of them took from his sled his cherished little sack with saranka, tobacco, sweet roots, and so forth, and, moving off about 30 steps to the right, he squatted down, buried a handful of each in the snow, and repeated his prayer for a long time. When he got up, he moved the same number of steps to the left and did the same. Then, his face suffused with emotion, he returned to us and distributed the remains of his sacrifice. He had prayed that we be granted a happy journey. Later, he was able to boast that his prayers had been heard... There is a tremendous difference between the religious feeling of a Gilyak and the religious feeling of not only a Christian, Jew, or Moslem, but even of a Buddhist. "Contrition," the striving of the soul toward the deity, in our meaning, all seem to be incomprehensible things to a Gilyak. For him, in religion everything is simple /367/ and clear; there are no doubts and no suffering. He does not understand religious ecstasy.

782

2 PROPITIATION--practices reflecting a sense of dependence and a desire to ingratiate or influence the supernatural; repudiation and intimidation; obeisances (e.g., bowing, genuflection); laudation; prayer; sacrifice (e.g., libations, food sacrifices, animal and human sacrifice, symbolic and vicarious sacrifices); vows; burning of incense; decoration of religious edifices; endowing of shrines and temples; etc. See also:

/49 cont./

771 For him, the prototype of everything that exists is, naturally, man, as the creature whom he knows and understands best. Everything reduces itself to man: everything visible in nature is a form in which is invested god-man. With such a world view, the religion of the Gilyak represents a combination of pantheism, the cult of animals, fetishism, demonism, polytheism, etc., all of them against the general background of anthropomorphism.

772 776 The Gilyak calls the universe "kurn," but with this same word he denotes the concept of a personal, man-like god. With the word "pal'" he denotes mountain and the god -- "master" of the mountain; with the word "tol'" -- the sea and the god of the sea. The universe is only the form which has been assumed by great image of the personal god, "kurn."

823 The Gilyak calls his native island "mif" (the earth). It is a living, divine creature, whose "head" (Cape Marii) and "chin," "Pytykry," lie in the Sea of Okhotsk, while its "legs" are two peninsulas in the Korsakov okrug which lie in La Pérouse Strait.

[782] I myself have made some trips across the "Chin," have seen how respectfully sacrifices were made by my companions and prayers were delivered to the earth concerning our successful journey. [778] I made my way up to the top of the very "Head" of the earth, which, according to the beliefs of the Gilyak, does not leave unpunished a sacriligeous offense against it by the feet of mortals, and saw the majestic bald spot of this divine Head, covered with sharp stone teeth instead of hair /50/ (the result of weathering), which bring superstitious terror on the Gilyak... The majestic crest of the top of the high cape looking out on the boundless sea is indeed very imposing!

Moreover, the parts, even the smallest ones, of this grandiose being -- the "mif" -- are the same kind of living independent creatures as the divine whole. Here is the majestic mountain Engel'spal', which rises alone over the northern dunes; it is the living reindeer of the god of the universe, "kurn," on which he traveled over the island, putting it into its present state, habitable for man. The valleys were

/55 cont./

776 782 Other gods distant from him, the sun and the moon, for example, just like the tly-nivukh'i, interest him little, for these gods are not closely related to his life and needs. On the other hand, the Gilyak is in constant communication with such gods as the master of the taiga, the sea, and the fire, turning to them sometimes with sacrifices, sometimes with prayers. Usually both acts are joined together. For an ordinary sacrifice neither solemnity nor any special objects are necessary. The principle /56/ of sacrifice is exchange, and therefore one cannot give the god of the sea fish, nor the god of the taiga the meat of animals.

782 [484] If the Gilyak sails on the sea and is afraid of a storm, he respectfully lowers a leaf of tobacco or a handful of rice over the side and says: "Please make the sea calm, so that I may arrive home alive and healthy." Whenever the Gilyak sets out, he takes along in a special sack his favorite objects for sacrifice, sweet herbs, sarana, and so forth -- since the gods are not demanding.

123 776 Some kind of candy delivered to the deity may sometime stand one in very good stead. I experienced this once myself. It was in August, 1894. With great difficulties, almost without provisions or supplies, and with one piece of brick tea and some biscuits, I reached the Head of the earth. When I unexpectedly informed my companions that I had decided to betake myself up to the top of the "Head" in order to collect plants and remove some stones, my companions were overcome with panic. They adjured me to renounce my "insane" intention, which had to lead to our common destruction, offering as proof the example of two Russian seamen who had attempted to go up to the top of the small god, Lazarev Cape, perished, and were buried there. The captain of my boat, Gibel'ka, an intelligent and loyal Gilyak from the settlement Tangi, who had become quite attached to me, was especially agitated.

/312 cont./

Only representatives of the clan, kahal o'khlir, gather at the place where the chédzigr stands. They bring rice, buds, a pig, and vodka. Before the tree there is a bench /fabar/ for bears' dishes. The pig is slaughtered, and its blood is sprinkled around with the comment: "Kur, indyil -- god, look!" No images of any sort are made on the tree.

The tree is also a road. Everybody goves to the Ily-n'lvush, the sacrifice goes along the wor, then along the thread which goes from the tree and serves as a trail. They start a fire in order to tan the pig. They do not feed the fire, but they do protect it, and they keep it out. It is absolutely necessary that the sun shine during a sacrifice, and therefore it is occasionally necessary to wait. When a balagan is placed in a new place, they make a new chédzigr.

Tlyrolh -- Sacrifice to the sky. Everyone assembles in one yurt. Early in the morning they set-out in search of a larch (for the chédzigr), while the women prepare various dishes. Then the tree which has been brought in is made fast, and all the dishes are carried in Chinese or Japanese dishes. There are villages where the Aino language is used, in Tevlth only a red dog /gi-ldzi/ is slaughtered instead of a pig and a cock. They tie it up to the chédzigr, strangle it, cut out the heart and throw it upward, treat the another with vodka, and rub the chédzigr with vodka. They celebrate once a year in January -- chamlong. The "word" during tlyrolh: "n'longer-a kinyngoh: hamgugr, khalahl tyrgyzir", i.e., "please, that I live well, that there be no sickness."

Then they make a new birch bowl (chan'gar), place it on the ground, and put the sacrifice in it. Shi, a stick, and a cone bow (nanchla) are placed there; the "word" (prayer) is not said, and they quietly leave. At home they "make" a fire, and when everything is cooked, all the sacrifices are placed between two coniferous branches and then placed between two forked pieces of wood (tung-k'vh); the fork is thrown into the fire and chédzigr. This fork is placed under the head at the end of a yurt to protect against the mila-a (the evil spirit). In /315/ the

/313 cont./

morning it is necessary to take back the ski and to forth quietly and stealthily. These things are placed so that the Tly-n'lvush descend the river, and by those objects they find out the nature of the Tly-n'lvush and "if he has a good heart," if he will give a "tink" /fan/ or not. "After all, five of us go, one caught some-thing while river, and we go on and pursuing but gets nothing. What is the reason for this?"

During a tahh -- smallpox epidemic -- in Tyr all the Gilyak assembled, made a sacrifice -- bow, pheasant, fish, roots, and berries. First the 120-year-old man Zyavkayu from the village of Dyi'mya sacrifices. They pray before the tree chédzigr. This old man sacrificed four big tahh.

Pal likes a tree with different peculiarities, and on solemn occasions such trees are selected. A sacrifice is also made to "one's clan Pal-yz" (the master of the mountain), but they are not made to Pila-yz (the great master). He is most frequently seen as a snake. One must not shout to him. There is a conversation going on the other side -- that is Pal-yz'. Pal -- mountain master -- likes a black dog. Tol -- sea master -- a white one. Each house has two fires, Pal-tigr and Tol-tigr. If a person has one stove, it is only Tol-tigr, and if he must boil bear meat, he goes to a clansman of that ishala who has two stoves.

Tol-tahhgr -- a tahhgr of larch; a hammer, chong-chirk', an hung on it. Near it is a battery (bench) /fabar/for which are placed bowls, spoons, tahhgrh, balagr, and tobacco. And here they invariably boil the dolphins, here the bones are left to lie, except the skulls and heads, which are carried away to kilbuch (tangyl, i.e., a place where they put skulls. During the funerals only two dishes are placed on the halugyr -- mos' and muvi (tissue of jelly-like dish). It is also from here, in the presence of the entire ishala, that they throw a little of everything into the Amur, but say nothing -- otherwise another misfortune will occur. -- Then on the tahhgr they hang robaxca, ngo (chldyzir) -- a bunch, yukola -- yyz' and announce that everyone should come out and feed it. This is the main office of Tol. People are sent

/313 cont./

"Tyk-ly? -- Is it enough?" "Yiuf! -- It is enough." Everyone approaches by houses and feeds it, and each says his own: "Send the dolphin! Send the little fish!" After this everyone gathers together at the same time, for otherwise it would be a heavy sin if they were to meet each other.

The customary tahhg of a hunter is the individual sig. Anybody who touches it gives a dog. If a member of another clan has insulted a lezing (the place for the bear festival), the vopund hylhyde: assemblies, and they judge him; they demand a bear or a dog. -- a dog /gyr/. Pyl-yz' -- the spirit of the mouth is fed each month. If they have caught a tasty fish, /314/ they cut themselves a piece and him a piece, and when his pieces have stood for half an hour, they eat them themselves.

When they build a pila sigryf (house in which the bear festival is celebrated), it is imperative to celebrate a bear festival. If there is nowhere to buy a bear, they must kill a hik -- a dogs black dog "it is just like molh," i.e., like a bear). If the house is simple, they kill only dogs, two to four in number, without regard to kind. If a poor falls on a lezing, they kill two black dogs. It is not at all necessary that a man be killed by a bear for a pila sigryf. And also a bear festival, when the members of other clans are leaving for (their own) homes, the bear bones are tied together with a thong and their dogs are killed at a special chédzigr.

It is not permissible for a single clan in a single village to make two lezing, but there can be several sigryf. Any house where a bear festival takes place is an sigryf.

/314 cont./

Sacrifices (sacrificed dishes -- chinfong) are placed on the 2. appropriate day, but if there is not enough, with the setting of the appropriate sun (not or pal'). /315/ /Sketch/ of the house-plan appears here./

Tyyrz -- "master" of the house; he lives either under the post (10) or under a stone (19). Sometimes he is an old man, sometimes an old woman or a young woman.

The master of the house and his family occupy the tol' erih punk; if the family is large then also the hemkahh (3) and pocakkhah (1). The hearth is placed in the middle (26).

In autumn, during cleaning, everything is abundantly fed; the walls, the floor, the supports under the plank beds, the edges of the plank beds, and so forth.

Rites upon the completion of a house. When a new house is completed, they place two sticks, one in the front and the other in the back of the house, and a thread stretched between them. Two hung images of the sun (hengr) and the moon (long chashh). They are not renewed later.

Sacrifices. In ancient times, sacrifices are made: They prepare mos' 1) alyn -- berries, 2) raki -- a porridge of rice or wheat, and feed the four-cornerr (chosch): four posts (mos'-cashh), and the two posts in the middle -- the front one, arnhhar', and the rear one, hemhhar', in which the master lives; they also feed the two-cornerr (ngo'-tol'-edz). Here the old man says: "Ha-ldi mu-ja' nolaga kyrmyzh: hamgugr, ta sihhydz khodal'ta hamgugr" -- be a good house (ut firmly). Make it felicitous for my children, and so that there be no kind of sickness." Then the bear is cleaned, plastered with clay, and they sacrifice -- tyv amyde.

Tyv ya' hash -- a stone before the threshold or beyond the threshold, or a piece of pig iron; under it sits the "master," who guards against the entry of the milk'.

Tyin yz' -- threshold. Beyond the threshold, under the ground, they place different foods (chyuhr) -- for the earth -- the master and the tol tyrgyr.

/317 cont./

Sanctification of the house. On the eve of sanctification, on the day of the completion of the building, with the setting of the sun, they feed the reliable man must make his way there and be attentive for a cracking sound or streaks of light.

If a cracking sound is heard during the sunset, or purple streaks of light are noticed, this is a bad sign. If the cracking is at dawn or the streaks of light are bright light -- this is a good sign. The bad sign means that not a "man," but a devil -- kins has settled in the house. Then the shaman must be called, and he makes a chinfong (chinfong), a grass figure, and drives out the demon. A real "master" is fed two times -- in autumn (chonjing) (1) and another time when one wishes. They

1. Evidently speaking of the cleaning of the hearth by feeding the "master" of the fire.

feed all the posts, the door posts, the threshold, the mariga, the stone under the threshold near the door, the dog, where the master of the old woman lives, guarding the house against the entering of the evil spirit.

/318/ Driving out the evil spirit takes place in the following fashion: a grass figure -- chihhnaj, on three legs, is placed in the middle of the yurt. A man holds it (a strong man holds it hard); in his other hand he holds a club. A shaman threatenes with a tambourine. The evil spirit must hide. The shaman commentator walls, bones, and variant things in the yurt from which kilo hehm must drive out the evil spirit, and he does not mention only one corner -- it is there that the evil spirit is hiding.

/319/ Driving out the evil spirit. And all answer: "Ly-gi, ly-gi, such and such a corner does not have evil spirits." Finally the shaman says: "The kings hid hidden in such and such a corner. Ahang (apparently the spirit -- assistant of the shaman), go and get him; and the rest make a battue!" "There, he went out, he went out a dog." (speaking to the kehhr, i.e., to the spirit).

/319 cont./

Make a battue, drive him toward this great figure. Ah! He has turned into a mouse." The chorus: "He is going there. He turned into a human form... he turned into a bird. He got into the pipe."

Finally, there is no other place, and he has to get into the chihhnaj -- the grass figure, whether he wants to or not. When he has entered it, the hand of the person holding the shaman appears to shake. The shaman shouts: "Hir hinn!" And shot one hits. They light a candle, throw light on it, and inspect the grass figure: it again does not have its head toward the threshold. The shaman searches for him again. He finds him. Again the same thing. Finally, the chihhnaj has its head toward the threshold, which means that the evil spirit has gone out. The shaman leaves his mana to keep watch overnight. In the evening of the following day, the shaman calls the real "master," but that means that he was late. The real "master" is generally hidden under the earth. The shaman looks for him and addresses to him the request: "Ha-ldi mu-ja' nolaga hinn, hinn an ilm, he hinn ya' ya' ya'

/356 cont./

(764) a man's one purse (nhy) for tinder and flint.
(765) B. Hoatsh -- a tobacco pouch, also of drel', for both men and
(792) women; tobacco is placed in the nhy and the hontkh.

A husband dresses his wife, a wife her husband, parents their children, and vice versa. The deceased is given nothing more than the things enumerated. Shagund -- valuables -- are hung around outside and inside the yurt.

Before the funeral guests are entertained from morning until night. Among the rich the entire village is entertained; they drink vodka and place vodka before the deceased. It is necessary to be gay, but they do not dance.

(794) No news, or tales, or songs (are recited -- puring).

On the following day the men go to the forest for the cremation of the deceased. They cut down larch and fir, and
(824) for children -- rose-willow; to cut larch or fir for children is a sin. One must select a good tree; otherwise it is a sin. They cut down one or two trees. The firewood is cut lengthwise and unfailingly a definite length: (82" among some, up to a sagene in length (the clan of Pletunka); among others, one sagene less one hand. The roots are not touched, and the branches are thrown away. The logs are placed in three rows, lengthwise and crosswise.

During the second night, too, nobody sleeps; everyone feeds
(782) the deceased (mu n'ngyvyn achnind), but they do not put anything in his mouth. On the third day the yurt is cleaned -- tay mund, the floor is swept; then the fire is purified -- tugur mund, yurt is prepared, and tugur amind is performed -- "they feed the fire" (the new master, or a clansman) -- mos' is thrown into a fire started with the branches of a fir, but nothing is said.

When all the preparations have been completed, they eat, drink vodka, and then bring in a dog sled. The deceased is placed on the dog sled, bound to it with thongs, and four men lift the dog sled and carry it on their arms out to the place of cremation. A "pyal" (dog) is tied to the place where its master slept. They walk around the future fire three times with the dog sled and the deceased, and they have a respite three times. After this the dogs and the dog sled are taken to the side, and the deceased,

/356 cont./

(795) This bird (the soul of the urila man) enters the avenger of
(796) the urila man and instills courage in him. Its image (vagp,
(792) tashch,vagp) is made out of the roots of the alder tree and place.

(798) The roots upward, not far from the raf over the grave of the urila tavern. The chhinaj of fish bird must be made out of the root, and a small knife must be placed in its mouth.

The resurrection of the soul. The soul of the deceased will sometimes be born again. If a boy is born with a sign indicating his origin (such as a person who has danger, he will say, even before untied speech, words that indicate his knowledge of the past.

(795) When he attains intelligible speech, his father puts a hat on him
(796) backwards and begins to ask him questions about the past, and
(797) he says quietly: "Well, that is enough, forget the best," and puts the hat on him in the proper way. Then the boy forgets everything, and will live for a long time. If the father does not do this, the boy will die. The procedure with the hat drives away the "noses."

II.

Hunting and Fishing

(824) Sacrifices to the sea -- Tol vymid (tynydge). 1. When winter
(792) sets in and there is not a single unfrozen patch of water on the surface of the sea, the men of the same khal'a (women do not participate) set out in the dark of night for the sea, a hole in the ice, and through it each of them throws wood -- "wood fire," which has been started with a piece of tinder -- to the sea. Later on, at home, they "eat," i.e., feast.

(651) 2. In summer, people who leave the shore in a rowboat throw things out of a bowl for sea offerings -- tol n'ngn -- to the master of the sea, Tol yr'dokh.

(792) To Tol they always sacrifice a white dog, a white fir, everything smooth and clean; to Pal and Mif, on the older hand, everything fanciful; to Kur -- a red dog, a red cock, a bright cup, vodka.

/382 cont./

(824) In the evening of the day of arrival at the hunters' balagan,
(792) they make chukh-chugynd (a sacrifice) to Pal-n'ngyvyn, the master
(798) of the mountains; the master says, "Ar'myr sikrf, urgur n'un'ujf, mushjf" -- "there are no more presents, make it so that I am not afraid, look after us well!" They make chukh-chugynd before a particular tree (uig-chhkar -- a tabooed and forbidden tree); then they only feed the fire, saying: "Urgur in'ja, hiulan tugur mujf, pal'akh pong argujd -- eat well, make the mountain people take pity on us!" The fire may not be made by an alien khhal. Only the master -- yr'ngn -- may clean the fire, tugurmynd. /383/ the cleaning is done in the winter quarters in fall and in the summer quarters in spring; the rubbish is put in one place. Mos' for the fire is prepared also only by the yr'ngn and his khhal, but the sacrifice may be offered by anybody. On the first evening they make the sacrifice to the hearth: "Urgur in'ja pal'akh ponargjd mila n'ivukh mungja" -- eat well, make the mountain take pity on me, make me a happy man!" Old tahhej (trees with bifurcations) are stacked together, and new ones are made. Near the balagan there is an uig-tahhej on which are hung sables, noses, and so forth. The word to it: "Pal ponargja n'ash hiulan -- a'ngyvyn mungjd!" -- "mountain, take pity on me and make me successful in hunting the beast."

Near the balagan is an uig-chhkar to which sacrifices are thrown merely with spoons -- no chhinaj are made. They also feed helming an'ish (a bitch looking into a behind) and Lymys'n mimi.

(651) Those who have arrived with the game hang it on the com-
(792) mon tahhej, where it hangs for several hours until it dries. Anyone from the same clan can take off the skin. The boiled head
(852) of a sable is decorated with imu, placed on sticks on the front part of the hearth, nearer the ponang (the middle plank-bed), and
(792) rice, puchka, saranа, and mos' are stuffed through the opening in the back of its head and through its nostrils; then the head is eaten by anyone who wishes.

When the head and the bones of the animal have been put together in chumashki, sacrificial dishes are prepared, and the bones

/383 cont./

are carried into the taiga, there they find a tree with a hollow
(792) trunk, make an opening in the hollow trunk, feed the head, and throw all the bones and the head there.

The otter is fed and buried in exactly the same way as the sable. The remaining beasts are uigund kauk (i.e., there is no taboo on them).

When a pair of reindeer horns from a mature specimen are found lying side by side in the taiga, the possession of them gives the Gilyak luck.

During the hunting with nooses (pochakhir n'arkhind), a woman must not see anything new or give anything from her own house to another, even a member of her own clan, if that thing has spent a night in the house. One must not sweep the floor outside. One must not allow any guest to spend the night. In the taiga, one may enter another's balagan, but not spend the night. If a sable is caught in a noose, an alien may not take it with his hands without the permission of the master, and in general during the hunting someone else's property cannot be touched even by a person from the same clan if he is not a participant in the hunting party; even a killed hazel-grouse may not be touched. If
(626) any person commits an uigind -- sin, they do not let him fish or
(792) hunt on the stream, and they do not attend his bear festival.

/384/ Sables, when caught, should not be killed by dogs. Catching a wolf. In Ikhdam (northwestern Sakhalin) they place a tree with a forked branch and sharpened edges not far from the yurt. Yukola is hung between the forked branch and the tree; the wolf jumps up to seize it, sticks in his paw, which becomes caught, and he cannot free it. It is a sin to shoot at wolves.

225 Seals are caught thus: a net is placed around a tor' (?), and the seals sleeping on the sand are driven together; then they fall into the net.

(824) Mos' is made twice a year (in summer after the salmon,
(792) and in autumn before the sable). In winter one must unfailingly kill a great number of dogs oneself (a minimum of four), make plenty of mos', and in summer catch a great number of bears (this will be pal n'ivukh tihuind). In general a great deal is done for the sake of tihuind.

/384 cont./

One may not sleep with a woman when nooses and traps
(792) are being set, i.e., during the narihind, and also during a bear festival and when a man has died.

III.

342 The Building of a House and Rites and Ideas Connected with the House

(787) A flint and some sweetbrier are placed under the post. The
(792) sweetbrier guards against the mills, while the flint is there so that there will be no hole in the wood, and then the milk (evil spirit) cannot come through. The door is toward the east.

When a new yurt is finished, a festival is held. They make an iinin chhinaj (chhinaj ofn (?) ehhinaj). Aqvyn (?)mij in the shape of a human face on each of four posts (nas'ki khur) of the hearth, and for the sturdiness of the house, inau are tied to the cross rafters (nas'ki). Then they kill a dog, tie it to the nas'ki
(792) khur closest to the door, and rub the chhinaj with the blood of its heart. The meat of the dog is boiled. Mos' is made, and the chhhinajinau, the helgelnan'ih, or (in Arkyop) the hymymnam, and the nich are fed. Three small furs are then placed in the hearth and tied up with two saranka -- bound with puchka (shin); for some reason these bindings are called "little bear." After this, mos' wrapped in inau is put in three places under the ground. At night when everybody has gone to bed, it is necessary to burn the fire and say a prayer.

(792) In the fire nearest the exit is the tugur-mam, and beyond the fire the old man tugur-vchhh. The tugur, the master of the fire, is fed with all sorts of viands; they throw them into the fire and say: "Urgur in'jf, urlantaf mu'if" (i.e., "eat well, be a good house"). Nor are they feed each /385/ corner, repeating: "Urian tugur mujf'ak urlaf parkjf, hiulan taf mujf ta chon'hejd" -- "be a good fire, do everything well, be a house that brings luck in the hunt, do not get broken!" (it is understood that the old woman

/385 cont./

(792) of the fire, the tugurmam, lives there). Then they feed the four
(798) corners of the hearth, a hole is dug at the left front corner of the hearth, and they put sacrifices there, saying, "Urgur o'ufd, nehhlang kun kkholaf khavyr hunivagoja" -- "after eating well, make your children live without sickness," and after there words the hole is filled up. Finally, they feed the kefhung ashh -- "the birch looking into a behind." At night, when everybody has gone to bed, it is necessary to burn a fir and say a prayer.

When the hearth is renewed in the winter quarters, small inau are tied to the nas'ki khur in the corners of the hearth, and tie them up with saranka and puchka, and then, when everyone has gone to sleep, they throw sacrifices up through the pipe; one is thrown by the women, another by the men. Before the beginning of the festival, the house is cleaned, covered with fresh earth, and lighted with the clan steel.

(792) The spirits living in the house. Tav yzin -- the master of the house
(798) -- four chhinaj, two male, two female, all pila hejmar -- old men.

Tayzin yzing. This yzing was a fisherman in the past. His soul lives in the yurt in the tugur (flint box).

When the yurt breaks, the tugur must not be touched. If one breaks the tugur (box), he pays a fine.

(792) Lymys'n-mam -- mistress of the threshold. She is in fish skin, lunchbacked, gray, lulls crying children. When the ceremony of stamping the threshold is held, when a woman leaves for another clan, she sits in the corner at the entrance, near the cups which are placed on both sides of the threshold.

/385 cont./

832 In Tenga a girl firmly refused to marry her bridegroom
(792) who had been betrothed to her in her childhood, but when sikhr was made, she married him.

684 If one sleeps with another's wife by force, he is beaten for it and his dogs are taken away.

/386/ When a woman is pregnant, firewood must not be
843 cut on her footprints; she must not be struck in the face, even
844 in jest. Chhkh-chugynd (a sacrifice) must not be made in the
(792) langraf (a bed for childbirth), and af soon as the child is born, has whomever is nearby to yer yurt. From the seventh month of pregnancy, the husband of a pregnant woman is not allowed to go hunting or to travel far to set up nooses, but he can go into the
846 langraf. Broth may not be brought from the yurt to the female yurt, and when the little girl's bed is hung a piece of fish net. All this is
(792) at the first sickness of the child.

842 /387/ If a woman does not have children, the wife
(792) husband's brother gives her her belt (chhk) and, secretly --
553 Names. Names are given after the grandfather, but if the
(792) too many grandsons, a new name is thought up. One must
take names from an alien khal; otherwise one must give
(792) the name from his own.

845 Twins. Twins -- tongch: -- ehhlang (tongch: means "twin
(792) the god who gives birth to twins). Tongch-mam -- the mother
846 tightly or mend anything for another. With difficult birth, one
(792) must open up hangings, open patches, and unscrew the rifle.

A woman must not shriek during childbirth; otherwise the
844 will not deliver for a long time. If the stomach is pointed, pro-
843 troiding, a boy will be born, if flat -- a girl. After four girls,
a boy will unfailingly be born (1).

(842) (1) Among the Orok a woman is in the
(792) balagan only during childbirth; then
for ten days they cook for her on a separate
fire; men do not eat (with her), fearing
to lose their strength.

835 dog. Among dogs, according to the belief of the Gilyak,
825 brother and sister do not copulate. Exceptions are very rare, and they are attributed to the evil doing of a milk'a (evil spirit). Therefore, when a Gilyak notes such a case of incest, he is obliged to kill the dog; otherwise the sin falls on him.
[782] It is true that the slaying takes place as a religious ritual, by means of a ceremony of strangling, and blood is sprinkled to all four quarters of the compass in sacrifice, but for the dogs this is a punishment for incest. It is curious, however, that incest between ascending and descending lines (son and mother, and so forth) among dogs is tolerated by the Gilyak, and they do not kill the criminals (is it not due to utilitarian considerations, since begetters are valued very highly by them?).

835 Cognate male and female cousins. Here, of course, only cognate male and female cousins, i.e., the children of a brother and sister, can be in question, inasmuch as the children of brothers, on the one hand, and the children of sisters, on the other, are considered tuvn, and we have already discussed the complete prohibition within each of these groups. From the kinship nomenclature we know that the terms used in reference to each other by cousins depend on whether the male or female cousin whom they are addressing or of whom they are speaking is the son or daughter of the brother of the mother, or of the sister of the father, namely: If "I" am a man, then I call the daughter of the brother of my mother an'g:ej (wife), and, conversely, she calls me pu (husband), but my sister calls the son of the brother of my mother akhmalk, navkh (father-in-law, husband of the wife's sister), and, conversely, he calls her n'erm -- wife's sister, i.e., terms which have nothing in common with matrimonial terms; and these terms correspond perfectly /154/ to reality. Sexual relations and marriage between the daughter of a sister and the son of her brother (and correspondingly between their tuvn) are not permitted; on the other hand, marriage between the son of a sister and the daughter of her brother is not only permissible, but is considered regular phenomenon. And in this case, as in all others, the terms brother and sister are

/282 cont./

585 her advice on how to live in a strange land, and, if she is unhappy about the marriage, they try to persuade her in every way possible. During the farewell feast the groom sits alongside the bride, and both eat from one dish and smoke from the same pipe, but during that day they usually do not converse. In general, the groom is supposed to comport himself modestly the whole day, and not to converse. Late in the evening, when the feast is over, the bride's mother orders the bridegroom to lie down on the bride's bed, and the marriage act is consummated. On the next morning the newly married woman brings something to eat to the newly married man and calls him "husband." On that very
585 morning they depart. Before the departure there is a last
782 regalement, and at that time the parents of the newlyweds exchange prayers of good wishes. Here is an example of such
539 benedictions, taken down on the Amur:
585 "If god gives happiness, they will live out their time
782 happily. If there is no happiness, they will live out their time badly. O god, make the life of our children a happy one!"

After this the father or a clansman of the groom says /283/ the following prayer: "O god, make, make happy the time of our children, in order that we may live happily; to our life together give good fortune!"

585 Saying their benedictions, they sprinkle vodka in the
788 direction of the heavens and in all directions. Before actually
[782] setting out they go through a ceremony which bears the designation "stamping the kettle." It consists of the following. At the inner side of the threshold of the yurt there is placed a large Manchurian kettle with five little ears (for the feeding of dogs) from the bride price of the groom, and at the outer side a small kettle from the bride's parents. Upon going out of the yurt, the bride and the groom, one after the other, place one foot in the large kettle and the other foot in the small kettle, not treading on the threshold. This ceremony establishes a symbolic union of mutual nourishment and mutual friendship in the presence of the two female penates -- the "old woman-mistress of the threshold" and the "mistress of the crossbeam over the door."

/298 cont./

614 A bear festival is held also for other reasons, /299/ for
796 instance, for reconciliation with one's son-in-law /zyat'/, k:khal
606 or alien. If a person offends his son-in-law, for example, in
627 making a purchase, he keeps silent, and the k:khal keeps silent, but they will continue to sulk until a bear festival is held by the offender for reconciliation (urla lytnydz).

796 A bowl, hyl, for the head is necessary for each new bear
415 festival. The head of the bear is always placed in a new bowl, while the old one is used for meat and the like. Anyone can prepare a dish for the bear festival. The bowl for the meat is bound with the penis of the bear. A bowl from which the bear is fed for the last time in the yurt, and always on the side opposite the door, is called pukstov-n'ir.

796 When a brother gives his sister a bear as a gift, he himself
431 is not permitted to bring it; he must come after it with pomp.
[231] The bear is greeted with zadz-chadz music. When the master feeds his bear for the last time, he says to it: "U'rur humyjá! Wingan úrur humyjá--live well! When you go, live well."

The gift giver does not shoot the bear and departs as soon as the festival is over, without even tasting (a morsel), while he must bring with him mos' and all kinds of dishes.

796 When a bear falls sick, then they hold pylng-tvysk and prepare uig, mos', from all sorts of delicacies and all sorts of berries.

Luk: -- a dog which has been born specially for the uig.

[782] When a dog is sacrificed, its skin, head and bones are laid
[184] in a wooden frame near the lezing where the bones of the bear are placed. Some clans hang bear heads on trees. This place is called k:ork ngangof.

V.

Slaves

567 The son of a slave remains free to the neck (i.e., his head
[196] is free), his grandson -- to the belt, his great grandson -- to the feet; in the fourth generation -- the descendants are "pure."
[683] Then he is a k:khal, i.e., a kinsman of the master, and if anyone

Ethel's wife gave birth twice after the birth of the twins was a bear.

A representation of twins — *tonych* — is placed in a little [illegible]. If one of them dies, they place a wooden figure, which is both die, then two joined together on the idols. *Chabb*-changed gives to them at the full moon and at the new moon. Kinsmen and strangers sacrifice down to the bereaved.

When a twin dies, he goes to his father, Pal-o'gyuyn, who gives birth to him, appearing to his mother in a dream.

A dead twin is not cremated, but is nailed in Turkish fashion in a specially built little house, in which he is driven to support him.

Twin is dressed in a white shirt and trousers and is surrounded with shavings — *tuyu*. The mother of twins in likewise not cremated after death, but is dressed in white and buried, also with pipe placed around. According to N. Pilsudsk, the mother is done with the father of twins.

The twin's twaglin helps catch bears and in hunting in general. The twaglin. is tied in case of sickness, especially tuberculosis (*khyvyn*).

Twaglin. Infanticide is committed sometimes in secret or even upon the order of the father of the underage husband of a woman.

A woman who was accused by a shaman of poisoning a boy, the son of another woman, was beaten, and, after they cut off her braids, she was thrown into a funeral pyre.

Illness. Illness is sent either by Pal-o'gyuyn or by Tol-o'gyuyn. Not each of them takes a milk not from his kingdom.

Ябв A milk can be of different shapes and often is red as blood and hard as stone. But when he enters a person, he becomes lively, "as if he were walking."

A violently insane person is imprisoned in a cage (in Bremen and Ind), he must not be killed.

Khlmk'ind — to be sick from not getting what one saw and wanted. Either the one who did the feeding or his family becomes sick. Then it is imperative to get at least a small church of what one saw and to touch it, and the person gets well.

/328.com/

Tol-o'gyuyn (to reconcile). When I was little I saw a dog and wanted very much to have it, but did not dare. I felt so under my armpits. I dreamed that the dog bit me in the very [illegible] and sore. I lay ням ill dead. Then my father bought the dog immediately — he had to hurry — and immediately fried a piece and I begin to recover."

Everyone who has a bear in his house, the kinsmen of his wife must give him a gift, which lies there on a small bed.

When a person who is drowning remains in a boat rescued from drowning, his wife must break the old chumashka and make a new one. If it is not broken, husband and wife will die.

Chum. Chum is dressed in one who was sent to the bear will be [illegible].

A drowned person is placed in a boat; the kinsmen get into another boat and float without rowing; they let the first boat, with the deceased, go ahead, and the deceased is cremated where it carries him to the shore. Hooks are used for pulling the body onto the bank. Inan are placed near the place of cremation. When the Tymovsk Gilyak travels to Tro, upon seeing the inan they throw chabb-chopped (sacrifices) into the stream.

A person who has been rescued from death by a bear sacrifices a dog to Pal-o'yuuh and makes chabb-chopped.

/329.com/

Thank you? If they do not exchange them, then one of them will drown, and the day they exchange hands. One man rescue an alien skul, and even good Russian (not the tramp), but a drowned person from another clan is not cremated, but is surrounded with stones.

After the rescue and the shaman procedure, the shaman must *Ябв* carry out his procedure: he sends his spirit to Pal-o'gyuyn, which lies there on a small bed.

When a person who is drowning remains in a boat rescued from drowning, his wife must break the old chumashka and make a new one. If it is not broken, husband and wife will die.

Chum. Chum is dressed in one who was sent to the bear will [illegible].

The bear festival is purely a religious festival. Naturally, there were times when a successful attack on a bear, an attack conducted in those days collectively, by the whole clan, was a real triumph for the clan, which devoured the huge bear at a common feast. Since the attack on the bear was most conveniently made in winter when the sleeping animal was captured in his lair, the bear festival was also celebrated in winter was perpetuated. The experience of centuries evolved a full ritual for the festival, which, like everything old, assumes in the eyes of the Gilyak the meaning of an unquestionable and indisputable all the sacrifices during the festival are made, not to the bear, but to the god of the taiga, the master of the bear — "Pal-'ulvuh." It is also understandable that the bear itself has acquired a position of honor: its meat cannot be thrown to the dogs, it cannot be eaten with sausages, etc. "Pal-'ulvuh" himself will exact revenge for such offenses, ordering other bears to bite especially hard. To the bear the bear festival is a clan festival, and, in this basis, women, as the nonpermanent element of the clan, do not participate in the eating of the bear, although they do participate in the eating of it. The fire is the move in which the meat of the bear is cooked is rotated only by the clan [illegible]. A touching custom among the Gilyak is

/336.com/

the god given meat to man, and the bears are returned as the [illegible] of the clan and sacrifices and feasts. For the same reason the Gilyak carefully buries the eyes in the sand of the shore, and [illegible] bear's head in the crown of a tree or on a post. To the Gilyak a sacrifice is not a ritual or a routine matter, but serious business on which his welfare depends. In addition to the usual sacrifices offered at the opening of the bear season, the Gilyak with special solemnity gives presents to his god at the beginning of the sable hunting. He offers this sacrifice all by himself to the taiga, at the side of the same small balagan which serves as a night shelter the whole time he wanders in the taiga and stays in the taiga. Besides the usual gifts, he sometimes sacrifices a dog for this occasion. After striking the sacrificial animal in the heart, he gives its blood to the god, he cuts the meat at a solemn feast with his kinsmen, and, He usually gives frequent gifts to his gods, although just a little at a time. Believing that a hundred little presents are better than a hundred rice or sarunka means to a Gilyak. Offerings made during a journey can be touching. I remember that when we made a journey to northern Sakhalin we came to the cret of a mountain ridge unexpectedly, and suddenly there unfolded the magical panorama of the mountains. The Tymovsk Gilyak, who never traveled anywhere before us. My Gilyak companions were deeply moved. One of them took from his pocket a little bag of tobacco, which was made of tobacco, sweet roots, and so forth, and, moving off about 30 steps to the right, he squatted down, buried a handful of ash in the snow, and then placed the bag of tobacco, the sweet roots, and so forth, he moved the taiffe number of steps to the left and did the same. Then, his face suffuse with emotion, he returned to us and distributed the remains of his sacrifice. He had prayed that we be granted a happy journey. Later, he was able to boast that his prayers had been heard. There is a remarkable difference between the religious feeling of a Gilyak and the religious feeling of not only a Christian, Jew, or Muslim, even of a Buddhist or Brahman. The idea that the Gilyak offer to the "master of the sea" fish bones and the head and eyes of seals. The explanation for this is very simple

/337.com/

[illegible]. He does not understand religious ecstasy. Shamanism, with its ecstasy, seems to me to be a borrowed phenomenon. It also does not fit in with the religious beliefs of the Gilyak. It is true that he believes in the souls of the dead, but he does not have supernatural fears him, believes in his predictions and in the power of his magic, believes, for instance, that the shaman can kill any man no matter how far away from him this last may be (this they say that the Ryukyu shaman killed the Shikotyanu one by drawing a bird than was flying past; shamanism, however, is not typical of Gilyak religious views. It is perhaps appropriate to mention at this point the fact that shamanism is not at all a typical phenomenon in the case of the unsuccessful outcome of their treatment, they blame the shaman for not performing the ceremony properly, only subject to physical violence and to cruel persecutions if the patient dies. Also, by suggesting to their patients that they [illegible] the spirit of possession by the spirit of a deceased shaman, they cause serious [illegible] in people whose nervous state is healthy. The prayers of the Gilyak are very simple and clear. Here is one of them: "Father, Sun, [illegible]!" (Oh, God, please!)— the Gilyak [illegible] himself to the sun or to the moon.

The Gilyak have a hazy conception, or better a feeling, about a supreme deity, the father of all men and of all that exists, but [illegible] this deity, which is not at all a Christian or Muslim or Lamaist formulation. The gods have a relation, not only to the material world, but also to the moral world. The Gilyak recognize the moral living, helping one's neighbors, and respect for the life and property of another every civilized society. Violating them leads to punishment in this life (natural, premature death) and in the future life. I happened to hear such a statement from a Gilyak: "If a rich man shows a poor man, it is a great sin, but if a poor man shows a rich one (in the material sense, if he borrows and does not repay, then he is a great sinner." Here, the Gilyak are somewhat rounded out the concept of sin, because the Gilyak who made it was a very rich man himself, a big kulak, was did not hesitate to be incomprehensible to the Gilyak. The Gilyak, in the religious [illegible] [illegible] [illegible]

/368 cont./
ceremony is not observed, namely, when a person falls victim to a bear. There is a whole ritual for such cases. I shall be brief. Immediately after receiving news of the Gilyak's misfortune, they set out in search of the bear, following its fresh tracks. After they find and kill the bear, they place the slain person astride it and solemnly carry the bear in its fur-trimmed rider to the settlement. They immediately begin to /369/ build a large balagan in which they place the bear and its rider. The balagan is enclosed on all sides; they leave only small openings in which are placed small troughs with sacrifices, which are at first renewed very often and then less and less frequently (in a year). This epopea is fully completed only in the third generation, in the presence of the clansmen of the slain man, with the final sacrifice of several dogs at the source of the local stream. The meaning of this whole procedure is the following. The bear is killed in conformity with the principle of revenge (the kindred bears must be raised). The posture of the slain man (astride the bear) is the symbol of the triumph of revenge. Leaving the slain man in the pose of a rider and honoring his memory for generations stem from a desire to crown the brave members of one's clan with a halo of fame. It may be that all this is done for the edification of the youth. Sacrifices are made to Pal'-nivush, in this case to propitiate him so that such misfortunes will not be repeated in the future. This example shows, incidentally, that the Gilyak are very far from regarding the bear as a god. The last respects paid a person who has drowned are also accompanied by a special ritual. He is placed in a coffin, but without fail on the seashore. The boat in which he drowned is no longer used. In the presence of the entire clan a rich sacrifice is made to Tull'-nivush on the shore. A new boat is built, in which the parents of the deceased or one of his brothers settle. Again in this case, the procedure is to foster contempt for danger, and, on the other hand -- to propitiate the capricious god of the sea.

In conclusion I must say a few words about the spread of Christianity among the Gilyaks. On the entire western shore I have met only two heathen Gilyak, who took the "sacred"

/434 cont./
from me for a small consideration the dogs that had become useless on a trip. The Gilyak do not consume their dogs, however, and generally speaking, such a reason can appear totally enough, however, if individual animals are injured or rendered useless, or if there are too many of them and, correspondingly, a shortage of food. In this case, even superstitious ideas can give in to it. Thus, I have seen it happen, for example, in the village of Tyk on Sachalin, where I was delayed on account of severe snowstorms for several days in February, 1856, in the company of a few traveling Tschonsi and Tymi Gilyak that, in order to calm the bad weather, after other means had already been sought in vain, three young dogs were strangled and cremated, which was to be repeated on the next day in case of failure. The meat and the entrails of the animals were thrown into the kettle, a part being added to the meal of the bear's flesh, and -- it blew enough! The bear's entrails were cremated in conformity with the principle of revenge (the kindred bears must be raised). The posture of the slain man (astride the bear) is the symbol of the triumph of revenge. Leaving the slain man in the pose of a rider and honoring his memory for generations stem from a desire to crown the brave members of one's clan with a halo of fame. It may be that all this is done for the edification of the youth. Sacrifices are made to Pal'-nivush, in this case to propitiate him so that such misfortunes will not be repeated in the future. This example shows, incidentally, that the Gilyak are very far from regarding the bear as a god. The last respects paid a person who has drowned are also accompanied by a special ritual. He is placed in a coffin, but without fail on the seashore. The boat in which he drowned is no longer used. In the presence of the entire clan a rich sacrifice is made to Tull'-nivush on the shore. A new boat is built, in which the parents of the deceased or one of his brothers settle. Again in this case, the procedure is to foster contempt for danger, and, on the other hand -- to propitiate the capricious god of the sea.

1. The details concerning this will be found in the pertinent section specifically devoted to this subject.

/464 cont./ "Ma'n ja'ngu Tlu Chi'wsk"
merchant on the Amur does it as he deals with his customers and offers them an occasional sip from his little bowl; this is the reason why the Gilyak, Sanagir, Orochi-Goldi, Samagir, etc., or Gilyak who are able to provide themselves with the precious beverage and the utensils required for drinking it, and this is precisely how Mamlin Rindi describes the ceremony which the Smerschur on /465/ Sakhalin drink their "a'ksa" brought from the Amur. I also saw the libation preceding the drinking, which consists of first moistening the tips of the Pustsch and forefinger with liquor and a few drops are sprinkled to the right and to the left up and down, and toward one's own chest, more or less carefully observed, by the Manchu and Chinese on the Amur, also by the Gilyak, Olcha, Goldi, and even Orochi in Hadshi Bay. Thus, the enjoyment of liquor among these people is added to the ceremony of the shop, and -- taking into consideration foreign utensils required for it, and with the observance of certain formalities prompted by superstition. Undoubtedly this ceremonial is borrowed from the Chinese, and, the procurement of the liquor from a great distance and its high price in the retail business of the Chinese merchants on the Amur, must have had a beneficial effect on the consumption of liquor among the Amur peoples in impeding and limiting ways and trained them to moderation in the enjoyment of it. In fact, I most emt to such moderation among them, and especially among the Gilyak, whom I know best, during the time of my stay in the Amur region. Despite the fact that with the settlement of the Russians along the Amur, the Gilyak, Sanagir, Orochi, Samagir and very close source for this prized and popular drink opened up for them, there was nevertheless so little drunkenness among them during the first few years afterwards that I never came across a single case of it, despite my many contacts with them, not even during the numerous bear festivals which I attended. This fact seems especially striking to me, but is explained by the fact that, according to their own statements, the drinking of spirits during the bear festival is regarded by them as /ulach (ulachi) -- a concepts which may owe its origin to the feeling for the

/317 cont./
peoples that it is dangerous to stay on it, or is covered with water -- this where is the most meager and difficult period for the river-dwellers, since human beings and dogs live on only the scanty remains of the winter supplies. Moreover, it is contrary to the usual ways of the Gilyak, Samagir, etc., to travel in the Amur at this time. The Gilyak therefore waits impatiently for the opening of the river, when it becomes lively anew and fishing and traffic on it are again possible. The opening up of the Amur River is therefore always a joyful and important event in the lives of the Gilyak and is appropriately hailed by them. As soon as the river is entirely free of ice, a boat manned by as many oarsmen as possible sets out from every village of any size in order to offer it, on a swift journey and amidst loud shouts and /318/ numerous salutations, that is, to toss pieces of jukola, berries, millet, tobacco, and the like into the water. On May 14/26, 1856, shortly after the ice had finally yielded to the spring sun, I witnessed this ceremony in Tymi, a prominent village of the Gilyak, and with the observance of certain formalities prompted by superstition. Undoubtedly this ceremonial is borrowed from the Chinese merchants on the Amur, and, in the retail business of the Chinese merchants on the Amur, must have had a beneficial effect on the consumption of liquor among the Amur peoples in impeding and limiting ways and trained them to moderation in the enjoyment of it. In fact, I most emt to such moderation among them, and especially among the Gilyak, whom I know best, during the time of my stay in the Amur region. winter-houses (tschadryh), which are erected jointly by the villagers and are usually occupied by several families. I cannot say, from my own experience, whether they are still during the Nikolayev post several deaths occurred in the nearly village of Kulk, without any of the houses being abandoned, much less torn down, but the person interrogated may have been correct. On the other hand, I once saw a corpse lying in a house, which will be discussed later in connection with the mode of burial of the Gilyak, but it, too, could have been brought back in after death had occurred outside the house. If the association of ideas suspected by Dr. Seeland is to be found among the Gilyak, this would prove that at even birth they are primarily thinking of the probable death of either the mother or the child, which, of course, fully justifies their own barbaric treatment of the woman in childbirth. Moreover, the Gilyak, Samagir, etc., are very fond of other superstitious treatments to insure an easy and successful birth. Thus, well before the birth, a figure referring to the act of birth is carved out of wood (see Pl. LIV, Fig. 6 /Ver.p. 1234/) and provided with small offerings of food, tobacco, and the like in order to pacify and make favorably disposed toward them the evil spirits that might have an influence on the birth.

No one is permitted to enter the tent where the woman is in confinement, with the exception of the midwife and other women who are assisting her. Immediately after the umbilical cord is cut, a special halik (Gilyak hamek- or kynk-dshakko, Pl. XXXII, Fig. 5 /Ver.p. 1012/), the handle of which is provided with especially rich carving and which may be made of iron, is placed in her hand. Evidently, the

(west and southwest wind), and the kongrusch (south wind) cause them less concern (2). The latter are especially dangerous

2. On the Amur the winds are, as a rule, distinguished less accurately, and simply by the four main directions: adj, tschlangi, kongrusch, and tungrusch (north, east, south, and west).

making a trip from Dul to the villages to the south on the same coast, since the sea ice sometimes breaks up immediately in

Magic arrow for exorcizing storms.

front of the sledd of the travelers. In the village itself several methods of appeasing the unleashed storm-spirits were used. At the tip of a long pole stuck in the snow there was fastened a square piece of sealskin, which evidently was the sign of a sacrificial offering to the storm. A second method served the same purpose, but in a much more attractive form. It was an ordinary-sized arrow made with two prongs at the tip and provided with two curls of wood shavings on the shaft. Between the two prongs, likewise bearing small wooden curls, the strong center rib of a tobacco leaf and a small piece of glowing timder were inserted and the arrow shot off in the direction of the storm adj-wind. Finally, a third method consists of sacrificing a number of whelps to the storm. In the village of Tyk their number came to three, and, if the storm did not stop the next day three

/871 cont./
others were to follow (3). This method was at least more pu-

3. Concerning this, see p. 662 above.

poseful, for it increased the food supply of the people and saved food, the lack of which was already making itself felt at the time.

I never saw or heard of a Gilyak who, upon entering a house, greeted the host, hostess, or any other acquaintance with a word or gesture, nor is it done upon his departure. As I gather from Middendorff's handwritten notes, given to me to use, this coming and going without any salutations extend also, too. With me they likewise constantly came and went without a salutation, or at most, later, with a "adrawa" and "gorochuchli" (equal from the Russian "zdravstvuyte" and "gorochuchli") and Chinese do they imitate the /672/ Tungusic Amur peoples by dropping on one knee in front of them and bowing their heads, but this is done only in order to show that they are not at all being punished by them, since the Manchu officials in Stanitsa and other places strictly insist upon such a show of deference.

But what surprised me even more is the fact that the word "thanks" seems to be missing entirely from their lexicon. I never heard it used by them, either among themselves or to me. Middendorff and Schrenck, who have accumulated a great deal of material, also have failed to ascribe this to the incompleteness of our word list, which is in general very poor in expressions for abstract concepts and emotions. On the other hand, I feel, strongly in the assumption that if they really had gratitude in their hearts, they would not have a word for it and that it should simply have always eluded us. After all, we turn them in all kinds of situations when they received services to help and hospitality offered almost to excess. It is possible that guests who have been shattered, despite notoriously many means, for days as a result of storms setting in and who have been fed along with all their dogs, as the Gilyak do among one another, depart without having said a word of thanks? Is everything based only on national communities or on the certainty of reciprocity in similar cases? With regard to me,

*796 252 784 [263] just as it would be extremely uñtsch if one wanted to fry, not only bear meat, but any meat at the one or the other hearth, for the bear would hear the sizzling of the frying meat and would be shocked. When it was thought that the bear meat was done, the broth was scooped into the aforementioned bowls and drunk, but the meat was placed upon fir branches under the étagère and covered with the same. Not until evening was it put into the trough hanging in front of the bears' heads. Moreover, toward

•[782] evening, six of the largest sturgeon and hausen, one of which was about eight feet long, were brought into the house and placed in front of the bears; they were offered to them as a sacrifice and were intended for the forthcoming feast.

+796 [887] In the morning of the following day (January 29) the old men resumed their work in front of the bear hearth. The young

[251] people were likewise busy, with some of them bringing in additional firewood, others going into the nearby mountain forest in order to bring from a storehouse for bilberries, which the women had erected there in the fall, the supply required for the festival.

+796 231 541 In the meantime the dogs were fed, except for those 14 animals which Judin had selected for a bravura ride on the river. They were decorated with the above-mentioned red-tasselled collars and harnessed to a small, prettily decorated sled which was driven by its owner himself. The drive, amid loud drumming by the women, proceeded at top speed, first down the steep bank to the river and then on a leveled course along the latter, and ended without a mishap amid the wild applause of the assembled throng. Only then were these dogs given their meal in the house, while the people enjoyed the bear-meat broth.

+796 252 In the afternoon, the old men began to cut the bear fat into long strips which, decorated with wood shavings (zach) and fir branches, they likewise hung in front of the bears' heads, and not until shortly before complete darkness did they take them down again to put them in a small trough decorated in the same way and placed on the floor in front of the bears. In the meantime, more life and commotion had entered into these preparations for the feast: some young men began to cut up the six

/739 cont./ But they

796 124 708 171 insisted on it and went on to say that the god of the Manchu was called Mäü and that the Manchu have idols carved in wood, human figures in various positions, with a pipe in the mouth, the arms akimbo, and the like. The Manchu bowed before these idols, but the Gilyak did not do this when they went to the Manchu.

124 982 •791 796 I inquired further as to whether and how the Gilyak pray, but always received the answer that they do not pray. My next question therefore was whether they had an evil god (or spirit) beside and beyond the good god, a question which seemed to surprise them, and I realized that the placing together of my words "god" and "evil" seemed absurd and contradictory to them. Hence they replied in the negative. But since the Gilyak /740/ are full of superstition, I can only explain as follows the contradiction between their idea of "God" described here and the evidence for various idols and their shamanism that I found:

791 796 Among the Gilyak there is an obscure and hazy conception of "God," of a supreme being, who has the attribute of the "Good One" in full measure and without any admixture of evil and who is revered by human beings. But this conception is a wholly ab-

[782] stract, commpletely empty one and does not at all fit into the life, into the customs and practices of the Gilyak; there is nothing concrete about it for them, and therefore they only know the word "pray," but not the act itself. Also, they know nothing about "God," in view of the complete emptiness of the concept, except that he is "Kingulätsch, the Good One." In the real, concrete life,

791 however, the Gilyak experience much that is bad and evil, and there are many forces of Nature which, especially in hunting and in fishing, are often obstructive, menacing, and even fatal for them, such as the often unfettered power of the elements themselves, the often fatal strength of beasts of prey, the occasional and to them inexplicable absence of fish, and the like -- forces against which man, and all the more a primitive people completely dependent upon Nature, must feel his powerlessness. He cannot always escape such forces of Nature and they do him harm; to him, therefore, they are so many evil events which he views (from the general, egoistic-teleological, primitive viewpoint of man) as

/744 cont./

708 755 532 [126] 6. Gilyak. Through C. v. Dittmar, following his visit in Tebach for the bear festival, I obtained a series of Gilyak idols which in part refer to the festival itself, such as Fig. 3, Plate LVIII /p. 1258/, in part to other things. Subsequent inquiries about their significance enabled me to obtain new insight into the religious views of the Gilyak. These idols and representations of various kinds are amulets intended to keep the various sicknesses away from man or, if they have attacked him, to remove them. Most of them are made with flexible joints and for that very reason are supposed to remove the stiffness or sickness of certain limbs (*).

* See Plates LIV /p. 1254/ and LV /p. 1255/.

For example, Figure 2, Plate LV /p. 1255/, with a jointed body, is intended for removing sicknesses of the back and body; the one with jointed legs (knees), ibid., Fig. 4, for healing sicknesses of these extremities. The large figure with jointed head, back, and legs, Fig. 1 on the same plate, the tschaltscha-tschngai, is made, as was mentioned above (**), in connection with the birth of children

** See p. 1046.

and held in front of them so that, by looking at it, they may be spared ailments of the neck, body, or extremities. The small idol with a cut-out in the chest and jointed arms and back, Plate LV /p. 1255/, Fig. 3, is intended for curing ailments of the chest, coughing, etc., as well as ailments of the joints concerned.

•[782] All these idols or amulets, the tschaltscha-tschngai not excepted, are fed with berries and other things in order to pacify their power or to win their favor, the wooden pieces bearing traces of this. These representations, however, are not worn around the neck, but are hung on the wall in the yurt.

708 532 951 Related to these idols are two amulets that have a similar purpose: they are the lalž and kissj (Plate LX /p. 1260/, Figs. 1 and 2). -- The former is an iron ring, open at one place, which is worn around the head to prevent headaches. The two opposing ends

/753 cont./

756 was Sajan, far above Nikolayevsk on the Amur River. Another, less famous one, Tschežach, lives in the village of Kaki, above Nikolayevsk. In case of an emergency, such as sickness, death, and the like, they are called to villages where there are no shamans (1). There are shaman implements, however, such as

1. That among the Gilyak the shamans have less a religious significance than a practical one, mixed with superstition, to be sure, also follows from the fact that they never designate as shamans, or regard as corresponding to their shamans, clergymen, but rather physicians and apothecaries, because they heal sickness. (The shaman may be present at a bear festival, to be sure, but not "to shamanize"; see pp. 1153, 1165; cf. also p. 880.)

drums and the like, among other Gilyak, for example, the brother Surgin and Sogin in Kulk, though neither of them was a shaman. Also, the art of dancing, of beating the drum, and the like, as is customary in the shaman performances, is known to many other Gilyak and is exercised upon request or as desired without it being regarded as sinful or the practitioners being shamans. For example, a boy in the village of Wait was said to be able to do the shaman's work very well, without being a shaman himself. A part

[789] of this among the Gilyak, it seems to me, rather than skill in dancing, singing, and the like, is the ability to do certain tricks, such as apparently plunging a knife into the body and the like, feats for which they particularly praise their great shamans. (Bm. I, pp. 34, 35.)

756 825 •782 789 28. Gilyak. The shaman performance. I learned that snakes are especially feared from information given to me by an eyewitness to the conjuring of spirits by a shaman among the Gilyak of Petrovskoye. After singing and howling had been performed by the onlookers, the shaman turned to the god ruling heaven, sun, moon and stars (about whom, incidentally, he could say nothing more th

2. Ineffective in cases of snakebite, for which the only remedy is tying the skin of the snake around the wound.

toad (which brings bad luck) is of two kinds, that is, sometimes a single one, simply called mipitsch, and sometimes a double one, wap-mipitsch, with a doubled body and extremities. The former has its abode on land, but the latter in the water; hence the former is also designated as mif-mipitsch, the latter as toll-mipitsch (3). Both are powerful and uncanny, magá, especially

3. Most of these accounts come from Porkuk and her son, Dshaman, from Kuĭk.. Jutschin thought that the wap-mipitsch represents the copulation of the toads, which as a rule takes place in the water and the seeing of which is regarded by the Gilyak as uitsch. According to him, the wap-mipitsch must be worn by women.

the wap-mipitsch, /754/ which, as the Gilyak put it, resembles the devil (kins ngarlatsch), hence, perhaps, its double shape. Their evil power is shown by the fact that they sneak up on a sleeping human being and crawl through his mouth into his inner organs, into his chest and stomach, whereupon the person falls

225 fed the head of the dolphin. Then we came down (to the
476 shore) and the old men cut up the dolphin. [113] When they cut it up, we called all the people (ordered them to come), spoke to them, and made each one of them take (let them take) his share. We gave less to the "sitting" men (that is, those who did not participate in the hunt). (1) We gave more

1. The Gilyak Shurman, from the village Lyangr, told me that they divide the beluga into equal parts. Only when they kill two--three belugas do they give somewhat greater shares to the hunters.

to those who went to sea. After they had taken away their
225 shares, we cut up the head (literally, broke it up). After we
782 cut up the head, in the evening, we sent the young men to cut
778 some birch wood; we sent them to cut some rowan-trees. Then we got some rowan shavings and put them in the respiratory opening. We cooked some cereal and put it in the sea-dish [Russian, Morskoye blyudo] We prepared some berries and put it in the sea-dish. Then we sent the children to bury the head. When they were ready to go, an old man went with them. They put the head down on the place where offerings to the sea are made. (2) They took the eyes

2. Near each village, there is a separate place from which offerings are brought to the sea.

out of the head and, having dug a hole in the ground, they put the eyes in the center (of the hole). (3) After they buried

parts designed for cooking as well as the jaws. After we cooked it, we took it out. Some ate the meat; others took off the meat from the jaws and ate it. Then we went to gather Hapzas. Then we brought it, cooked it, ground it and made muvi. Then we got some rowan shavings and shoved them (in the nose of the beluga). Then we took the head; we took it to throw it out. Here we cut off a young tree. We cut off a forked aldern tree. We spread muvi over the shavings stuck in the nose of the beluga; we spread muvi on the holy bones. We stuck the tree through the ear-ring holes of the beluga, lifted it and hung it up here. Then we lifted the holy bones (jugular vertebrae) and tied them to the tree. We put down the jaws and pressed them with a stick."

121 In 1931 I was sent to the Amur Gilyaks for the purpose of studying their dialect and of collecting materials for an ABC book. I was able to devote some of my time to the study of problems in the field of ethnography, such as: the history of the Gilyak clans, land property of the clans, interclan relations, the fishing industry, etc. In the following survey I put before the reader the material gathered in the course of this work and pertaining to the fishing industry of the Gilyaks in the village of Kul.

225 At the first signs of spring, beginning with the month of
782 qar-lo (crow month') (1), the Gilyaks of Kul go seal-hunting.

1. Corresponds approximately to the end of February-beginning of March.

They get out hooks and replace the old strings on them with new ones. Then they perform a religious-magical ceremony which consists in exposing the hooks to the smoke of spruce and of a plant locally known as (t'ᵊkr) bogulnik and set out on sleighs pulled by dogs to the tremendous ice fields of the sea of Okhotsk. On arrival, the Gilyak hunter lets a kuti-ŋəŋ-gan
225 (a dog seeking holes') search for seal air-holes. The Gilyak
411 lowers his hooks into each of the holes found by the dog. The hooks are fastened to a stick put across the air-hole. When the seal wants to breathe, it sticks out its head. The hooks in the air-hole hinder the seal, and when the seal wants to submerge, one or two hooks are thrust into its body. The hooks of the tackle kitə (2) which go into the implements for hunting

2. Tackle for seal-hunting in the summer. The main part of this tackle is a large number of sharp hooks.

seals in air-holes are so sharp that they pierce the body at the slightest resistance. On the following day the Gilyak returns to the same place. He looks to see if a seal caught
225 on his hooks. The Gilyak first pulls the captured seal through
411 the air-hole and then kills it by hitting it over the head with a
531 striker specially made for the killing of seals. This striker called tor-tas (from tor 'head', za-d 'hit', a suffix pertaining to the implement used in the action), is made of a bough of some strong tree. The bough is cut off together with a piece of stem at its base which is then rounded. At the lower end of the handle of this peculiar hammer is a carving which represents the snout of a seal.

he Gilyaks believe that if the food for the dogs is not
and they must be fed before daybreak-- the dogs will
ea offering and the latter will not reach its place of
on. To prevent this from happening, the Gilyaks
feed the dogs of the sea spirits (according to the
f the Gilyaks, spirits are human beings like them-
nd have their own dogs.) For this purpose they wind
fish-tail bones (mamye) which they then throw into
efore offering to the spirits. The Gilyaks believe that
of the spirits will eat the fish bones and, having had
, will not touch the refreshments meant for their

all gifts are ready, a hunter carries them to the sea.
re not present at sea offerings. On reaching the shore
ak sticks two small twigs in one place, at the very
he water; one twig is a keyla-ŋeks twig and the other
ŋeks ('rowen twig'). A small distance away from
sticks another pair of small twigs at the edge of the
hese peculiar gates are called tayr. The offering is
nto the sea through the tayr. First to be emptied are
ir, (2) that is, troughs from which drowned men are

Uiy-ŋir is made in memory of a man drowned in the
sea. The first uiy-ŋir "should be lost" quickly as the
Gilyaks put it. Then they make a second one which

782 they keep for a long time. When some one is
225 drowned the Gilyaks arrange a boat race, fight, and
766 run. In this connection I wish to note that in the
415 valleys Chayvo, on the Okhotsk shore of the Sakhalin peninsula, where I studied the cult of drowned men in great detail, no felicitations are allowed when a man is drowned.

fed. (Mos for these troughs is prepared by men). Next, mos is emptied out of the tol-ŋir ('sea troughs') for which it is prepared, as in all other cases, by women. The offering completed, the troughs are turned around so that their "eyes" are directed to the houses instead of to the sea. (3) Next,

3. The troughs are in the form of animals. As I observed in the village of Chayvo, drops of mos meant to be "eyes" are put on one end of a tol-ir, which apparently no longer has animal form.

pebbles, picked up from the shore are put into the troughs. At home these pebbles are thrown into the fireplace.
782 The Gilyaks regale their kinsmen with whatever is left
262 over from the offering and also eat themselves. Mos from the
225 uiy-ŋir is eaten only by old people. Women, children, and
561 young hunters must not taste this mos.
225 It is imperative that the "feeding of the sea" be completed
782 before the departure of the hunters. Once the hunters put out to sea, "feeding of the sea" is not allowed. At present this custom is not strictly observed, and if someone happens to be late, he "feeds the sea" late in the evening when it is reasonable to assume that the hunters at sea have gone ashore; although they sometimes spend the night on floes.
After the offering the Gilyaks begin preparations for putting out to sea on a hunt.
225 The essential prerequisite for seal-hunting at sea is a large
501 spacious, many-oared boat. Not every Gilyak is the owner of
476 [80] such a boat, suitable for long voyages. In the village Kul
422 there are no more than ten such boats. (1) In the seal-hunting
466

1. Unfortunately, it did not occur to me to count the number of these boats during my stay in the village Kul.

season the hunters unite in a collective which centers around

225 the boat; just as in the Siberian salmon fishing season they
501 unite in a collective which centers around the seine or the
476
422 zayezdka.
466 When the hunting season opens, the owner of such a boat starts collecting his companions. If the owner happens to have
225 a son-in-law (ore) in the village, he asks him to join him in
614 the hunt. In general, however, the owner of the boat selects
476 hunters regardless of clan membership.
466 Thus, for instance, the boat owner, Gilyak Norp of the clan
556 Tfanu, was accompanied by hunters from the following clans: Otaq from clan Hutevin, Potaq from clan Neoŋafin, Ŋt from clan a ramla, Onkan from clan Lezran and Tesk from clan Tfanu.
A similar situation existed in collectives of hunters who went hunting in 1931.
The hunter collective centering around a boat is sometimes named after the owner of the boat. For instance, ŋl tun-munim ('one boat of Gylkhtyun') Xitkun-mu-nim (one boat of Xitkun).
225 The owner of the boat is the organizer and leader of the
556 collective of hunters grouped around him. Those who travel
476 with him are his subordinates. The leader of such a collective
466 of hunters is called pila ('bolshak') (2) (from pila-d--'to

2. This is the name of the oldest in the clan and generally of any foreman in industry.

be big,' - suffix used in forming verbal nouns.)
225 The duties of pila are many. A pila is supposed:
476 1. To look over the boat, the rowlocks and, if need be,
502 to effect repairs.
2. To prepare and to take along a strap, harpoon tips (tamra), harpoons shafts (ve·l), his gun and the guns of his fellow-hunters, a kettle and a tea-pot (the hunters are obliged to take only cups with them), a tent, a sail, a tripod for the tea-pot and the kettle, and a compass. (3) Most of these items

3. Earlier they used to take to sea ŋafq-va ("friend-stone" or "friendly stone"). See the remark in the supplement to "Seal Hunting."

are the property of the pilaŋ.
225 3. To perform a number of religious-magical ceremonies
782 before setting out for the hunt as well as during the hunt. In
372 this capacity the pila exposes the boat to smoke, performs
476 mu-zi·d and t·aj; ceremonies to be described in detail below.

225 During the hunt one must use the tinder box or the matches
782 of the pilaŋ to light a campfire. No hunter has the right to
372 light a camp fire using his own implements for this purpose;
476 he has to use the implements of the pilaŋ instead.

4. To tend the rudder and to observe the wind and ice-
225 floes. Young hunters with no experience in sea-faring rely
476 in this respect completely on the pilaŋ. One Gilyak told me:
502 "If the pilaŋ observes the wind and the floes, the young hunters are not worried."

5. To distribute the quarry among the hunters.

As can be seen, the pilaŋ performs the most responsible functions of a leader. I was told by the Gilyaks that if anything goes wrong during the hunt the pilaŋ is held responsible.

In the collective of hunters there must be not only organizers but also good oarsmen and a good shot.

225 [81] Everything in the boat is organized from the beginning
501 to the conclusion of the hunt. Each of the hunters occupies a
476 designated position at the oars. Each of the positions has its name.

The position at the first pair of oars, starting from the stern, is called ŋ̊tivd, the second - tafpuf, the third - alχ-pid, the fourth - meyerq-pid ('sitting at the bow'), the fifth - lele meŋ-pid ('placed at the very bow'). There are boats with six and even seven pairs of oars.

225 Starting from the stern, the first position, ŋ̊tivd, is oc-
476 cupied by the oldest and strongest oarsman in the boat. At the
554 next pair of oars is a younger hunter. The position at the
561 oars at the bow is occupied by the youngest of the hunters in the boat.

When the ice fields are reached and the hunt begins, the position at the bow is occupied by the very best shot. Until that time he rows just like the others. As long as there are no seals in sight he rows like the others, occupying the position at the bow. Since he is the oldest of the hunters the pilaŋ often turns out to be a better shot than the young hunters. In such cases he turns the rudder over to someone in the boat and sits at the bow to fire at the seals. Thus, for instance, the Gilyak pilaŋ Norp sat during the hunt at the bow and fired at the seals. At the same time Gilak ŋ̊t tended the rudder which the pilaŋ had turned over to him. The Gilyak pilaŋ Tavjun was at the bow during the hunt. According to his information he had killed by himself twenty seals and missed two. We do not wish to imply that of the whole collective of hunters only one person shoots at the seals. Two, three or four hunters do the shooting

225 mu-ziŋ̊d on the boat supports the assumption that at one
789 time or another the Gilyaks, it seems, regarded a boat as
774 a living thing. Mu-ziŋ̊d on the boat serves, it seems, as a
751 means of guarding the boat against and protecting it from misfortunes.

782 Aside from mu-ziŋ̊d, t̊aj is performed on the boat. T̊aj
778 means 'image', 'figure,' 'picture.' With shavings (inau) of
532 a branch of rowan (qosk-ŋ̊ks) the pilaŋ makes two figurines.
225 One of the figurines is placed at the prow of the boat and the
789 other - at the stern. I once saw such a figurine on the neck of a representation of the bird ugŋ, placed by the Gilyaks at the bow of the boat. The figurine placed at the bow has its face turned to the sea. We shall come back to these t̊aj elsewhere.

782 There is one other ceremony performed on the boat. Before
789 setting out on a hunt the Gilyaks expose the boat to smoke.
225 They light fires of spruce and bogulnik on both sides of the
372 boat and they try to build the fires so that the smoke hit the boat. The pilaŋ takes a branch of spruce or of bogulnik and, starting from the bow and going towards the stern, hits the outside and the inside of the boat as well as the rowlocks with the branches so as to elvlaf-p̊k-ŋ̊zd --"lose bad places (evil)". Then the hunters push the boat past the fire into the sea and are off.

225 I watched Gilyak Xitkun who, having already returned from
502 a hunt, put out to sea with the hunters a second time. Five
554 hunters were at the oars. Propelled by strong and simultaneous strokes of five pair of oars the boat took lightly and quickly to sea. Xitkun, firmly gripping the rudder, set the bow of the boat northward, towards the cape barely visible in the distance. The Gilyaks rowed calmly and quietly. They need fear nothing. At the stern of their boat sits an exper-
777 ienced pilaŋ, tested in trips. At the bow are placed a representation of the sea bird ugŋ and the figunines t̊aj. They will vigilantly look out for and protect their course.

When the boat became a tiny spot in the distance and its outlines blended with the water, the women who saw off the hunters left the shore for home.

225 After leaving the village the hunters turn northward. They
823 first go to Uiŋ-kr̊ "sacred cape." (1) Once there, they pull
766
782

1. It seems that there are "tombstones" in memory of drowned men on the cape.

the boat out of the water. The pilaŋ picks up a scoop containing the usual refreshments called for by the occasion and

225 throws them into the sea. Each of the hunters has with him
823 similar gifts which the pilaŋ throws into the sea together
766 with his own gifts. If the hunters go past Uiŋ-kr̊, then they
782 throw their offerings into the sea from the first floe at which they stop. The Gilyaks believe that on every cape (kr̊) there lives a ŋ̊tik- an old woman. These old women must also be given something at the time of the sea voyage. It is believed that tvax-ŋ̊tik, 'the old woman of the mouth of the river,' who lives in the mouth of the river Kul helps during the hunt.

225 [83] In the past the Gilyaks would go as far as T'uurf
(Bay of Tugursk) during a seal hunt. They would sometimes spend the winter there and engage in fox hunting. The Gilyaks told me that their ancestors apparently did not go to ksvr-mif (Shantar Islands) (1) At present they do not go beyond

1. According to the account of Schrenk, the Gilyaks did not hunt on the Shanter Islands (On the natives of the Amur region), v. II, p. 288.

Lo ri. In former times the Gilyaks would put out to sea when the ice began to break. They would hunt at sea until the end of the summer and then they would return to the village to fish salmon. When the ice was gone and, consequently, seal hunting on floes ceased, they would hunt seals by means of tola-k'e, 'a heavy drag net.'

At present the Gilyaks put out to sea for short periods not exceeding one or two months. Thus, for instance, Norp put out to sea with the hunters on July 8 and returned from the hunt on August 2. In 1930 two boats of hunters hunted seals off cape Litke and stayed there for two months.

411 The Gilyaks of today also hunt by means of a drag-net,
225 tola-k'e. (2) Tola-k'e is made of heavy rope called locally
283

2. Of the very old seal-hunting implements in the village Kul, a very large floating harpoon tla is completely out of use. It was made out of a few long sticks turned of the trunk of a larch. I got acquainted with its structure and I observed how it is being used in the village Chayvo. This harpoon is sometimes 18 ruchnykh sagenes long.

matauza. The rope is 45 ruchnykh (makhovykh) sagenes long. Each of the meshes is large enough for the head of a sivuch. Tola-k'e is set not far from the shore. The upper cord of the tola-k'e is called ŋ̊ski 'back.' The shore-end of the net is

225 3. Pila-laŋr 'sivuch', literally: 'a big seal.'
552
825 Pəγi

Among the seals of this kind the Gilyaks distinguish a few age groups: a seal belonging to a particular age group is named accordingly. For instance:

1. Qrγər is the youngest of all pəγi.
2. Mat-γəγəl is the next to the youngest pəγi. For the time being this name is conditional. Its etymology can be given as follows: mat-γəski-kəld; mat - 'smal,' γəski 'back,' kəld 'long,' little long-back.
3. Tje-γəsχəl last year's γəsχəl.
4. Qat next in age to tje-γəsχəl.
5. Siusui-γa next in age to qat, i.e. the oldest pəγi.

Qoma.

1. Heqr-motk - the youngest qoma.
2. Ta a a - next in age to heqrmotk.
3. Arəfk - next in age to taγarγa, i.e. the oldest qoma.

Alχ.

Here the Gilyaks distinguish the olvarak - multicolored al and dalr - grey Alχ.

225 The sivuch is considered by the Gilyaks to be the most
237 valuable of all seals listed above. The toughest straps, dog harness and shoes (vamps and soles; tops are made out of the skin of other varieties of seals) are made out of sivuch skin.

If the quarry is big, the hunters prefer to take with them the extra hides with the fat and the heads of the seals, leaving the meat on the ice. They separate the head together with two jugular vertebrae (maχt) and two upper ribs.

225 When the Gilyaks kill a seal or a dolphin at sea, they first
782 "feed" it the root of the plant piskər. (1) If not enough of this

1. In villages further South they feed the root of the plant "orŋoχt."

plant has grown, they feed the grass muzŋi. When setting out on a hunt, the Gilyaks take along with them a sufficient supply of these plants. Having killed a seal, they open its mouth and through it they put the root of this plant in the nasal cavity. Gilyaks put the stalk of the plant next to the seal on the ice and leave the seal there. They also leave pər 'gall' of the seal on the ice and next to it they put piskər.

252 Then she pressed tubers of dry sarana into the openings for the eyes and nose of the sivuch and put the head into the kettle.

263 When the heads were cooked, Xitkun, his son and other
177 hunters started to eat. They were served meat on flat
258 wooden dishes. At the same time they were given a small
314 bottle with salt and a tiny cup containing finely cut cheremsha While one may eat cooked meat with salt, one must not cook meat or fish with salt. In former times the Gilyaks had no salt. They learned the use of salt from the Chinese. In 1926 I was told in the village Chayvo that the ancient Gilyaks used a solution of ashes instead of salt. I was told the same thing in 1931, in the village Kul. According to my informants the ancient Gilyaks burned boughs and stems of trees thrown up by the sea. They dissolved the ashes of those trees, saturated with the salts contained in the sea, in water taken from a well or river. When the ashes settled at the bottom there remained, as the Gilyaks of Chayvo put it, "water as clear as alcohol." It is this water which they used instead of salt. I brought from the village Kul to the Muzeĭa Antropologii i Etnografii a wooden plate of the an-
415 cient Gilyaks, black with age. This plate, which was sold
263 to me by old man Tujun, was specially made for seal meat. In the sides of this "plate" were carved two tiny cups which as Tujun informed me, would be filled with salt water for dipping pieces of meat in it.

462 On the following day, after the meat was taken off the
782 heads, the Gilyaks prepared them for throwing in the sea.
225 The heads are dumped in the sea by women and not by men-hunters. As we shall see, it is also the women who bring pay to the fire. Xitkun prepared tiny white, thin shavings of qosk-γəks 'rowan.' These shavings are called iugrusps. He handed the shavings to his wife Hemanγ. The old woman stuck the shavings in the nasal openings in the heads of the two sivuchs and smeared them with cowberry juice. Then she tied the lower jaws to the heads of the sivuchs using stalks of burdock-pəs. In a row with the skulls lay jugular vertebrae (maχt) and bone splinters from the broken skulls. The heads were placed on a board. The other wife of Xitkun took the board with the heads and the mug containing the eyes and went towards the sea. I followed her. Standing at [95] the very edge of the water she threw the heads of the sivuch into the sea as far away from the shore as possible. next she threw the contents of the mug into the sea as far as possible and then she threw into the sea the skull

462 fragments. Finally she threw into the water grass muzŋi
782 Soon the sea closed quietly over the remains of the sivuch
225 thrown into it.

Now Xitkun's wife bent and picked up as many pebbles
372 there were sivuch heads. At home she threw them into the
782 fireplace. These pebbles are called uskis 'pay' (j-uski-d
225 'to pay,' s - suffix of the implement of action).
77[illegible] There arises the question why this pebble is called pay and why the Gilyaks pay for the hunt to the master of fire

Of some help in answering this question may be the fol ing opinion of the Gilyaks of which I was told on Sakhalin 1927 by the Gilyak Murmur of the village Chayvo. Murmu informed me that while the hunter is still asleep the mast of the fire hunts seals for him. If the master of the fire fails to kill a single seal, then the hunter will fare no bett "We sleep, fire first kill seal. Fire seal not kill, we also not kill."

The ceremony of throwing the heads into the sea conclu the seal hunt.

115 A seal hunt. (1) Supplement
225

1. This is a translation from the Gilyak language. The text was taken down in the village Hiski, 40 versts from Kul, on July 10, 1931, and was told by old man Jajpan.

225 In the spring we came to a summer village, we were s fering hunger, we caught only fish, catching bullheads on hooks, only ate. Then the sea ice moved. The pilaŋ said: "Let's hunt seals. How many will go? Six gathered to go. "Women make mos, make muvi." Then we slept. In the morning we got up and ate."Prepare your things, harpoon tips, harpoon shafts, oars, small benches, and put every thing in the boat." Then we brought out things to the boat and put them down. All got down into (entered) the boat. Then we pushed off the shore. Five rowed. Then, rowing, we got to sea. After we got to sea, we came alongside the shore. When we came alongside the shore, we pulled out boat and lighted a fire. The fellows said: "Big man (2) ma

2. L.e. pilaŋ

tŋaj." The big man made tŋaj. He made two tŋaj; one was

on a birch-tree. Then they scattered some more rice and berries. (5) Then we sat down around it. We fed the children

5. That is, they spread rice and berries on the head of the beluga.

and went down again. Then we got a young man to take a white stone and put it in the sea-dish. Then we returned and went home. When we came home we put the stone in the fire place." (6)

6. The stone which they put in the fire place is a payment to the master of fire for the successful outcome of the hunt (cf. our article "Morskoi Promysel Giliakov Derevni Kul', [Sea fishing among the Gilyaks of the village Kul]).

182 The methods of beluga hunting as described by the Gilyak
225 Mytka in his account and pictured in his sketches are characteristic of the village Puir and partly of the village Lyangr. The hunt proceeds differently in other places. [114]

The account of the Gilyak Khor (from the village Chomi(?)) telling of a beluga hunt undertaken by him and his friend in 1930 supplies us with enough information to enable us to distinguish between the methods used by the Khor and those described above.(Khor's account was written down by me in the fisheries of Dzhaori in 1931) [For Mytka's account, see category 225, pp. 111-113; for Kor's account, pp. 114-116--Analyst.]

225 We present a translation of the account, striving to com-
103 municate the spirit of the original.

"During a run of herring, the four of us, two adults and two children, went in a boat to the Big Cape (Pila-kr-) to hunt for belugas. When we approached the whirlpool (Polx), we came ashore and took out our things. The animal (that is, a seal, a beluga) was swimming up (1) to the shore. The

1. Literally: "rose up to the shore."

children heated tea, and we took the harpoons and went up.

memory. It is such a difficult
ose I saw were not taken out more
fortnight for a constitutional.

"[LSS: During the bear fête] When the feasting, drinking, smoking, and talking were at an end, a start was made for the execution-ground. On [199] their way the company halted at the beginning of the avenue to allow a few of their number to shoot blunt, wooden-ended arrows towards the bear. There seemed no attempt on their part to hit the animal, or else they ignominiously failed, for the shots were lamentably short of or beyond the mark. This appears to be only another example of the weakening of traditional custom, for the shooting with blunted arrows at the poor bear was one of the greatest pieces of 'fun' in olden times. Arrived at the ground the crowd grouped itself in front of the animal in a semicircle."

9: Hawes--212-213 T-3 (1901) 1903 Gilyak
116, 224, 782

"When the hunting season is advanced, another method for the capture of the sable is adopted. The native sets out with his dogs, who quickly find the tracks of the little animal, and drive it up a tree. The hunter then lets fly a blunted arrow, and, if skilful, stuns his prey. With fair success he may thus catch seven or eight sables [213] in a day. He is careful so to kill them as not to injure the skin, and in skinning he strips it off like a sock. Half of the flesh he gives to the dogs, and the other half he offers to Pal ni vookh."

10: Coxwell--130 [2] B-3 (no date) 1925 Gilyak
116, 224, 539, 782

"THE MOUNTAIN-DEVIL IN THE FORM OF A TIGER
[LSS: For the text of this tale, see category 539, pp.126-127]

It is noticeable that the hunting party, on setting out, sacrificed not only to the fire, but to the mountain and the sea. Later, the sacrifice of dogs to the mountain shows a real relief in the power of the mountain spirit. In the Ostyak tale, 'Aspen-leaf,' the hero, in the middle of a perilous adventure, bends his neck in worship of spirits. The Yukaghirs sacrifice a reindeer at marriage; also deer to a river. The Tcheremisses sacrifice a foal, an ox or a cow to their gods, Keremet and Sheert.

The Eskimo have a tale of a mountain spirit that dug up the body of a man, who had pretended to be dead in order to see what the mountain spirit would do. The mountain spirit carried the man to its home and the man soon opened his eyes and killed his captor, also the latter's children. The dead mountain spirit's wife pursued the man, but he escaped by telling hills to rise up and a stream to flow between himself and his pursuer. (3)

782 Next to the sacrificial objects a one to two meter long
775 stick carved in curly design is dug into the ground; they call it nau. From this moment on the whole tribe is safe [762] from being haunted by the dead child, tonhr ehlian, without further prayers or sacrifices.

753 If the relatives neglect to follow these rules, which
845 are designed to appease the awe-inspiring spirits of
776 the mountains and to win their favor, they evoke their anger. Several diseases which attack the parents and relatives of the twins are considered to be symptoms of their revenge (tohr ehlian). These usually are certain diseases like deformation of the jaw-bone, squint-eyes, stiffening of the neck or any kind of convulsions. The appearance of such diseases is considered to be a consequence of the mountain spirit's dissatisfaction; in such cases one says "tonhr ehlian singrund", that is "the twin child is tormenting".

784 The Gilyak are so afraid of these dangers that
845 young women and girls are strictly forbidden to listen
777 to reports about such happenings; by these precautions, they believe, they will be able to prevent the birth of twins. Women are neither allowed to borrow household articles nor to accept gifts from friends who had given birth to twins. In this case old soft objects are considered to be the most dangerous ones. Hard objects, however, especially tools made of metal, do not transfer the bad luck of the former owner to the new one.

842 It is altogether a trait characteristic of this northern
777 tribe that they believe in the possibility of the transference of physical peculiarities from one man to another man by way of his tools. This gives us an explanation for the superstitious remedies they use for overcoming a woman's sterility. The woman who cannot bear children must ask another very fertile woman to lend her the waistband of her trousers and she has to wear it up to the moment of the desired success. A Gilyak told me that fertility can be transferred from one person to another like a contagious disease, for example by way of a vessel which had been used by the sick person.

796 on a bed of fir twigs as on a bed of state and the participants
in the festival visit it for the last time. After two or three
days they pull off its hide and the meat is distributed among
796 the guests who eat it with relish. There is a strange con-
825 tradiction in these bear festivals. On the one hand, they honor
531 the bear as a celestial being, as is proved not only by its
pictures serving as idols and amulets but also by the tender
attentions that they show the animal during its imprisonment.
For this speaks also the solemn way of killing it, as well as
the ceremonious procedure used in treating the corpse; also,
the circumstance not mentioned above, that the traveller was
not allowed to take with him one of the willow sticks of the
fence which was later used for the bed of the dead bear. He
would all the sooner have done so since the stick was distin-
796 guished by tasteful carving. On the other hand, they are not
825 afraid to kill this animal that they honor as a divine being,
756 and by a death, even, that is only the conclusion of a rather
barbaric torture. Furthermore it is a curious circumstance
that during the whole course of the festival, as far as Jakobse
was able to observe it, the shaman was not even visible, even
though the latter plays such an outstanding role at all the
796 religious ceremonies of the Amur peoples. What, besides, is
782 the purpose of leading the bear out on the ice of the river?
776 [in the bear festival; see p. 381--Analyst] Should it suggest
the idea that the animal is to be offered as a sacrifice to the
river honored as a god? And if this is really the case, what
a strange idea it is to sacrifice one god to another and to eat
him up in the end. And why don't they kill the bear on the
river bank and let at least its blood flow into the water, just
as the fish gods are entrusted to its waves? What, further-
more, is this sacrifice meant to effect? and what is its
nature? Are we to imagine it as a sacrifice of thanks offered
up to the river dispensing blessing and nourishment, or as a
sacrifice of expiation by which the river is supposed to be
made favorable to the dwellers near it, because the latter are
well aware of their dependence on the river and its power to
bring them destruction? In the former case one would think
that the celebration would take place as soon as possible after
the time fishing ended, that is, about September or beginning
October, while these festivals actually are not till later. The
second assumption does not agree, again, with the circum-
stance that the nature of the festival is a thoroughly joyful
one, as is proved, at least to my mind, by the description
of it given above. This is not contradicted, either, by the
solemn silence which reigns during the lethal shot and the
796 preparation for it. For it is by no means necessary to see

Sometimes the dogs also draw sleds in these races.

Dog racing, besides being an amusement also has a practical significance, for the good runners find immediate buyers. In fact, the bear festival is a sort of fair, where various things are bartered.

The chief figure of the festival, namely the bear, is well-fed throughout the whole period and is repeatedly led through the village, at which time he pays a call at each house and this is done in such a way that he has to go from one house to another at an angle, by way of the adjacent section of the river. This symbolic procedure assures the house of "an abundance of fish". He is always led by several men who put up the necessary number of chains and ropes on all sides. In the houses he is treated to fish, millet, and cranberries, and sometimes he is also teased. Some Gilyak also prostrate themselves before him. This is by no means worship, however, as some have assumed. Some do it for fun, some in earnest, calling on the spirit of the bear not to seek revenge on them after he is dead. Sometimes the bear is not given such expressions of veneration.

When the bear's immolation nears, he is tied to a stick which has been driven in the ice, and then he is shot with arrows. In this procedure the archers seek to outdo themselves. At last the unfortunate bruin is given a merciful blow with a lance. He usually dies in peace and majesty, with his fore-paws resting on his wounded chest. When this happens the woman who has had charge of him is often heard to weep loudly. Finally, funeral pyres are lit and the Gilyak seat themselves around them. Pieces of bear meat are passed around and before they are eaten they are lightly [237] roasted. Eating and tea-drinking are the main activity at a bear festival. The stick music which is here offered as entertainment has been described. Special music is produced in the village of Kola. This village is the northern outpost of the Gilyak settlement, on the coast of the Sea of Okhotsk, about 200 versts from Nikolayevsk-na-Amure. (1) Here are

771 predominantly of a practical disposition and are not fond of
rumination. Moreover, they do not yet have firm beliefs
and their prophets, the shamans, often misuse their imag-
ination so boldly that their assertions contradict those of
other shamans or of everyday experience. From conversa-
tions, from customs and actions, we may conclude that the
Gilyak believe in a supreme being, in many lesser spirits,
both good and bad, and in immortality, but they have not
emerged from fetishism.

776 God (Kush or Kur) made everything, he lives in heaven and
782 never appears. He is held to be good, but otherwise nothing
is said of his characteristics. In one village, however, I
heard that God is very angry if a shaman is put to death. In
this we may already see something like priestly self-glorifi-
cation. Kush is not worshipped, in fact, one does not bother
much about him, only now and then something is sacrificed
to him, but it is questionable whether this is meant for him
or for his subordinate spirits. For instance, when a Gilyak
crosses a dangerous passage on his journey, he pours a
bowl of spirits on the earth or in the waters: this is the
sacrifice to God. Sometimes one of the best dogs is
sacrificed to him, whereupon it is eaten. Near a village a
stake is sometimes rammed into the earth and beneath it
millet or fish are buried, or tobacco and such things [240]
are tied on top, - all this is meant to be for the supreme
being. Such a stake remains standing until it rots.

825 The bear usually appears as the executor of divine
783 ordinances, and he punishes the bad people during their life-
time. As a matter of fact, there are a number of superstti-
tious ideas connected with the bear, and thus he may be
regarded as a "sacred" animal, but nobody regards him as
a god or demigod.

825 The Gilyak do not bother much about the tiger, for they
789 seldom encounter him. But the Goldi and Manchurians re-
278 gard him as much more than a wild animal. He is regarded
as having some mysterious power, he is spoken of with a
certain caution and referred to as "the honorable colored
one". (1) It is also said of him that he only attacks bad

*614 Finally, if one keeps in mind that the term "sin" embrac
771 not only prohibitions in the formal sense, but also the obli-
● 783 gation to carry out positive norms, then the formula "commo
784 acquires a broad general sense, becomes the expression of the
182 principle of unity of the circle of clan obligations in general.
The significance of this principle is all the greater by virtue o
fact that in the eyes of the Gilyak obligations and prohibition
are by no means formal juridical norms, observed through fea
punishment, but religious imperatives, rigorously performed o
of the feeling for self-preservation. For the Gilyak there is n
difference between religious, sexual, and social prohibitions;
all are equally religious, and to satisfy the dictates of religio
means to be concerned about the benevolence of the gods, ab
the elimination of the machinations of the enemies of life,
etc., that is to say, to feel concern for one's self-preservatio
Not to fulfill them, keeping in mind the whole clan back-
ground of the cult, means not only to destroy oneself, but the
whole clan as well. Hence the great importance of this
principle as a cementing agent of the clan union. Hence,
*614 on /108/ the other hand, it becomes comprehensible as to
182 why norms frequently contradicting human nature, requiring
602 immense self-control, are carried out, not through compulsio
83 but as the natural dictates of instinct. Consider, for example
with what strength the sexual norms act. In general, in
matters of the sexual instinct the Gilyak, both men and
women, follow their natural inclinations with complete
freedom; there is no chastity either before or after marriage.
Their only concern is not to become victims of jealousy.
There is no question of any feeling of self-restraint. Never-
theless, despite the complete sexual license from our point
of view, the Gilyak observes complete chastity with respect
to persons of the prohibited categories. Adultery is unknown
to him; the adulterer is a monstrosity, an exception that is
*614 almost never encountered. The same is true of the prohibi-
602 tions of speech. Brothers and sisters, left face to face, will
182 go for whole days enduring the torments of silence, in the
most urgent necessity exchanging rare businesslike phrases in

825 and if he gets caught, he is killed. But even after that he is
789 handled with respect, that is, his corpse is laid before the
278 house of the idols and left there until it begins to decay.
Besides the skin, the bones and the gall are immediately
sold, for the former are held by the Gilyak to make a man
brave, and the latter is used for all kinds of medicaments.
776 Of the numerous spirits whom the Gilyak are supposed to
782 know about, some are good and protect man, but the major-
ity are more or less evil, and must therefore be propitiated
with gifts. The chief of the evil ones is called Kins (on the
island of Sakhalin: Kinsh) and to a certain extent corres-
778 ponds to the devil, Ahriman, etc. of other peoples. "Spirit"
782 and "idol" are both called kegn, for the idols are not only
532 symbols, but at times also the dwellings of the spirits or
kobolds. Usually they are kept in the storage huts and only
hauled out on special occasions. If an idol is "heavy" it
means that its inhabitant, the kobold, is at home, but when
it gets "lighter" than usual, the spirit is roaming about
somewhere. The offerings here also consist of millet,
tobacco, etc.; very often the face of the idol is smeared
with cranberry juice, which seems to have a powerful effect.
Wood chips are also hung around its neck. The idols have
different appearances. A guardian spirit, for example, [24]
lives in a wooden cone that is placed somewhere in the
vicinity of the yurt when it is built. If the yurt must be
taken down, the idol remains, and at the new dwelling a new
one is made. Some idols are crude imitations of humans,
others have the shape of a bear and are sewed into bear skin,
still others have the shape of a bird, etc. Some human-like
idols represent children, others old people. Some have
hands and feet, others only a head which sits on a body show-
ing a navel. Small idols are sometimes worn as talismans.
These also usually have human forms, but some look very
89 different. Thus the talisman against a difficult birth is a
44 figure carved of wood, representing a double acorn.
Besides the idols, there are some more or less strange-
78 looking objects not made by the Gilyak themselves, which
82 have a mysterious significance for them. Such an object
77 stands on the so-called Tyr (1) about 80 versts from

1. From the Gilyak village Tyr.

Nikolayevsk-na-Amure. On a high, precipitous river bank
a Bhuddist temple formerly stood; of this only a few stone
pillars remain, bearing Chinese and Mongolian inscriptions.

778 These were deciphered by Klaproth and the Archimandrite
782 Avvakum. One inscription reads: "Temple of eternal peace",
177 the other is a Tibetan translation of the Sanskrit sacred formula: "Om mani padme hum", i. e., "O jewel in the lotos! Amen!" The temple was supposed to have existed in the time of G nghis Kahn. Neighboring Gilyak come to these pillars and offer sacrifices, that is, they decorate them with wood chips, pour millet or spirits on the earth, etc. Thereupon they promise themselves an abundant yield of fish.

Near the village of Vaida high above the water is to be seen a thin, dry tree trunk parallel to the water level and jutting out of the steep rock wall, with branches radiating out in a circle. This tree trunk is held to be sacred by the Vaida-Gilyak. It is also often decorated with wood chips and above its roots, on the edge of the river bank, the bear festival is held. The above-mentioned church bells also belong to the sacred objects. [RCH: see category 116, p. 237] [242]

775 Almost all Gilyak believe in a future life, which may be
171 gathered from the customs relating to the burial ceremony. Life in the hereafter is pictured exactly like the present life, except that it has neither age nor death. A deceased aged person regains his youth there, a married couple is united anew. There is neither hell nor paradise. (1) The

1. A similar belief is said to exist among the natives of Kamchatka.

fate of evil persons differs from that of good ones only in the fact that the souls of the former do not immediately reach that world, but must roam about on the earth for a while, usually in the form of an animal, particularly a dog. This is the Gilyak purgatory which certainly cannot be called the most absurd idea of purgatory. "The beyond" is put not below, but above somewhere in heaven.

771 However, even among these savages there are sceptics, or rather unbelievers. Thus a Sakhalin-Gilyak, after a pause, told a visiting Russian priest who sounded him out on religious matters: "What business of ours is God! If we have enough sable and fish we shall live, if not, we must go hungry." Another Gilyak in the vicinity of Sofiyskoye positively denied immortality in speaking to Russian peasants, pointing to a fish and saying: "just as this fish will disappear if I put it to death, so also man disappears."

771 More frequently one finds those who recognize a supreme being and immortality, but do not bother much about them. Some do not even believe in the idols, and these may already reflect the opinions of those of other beliefs. Thus the little village of Kula near Nikolayevsk has for some time already had neither idols nor shamans. I was visited by two brothers who were born there and who were both wide-awake and good-natured chaps; they confessed to me that they believe in god, but regard the idols as foolishness.

756 The shamans are the mediators between the visible and
789 invisible world; they always excel in experience and
782 perspicacity, whereby they know how to predict many things, for instance, changes in the weather, and thus they exert their influence. Their chief function consists of driving out sickness which is mainly the work of evil spirits. Incidentally they are [243] also consulted on other occasions. For instance, there may be few fish at one place or another; the shaman is consulted and orders a dog of such and such color to be killed and offered up in the river at the designated place. The sacrificial gifts are generally made according to the shaman's prescriptions. A competent shaman knows how to "drive away the rain" by threatening the clouds and denouncing them loudly. Likewise, of course, he understands how to make rain and thunderstorms. "As soon as he begins his magic song, rain clouds immediately appear", a Gilyak believer told me. His magic practices can also bring harm. For instance, he can cause a human somewhere far off in some village to die of a fish or a drink which does not harm others. He can flood a village, and so forth. Occasionally the magic practices are feared, but the magician is never persecuted. However, the shamans are usually merciful enough to stick to threats only, if someone irritates them; and besides, not everybody believes in them.

755 If a shaman is invited to visit a sick person he appears
34 in his official costume. He wears a girdle on which hang numerous clinking tin objects. In his hand he carries his drum and his staff. The drum is about two-thirds meters long and consists of a wooden ring on which is stretched a pig skin or the skin of a stag, and on which hang a number of little bells. He alternately beats his drum and sings

be cremated after their death. If that were done all those present at the ceremony would be punished with the loss of their eyesight. Even the parents of twins have to be buried in the earth, because they too have become relatives of the god of the mountains. The children of twins, however, are considered to be ordinary members of the tribe, and at their funeral there is no deviation from the custom.

845 If twins stay alive and grow up they remain, for the
551 rest of their lives, the object of awe for all their
769 neighbors and friends although there may be enough proof that they lack every kind of supernatural power. At every meeting, either in friendship or in hostility, the others remind them of their unusual progenity and everybody attributes to them that mysterious innate power. Each of the twins bears the name he gave himself as a child. The custom of giving the child the name of a dead ancestor is not followed in the case of twins. The names of the twins are neither given to another child in the same family nor to another child in the tribe. Here too we see a deviation from the general custom of giving children the names of dead ancestors.

845 The greatest awe is felt for those twins who die in
766 childhood. The offspring of the spirits of the
782 mountains who, while living among ordinary human
775 beings for a short time, who did not get used to them and did not feel he was one of them, has especially the power to do harm to people; that is why they try hard to win his favor. The family who had harbored the unwelcome offspring of the mountains constructs a little model of a Gilyak yurt and puts it either on a little board inside the house or outside in the open. A little figure carved in wood which represents the dead child is put into that little hut. The members of the family consider it necessary to give some of the food they eat themselves to that little figure every day. This rule is strictly followed not only by the parents of the twins but also by the two following generations. Only the great-grandchildren, observing ceremonial rites, carry the little figure with its

/108 cont./

impersonal form, although by temperament these are far from taciturn people. Of course such self-control is the result of upbringing and training to a considerable degree, but it never would have reached such a high state of self-restraint if it were not for the general consciousness of the destructive effect of each individual infraction on the welfare of the whole clan.

The religious sanction of prohibitions and obligations and the lively consciousness on the part of one and all that "sin is communal" explain to us the most amazing aspect of the clan structure, the presence of the social organism and the almost complete absence of the element of compulsion, authority. But more about this later.

Such are the basic features of the clan. By them one can judge its all-embracing role in the life of the Gilyak. It enfolds a man from birth to death, giving life all its content. It surrounds him with intimate bonds of kinship from both the side of the father and the side of the mother. It unites with a living bond the living generation with the departed ones. It guarantees to man an individual marriage and conjugal rights outside of it, and after his death it provides for his widow and children. The clan defends his life and the inviolability of his family against encroachments by a member of another clan, ready as one man to rise to the defense of the trampled rights of a clansman and to answer for his guilt to a member of another clan. It feeds him when he is hungry, it pays the debts of the insolvent, it assists in the payment of the bride price and of blood money.

/109/ In the benevolence of the clan gods, in the clan sacrifices, man finds the higher protection and the strongest guarantee of his welfare. The clan is the school of moral training, the school of duty, of social co-operation and abnegation, and, finally, in the clan, man finds the highest pleasures and the most valuable consolation in the most bitter miseries of life - the noisy joys of festivals and preparations for felicity in the world beyond the grave.

/367 cont./

577 783 673 688 In any case, it is characteristic. The Gilyak therefore have a clear conception of sin ("umgysh"). It goes without saying /368/ that such things as stealing and murder are a sin but, to be sure, there are a great number of acts, indifferent from our point of view, that are considered sins by the Gilyak, for instance: to heat seal fat on a fire and not in the sun is a sin, and, in general to deviate from the old ways is a sin. It is curious that in many cases a sin, even when it consists in insulting a deity, is atoned for by a fine paid to one or another person; for example, for the slightest harm to the fence of the hearth, the one who caused it must pay a dog, a cup and saucer, and a few other small things to the master of the yurt; otherwise, one of the two will become ill. Even this small episode illustrates the idea of the necessity t
[682] atone for a sin. The damages paid for a murder are provided by the clan of the murderer not by necessity (such necessity does not always exist), but as an atonement for the sin before an angered deity. On the other hand, the gods do not allow an evil deed (sin) of people to go unpunished. They send storms and rains, a scarcity of fish and fowl, send down diseases and various other
[821] [829] misfortunes. The Gilyak think that thunderstorms and lightning have become more frequent since the arrival of the Russians; this is because the god has been angered by the sins of the Russians.

771 775 Imagining his gods as mortal, the Gilyak merely expresses his extremely anthropomorphic view of them. In fact, human existence, according to his belief, does not end with this life. There, beyond the flame of the fire, is another world, another la where a Gilyak lives again, with the same needs and the same ideas; only there the poor man will be rich and the rich man poo After death a Gilyak receives a different name, and it is a sin to call a deceased person by his old name. They also believe in the transmigration of souls, or, more exactly, in many rebirths. Thu there is a legend which tells that after the death of a Gilyak who had on his face distinctive scars from wounds received in a fight
766 with a bear, a boy was born to another Gilyak with the very scars
[764] on his face as the deceased had. It is well-known that the Sakha Gilyak burn their dead. There is, however, one case when this

9: Hawes--162 T-3 (1901) 1903 Gilyak
116, 231, 527, 783, 796

"The object of the capture and feeding of the bear is the holding of a great yearly semi-religious festival, in which the slaughter of the beast plays the chief part. It is more probable, that in the older times a full-grown bear was captured just previous to the fête, and that to-day the letter rather than the spirit of the sacrifice is kept up by seizing cubs and rearing them for three or four years. The feeding is a matter of no difficulty, as will be seen when we come to the preparation of the Gilyak's winter stores. [LSS: See category 116, p. 174.] To the owner or capturer of the bear, the feast turns out a very profitable investment, for visitors from neighbouring villages flock in, and while necessaries are provided by the owner, luxuries are on sale, and bring him in a handsome profit.

The animals are kept in stout log cages, adorned with a pine-branch at each corner. Wishing to see, and if possible to photograph one of the occupants, I desired the villagers to bring one out, or at least unroof him. There were, however, too few men-folk at home, and the adult bears were very fierce, as indeed we gathered from their movements and remarks within; so two of the five little cubs were partially unroofed. The poor little orphans snarled, and shrank frightened into a corner, tumbling over one another, and trying in their terror to hide each beneath the other. Ere the month of January, 1905, is passed, or perhaps before, their spirits will have been released to carry messages to the great Pal ni vookh."

edominantly of a practical disposition and are not fond of mination. Moreover, they do not yet have firm beliefs d their prophets, the shamans, often misuse their imag-ation so boldly that their assertions contradict those of her shamans or of everyday experience. From conversa-ons, from customs and actions, we may conclude that the lyak believe in a supreme being, in many lesser spirits, th good and bad, and in immortality, but they have not nerged from fetishism.

God (Kush or Kur) made everything, he lives in heaven and ver appears. He is held to be good, but otherwise nothing said of his characteristics. In one village, however, I ard that God is very angry if a shaman is put to death. In is we may already see something like priestly self-glorifi-tion. Kush is not worshipped, in fact, one does not bother uch about him, only now and then something is sacrificed him, but it is questionable whether this is meant for him for his subordinate spirits. For instance, when a Gilyak osses a dangerous passage on his journey, he pours a wl of spirits on the earth or in the waters; this is the crifice to God. Sometimes one of the best dogs is crificed to him, whereupon it is eaten. Near a village a ake is sometimes rammed into the earth and beneath it illet or fish are buried, or tobacco and such things [240] e tied on top, - all this is meant to be for the supreme ing. Such a stake remains standing until it rots.

The bear usually appears as the executor of divine dinances, and he punishes the bad people during their life-me. As a matter of fact, there are a number of superstiious ideas connected with the bear, and thus he may be garded as a "sacred" animal, but nobody regards him as od or demigod.

The Gilyak do not bother much about the tiger, for they ldom encounter him. But the Goldi and Manchurians re-rd him as much more than a wild animal. He is regarded having some mysterious power, he is spoken of with a rtain caution and referred to as "the honorable colored e". (1) It is also said of him that he only attacks bad

/102 cont./

*614 only one of its kind, must have worn out the foe and weakened his
628 spirit more than the most active resistance. Utilizing their habeas
562 corpus, day and night they go about the environs in perfect safety looking into every bush, every blade of grass, in search of the enemy in ambush. And if the attackers do not possess an overwhelming number that makes it possible to fall openly upon the expectant enemy, they will never succeed in eluding the vigilance of the inviolable chain of sentries, and the patience of the attackers, worn out by boredom, the march, the torment of waiting, of necessity breaks on the passive resistance of the weaker sex, and the basis for peace has been established.

In order to appreciate fully the importance of the passive
●[784] participation of the women in the struggle of the clans, it must
[724] be kept in mind that in many clans it is forbidden to light a fire on alien territory, /103/ use the water of its rivers and springs, hunt, etc., so that, like the Biblical dwellers of Gibeon, the Gilyak find it necessary to set off on an expedition loaded down with skins filled with water and as much food supplies as a man can carry. Under such conditions every extra day of waiting threatens death by famine, and thus the vigilance of the women necessarily conquers.

175 Here is one of the examples known to me. In 1851, 30 men
*614 of the settlement of Tebakh set off overland to take vengeance on
628 one of the clans of the settlement of Kol' for the slaying of a
562 clansman. After a long march, and a still longer and more fruitless
724 period of waiting as a result of the vigilance of the women, with poles in their hands, ceaselessly searching the locality, the water in their skin-carriers finally gave out, and the avengers had to depart with nothing and terminate the matter peacefully ... Thus small causes often lead to important consequences.

*614 Tylor was right when he asserted that exogamy weakened the
771 relations between clans and introduced peace, although he pro-
[114] ceeded from the mistaken conjecture that the aspiration for peace brought to life the very institution of exogamy. It is true that primitive man is not so sentimental, he is mainly too "god-fearing," that he would sacrifice with a light heart his own fears of punishment for a breach of his blood duty to the voice of feeling, or

/107 cont./

*614 Finally, if one keeps in mind that the term "sin" embraces
771 not only prohibitions in the formal sense, but also the obli-
783 gation to carry out positive norms, then the formula "common sin"
●784 acquires a broad general sense, becomes the expression of the
182 principle of unity of the circle of clan obligations in general. The significance of this principle is all the greater by virtue of the fact that in the eyes of the Gilyak obligations and prohibitions are by no means formal juridical norms, observed through fear of punishment, but religious imperatives, rigorously performed out of the feeling for self-preservation. For the Gilyak there is no difference between religious, sexual, and social prohibitions; all are equally religious, and to satisfy the dictates of religion means to be concerned about the benevolence of the gods, about the elimination of the machinations of the enemies of life, etc., that is to say, to feel concern for one's self-preservation. Not to fulfill them, keeping in mind the whole clan background of the cult, means not only to destroy oneself, but the whole clan as well. Hence the great importance of this principle as a cementing agent of the clan union. Hence,
*614 on /108/ the other hand, it becomes comprehensible as to
182 why norms frequently contradicting human nature, requiring
602 immense self-control, are carried out, not through compulsion,
83 but as the natural dictates of instinct. Consider, for example, with what strength the sexual norms act. In general, in matters of the sexual instinct the Gilyak, both men and women, follow their natural inclinations with complete freedom; there is no chastity either before or after marriage. Their only concern is not to become victims of jealousy. There is no question of any feeling of self-restraint. Nevertheless, despite the complete sexual license from our point of view, the Gilyak observes complete chastity with respect to persons of the prohibited categories. Adultery is unknown to him; the adulterer is a monstrosity, an exception that is
*614 almost never encountered. The same is true of the prohibi-
602 tions of speech. Brothers and sisters, left face to face, will
182 go for whole days enduring the torments of silence, in the most urgent necessity exchanging rare businesslike phrases in

/108 cont./

614 602 182 impersonal form, although by temperament these are far from taciturn people. Of course such self-control is the result of upbringing and training to a considerable degree, but it never would have reached such a high state of self-restraint if it were not for the general consciousness of the destructive effect of each individual infraction on the welfare of the whole clan.

614 783 784 771 The religious sanction of prohibitions and obligations and the lively consciousness on the part of one and all that "sin is communal" explain to us the most amazing aspect of the clan structure, the presence of the social organism and the almost complete absence of the element of compulsion, authority. But more about this later.

614 182 Such are the basic features of the clan. By them one can judge its all-embracing role in the life of the Gilyak. It enfolds a man from birth to death, giving life all its content. It surrounds him with intimate bonds of kinship from both the side of the father and the side of the mother. It unites with a living bond the living generation with the departed ones. It guarantees to man an individual marriage and conjugal rights outside of it, and after his death it provides for his widow and children. The clan defends his life and the inviolability of his family against encroachments by a member of another clan, ready as one man to rise to the defense of the trampled rights of a clansman and to answer for his guilt to a member of another clan. It feeds him when he is hungry, it pays the debts of the insolvent, it assists in the payment of the bride price and of blood money.

614 182 771 /109/ In the benevolence of the clan gods, in the clan sacrifices, man finds the higher protection and the strongest guarantee of his welfare. The clan is the school of moral training, the school of duty, of social co-operation and abnegation, and, finally, in the clan, man finds the highest pleasures and the most valuable consolation in the most bitter miseries of life - the noisy joys of festivals and preparations for felicity in the world beyond the grave.

Sakhalin

/328 cont./

764 766 To be burned is better than to be buried.

The one made the first mos' for a drowned man is not burned after death, but buried in the ground.

A drowned person, if he is of another clan, is not burned, but is inclosed in sticks.

If the deceased was murdered, he is not carried into the yurt, but is placed beside it. Near the place of the cremation of the murdered person, they place a "vagn'" -- a tree with the roots /329/ upward. Those who have been killed are carried off the field of battle by both sides to their villages.

764 If a person dies in a balagan, he remains there (until the funeral.

764 349 A raf (a little house with a little door, over the grave) is made in a month, or in two, three, or four months, when there is time. A raf cannot be set up in winter or spring, for the earth is frozen, and in autumn as well. During this time the deceased is absolutely not fed. A raf is prepared by common efforts.

● [784] [614] On the day of the preparation of a raf, as on the day of cremation, all forms of work are prohibited for the clan members. It is prohibited to fish, to go hunting, to make a dog sled; it is prohibited to sew, even to "make one's head," i.e., to comb one's hair, but one can sing songs. Members of alien clans are allowed to work if they did not observe the work on the construction of the raf, but the members of the same khala, if they know that a raf is being made, even if they live in a different settlement, are forbidden to work. The master who helps in the building of the raf does not receive any reward; that is a sin.

The walls of a raf are made of boards. The roof is made as on an actual house. In the middle there is a kikhak; a double board with a stopper which closes an aperture -- kylmyz' (navel). The sharp stoppers go through a round piece of birch bark which is placed over the aperture. In the upper section are stuck a spear, arrows, hooks, and a knife. The kikhak; is wrapped in a piece of drel' of a trapezoidal shape and fastened, tied to the navel; the upper part of the kikhak; remains bare. On top of this, in front, there is an apron of the same shape, which is decorated

Sakhalin

/333 cont./

224 787 are carried into the taiga, there they find a tree with a hollow trunk, make an opening in the hollow trunk, feed the head, and throw all the bones and the head there.

The otter is fed and buried in exactly the same way as the sable. The remaining beasts are uigynd kauk (i.e., there is no taboo on them).

825 197 When a pair of reindeer horns from a mature specimen are found lying side by side in the taiga, the possession of them gives the Gilyak luck.

224 ● 784 During the hunting with nooses (pochakhir n'arkhund), a woman must not sew anything new or give anything from her own house to another, even a member of her own clan, if that thing has spent a night in the house. One must not carry the fire outside. One must not allow any guest to spend the night. In the taiga, one may enter another's balagan, but not spend the night. If a sable is caught in a noose, an alien may not take it with his hands without the permission of the master, and in general during the hunting season the captured sable cannot be touched even by a person from the same clan if he is not a participant in the hunting party; even a killed hazel-grouse may not be touched. If [626] any person commits an uigind -- sin, they do not let him fish or hunt on the stream, and they do not attend his bear festival.

224 /334/ Sables, when caught, should not be killed by dogs. Catching a wolf. In Ikhdam (northwestern Sakhalin) they place a tree with a forked branch and sharpened edges not far from the yurt. Yukola is hung between the forked branch and the trunk; the wolf jumps up to seize it, sticks in his paw, which becomes caught, and he cannot free it. It is a sin to shoot at wolves.

225 Seals are caught thus: a net is placed around a tos' (?), and the seals sleeping on the sand are driven together; then they fall into the net.

221 [252] Mos' is made twice a year (in summer after the salmon, and in autumn before the sable). In winter one must unfailingly kill a great number of dogs oneself (a minimum of four), make plenty of mos', and in summer catch a great number of bears (this will be pal n'ivukh tkhusind). In general a great deal is done for the sake of tkhusind.

Sakhalin

/336 cont./

854 [344] A newborn baby is washed with his mother's milk for 15 days and then with cold water from the mouth. For the first year the whole body is washed twice a day, and then only the face.

854 783 Protecting the child. A stick on which the cradle is hung -- ekhl-chugir(?). Sometimes a Japanese saber in birch bark is used instead of a stick for frightening away evil spirits. If a child dies, they preserve everything, along with the amulets, for the next child, whom they again serve; if another child is not born, they preserve them until their old age.

845 785 If a child dies during childbirth, the woman must not ride ● along a stream or on the sea for a whole year; there would be no fish. Chkhnaj -- weapons, a little ax, a knife, a bow and arrows, 854 855 are hung over the child's bedding on both sides. Over the head of 789 a little girl's bed is hung a piece of fish net. All this is hung up at the first sickness of the child.

842 /337/ If a woman does not have children, the wife of her husband's brother gives her her belt (chik) and, secretly -- a piece of her husband's belt.

553 Names. Names are given after the grandfather, but if there are too many grandsons, a new name is thought up. One must not take names from an alien khal; otherwise one must give the latter the names from his own.

845 [776] Twins. Twins -- tongch: -- ekhlang (tongch: means "twins" and the god who gives birth to twins). Tongch: may be from Pal-n'igyvyn, i.e., the master of the forest, and Tol-n'igyvyn -- the master of the sea.

845 782 When twins are born, chukh-chugynd must be arranged for Pal-n'ivukh: mos', saranka, puchka, rare fish, etc., in small quantities; they first set them in place and then eat them themselves.

The place where the chukh-chugynd is made is called chauf. If twins die young, then they make chkhnaj -- two or one depending on how many died. A little balagan is made under the chkhnaj. Chukh-chgynd is made here also before setting out on a journey or a hunt, and also upon one's return and when the children are ill.

342 352 364 191 [113]

8. (cont.)
Section 3: "Ethnographie, auf Grund des von Dr. Karl von Scherzer gesammelt. Materials bearb. von Friedrich Müller /Ethnography, on the Basis of Material Collected by Dr. Karl von Scherzer and worked up by F. Müller/," Vienna, 1868, p. 158. In the last-named work the heating by pipes is called "Russian type," though this is by no means a national Russian arrangement.

by means of which an evenness of temperature is attained in the house to an extent inconceivable in the primitive dwellings of the Amur peoples.

352 354 517 191 513 [199] Finally, the fact that the heated sleeping benches are used by the Gilyak and all the other Amur peoples in exactly the same way as by the Chinese also /353/ argues in favor of the Chinese origin of them. According to U-tschen, the Chinese always lie crosswise on the kang (1), with their feet

1. Cf. Wassiljef's translation of U-tschen's writing, op. cit., p. 98.

toward the wall (2), and the same is also observed by the Gilyak

2. Pallas, op. cit. In the Amur region, too, I have never seen Chinese sleep otherwise on the kang.

and the other Amur peoples with superstitious strictness, whereas in the earth yurts, one sleeps in the opposite position, with the head toward the wall. In a Gilyak winter-house on the Amur, [123] when I once placed my head against the wall, as in the earth ● [984] yurt, in order to have a support for my pillow, it aroused gen- [997] eral indignation among the Gilyak, and the cry "uñtsch, uñtsch," which means the same as "misfortune" or "unlucky, forbidden," rang out on all sides. The reason why the Chinese always assume this position on the kang is said to be that the part of the sleeping bench that joins the wall is especially warm because of the pipe

G /353 cont./

352 354 517 191 513 191 [136] G [984] [997] running under it and therefore is better suited for the feet than for the head. There is another justification for this custom in the winter houses of the Amur peoples. If one lies with his head against the wall, he exposes himself so that the rats, which are exceedingly abundant in these houses and which always run along the walls, would be constantly running over the face. This alone, however, would not make the Gilyak refuse ● to allow even a stranger to assume this position on their kang, if superstition did not demand strict observance of the traditional custom, and afraid of any violation of it, no matter by whom, as misfortune for all the inhabitants of the house.

G 342 191 Due to the lack of historical data, it cannot be determined when the Chinese winter-yurt reached the Gilyak on the Amur and, gradually spreading downstream, supplanting the earth yurt, reached the Amur-Liman, the coast of the Sea of Okhotsk, and the Liman coast of Sakhalin. In the reports of G [195] Pojarkof and Nagiba, who spent the winter among the Gilyak at the mouth of the Amur and along the Sea of Okhotsk in 1644-45 and 1652 (3), there are, unfortunately, no hints which would

3. See pp. 216, 219 ff. above.

K 342 191 195 permit conclusions about the nature of the Gilyak houses at that time. In the case of another Paleo-Asiatic people, the Kamchadal, we see the original earth-yurt completely disappear before an imported, foreign type of house construction within the short space of about 50 years. At the time of Krascheninnikof and Steller (in the forties of the previous century), all the Kamchadal still lived in earth yurts of the type described above. Even in 1779, when Clerke, the successor of Cook on the latter's third voyage, visited Kamchatka, at least the south of the peninsula, between Peter-and-Paul's Harbor and Bolscherezk (4).

K [113]

4. Tagebuch einer Entdeckungreise nach der Südsee in den Jahren 1776-1780 unter Anführ. der Capitäne Cook, Clerke, Gore und King, transl. by J.R.Forster, Berlin, 1781, p. 333.

/534 cont./
consideration, repaired at the slightest damage, and dried in
the sun after every fishing expedition. For this purpose they
are spread out over special racks taller than a man, and super-
stition requires that if the drying nets are in a person's way he
must always go around them, never underneath them. And,
finally, not until the nets are completely dry may they be used
again. Treated in this fashion a net lasts for several years among
the Gilyak and rewards many times over the care and labor used
in making it.

/535/ What has been said in the preceding about Gilyak
fishing may in general be applied to the Tungusic peoples of the
lower Amur region more or less neighboring them, although with
a few qualifications and modifications, which are determined in
part by the way of life and the character of these peoples and in
part by the distribution of those species of fish principally caught.
First of all it must be emphasized that, with regard to fishing,
all the Tungusic peoples of the lower Amur region differ from
the Gilyak, not so much by practicing it by means of any new
methods unknown to them as by the essential, crucial fact that
none of them is ichthyophagous to the extent that the Gilyak are
or is dependent on fishing for its entire economy like the Gilyak,
and therefore none of them practices fishing to the extent and
with as much constancy, care, and energy as the latter. Among
all these peoples, and not excepting the Olcha, who are closest
to the Gilyak in all their external behavior and way of life,
hunting, as a means of directly and immediately satisfying
the urgent needs for food and clothing, plays a far more im-
portant role than among the Gilyak, and, to be sure, this is
more and more generally the case the farther one goes upstream
and into the side valleys of the Amur River. Consequently,
it must take up more time and labor, or rather must take this
away from fishing. In particular it cuts heavily into winter fish-
ing. In no season of the year does the basic difference in
character between the Gilyak and the Tungusic peoples of the
lower Amur region appear more clearly than in winter, in that
the former remain the same sedentary fishermen, despite various

/711 cont./
visibly amused, permitted them to do. The choice of the archer
who is to dispatch the fatal arrow toward the bear, however, is
made by the owner himself and is regarded as an honorary token
of his favor. For the two animals belonging to him Judin had
chosen two young people, one of them an Olcha from Tschlwi
whose father was a friend of his and from whom he had bought
one of the bears. Both animals, hit in the right lung at a dis-
tance of about five paces, fell dead after the first shot; the third
animal died slowly after it had been hit by two arrows. The blood
which they lost in dying was immediately covered with snow, for
otherwise someone might step in it, which would definitely be
ritsch.

As soon as the bears were dead, they were dragged into
the kadlya by their chain and an auxiliary strap tied around the
snout, and put down at the places where they had stood in life,
on a bed prepared for them out of peeled sticks. Here all three
carcasses lay in the same order and the same position: the snout
and the front legs to the front pointing toward the entrance into
the kachra, the hind legs to the rear, pointing toward the läsng.
The neck /712/ and body bands were taken off of them and the
snow beaten off their fur with sticks. Next the carcasses were
skinned and cut up. For this purpose a illustration appears here:
strap was next slung around the neck of the animal and attached
to the stake in front. Again it is difficult to step over this strap --
one may only walk around it, either in front or in back. The
bear was now rolled over on its back, and a cut was made down
the middle of the entire belly side, beginning at the throat, and
from this middle cut four others went out to the legs. Then the
fur was stripped off and cut around the paws in such a manner
that a ring of fur remained above the claws on each one. After
the belly side had been skinned, the animal was turned over and
the fur stripped off the back side up to the head. Then the man
standing at the tail end once more waved the fur up and down
over the carcass and threw it over the head of the bear to his
companion at the head end, who threw it back again. This

/716 cont./

Toad made out of birch bark.

graybeards, as a high port of honor; the women and girls, the boys
and youths are excluded, and it therefore proceeds very slowly,
deliberately, and, so to speak, solemnly. First the kettle in the
fireplace was surrounded with a thick wreath of wood shavings, and a
similar half-wreath was spread in front of the vent hole. Then the
kettle was filled with snow for it is ritsch to use water for cooking
bear meat, and the fire under the kettle was kindled with shavings and
fir branches, with the latter also used for incense from time to time.
Simultaneously a large wooden trough was hung on straps directly
under the bears' snouts so that it hung about three feet above the floor.
The trough was richly decorated with all sorts of arabesques and
figures and in particular on one side showed a bear carved in relief and
on the other side a toad likewise executed.

The work of the old men proceeded so slowly that it was not
until toward evening that they began to cut up the meat of the legs
and feet. Each leg was first placed upon the fir branches in front of
the bears, as though to ask first for their permission to prepare it; only
then was it cut up and put in the kettle. The cooked pieces were

/717 cont./
even on the lower end of the spoons which are used by the Gilyak
at the bear-festival feasts. I succeeded in bringing back to our
museum quite a number of bear-festival bowls and spoons which
had belonged to the distinguished Gilyak, Stogin in Kulk, and
came into my hands only through a lucky accident. At the time
of my visit the Gilyak refused any offer, however high, for a
utensil used in connection with their bear festival, with the asser-
tion that such a transaction would be too greatly ritsch. If one
examines these carvings more closely, one discovers that they
attempt to depict the bear in all the various situations and positions
in which it is put during the bear festival: on Plate I. /p.1256 /,
Fig. 1, for instance, it is shown with the neck and body band; on
Plate L, Fig. 3, and Plate LII /p. 1252 /, Figs. 3 and 5, attention
is called to the revolving ring on the upper side of its body band;
Plate LII, Fig. 4, shows it eating from the bear spoon; Plate LI
/p. 1251 /, Fig. 6, shows him, led on a chain, it defends itself
against its attackers, and the same figure, as well as Fig. 5 on
Plate LII, shows the bear's head in the läsng and later looking down
from the rack in the house. The most interesting, however, is the
spoon illustrated on Plate LI, Fig. 6, not only because it can be
regarded as a masterpiece of Gilyak wood-carving, but also be-
cause it alone shows almost all those situations of the bear at the
festival held in connection with it and, in addition, by linking the
bear's head looking down from the rack in the house with the toad
depicted in the bowl of the spoon, it shows the latter as the
spiritual initiator of the whole bear festival. These bowls and
spoons are always made only during the bear festival, and here in
/718/ Tebach two Gilyak sat on the floor in front of the bears
busily occupied with the carving of such implements.

In the afternoon of the same day new quantities of bear
meat were brought from the storage chambers and placed on the
floor covered with fir branches in front of the bears. As before,
the kettle was filled with snow, and the cooking now proceeded
more energetically -- but always without any salt, the use of
which is strictly forbidden, not only in the preparation of bear
meat and broth, but also for all other foods during the bear festival,

/718 cont./
just as it would be extremely ritsch if one wanted to fry, not only
bear meat, but any meat at the one or the other hearth, for the
bear would hear the sizzling of the frying meat and would be
shocked. When it was thought that the bear meat was done, the
broth was scooped into the aforementioned bowls and drunk, but
the meat was placed upon fir branches under the fireplace and
covered with the same. Not until evening was it put into the
trough hanging in front of the bears' heads. Moreover, toward
evening, six of the largest sturgeon and hausen, one of which was
about eight feet long, were brought into the house and placed in
front of the bears; they were offered to them as a sacrifice and
were intended for the forthcoming feast.

In the morning of the following day (January 29) the old
men resumed their work in front of the bear hearth. The young
people were likewise busy, with some of them bringing in addi-
tional firewood, others going into the nearby mountain forest in
order to bring from a storehouse for bilberries, which the women
had erected there in the fall, the supply required for the festival.
In the meantime the dogs were fed, except for those 14 animals
which Judin had selected for a bravura ride on the river. They
were decorated with the above-mentioned red-tasselled collars
and harnessed to a small, prettily decorated sled which was driven
by its owner himself. The drive, amid loud drumming by the
women, proceeded at top speed, first down the steep bank to the
river and then on a leveled course along the latter, and ended
without a mishap amid the wild applause of the assembled throng.
Only then were these dogs given their meal in the house, while
the people enjoyed the bear-meat broth.

In the afternoon, the old men began to cut the bear fat
into long strips which, decorated with wood shavings (zach) and
fir branches, they likewise hung in front of the bears' heads,
and not until shortly before complete darkness did they take them
down again to put them in a small trough decorated in the same
way and placed on the floor in front of the bears. In the mean-
time, more life and commotion had entered into these prepara-
tions for the feast: some young men began to cut up the six

/750 cont./
figure was made in case of backaches, in order to rid oneself of
the ailment (Plate LIX /p.1259 /, Fig. 9). (2 S.R. I, p. 15.)

21. Gilyak. In the village of Kalm I was able to buy
many idols, all different and some of them very interesting,
for example, one idol of human shape with a bear's head (Plate
LVII /p.1257 /, Fig. 3). It was named for me as ogink, a desig-
nation that other idols in purely human shape also had. Another
had the head of an owl (ki) on a human body (Plate LVII /p.1257 /,
Fig. 5); in the case of a third one the owl sat on the head of the
human being (Plate LVI /p.1256 /, Fig. 4), several human figures
had cavaties in the body to hold food.

One idol consisted of a block of wood with a human face and
a row of prongs on top of the head, each of which was provided
with a human face.

I also bought here the bowl in which food served to the
idols is put and which is called toil-ngir or kägn-ngir.

Then there were idols of the white whale (pömi-tscho)
with a human being on it (Plate LVI /p.1256 /, Fig. 9), as well
as of the wolf, amulets with two heads, that is, of the bear and
raven, etc., here.

In the village of Tschelmok many idols with zach wound
around them and several clothed in beatskin stood on a shelf in
the corner of a yurt. I acquired a small tiger-idol with a human
figure on top of it (Plate LVII /p.1257 /, Fig. 1), and furthermore
an amulet with three idols, one of which represented a human be-
ing, the second a wolf, and the third another animal that could
not be named for me. Next to the idols there were a great many
idol bowls, all of about the same shape with representations of
various kinds, sometimes with a human face, sometimes with a
toad, a lizard, and the like on them. These were all toil-ngir.
Only one idol-bowl was completely different and consisted of two
cups made out of a piece of birch bark and placed side by side
in the form of an 8 (Plate LXI /p.1261 /, Fig. 1). This vessel
was called tschobrä and was used for the same purpose. No amount
of persuasion, however, helped in getting the woman who owned
them to sell one or the other of these idol-bowls. She said that
it was ritsch and would cause her death.

/768 cont./
A rough little rod or a similar stick (wadžach) stuck in
the ground is likewise said to mark a place where a corpse is bur-
(Bm. I, p. 18.)

51. Gilyak. In September, 1854, the Gilyak of Kulk dis-
covered that one of their burial houses, raff, had been destroyed
by Russian soldiers and the ground on which it had stood was dug
up, and they came to complain about it. I then learned that the
ashes of cremated corpses are under the little houses and various
colored rags, peculiar implements, and the like are deposited
there. Near Kulk, in the birch forest along the Amur, four or
five such small houses stood together and formed a burial place,
while such structures are otherwise often found individually in
the midst of the forest. The Gilyak said that in the destroyed
little house the ashes of six children's corpses were in one
vessel, over which the same number of sable furs had been
placed. The latter was done in order to prevent a sudden dying
of their children such as had taken place during the year. Now,
since the house had been destroyed, they feared the return of
the epidemic. (Bm. I, pp. 15, 16.)

52. Gilyak. Every spot where a corpse is deposited or
a dead person's ashes are to be found is regarded by the Gilyak
as sacred and inviolable to some extent. No Gilyak therefore
would wantonly touch a raff. Moreover, the latter may never
be transferred to another place. This would be ritsch. There-
fore, though the Gilyak from Kulk bewailed and complained
about the plundering and destruction of their raff, they neverthe
less decided not to transport the remains to the villages to which
they themselves had moved from Kulk. (Bm. I, p. 16.)

53. Gilyak. If one investigates the interior of a little
burial-house he always finds in it a longish little board in an
upright position: kakk, atlo tars. The middle of it is pierced,
and the hole has a peg, kylms, stuck in it; a strip of linen is
wound around the board, and sometimes the lower end, too,
is wrapped in linen and decorated with various rags, kakk-o
tars-rawä (Plate LXVIII /p.1268 /, Fig. 2). Close to the board
and likewise in an upright position there is a little stick, pyk-ng

T: Kreinovich--25 E-5 (1931) 1934 Gilyak

252 cutting in half the skin on the snout of the sivuch, she peeled
237 it off. The skin peeled off the snout is hung over the door where it stays until, as the Gilyaks say, it is "lost". After taking out the eyes, the old woman cut them and poured their content into the cup containing the whiskers. Then she turned the eyes inside out and cut out first the lens and then the pupil Afterwards, she cut off the noz-ŋak and put it in a separate cup since it is eaten in raw form.

This done, she cut the meat covering the skull. If the skull was broken by the striker, she picked the bone splinters, sucked them one by one and put them in a separate vessel. Subsequently, the splinters together with the heads are thrown into the sea.

262 [94] If the skull was whole the old woman broke it with a
784 stone. I asked the old woman why she would use a stone rather
411 than an axe to break the skull; to which she replied that it is
252 a sin to use an axe just as it is a sin to cook the brain, for it has to be eaten raw. Brains are not the only items consumed by the Gilyaks in raw form, others are: the back, the heart, the intestines, the kidneys, the wind pipe and the noz-ŋak.

411 To watch the old woman break the heads of the sivuch with
177 a stone, sink her fingers in each bloody brain and draw it into
252 her mouth with a sob-like sound, I felt returned for a second to the stone-age by time machine. In fact, if we disregard guns recently acquired by the Gilyaks, and iron which they also recently learned to work into the knives using Japanese kettles as the starting material, spear tips, arrows and harpoons, we are back to the stone tip on the harpoon shaft and on the arrow, the stone axe, which is still remembered in their language (1) and we find no Japanese iron kettle. It

1. Cf. our paper - "Gilîatskîe chîslîtel'nyîe" ("Gilyak Numerals"), Published by Nauchno-issledovatel'skuî Assotsiatsii Instituta Narodov Severa TSIK SSSR, p. 10, 1932.

then becomes clear to us why the old woman uses a stone in breaking the head to get at the brains and why the Gilyaks eat the brains as well as the meat taken from the animal's back, the heart, the intestines, the kidneys, the wind pipe and other parts of the animal - raw. It is then that we see all of the Gilyak mode of life in an entirely different light.

252 Having taken out the brain and having put it in a separate trough, the old woman separated the lower jaw, tied the plant piskər around its middle and put it in the kettle to cook.

/69 cont./

796 accident that the death of a relative, i.e., the fact of the
825 extraordinarily malicious designs of an evil spirit, forces him to catch or buy a bear cub, whatever the cost. That a bear
[787] by its mere presence drives away evil spirits may be seen
[755] from the single fact that during the bear festival the shaman
[756] is forbidden to consult in his dreams his kekhn (see below) about curing a sick man, i.e., driving out the evil spirits residing in him, for the bear will be offended; he himself can drive them away with his own strength. Analogies to
[171] such beliefs in the purifying influence of the bear and of many other animals are to be found in vestiges of our own survivals and ceremonies. As is well known, in Little Russia /Ukraine/ there existed the custom of leading a bear through the village on certain holidays for purification... In our grand stables the custom of keeping goats, who are supposed to protect the horses and the grooms from evil power, has
[614] been preserved up to the present. And so, similarly, the clan that feeds a bear performs an important social function, securing all their own against the evil designs of their strongest, though invisible enemies. Unique religious sanitation, but the only kind available to primitive man!

Let us consider the meaning of those ceremonies that accompany every case of bear killing. First of all we should say that the Gilyak does not consider the killing of a bear a sin. In spite of all his respect for it, he is convinced that in the first place those bears that fall prey to him are sent to him by the "master" of the taiga, for whom the bears play the same role that dogs do for the Gilyak. "The bear is the dog of the master of the mountain," such is the formula of the
[774] Gilyak. In addition, the bear loses nothing by its violent death, for death to it is only leaving its body to the Gilyak, while its soul -- that living duplicate -- then gaily runs to its master as if nothing had happened. Therefore no expiation whatever is required here. But the bear, even though only the dog of a forest man, is nevertheless a creature of a higher order, of a higher rank, than man. From the point of view of primitive man, there is nothing derogatory to the sacred

756 Now a few more words concerning the nature and psychics of these strange people called shamans.

According to the views of the Gilyak, the shamans are chosen beings. Do not be a shaman! The talent of a shaman is not a gift, but a burden. In order to become a shaman, it is necessary to be liked by a kekhn, or to recei such a kekhn from one's father or uncle. Turning into a shaman constitutes a turning point in the life of the chosen one, a crisis accompanied by very complex psychological phenomena.

One shaman with whom I was acquainted told me th before he became a shaman he was sick for more than two months, during which he lay motionless on his back in com plete unconsciousness. No sooner would he awaken from on paroxysm than he would fall into another. "I would have died," he told me, "if I had not become a shaman!" Dur- ing these months of trial he dried up like a stick. At nigh [787] he began to dream that he sang shaman songs. Once a whi eagle-owl appeared to him and stood near him, quite close while a little farther away stood a man who said to him: "Make yourself a tambourine and everything that a shaman should have, and sing songs. If you are a simple man, not ing will come of you, but if you are a shaman, you will be real shaman." He slept for a long time, how long -- he do not know, but when he woke up, he saw that he was held ov a fire by the feet and by the head; the people around him thought that he had been killed by the kekhn. Then he com manded that he be given a tambourine and began to sing so He felt not quite drunk, not quite dead. Then he first saw his kekhn and kenchkh, and the former said to him: "If you see a sick man, cure him; do not believe the kenchkh, he has a human face, but the body of a bird; believe only us."

I myself was once a witness to the first appearance o such a paroxym. A Gilyak boy by the name of Koynyt, twelve years old, the son of a shaman, my guest, fell aslee after dinner, and, accidentally awakened by my comrad, the boy began to thrash furiously and to shout, repeating all

844 The mother delivers the child herself, and only if the mother is entirely too weak does the midwife help at the delivery.

The Gilyak do not know how to give obstetric help to a woman in labor. If a woman is not able to deliver the child she dies, and, in this case, the child will perish too. But that happens very rarely. During a more than ten years' stay in the region of the river Tym I heard only once that a woman died during the delivery.

Among the Gilyak the first childbirth is considered to be the hardest. It is especially hard and painful for very young women who are not fully developed physically.

845 Girls are strictly forbidden to laugh when people
784 talk of delivery or confinement, and they are supposed to stay serious during the act of birth. If they fail to do so, in the future they will go through very hard deliveries and suffer exceedingly great labor pains.

844 In order to speed up the discharge of the placenta chiplings of a certain wood (sambucus racemosa) are put into the mouth of the woman in labor. The bitter disgusting taste of the wood causes vomiting which, according to the belief of the Gilyak, should accelerate the discharge of the placenta (ehlaud cuind, that is: the child's food). But, if the placenta nevertheless is not discharged after a while the woman dies. This [758] happens rarely but does occur once in a while among the Gilyak. The placenta is wrapped in a towel and hung up on a tree in the wood not far from the house.

845 If a child is born with a caul which, however,
777 happens very rarely, the caul is not thrown away but is carefully dried and kept with other household articles. For the Gilyak believe that this caul which in the language of their tribe, is called ehlan ok (the suit of the child) brings luck to the whole family.

844 The newly born child is not simply called a boy or
553 a girl. If a girl was born it is, for the time being, called mukin ehlan, that is: tailless child (mukind usually is the name for a dog with a very short tail). But if a boy was born his relatives say: moi ivend panend, that is: one who has a penis was born.

786 ORGIES--practices reflecting hysterical tendencies or release from normal inhibitions; frenzied singing and dancing; ceremonial license (e.g., phallic rites, temporary lifting of sex restraints, ceremonial intoxication); bacchanalian revels; religious prostitution; induced hysteria, hallucination, and swoon; religious revivalism; etc. See also:

Sex taboo . . . . . 83 Temple prostitutes 793
Drunkenness . . . . . 273 Conception of abnormal mental states . . . 828

755 softly or whispers magic formulas, walks back and forth
534 like a pendulum, far into the night. Sometimes he leaps over a burning pile of wood, or he makes the sick person
755 run about if he is able. Some shamans impress their public
786 with more difficult tricks. They appear laden with chains,
778 whirl about like mad, and in a state of ecstasy may hurl themselves into the fire and make believe it does them no harm. Narcotic drinks are not given, but the sick person sometimes gets certain herb infusions from which the shamans expect healing effects. The magic feats are corroborated with various prescriptions relative to the spirits. For instance, an idol in the shape of a human being is placed next to the sick person, its face smeared with cranberry juice, and the sick person himself has wood chips hung around his neck, etc. Or the shaman orders that the clothes of the sick person be hung out in the woods and that he be [244] dressed in others. This is done in order to outwit the kobold who saw him only in his old clothes.

755 This medical magic is usually begun in the evening, at
789 twilight, when the imagination is more active and also when deception can be more easily concealed. The shamans also seek to consolidate their authority by means of various magic tricks that otherwise have no practical meaning. For instance, they swallow knives and needles. Not long ago there lived a celebrated magician near Sofiyskoye who gouged out his eyes and thrust a knife into his belly, which was afterwards excreted. He was later exposed in these juggling tricks by an itinerant Russian merchant. It was shown that the knife blade, instead of penetrating his belly, disappeared into his pants and passed into a receptacle. After that the magician was completely discredited.

789 Finally, there are a few superstitious practices we must
372 mention. If a Gilyak goes on a journey he must drink some
271 water in the yurt shortly before he leaves; he does the same thing as soon as he has returned. The hearth fire is also to a certain extent sacred for the Gilyak; it is not carried outside and the Gilyak do not like to have a traveler light his cigar at it and then leave the house.

177 This chapter is also the place to say a few words about the
797 baptized Gilyak. There are not many of them, but no one knows exactly how many, first of all because many of these "Christians" let themselves be baptized several times, in the city, for instance, as well as by their village divine. From this we may see how much they really understand of their new religion. We have said before that they regard

787

787 REVELATION AND DIVINATION--practices reflecting anxiety about the future and often also a sense of inspiration; quest for visions and guardian spirits; hallucinatory revelations; communication with spirits (e.g., through spirit possession, through inspired oracles, through mediums); prophesy; clairvoyance; acquiring mystic insight through concentration and contemplation; interpretation of dreams; omens and their interpretation; divinatory practices and techniques (e.g., haruspicy, hepatoscopy, necromancy, scapulimancy, scrying, sortilege, astrology); etc. See also:

/770 com./
the village. The raff, then, is a memorial erected for the deceased.

The cremation site was very simply marked: the ashes scraped together, enclosed in an elongated frame formed by four boards set vertically, and this covered with boards; around the boards of the frame, however, little sticks with zach were placed (see Plate LXV /p. 1265 /, to the right in the middle distance).

There was no pittyssj in Kalm. I learned that such is set up for a deceased person only if no snow has yet fallen at the time of death; otherwise it would be uitsch to set up a pittyssj. (2 S.R. I, pp. 4-6.)

57. Gilyak. According to Surgin's report, not every deceased person is given a raff. If a very small infant dies, the corpse is not cremated, but simply wrapped and buried in the ground, and no raff is erected for it, for the soul of such a child does not wander, but goes to heaven. If larger children die, the corpses are cremated, and one raff is erected for two of them. Each adult gets a raff, men and women. The corpse of a person who has drowned is cremated, but no raff is erected over the ashes; rather, a stick is stuck in the ground and a boat is placed next to it. If a Gilyak dies /771/ from being wounded by a bear the corpse is not cremated, but deposited in a structure which is especially erected out of beams crossing at the ends. Such a burial house is called tschchyf(*)-ngych and usually is located in

* Tschchyf--the bear.

the forest where the deceased fell in the fight with the bear. The soul of such an unfortunate person does not go to heaven. The burial house has a small opening through which all kinds of foods are deposited for the deceased, such as berries, fish, groats, etc. Inasmuch as these these articles lie next to the corpse, they acquire a strong curative power against various sicknesses, and ailing Gilyak customarily go to such a burial house and eat some of the food deposited there, which cures them at once. The depositing of food in such a structure goes on for months and years, and consequently also the visits to it for a cure.

Golsi RYS
Olcha

1. (cont.)
members of a village -- or -- as in the case
of a suicide -- it is automatically omitted.

Since the soul of a murdered person flies to heaven, it does
t need any of the articles such as are placed in the raff for the
andering soul of a person who died a natural death. (Bm. I,
. 52-54.)

62. Gilyak. As the Gilyak (on the west coast of Sakhalin)
ld me, they burn their corpses and erect wagn over the ashes
f murdered persons. (2 W.R. I, p. 8.)

63. Gilyak. The Tymy Gilyak assembled in Ngachd-wo
n the left bank of the Tymy on Sakhalin) said that they like-
se usually burn their corpses, as is done along the Amur, in
e Liman, and on the west coast of Sakhalin up to Arkai (excl.).
raff is erected over the ashes of the cremated corpse and, as
ong the Amur, has a kakk, pyk or tutut, and pyk-ngit or tutut-
it in it. The pittyssj is present in the raff and among the Tymy
lyak bears the designation raff-njo, that is, burial-house storage-
amber, which wholly corresponds to its significance. Only the
cham-ngar is missing (*). (2. W.R.I, p. 45.)

* See Appendix 53 /p. 1233/, 55 /p. 1234/.

64. Gilyak. From Arkai on, along the west coast of
khalin, south to Pilja-wo, the last Gilyak village, the Gilyak
e said not to cremate their corpses which is regarded as uitsch,
t to deposit them in wooden coffins in small houses, just as
ong the Tungusic tribes of Manchuria and Sakhalin and the
nu (2 W. R. I, pp. 8, 45.)

/773/ According to another report, the corpses are interred
th of Arkai (2 W.R. II, p. 25).

65. Olcha. In the forest not far from the Russian village of
gorodskoye in the vicinity of the Olcha village of Pullj (Pulu
the map, on the right bank of the Amur), there were two very
cefully worked Olcha tombs ornamented with various paintings

burned their dead, but they also buried them in the earth. During the burning, they broke the sled on which they had brought the corpse and killed dogs. Their meat was cooked in large cauldrons and eaten on the spot. The "sendoff of the soul" took place several days later, on the day of the "lifting the tree," as the cemetery was called. There they built a raf—a little hut for the figurine which represented the dead.

At the cemetery more dogs were killed on this day. The women sewed clothing for the figurines. Models of hunting and fishing gear were attached to the figurine, and a variety of household articles were laid with it. The real gun, kettle, teapot and other articles were broken nearby. It was held that on this day the soul migrated in a sled into the world of the dead, situated underground. The dead were buried only by members of their clan.

A variety of taboos were connected with the fire, whose "master" spirit was an old woman. The shaman's duties among the Nivkhi were connected with "healing" and with the constant struggle with the evil spirits, milk and kinr, which caused illness and death. The shamans had their own helping spirits (kekhn). However, shamanism was not greatly developed among the Nivkhi. It is interesting that the shamans did not take any part in the clan cults.

Folk Arts

The traditional poetic works of the Nivkhi are varied. There are songs of various kinds, tales, proverbs and sayings, and also myths, reflecting the most ancient ideas about the origin of the world, of nature, of various natural phenomena, and of spirits. There are also epic and historical tales (tyl'ugd), describing hunting feats, wars between clans, etc. The Nivkhi myths also include the Tunguso-Manchurian myth about the three suns. According to one of the Nivkhi myths, people descended from trees: the Nivkhi descended from the larch, the Orochi, from the birch.

Among the decorative arts, the most developed were carving on wood and bone, embroidery and appliqué on robes made of fabrics and fishskins. Most of the articles of daily use—wooden troughs, spoons, dippers, birchbark boxes, knife handles, spear-tips, pillows, blankets, robes, hats and mittens—were covered with spiral-ribbon designs, executed with great taste and skill. Wood-carvings also decorated barns, burial huts and dwellings. In motif and style, the Nivkhi design is related to the design of the Ul'chi and Nanays. The principal motifs of the ornamentation of clothing and birchbark utensils were symmetrical combinations of bent lines, often almost spiral, and stylized representations of birds. Appliqués from fishskin, fabrics and birchbark were cut out according to birchbark or leather patterns, transmitted from generation to generation. Robes, birchbark boxes and hats, and other articles had standard combinations of ornamental motifs, reproduced on articles of specific groups. The main colors in appliqués of birchbark, fishskin and fabric were black, white, red and blue. Appliqué on birchbark, fabric and fishskin was women's work; carving on wood and bone was done by men. Many women were famed for their skill and craftsmanship.

The origin of the Nivkhi ornamental art, as well as the art of other Amur peoples, has not yet been sufficiently established. Some of the motifs (such as roosters, dragons and monster-serpents) were unquestionably suggested by Chinese art and mythology, but underwent considerable local transformation; others (spirals) probably date back to neolithic times.

198 urla-dus 'good meat' they say amra-elvla-dus 'amra bad
225 meat.'

ǝkila-dus 'bad meat' they say amra-urla-dus 'amra good meat.'

etc.

225 Apart from taboos pertaining to names the hunters must
784 also observe other taboos during the hunt. Thus, for instance one must not pour water out of the boat onto floe where seals had been killed. Xitkun, who told me about it, said that he all but lost his sight as a result of pouring water out of the boat onto floe with killed seals on it.

It is forbidden to stick a knife in the ground during the hunt.

It is forbidden to spit in the blood of a seal, etc.

[85] Not only the hunters are supposed to observe a number of taboos; the same holds for those who remain home and, especially for women.

Thus, those who remain home must not do any laundrying in the house of the owner of the boat. They must not pass any objects to one another across the fire, for, in that case, the seal at the seine would swim through it.

They must not cut leather for shoes (kiyid), otherwise the tola-ke might tear.

They must not cook hearts of seals until after the hunt.

A pregnant woman must not approach the sea shore, otherwise all ice might be carried off to sea and the hunters would not be able to hunt seals.

115 In this connection I quote from my Sakhalin diary one of my conversations with the Gilyaks. This conversation took place in the village Khoi on the western shore of Sakhalin (50 versts from the town of Aleksandrovsk on June fifth, 1928. I was sitting in Gilyak Roygin's yurt. Present were, besides Roygin and myself, the Gilyaks Kavzgun, Chulkin, Furaga and the late old man Pletunka, as well as one of my friends and the interpreter L. LA. Shternberg.

225 Roygin said: "When you go seal hunting in the spring you
825 know all that is going on at home. The seal will tell all. The
787 seal will not tell the good things, but he will invariably tell the
626 bad things that are going on at home. If, say, the woman at
784 home starts scratching her head, the seal on the floe will scratch his head with his paw. If they are fighting at home, the seals will start fighting. If the woman wash something at home and hang it out, the hunter is bound to miss the seal even if if were not more than five steps away from him. We say that all the hunter can do is hit the linen. Obviously, the 'god' kes

225 has hung something in front of the seal. The seals will also
825 tell of a theft in the village. If the wife at home has sexual
787 relations with another man while her husband is away on a
626 hunt, the seals on the floe will likewise engage in sexual inter-
784 course. When they witness some such thing at sea, some of our Gilyaks will, after returning home, beat up their wives and later on find out from neighbors in the village what had really happened. Now, suppose you cook seal meat, eat it and pick your teeth with a little stick, then the seal in the sea will show how you picked your teeth with the little stick.

During the spring seal-hunt on floes, when the Gilyaks jump from floe to floe close to shore and kill seals with harpoons, those at home must not break any objects - say, plates or bowls, for otherwise the floe will break and the hunter, say, the father, brother or son, may drown. Therefore those at home must be very careful.

On the day when something goes wrong at home, the hunter will not get his seal. Then he returns home angry and tries to find out what deprived him and his friends of their quarry.

776 Roygin told me all this in order to prove to me the existence
825 of kes, 'god'; a point on which I did not want to agree with him.
225 "How can a seal, 20 versts from home, know what is going on at home?" he told me. "Surely kes must be telling him about it. That is why we say that kes exists."

225 Incidentally, after my conversation with Roygin, Pletunka
784 told me that the mrolv-nivgv 'ancient Gilyaks' observed the
57 following ui and "taboo," "sin" during a seal hunt: the guest must not touch the handle of a kettle or teapot. Only the master of the house (in the past as well as at the present time) could pour out tea or any other liquid food for the guest. If, even by mistake, the guest touched the handle of a kettle or teapot, he was obliged to tear a strip of material off his sleeve and put it in the (hearth). (1)

1. This word in my diary is illegible. As far as I can remember, Pletunka spoke of a hearth.

225 [86] During the spring hunt the Gilyaks of the village Kul
552 hunt different types of seals. They also catch an occasional
825 dolphin. They distinguish the following varieties and ages of seals: Pila-la r 'Sivuch'

1. Nav-na 'present-time animal', i. e. a sivuch born in the given year.

2. Tje-na literally: 'last year's animal', i. e. a two year old sivuch or one born in the previous year.

225 After they have killed a sivuch, they wash its head and its
782 snout with water. During the washing they use a special scoop
a- ain-du-muurs, literally, 'the animal face washing scoop,
i. e. the scoop used in washing the face of the animal.

The heads with piskir stuck in them are taken home.

225 After the first sivuch has been killed the pilaŋ performs
782 the ceremony of feeding the figurines t'aj. (Regardless of the
425 number of killed seals belonging to other varieties, this
778 ceremony is performed only after the killing of the first
sivuch.) The pilaŋ cuts the breast of the sivuch and smears
the mouth of the figurines with blood taken from the heart of
the sivuch. [87] The Gilyaks say that if one were to smear all
of the face of a figurine, the latter could not "see." After
the completion of this ceremony the sivuch is regarded as
belonging to the pilaŋ. However, as far as the distribution of
the quarry is concerned, this sivuch is regarded as being not
different from the other sivuchs. This will become apparent
from the facts given below. True - as I was informed by a
Gilyak - this holds only if few sivuchs have been killed. With-
out drawing final conclusions as to the possibility of the pilaŋ
asserting his title to an extra sivuch on top of his share of the
quarry - for this we do not have sufficient data - we wish to
emphasize at this junction two incontestable circumstances.
First - the pilaŋ appropriates the first sivuch killed during the
hunt; second - this appropriation is effected under the guise
of a religious ceremony.

784 This latter circumstance clarified for me the essence of a
225 number of taboos among the Gilyaks.

183 Thus, for instance, young hunters (as well as women) are
626 supposed to observe a number of taboos in connection with the
262 meat of a bear. At the same time old hunters need not observe
those taboos. This is not the place for the enumeration of the
tabooed parts of the animal which the young hunters (as well
as women) are not supposed to eat. We shall only point to the
explanations given by the Gilyaks concerning some of the in-
terdictions. Thus, for instance, the young hunter *must not* eat
the heart of a bear, otherwise he will sustain a heart affliction
as soon as he comes on a track of a bear. And one cannot go
hunting bears with a heart so afflicted. The young hunter must
not eat the tongue of a bear, otherwise the bear will beat him
to death during an encounter. "Therefore tongue old men only
can eat." These instances illustrate the manner in which the
Gilyaks rationalize their taboos.

It would be ridiculous to look for special meaning in all
these taboos and their explanations. The meaning of these taboos
and their interpretation is simple--the taboos serve to keep

784 from young hunters and women the fact that the old hunters
225 who play a leading part in the hunt appropriate the tastiest
183
626 parts of the quarry under the guise of religious interdictions.
262 Taboos regulate the relations between the old and young
784 hunters as well as the relations between the male and female
462 parts of the clan.

868 Thus, in the very same year of 1931, in the village Čarvax
183 (Charbakh), the old Gilyak Kozin and Ə̂isk (Agiska) informed
626 me of interesting taboos pertaining to a number of objects
used by children in their games.

A boy must not play with a yoke or with a board used by
women in cutting leather and cloth (tans-kəlmr). Also, a child
must not play with a woman's cutting knife (tan-dago).

"When I was little Kozin told me, old men would not permit
to put a yoke on a boy's shoulders. That was Uit ('taboo,'
'sin'). If a boy hit the legs of another boy with a yoke or a
cutting board, then when he grew up and went hunting in the
taiga, he might not be able to walk well." Agiska told me that
he will have no luck in hunting.

Agiska told me that a girl should not play with arrow, bow,
or spear, for these implements will not bring luck (in local
Russian - farta). If a woman or a girl were to step in-
advertantly over a spear or arrow, the arrow will not go deep
into the body of the bear and will not stick. That is why girls
are not supposed to play with those implements.

These taboos indicate that already at an early age children
are prepared for definite tasks; that boys must not - if only in
play - have anything to do with implements used by women in
their tasks and that, conversely, girls must not use implements
used in their tasks by men. These taboos are seen to legit-
imize for both men and woman, virtually from the time of
birth, the distribution of labor existing among the Gilyaks.

462 [88] The women of a clan perform the most onerous work which
614 from the point of view of men, is least respectable. Until
recently it was the slaves who did this work for the Gilyak
rich. The women must carry water, chop wood, feed the dogs,
row (notwithstanding his wife's advanced stage of pregancy,
the husband tends the rudder; the man is supposed to tend the
rudder and the woman to row; the opposite would be disrepu-
table and inadmissible for a Gilyak hunter), prepare food,
make clothes, shoes and perform a number of other onerous
tasks some of which are regarded as detrimental to the dig-
nity of a hunter.

The males of a Gilyak clan are hunters, providers of food.
They procure food for the whole clan. They procure fish, bear

462 and seals. They distribute the quarry. They play the leading
614 part in the economic, social and religious life of the clan
and in no one of these areas do they permit women to play
614 a part equal to their own. Women play a subordinate part in
562 the productive activity of the clan; they collect plants, roots
and berries. Woman cannot play any part in the social life of
the clan for they do not belong to the clan from the very time
they are born, and when they grow up they are given away,
in fact sold, by the hunters to some other clan. The clan that
takes the woman, i. e. the clan of the son-in-law (ore) become
dependent upon the clan of the father-in-law (apak). Also,
women play no part in the religious life of the clan.

527 Women are not permitted to be present during more im-
562 portant moments of the "bear holiday", for the bear hunt is
784 a matter for men-hunters and not for women. Not once in their
life are women permitted to eat the better cuts of bear meat.
They are only allowed to eat some meat of the poorer cuts.
Women must not be present at offerings to the spirits of the
woods and of the sea which help the hunters, for hunting is a
man's job. As mentioned above, a pregnant woman must not
come to the sea shore while the men are hunting seals, other-
wise the ice would disappear and the hunters would return
home empty handed, etc., etc.

784 The taboos mentioned above are a religious-magical super-
462 structure on the labor distribution according to sex. One
626 should look for explanations of these taboos in the relations
183 among different groups of people in primitive society rather
than in religion.

In legitimatizing this distribution of labor, the taboos turn
the female part of the clan into slaves of the male part - the
men-hunters.

Without further dwelling on these problems we merely
indicate that there is no mystical element behind the taboos.
The mystical content is often added in order to befuddle and to
enslave people and to keep from them the essence of germinat-
ing exploitative relations among men. This is illustrated by
the example of the t'aj where the pilaŋ attempt to assert his
title to a sivuch is made covertly rather than openly, under
the guise of a magical-religious ceremony.

However, we now revert to our topic.

225 Having killed a sufficient number of seals, the hunters,
422 loaded with their quarry, return to the village. On arrival
476 the pilaŋ distributes the quarry. At this point it becomes
apparent that the sivuch, which is the pilaŋ's legal property
and whose blood he used in feeding the t'aj, is included in

/753 cont./
756 was Sajan, far above Nikolayevsk on the Amur River. Another, less famous one, Tschêžach, lives in the village of Kaki, above Nikolayevsk. In case of an emergency, such as sickness, death, and the like, they are called to villages where there are no shamans (1). There are shaman implements, however, such as

1. That among the Gilyak the shamans have less a religious significance than a practical one, mixed with superstition, to be sure, also follows from the fact that they never designate as shamans, or regard as corresponding to their shamans, clergymen, but rather physicians and apothecaries, because they heal sickness. (The shaman may be present at a bear festival, to be sure, but not "to shamanize"; see pp. 1153. 1165; cf. also p. 880.)

drums and the like, among other Gilyak, for example, the brothers Surgin and Sogin in Kuĭk, though neither of them was a shaman. Also, the art of dancing, of beating the drum, and the like, as is customary in the shaman performances, is known to many other Gilyak and is exercised upon request or as desired without it being regarded as sinful or the practitioners being shamans. For example, a boy in the village of Wait was said to be able to do the shaman's work very well, without being a shaman himself. A part
789 of this among the Gilyak, it seems to me, rather than skill in dancing, singing, and the like, is the ability to do certain tricks, such as apparently plunging a knife into the body and the like, feats for which they particularly praise their great shamans. (Bm. I, pp. 34, 35.)

28. Gilyak. The shaman performance. I learned that snakes
756 are especially feared from information given to me by an eye-
825 witness to the conjuring of spirits by a shaman among the Gilyak of
782 Petrovskoye. After singing and howling had been performed by the
789 onlookers, the shaman turned to the god ruling heaven, sun, moon, and stars (about whom, incidentally, he could say nothing more than

787 /753 cont./
756 that he had been thus informed by the eldest of his people), and
825 pronounced the conjuration or address to the bear and the snake as
782 the two animals most feared by the Gilyak and Russians. During
[534] these conjurations he occasionally beat on a drum-like animal-skin stretched over a ring, using a little stick with a snake depicted at one end and a bear at the other. The bystanders howled and danced, and then the shaman beseeched the god for good fishing, good weather, for the rain to run off into the sea, for a favorable and safe sea for Gilyak and Russian. (Bm. I, p. 9.)

825 753 29. Gilyak. Shamanistic acts in case of sickness (2). The

[752] 2. Ineffective in cases of snakebite, for which the only remedy is tying the skin of the snake around the wound.

toad (which brings bad luck) is of two kinds, that is, sometimes a single one, simply called mipitsch, and sometimes a double one, wap-mipitsch, with a doubled body and extremities. The former has its abode on land, but the latter in the water, hence the former is also designated as mif-mipitsch, the latter as toll-mipitsch (3). Both are powerful and uncanny, magá, especially

3. Most of these accounts come from Porkuk and her son, Dshaman, from Kuĭk. Jutschin thought that the wap-mipitsch represents the copulation of the toads, which as a rule takes place in the water and the seeing of which is regarded by the Gilyak as uitsch. According to him, the wap-mipitsch must be worn by women.

the wap-mipitsch, /754/ which, as the Gilyak put it, résembles the devil (kins ngarlatsch), hence, perhaps, its double shape. Their evil power is shown by the fact that they sneak up on a sleeping human being and crawl through his mouth into his inner organs, into his chest and stomach, whereupon the person falls

825 /754 cont./
753 sick and dies, if he does not use the proper means to free himself of the mipitsch. The only means that can help him, however,
755 is a shaman. He conjures up a kägn (a good god), who removes
756 the mipitsch from the sick person. At the same time a mipitsch
532 carved by the shaman himself or by someone else at the order of
[787] the shaman is hung around the patient's neck and must be worn by the sick person from then on to protect himself in the future. A sick man wears a single mipitsch, a woman a double one. The mipitsch are always carved out of wood, especially the wap-
[322] mipitsch. It is only on the snout-band of the dead bear (see pp.
462 1156, 1162) that a single mipitsch of birch bark may be found.
[824] This is made by the women, but the wooden ones are always made by the men, since wood carving of all kinds is an occupation for only the men, while the women are skilled at cutting arabesques and figures out of cloth and therefore also out of birch bark.

753 The ideas of the Gilyak concerning the lizard (mā(r)ngai) are
755 similar to those concerning the toad and snake, except that much
825 less power is attributed to it. It allegedly crawls into the head of the sleeping person and is removed in a way similar to the above by a shaman and by putting an iron amulet-ring (lalź) (1)

1. See Appendix 6 /p. 1196 /.

around the head. This ring bears the representation of a lizard on either side, in the region of the temples; in front, closer to the forehead, there is a human figure on either side, supposedly indicating a man on one side, a woman on the other. Finally, at the very front, on the forehead, the lalź bears a frog shape. This is striking, since the frog (dhal) is not regarded as unlucky, is not magá. (Bm. II, pp. 44-46.)

756 30. Gilyak. Amazing, miraculous acts which the Gilyak
554 shaman performs are chiefly the means by which he wins admiration and esteem among his countrymen. The more these acts deviate from the natural course of things, the greater is the reputation of the sorcerer. Such is enjoyed, for example, by the Gilyak

756 /754 cont./ Such is enjoyed, for example, by the Gilyak
554 Räppun in Tebach, about whom the following miracle is reported.
782 His hands are tied to his back by straps, and his throat is likewise
789 strangled by a strap. Then he sits down on the floor of the yurt, in which the light and the hearth fire are extinguished. As soon
[533] as it is dark, he begins singing, which, in shaman fashion, is performed with long prolongations, monotonously frequent repetition and transposition of the same words, and with a trembling, wailing voice. After this the shaman falls down as if dead.
/755/ Now all those present in the yurt, men, women, and children, begin a song that serves to conjure up a kägn.

During this conjuration a kägn appears, invisible to everybody
[787] except the shaman, loosens the straps on his neck and hands, and gives him new life. As soon as the singing has died away, the shaman stands there, restored to life.

The shaman Chorvin from Tschcharbach is less powerful, but he is only a boy, a matscherlagu-tscham. Nevertheless, he, too, does miraculous things. Thus the Gilyak say that he sits
[787] down in the yurt with his hands tied to his back, the fires are extinguished, and all the onlookers begin a shamanistic song, in which the kägn is called upon to come and to dance, and in fact, while the singing is still going on, a small kägn hardly larger than a nail comes and dances on his arms. As soon as the singing ceases, the boy shaman stands there unfettered.

Each shaman has his own songs; I could not find out what they
756 mean and whether they are also sung on definite occasions. It
533 seems certain that every shamanistic song serves for conjuring up a
787 kägn who is supposed to appear and to lend assistance, be it for curing a sickness or for divulging the future, etc. It also seems that, according to the conception of the Gilyak, the kägn always produces his effect while dancing, a conception that may be connected with the practice of dancing on the part of the shaman himself. In the aforementioned shamanistic songs the kägn is expressly invited to dance (lärta). But the appearance and the dancing of the kägn are never visible to anyone in the yurt other than only the shaman, and this is precisely the mark and proof of his higher power and supernatural strength. (Bm. II, pp. 47, 48.)

/755 cont./

756 [124] 31. Gilyak. The Gilyak Jutschin from Patchä gave me a minute description of the procedure during the conjuration of a spirit which is done through the power of a shaman. His report corresponded to the shamanistic performances described above to a large extent. I shall let it follow here.

756 787 789 It is night and dark in the yurt. On the floor, in the center of the yurt, where the dogs' table has been removed, a shaman is lying with his arms tied to his back, a noose of straps around his neck, both ends of which are held by two Gilyak sitting far apart and at some distance from the shaman. There is not a sound in the yurt until the shaman shouts the word tfwyssj, whereupon a noise which sounds like dancing pieces of wood is made in the yurt -- it emanates from one or several kägn who have appeared in the yurt. The Gilyak sitting around immediately address the kägn, asking him various questions as to why he has appeared: whether he needs berries, or elk fat or a root, and the like, or whether he has simply come, etc. The kägn answers each question affirmatively, negatively, or evasively, expressing himself by different kinds of noise. If the question is followed by a simple hammering, the answer is affirmative; if a mere scraping follows, it is negative; finally if a single hammering and then a scraping follow, it means "I do not know."

/756/ Now the kägn, during constant noise, approach the shaman lying bound and noisily dance on him. The shaman breathes his last, audible to everyone. If he is dead, all the [533] Gilyak sitting in the yurt begin the conjuration song of the kägn; but if he is alive, only one of the Gilyak sings, for the choosing of whom the kägn is questioned. This is done by asking him, "Should this one (the name in question) sing? Should that one (so-and-so) sing?" etc., until the answer is affirmative. The [533] song which the Gilyak begin to sing after the death of the shaman runs: "Restore to life soon, come soon, why hesitate? Come soon, dance soon!"

This song moves the kägn to dance noisily again down from the shaman. Once more one hears him heave a deep sigh -- this time breathing in life anew -- and now he stands there freed

G /756 cont./

756 787 789 of all his bindings and alive again. With the words, käutschek via, käutschek via! (*) which he calls out to each kägn, the shaman now

G [192] *Perhaps kaunczra = out! virä = let us go! -- according to the Gilyak word-list by Dr. W. Grube.

banishes all kägn from there again, it is quiet in the yurt, the shaman performance is over, and the fires in the hearths may be rekindled. (Bm. II, pp. 55 and 57.)

G 756 184 32. Gilyak. In the village of Tyk on Sakhalin I was told that there are likewise shamans among the Gilyak on Sakhalin; moreover, they are said to have the same instruments of their art as those on the mainland, drum (kassj), shaman's belt (Olcha jangpä), etc. (Plate LXI /p. 1261/, Figs. 2, 4). (2 W. R. I, p. 10.)

The large village of Tschai-wo on the east coast consisting of at least ten yurts, was said to have a shaman who was famous among the Gilyak. (2 W. R. II, p. 7.)

Gi 755 756 33. Samagir. One evening I heard the sound of drums in the village of Ngägha. I was told that in the neighboring yurt the shaman's drum was being beaten, and I went there immediately. There was no light in the yurt, and even in the two hearths there were only glowing embers, in front of which women and children Gi were crouched. The dull tones of the drum, accompanied by a [533] melancholy and monotonous singing, resounded from a remote, dark corner of the large, dim room and occasionally became so powerful that the whole yurt rumbled. Accompanied by my guide, I sat down on one of the sleeping benches and listened for a while Gi to the eerie music. When I inquired as to why there was no fire [372] in the yurt, I was told that the shaman sounds were meant for a sick woman in the yurt and that no fire was permitted in connection with this. And, indeed, when after a time the flames were fanned in the hearths and the night-lamps were lighted in the yurt, the drumming and singing instantly ceased. I now approached the shaman, who was sitting on one of the sleeping benches. Next to him lay the sick woman, a pan of coals (jachalacco) with dying

198 urla-dus 'good meat' they say amra-elvla-dus 'amra bad
225 meat.'

ɔkila-dus 'bad meat' they say amra-urla-dus 'amra good meat.'

etc.

225 Apart from taboos pertaining to names the hunters must
784 also observe other taboos during the hunt. Thus, for instance one must not pour water out of the boat onto floe where seals had been killed. Xitkun, who told me about it, said that he all but lost his sight as a result of pouring water out of the boat onto floe with killed seals on it.

It is forbidden to stick a knife in the ground during the hunt.

It is forbidden to spit in the blood of a seal, etc.

[85] Not only the hunters are supposed to observe a number of taboos; the same holds for those who remain home and, especially for women.

Thus, those who remain home must not do any laundrying in the house of the owner of the boat. They must not pass any objects to one another across the fire, for, in that case, the seal at the seine would swim through it.

They must not cut leather for shoes (kivid), otherwise the tola-ke might tear.

They must not cook hearts of seals until after the hunt.

A pregnant woman must not approach the sea shore, otherwise all ice might be carried off to sea and the hunters would not be able to hunt seals.

. 115 In this connection I quote from my Sakhalin diary one of my conversations with the Gilyaks. This conversation took place in the village Khoi on the western shore of Sakhalin (50 versts from the town of Aleksandrovsk on June fifth, 1928. I was sitting in Gilyak Roygin's yurt. Present were, besides Roygin and myself, the Gilyaks Kavzgun, Chulkin, Furaga and the late old man Pletunka, as well as one of my friends and the interpreter L. IA. Shternberg.

225 Roygin said: "When you go seal hunting in the spring you
825 know all that is going on at home. The seal will tell all. The
787 seal will not tell the good things, but he will invariably tell the
626 bad things that are going on at home. If, say, the woman at
784 home starts scratching her head, the seal on the floe will scratch his head with his paw. If they are fighting at home, the seals will start fighting. If the woman wash something at home and hang it out, the hunter is bound to miss the seal even if it were not more than five steps away from him. We say that all the hunter can do is hit the linen. Obviously, the 'god' kes

225 has hung something in front of the seal. The seals will also
825 tell of a theft in the village. If the wife at home has sexual
787 relations with another man while her husband is away on a
626 hunt, the seals on the floe will likewise engage in sexual inter
784 course. When they witness some such thing at sea, some of our Gilyaks will, after returning home, beat up their wives and later on find out from neighbors in the village what had really happened. Now, suppose you cook seal meat, eat it and pick your teeth with a little stick, then the seal in the sea will show how you picked your teeth with the little stick.

During the spring seal-hunt on floes, when the Gilyaks jump from floe to floe close to shore and kill seals with harpoons, those at home must not break any objects - say, plate or bowls, for otherwise the floe will break and the hunter, say, the father, brother or son, may drown. Therefore those at home must be very careful.

On the day when something goes wrong at home, the hunte will not get his seal. Then he returns home angry and tries to find out what deprived him and his friends of their quarry.

776 Roygin told me all this in order to prove to me the existenc
825 of kes, "god"; a point on which I did not want to agree with hi
225 "How can a seal, 20 versts from home, know what is going on at home?" he told me. "Surely kes must be telling him about it. That is why we say that kes exists."

225 Incidentally, after my conversation with Roygin, Pletunka
784 told me that the mrolv-nivevr 'ancient Gilyaks' observed the
57. following ui and "taboo," "sin" during a seal hunt: the gues must not touch the handle of a kettle or teapot. Only the master of the house (in the past as well as at the present tim could pour out tea or any other liquid food for the guest. If, even by mistake, the guest touched the handle of a kettle or teapot, he was obliged to tear a strip of material off his slee and put it in the (hearth). (1)

1. This word in my diary is illegible. As far as I can remember, Pletunka spoke of a hearth.

225 [86] During the spring hunt the Gilyaks of the village Kul
552 hunt different types of seals. They also catch an occasional
825 dolphin. They distinguish the following varieties and ages of seals: Pila-la r 'Sivuch'

1. Nav-na 'present-time animal', i.e. a sivuch born in th given year.

2. Tje-na literally: 'last year's animal', i.e. a two year old sivuch or one born in the previous year.

/317 cont./

342 787 Sanctifying the house. On the eve of sanctification, on the day of the completion of the building, with the setting of the sun, a reliable man must make his way there and be attentive for a cracking sound or streaks of light.

342 787 789 If a cracking sound is heard during the sunset, or purple streaks of light are noticed, this is a bad sign. If the cracking is at dawn or the streaks of light are bright light -- this is a good sign. The bad sign means that not a real "master," but a [776] devil -- kins has settled in the house. Then the shaman must be called, and he makes a chkhnyr chkhnaj, a grass figure, and drives out the demon. A real "master" is fed two times -- in 342 776 782 autumn (cleaning) (1) and another time when one wishes. They

[392] 1. Evidently speaking of the cleaning of the hearth by feeding the "master" of the fire.

feed all the posts, the door posts, the threshold, the matka, the stone under the threshold near the door, where the old man or the old woman lives, guarding the house against the entering of the evil spirit.

342 789 /318/ Driving out the evil spirit takes place in the following fashion: a grass figure -- chkhnaj, on three legs, is placed in the middle of the yurt. A man holds it by a string tied to his hand; in his other hand he holds a club. A shaman shamanizes [534] with a tambourine. The evil spirit must hide. The shaman [756] enumerates the walls, boxes, and various things in the yurt from which his kekhn must drive out the evil spirit, and he does not mention only one corner -- it is there that the evil spirit is hiding.

342 756 789 The shaman then says: "gy, gy (i.e., 'good'), in such and such a corner there is no evil spirit." And all answer: "Gy-gy, gy-gy, such and such a corner does not have evil spirits." Finally the shaman says: "The kings has hidden in such and such a corner. [776] Massi (apparently the spirit -- assistant of the shaman), go and get him, and the rest make a battue!" "There, he went out, he went out as a dog..." (speaking to the kekhn, i.e., to the spirit).

/331 cont./

775 787 The dead come in a dream. Thus Indyn's mother came to him several times. The last time she said to him, "Your father took me again," and she did not appear any more.

794 [231] The big soul inhabits the entire body, and in the head of this large soul live small souls -- tarn. After the death of a person, a small soul lives in his pryski (dog), which is tied to his plank bed. Small souls resemble eggs and are white in color. During sleep the small soul goes everywhere, talks, sees, and so forth.

[735] A poor person "still has one tiny little soul." If a person dies away from home or drowns, his soul comes home. The soul of a dog which died accidentally roams all over.

Every body has a soul, and its shape corresponds to the body. Therefore, if the body is given a certain shape, it will acquire a corresponding soul, and therefore if a throat is sore, they make [825] a tongue, and his soul lives in that tongue. A captured bird with which children have been playing must not be let loose, for it will carry away the soul.

775 The fate of the soul depends on the kind of death. 1. A person who has been eaten by a bear lives to a ripe old age with Pal-n igyvyn (the master of the forest), while a person who drowned -- with Tol-n'igyvyn, and then they go to Mlyvo.

2. A suicide (who hung himself) goes directly to Mlyvo.

3. Those who died from an epidemic (an epidemic is caused by the bloodshed during the wars of the Japanese, the Chinese, and the Russians) also go straight to Mlyvo.

4. One who died a wound (by a knife, a bow, or a rifle) lives, like a bird, in the air. The souls of such unfortunates shreik at night from the trees.

5. Until a tkhusind (ransom) is received, one who was killed by a person will also fly in the sky. If blood vengeance is taken for the dead person, both souls go to Mlyvo together.

775 825 The night bird takhch is of the size of a crow and just as black, but its beak is red. If its cry is heard at night, one must not call it by name, but must say atk.

When a person is killed, a great number of these birds fly together into the village.

Sakhalin

/337 cont./

845 Gibel'ka's wife gave birth to twins; one of the twins was a bear.

[532] [778] [782] A representation of twins -- tongch: -- is placed in a little storehouse. If one of the twins dies, they place one tongch:, while if both die, then two joined together on the sides. Chukh-chugynd is given to them at the full moon and at the new moon. Kinsmen and strangers sacrifice down to the third generation.

[775] [787] When a twin dies, he goes to his father, Pal-n'gyvyn, who gave birth to him, appearing to his mother in a dream.

766 A dead twin is not cremated, but is seated in Turkish fashion in a specially built little house, in which a wedge is driven to support him.

He is dressed in a white shirt and trousers and is surrounded with shavings -- inau. The mother of twins is likewise not cremated after death, but is dressed in white and buried, also with inau placed around. According to B. Pilsudski, the same is done with the father of twins.

778 224 164 782 The tongch: helps catch bears and in hunting in general. The tongch: is fed in case of sickness, especially tuberculosis (Slyavo).

Infanticide. Infanticide is committed sometimes in secret or 847 even upon the order of the father of the underage husband of a woman.

682 A woman who was accused by a shaman of poisoning a boy, the son of another woman, was beaten, and, after they cut off her braids, she was thrown into a funeral pyre.

753 776 Illness. Illness is sent either by Pal-n'igyvyn or by Tol-n'igyvyn, but each of them takes a milk not from his kingdom.

/338/ A milk can be of different shapes and often is red as blood and hard as stone, but when he enters a person, he becomes lively, "as if he were walking."

732 758 A violently insane person is imprisoned in a cage (in summer) and fed; he must not be killed.

753 Kkhmas'ind -- to be sick from not getting what one saw and wanted. Either the one who did the seeing or his family becomes sick. Then it is imperative to get at least a small crumb of what one saw and to touch it, and the person gets well.

/343 cont./

773 the women boiled the grandchildren, ate them, ran into the taiga, and disappeared.

778 776 789 Chnyr-chkhnaj. If a loss has occurred, they make chnyr-chkhnaj, a figure of grass, and beat it (thresh it); if the chkhnaj is good, the lost thing will be found on the following day. If it is not known what milk caused the harm, chnyr-chkhnaj is hung up over the plank bed and fed.

685 For stealing bear meat or a fishing rod, the face is maimed.

158 Kleptomania. There are thieves-kleptomaniacs, for example, Sentukh from Ady-Tymi. After his brothers threatened to kill him, he ran away to /344/ Lungvo. There he and his [774] wife continued doing the same. He has one soul -- a rat sitting in his belly. The things that tempt him shine in the dark for him. The Gilyak confined themselves to depriving him of the things.

756 774 The shaman Koynyt's father, from Tro, once noticed that his trousers had disappeared. He began to shamanize, found a rat in the belly of a woman, killed it, and on the following day the woman died.

683 Over an insult it is necessary to fight with sticks (chkharkirvand), or pay tkhusind, or take something by force. Frequently they kill over an insult.

787 Fortunetelling with a stone parnkhasind, with a kettle. The parnkhasind replies thanks to the chekhn. If the kettle swings straight, one has hit the mark; if to the side -- one has not hit it. If one has hit the mark, he must make a wooden chkhnaj, hang it around his neck, and feed it.

/78 cont./

island, his young son, Koynyt, had two souls already, even though he was as poor as Job.

The difference in the number of souls according to rank applies only to the so-called large souls, i.e., souls equal to a man's body in size and during his life pervading the entire organism. But, in addition to these large souls, each man also has small souls located in the head of the large soul, after whose death the small soul turns into a large one and becomes a duplicate of the deceased one. It is of extreme interest that the Gilyak visualizes the small souls in the shape of an egg, an idea which is so characteristic of the psychology of primitive man /79/ for whom the mysterious processes of embryology lead to the idea of the immortality of the soul just as inevitably as the speculation on the fact of the growth of a plant from a seed thrown into the soil led the Christian thinker to it.

During the life of a man, this small egg-like soul plays an enormous role. It is this small soul that appears to the Gilyak in his dreams, all that the Gilyak sees in the course of his dreams and that is accepted by him as living reality, all this is performed by this little soul.

But shamans, no matter how many souls they have, are not omnipotent... There is a time when the mightiest shamans together with all their kekhn are powerless to help man in his struggle against the evil spirits that reside in him. This occurs most often when a man's tormentors are the evil genii of the mountain or the sea. After destroying the body, these lords frequently carry away even the soul of the dead man. Freed of its corporal burden, however, the soul can take care of itself; it learns to escape from its pursuer and hide nearby among the friendly mountain or sea people. After some time the soul-twin, having assumed human form, travels into a new land, mysterious to us, but well-known to the Gilyak -- mlyvo (literally, "settlement of the dead"). Normally, however, the evil spirits, having killed the body, leave the soul in peace, and it may set out for the new world unhindered. It is very easy to get to the mlyvo. Somewhere on the surface of the earth there is an opening (mortal men do

Amur

/306 cont./

A child's amulet -- ola bituz consists of two slender fir trees -- prung, which are uprooted on the day of birth of a boy; their crowns are bound with birch bark. Then they are reinforced, encircled with simple sticks, and bunches of leaves of Ledum palustre -- the marsh tea (tykr) are attached to them, as well as the sharpened head of k:khong z'akh, the head of a pike (ius), and hooks for the boy's clothes. If the boy dies, all this is thrown away, but if he survives, everything goes to the next child (settlement of Kal'ma).

VII.

Religion

The soul and the ceremonies after the burning of the corpse. The soul -- cheg:n, chekhn, yrykh, uz'(the pith as in a tree). A man has three souls: one major one -- cheg:n, and its two shadows, assistants. When the cheg:n of a shaman is wounded, the shaman dies.

If in sleep something is dreamed clearly and comes true, it is the activity of the chief soul, and if it does not come true, then of the shadow-assistant. There are interpreters of dreams. If one sees a cow, there will be a storm; if a red berry, he will soon fall ill.

In the morning on the next day after the cremation of a dead man, his family arrives, rakes together the ashes, encloses them with wooden boards on four sides, and covers them with fir branches, and on top with drel', then birch bark and wooden boards, which are then attached to the ground with wooden /307/ hooks. The skull bone (chongr nynyv), which is picked up from the ashes, is wrapped in white, placed between two wooden boards, and fastened together with an umbilical cord ("the root from which man is born"); this is the way they make the mu n'ivukh k:ak. Some place the bone in the upper part, others --

/309 cont./

766 Two men, friends of the deceased, sit to watch, do not
766 move, do not speak, tie up all the dogs, and wait. In the yurt
754 a shaman shamanizes, calling on the sorcerer who drowned the
•787 man to eat from the kinys n'ich: "Go eat human meat!" He rushes from beyond the mountains, from beyond the valleys. Amid complete silence a wave splashes, a whirlwind rushes through, a bird swims up, a black dog runs up. Suddenly the wave has approached the very cup; the deceased either moves, makes a sound, or sits up. Now it is necessary to pierce the deceased or (to hit?) the cup with a dolphin harpoon which has been in constant use, or a spear, and it feels as if the spear has struck into the man, and there are traces of blood on it. On the following day the sorcerer has a wound or a sickness from which he dies. Then the dead man is buried, while the cup is kept for two summers and then thrown away. The cup may also be destroyed right away. They do not make it very pretty. Then they make real tolin'ir and sacrifice from them down to the third generation.
756 Shamanistic kamlanie. Shamans are 1) toldokh urly cham;
787 2) pal'dokh urly cham; 3) kurdokh urly cham; 4) pang:at n'ivukh -- fortuneteller. At home a shaman directs his questions to a stone with a hole -- tolfang. If the stone immediately gives answers, it is thrown away. The shaman queries his pal'pang:a (a wooden figure which is bound with white drel', and with shavings on the neck; it is suspended on a string). The waving of the figure is an affirmative answer. If there is no pang, they tie tobacco wrapped in white drel' to the stone. It advises the shaman about medicines, indicates what sacrifices to give and
[755] to which particular pal (i.e., pal of one's own or of a different clan), and so forth. It cannot drive away the evil spirit, but it can find out what spirit is there and also give indications with regard to stealing and fish. A man receives his pang also during sickness. He may even be a shaman, but frequently bad shamans steal (tempt away) their major kekhn from them. There are shamans
756 who have pang:kh, but not each one has them. There are
776 shamans who have kitus, something like an earthworm.

X.

The Building of a House, Its Plan, and Rites Connected with the House

342 Before laying down the first row of logs, they try sprinkling
•[087] flour: if in the morning there is an imprint of a human foot, this is good; if of a human hand or of a beast, this is bad, and then they change the place. If there are no imprints of any kind, this is also good.

342 Explanation of the plan of a house (see drawing). 1. Shy --
354 door. 2. Tol-erkh pusk fakh -- window facing the hearth of the "master" of the sea. 3. Kem-fakh -- second window to the left of the door. 4. Ponakh-fakh -- window over the middle plank-bed. 5. Pal-erkh ponakh-fakh -- window facing the master of the mountain. 6. Kyly nakh fakh (mat'k:as' n'ekh fakh) -- window alongside the long plank-bed. 7. Mat' k:as' akhr fakh -- window near a small post. 8. Pal-erkh pusk fakh -- window on the side
342 of the mountain. 9. Kangyl -- the place for tying dogs. 10. Tly k:as' -- large post. 11. Kil erkh mat' k:as' -- small post. 12. Tol erkh mat' k:as' -- post on the side of the sea. 13. Mat k:as' -- small post. 14. Hytyfi mat k:as' -- middle small post. 15. Pi'la digr-irku k:as' -- large elongated post under the matka. 16. Pal erkh' mat k:as' -- small post on the side of the mountain. 17. Kylyná mat' k:as' -- long and slender little post. 18. Shyvos n'ich fakh -- small stone near the threshold. 19. Pi'la k:as' nir fakh -- small stone at the threshold on the level of the floor.
[354] 20. Pi'la digr -- elongated matka. 21. Pal erkh tuur -- hearth of
[335] the master of the mountain. 22. Tol erkh tuur -- hearth of the master of the sea. 23. Tyjf -- cross log, foundation of the house. 24. Kylzhutá -- the middle of the plank bed where they put a person who has been wounded by a bear. 25. Uig dz:onkh -- tabooed
[778] corner for the bear's head and so forth. 26. Ke dz:onkh -- upper corner. 27. A dz:onkh -- lower corner. 28. Pal erkh pusk dz:onkh -- corner on the side of the mountain for tabooed things.
[776] 29. The floor is divided into two halves: a) pal erkh kyl, and b) tol erkh kyl. On each half is placed only that which has to do with the appropriate spirit, with tol' or pal'.

"The spirits of the deceased occasionally

convulsive attacks, which are
ck person reveals to those around him
atures. The patient believes firmly in

533 boats. However, there are some to be found among them
who are considered singers; they are improvisors of a sort
who entertain the others with their song.

535 The dance does not exist among the Gilyak, unless one in-
201 cludes in this category the spontaneous leaps with which a
517 tipsy one occasionally cools off his exuberance. There is a
521 reason for the Gilyak's facial expression of which we spoke
above. It is neither sullen nor sad, but also not unhappy
or good natured; it is serious or indifferent. But I must
hasten to add that this immobility and indifference only
reaches to a certain point. The Gilyak's imagination and
his sense of humor are not immediately apparent, but in
reality he possesses both. The favorite pastime on winter
evenings is listening to a story teller, and his voice is
alternately interrupted by laughter and exclamations.

527 Holidays and festivals. There are no special rest days
787 which would, for instance, correspond to our Sundays.
483 The bear festival is the only one worthy of this name. It is
celebrated once a year during our January, it lasts two
weeks and is accompanied by various entertainments. Young
bears which, as we said, are brought up for this festival,
are taken direct from their caves or they are bought from
Sakhalin kinsmen. Occasionally 100 rubles are paid for a
one-year-old. Young bruin is put into a hollowed-out tree
trunk to which he is fastened with a chain, and thus he
transported by sled. The yurts where this traveler halts are
considered particularly lucky. It has happened now and then
that the bear, because of negligence on the part of the people
transporting him, has crushed a child to death, but such
accidents are not mourned by the parents, who regard it as
a good omen.

527 The bear is kept in a special enclosure in his new home.
231 An old woman is appointed to feed him and give him water.
The latter is offered him in a long wooden spoon which is
inserted through a little opening. His chief food consists of
dried fish, sometimes he also gets millet and various
scraps. [236]

Not all villages have bears, therefore people from different
villages usually assemble for the festival, even from those
places that had their own bear festival and had already con-
sumed their bear. Often Sakhalin-Gilyak come to the main-
land at this time, although they themselves are well supplied
with bears.

527 Besides feasts, various amusements take place at the
541 festival; for instance, dog races. A track is cleared on the
437 ice and staked off, and the trained dogs run for wagers.

/338 cont./

752 thank you!" If they do not exchange them, then one of them
784 will drown. After this they become friends. One must rescu
[572] an alien khal, and even good Russians (not the tramps), but
[614] drowned person from another clan is not cremated, but is sur
[628] rounded with sticks.
[766] After the rescue and the shavynd procedure, the shama
must /339/ carry out his procedure: he sends his spirit kekhn
Tol for a small soul, which lies there on a small bed.

When a person who was drowning returns in a boat resc
from death, he and his wife must break the old chumashka a
make a new one. If it is not broken, husband and wife will

766 A man who drowned or one who was eaten by a bear w
[775] be a god.
[776]

A drowned person is placed in a boat; the kinsmen ge
into another boat and float without rowing; they let the first
boat, with the deceased, go ahead, and the deceased is cre
where it carries him to the bank. Hooks are used for pulling
the body onto the bank. Inau are placed near the place of
cremation. When the Tymovsk Gilyak travel to Tro, upon
the inau they throw chukh-chugynd (sacrifices) into the strea

752 A person who has been rescued from death by a bear s

/282 cont./

585 her advice on how to live in a strange land, and, if she is un-
happy about the marriage, they try to persuade her in every way
possible. During the farewell feast the groom sits alongside the
bride, and both eat from one dish and smoke from the same pipe,
but during that day they usually do not converse. In general, the
groom is supposed to comport himself modestly the whole day,
and not to converse. Late in the evening, when the feast is
over, the bride's mother orders the bridegroom to lie down on the
bride's bed, and the marriage act is consummated. On the next
morning the newly married woman brings something to eat to
the newly married man and calls him "husband." On that very
585 morning they depart. Before the departure there is a last
782 regalement, and at that time the parents of the newlyweds ex-
change prayers of good wishes. Here is an example of such
benedictions, taken down on the Amur:

539 "If god gives happiness, they will live out their time
532 happily. If there is no happiness, they will live out their time
782 badly. O god, make the life of our children a happy one!"

After this the father or a clansman of the groom says /283/
the following prayer: "O god, make, make happy the time
of our children, in order that we may live happily; to our life
together give good fortune!"

585 Saying their benedictions, they sprinkle vodka in the
• 788 direction of the heavens and in all directions. Before actually
782 setting out they go through a ceremony which bears the designa-
tion "stamping the kettle." It consists of the following. At the
inner side of the threshold of the yurt there is placed a large
Manchurian kettle with five little ears (for the feeding of dogs)
from the bride price of the yurt, and at the outer side a small
kettle from the bride's parents. Upon going out of the yurt, the
bride and the groom, one after the other, place one foot in the
large kettle and the other foot in the small kettle, not treading
on the threshold. This ceremony establishes a symbolic union
of mutual nourishment and mutual friendship in the presence
of the two female penates -- the "old woman-mistress of the
threshold" and the "mistress of the crossbeam over the door."

/283 cont./

585 It is noteworthy that such a ceremony of "stamping the kettle"
• 788 takes place among the Tungus tribe of the "Negda," who since
788 olden times have concluded marriages with the Gilyak, from
777 whom they have undoubtedly borrowed the custom.

586 A year after the wedding the newlyweds, usually already
584 with a child, come to stay a little while with the wife's family,
788 and when they again depart they once more go through the cere-
mony of "stamping the kettle," only this time, instead of
kettles, they use cups.

The vicissitudes of marriage. Just as in our society, marriages
583 are not always happy. Since the consent of the woman to the
586 marriage is not asked, and rarely does any girl resolve to disobey
[584] the will of her parents, and very rarely do the parents yield to
the protests of their daughters, not backing down from their
decision even in the face of a threat of suicide, life after the
583 wedding is fraught with tragedies. Either a woman runs away
586 with her lover, or she runs away to her parents, especially in
837 the case of ill-treatment by her husband. In such cases the
husband often tries to take back the fugitive by force, and
otherwise he demands the return of the bride price. Since no
[591] one has a desire to part with something once it has become his
own property, litigations to recover the bride price are endless.
[123] During my wanderings among the Gilyak, who at first took me
to be one who had power, I had to listen to complaints concerning
583 the return of bride price in every settlement. They preferred,
586 however, to ask for the forcible return of the wife, which was
837 often done by the Kekhal administrators with the favorable
777 assistance /284/ of the priests. The fact was that persons who
749 had lured away or abducted another man's wife appeared before
a missionary with the request to be baptized and married, in
order to guarantee themselves against the wife's being forcibly
taken back by her former husband. The missionary willingly
fulfilled such requests and gave them a marriage certificate,
which gave to her owner the right to a police order demanding
her return in case she was forcibly taken away. And this led
to tragedies. One such case deserves to be immortalized.

* 614 what a man! His right arm was worth so many "syalakhr" (1);
628
631
[436]

1. The syalakhr is a monetary unit which the Gilyak for some reason translate into Russian by the word "tselkovi" /one ruble/ and value in our money at three rubles, -- apparently the Chinese customs duty. It is in these units that the Gilyak evaluate their exchange values -- the shagund (see above).

if he were living, would he be content to take that much? His left arm was worth so much, etc." Then all the other parts of the body are listed, and the amount of the blood money is computed. If the opposing side agrees, it lays in the kettle of the orator as many pieces of wood as it has agreed to pay "tselkovi." But agreement is never reached at once. The orator of the opposing side seeks to find excuses for the slayer and offers a minimum ransom. This angers his opponent, and he wrathfully departs, threatening to break off negotiations. His colleague hastens after him, urging him to make concessions. They sit down, each one lights up a pipe, always with his own fire, they quarrel, again one of them flies into a passion and hastens off, again they come together and return to the settlement...

[576] Etiquette demands that an agreement should not be reached at once, but only after stubborn opposition; therefore sometimes two and three days pass in endless meetings and
[117] separations. Sometimes Gilyak cash on the Amur resort at the
• [789] last moment, after the manner of the Tungus tribes, to the aid of their magic rods, which they threaten to break and thereby bring the wrath of the gods upon themselves and their stubborn opponents.

When an agreement has been reached, the religious
* 614 feature that is mentioned above enters in, the procedure
628 of an imitation of a bloody battle, which is supposed to
536 conceal from the soul of the slain man and the clan gods the peaceful solution of the conflict.

/116 cont./

555 and the chosen one cannot either evoke envy or pride himself on
556 his advantages (1).
156

1. The following example can serve as a good illustration of the outlook of the Gilyak on the origin of personal wealth. On the western shore of Sakhalin the wealthiest man in my time was a certain Gibi' from the village of Tangivo. He had, in effect, a fine intelligence and was an able hunter and an energetic man. Moreover, he was aided by his acquaintance with the Russian officials, whom he served in the capacity of supplier of furs and collections. But the Gilyak logic saw the cause of his extraordinary wealth in a quite special circumstance; that he once found far away in the hills under a log a piece of some
• [789] kind of substance, a magic talisman, sent to him by the gods.

* 614 His protectors, sending him the beasts of the taiga and the
156 fish of the water, are the common genii of the clan. To hoard
[490] one's wealth, not sharing it with one's clansmen, would be
[183] equivalent to appropriating for oneself that which belongs to one
jointly with all, and the highest ambition of such a man is to
display his benevolence and generosity to those around him.

Such are the economic relations, producing a whole per-
sonality equal to others in preparation and knowledge, /116/ ex-
cluding the possibility of mutual slavery, and creating for each
person a healthy atmosphere of consciousness of his own freedom
and self-determination.

156 But the greatest wholeness is given to a person by his socio-
777 religious world-outlook. The basic axiom of everyone is that all
his existence and welfare are completely in the hands of the gods,
in particular the clan gods, who showed their beneficence not on

Amur

/304 cont./

685 for your master!" And thus /305/ they go around the entire vil-
754 lage, meanwhile putting on the tendon. Then the thief begins
to suffocate from fright and confesses. A shout goes up; it
happens that the thief dies from it.

628 An oath is taken also in controversial matters. Before the
695 court, in a balagan where the khlaj-nivukh sits, nothing is allowed
to be boiled; they eat raw yukola.

A stick (kyz') -- about an arshin in length with a human
chikhnaj.

If the matter reaches the point of breaking the stick, then
they pay more -- double. Both big and little assemble in the
balagan of the khlaj-u'vukh'a (the settlement of Karga, 1896).

881 Women, Childbirth, and Children. A maiden who has reached
830 sexual maturity makes two braids. Women pierce both ears in
178 order to put in earrings (mer'ab); formerly men also pierced their
881 ears. A wife who is a minor can be slept with only after she be-
585 gins to menstruate. During menstruation the woman puts on her
841 oldest clothes and does not sleep with her husband. Women wash
[302] themselves, but not with hot water, for otherwise the ungurmam
(the mistress of the fire) takes offense.

171 Among the Kekhal (Orochi) a man who has two wives ac-
839 commodates a guest under one blanket.

843 A pregnant woman must not look at the Amur when it be-
823 gins to break up, in order not to slow up the opening of the river.

They give birth in the balagan (midwife -- langyr-mam).
In winter the mother spends one and a half days in it, in summer --
three days.

844

84 One must not cry out during delivery -- a sin. The husband
at this time does not go anywhere. If a child has died during
birth, the woman must not travel on the river or sea for a whole
year -- there would not be any fish. For a month before child-
birth, it is not permissible to bind anything tightly or to drive in
stakes; it is not permissible to repair anything for an alien.
• [789] During difficult deliveries they open up boxes, tear off patches,
and uncrew their rifles. The newborn baby is washed with cold
water. The midwife is not paid. Until the umbilicus heals, the

/305 cont./

84 mother has her own fire. After childbirth a woman washes herself
for three days and then moves to her yurt, but for seven days
she sits apart and eats from a separate kettle. For ten days after
childbirth, it is not permissible to drink cold water or to eat raw
fish, but if twins were born, then it is permissible. When a child
is born, they bring in two sticks, put them into his hands and lift
him up. Similarly, sticks will be placed in the infant's hands
[055] when he falls ill, and he will be compelled to lift himself up (1).

[097]

1. On another page of the same notebook, we find the following notation: "These sticks kyz' nyngydz' (from kyz' -- risk, luck, and nyngdz -- to seek)," which probably refers to the above-mentioned sticks.

845 /306/ If two children were born, they make two pairs of
pning, two kong a'akh, two sticks made of rose-willow, cut as
strips (pying a'akh), two small bows (pudz:) and arrows of a special
shape (m'erlar), and attachments for the cradle -- pitus'. When
they prepare food, these trees -- ola' bitus' -- must be fed
(settlement of Kal'ma).

While a child is growing up, his umbilical cord -- kylmyr
855 is kept at home, and then he himself must carry it into the forest
784 and hang it on a tree. O'gang chikhna) is a figure that they make
846 when a child is suddenly frightened during his sleep. The chikhnaj
is the figure made when a person himself, without the shaman,
does that which he dreams.

514 The child's excrement is poured out near a fir tree (both
male and female); after being cut, hair is also thrown here (it is
not permissible to cut the hair of twins). One must watch care-
fully to see that no female blood drops on the urine or the refuse,
824 for then the child is lost. The child will die if the tree growing
[761] there is broken. This tree is called pila uigf, and the place
is called ki markf -- literally -- "urine pouring out place."

[114] tube as our Gilyak specimens bear. But I cannot agree with his opinion that these figures approximate those prevailing on the South Sea islands and are to be regarded as an offshoot of the death's-head form popular there, which is associated with cannibalism and the trophies of human skulls. Similar, quite [189] crude and primitive representations of a human face by means of a couple of circles with a dot in the center, a vertical line in between, and a horizontal line under them, as eyes, nose, and mouth, are not infrequently found on the implements of the Gilyak and owe their origin, I believe, to the notion that by putting them

[402 cont./]

on an object the influence of any evil spirit involved will be neutralized and the use of the tool will be accompanied by no ill-em - a belief that I shall discuss in another place.

The thread with which garments are sewed varies according to the variety of material. Thus, for example, and for birch-bark hats are sewed with fish-skin yarn, that is, line thread cut out of fish skin, which the Gilyak call *mylds* and distinguish, according to the type of fish from which it was taken, as *nimgar-myrds*, *nimk-myrd*, *kuk-myrd*, etc. (8). For coats and similar articles of clothing, with the thread

5. *Filmgat* is Cyprinus Carpio L. (*mirk*) Hypophtalmichthys Dybowskii Herz.; I do not know what type of fish the name *kuch* refers to.

[411 *kuhe*] that the Gilyak know how to make from the ordinary stinging nettle, and which is also used for making cord and fishing nets (6). The garments made out of cotton or cloth are sewed

6. As it also known for the Siberian peoples, the ancient Kamchadal Steller, op. cit., p. 83; Krasheninnikof, op. cit., Vol. I, p. 302, and others. The Gilyak method of making thread and from a nettle fiber will be discussed in this work in a later section dealing with fishing.

with Chinese cotton thread, and for the various quilting and embroidery the Gilyak are other than the silk thread like wise obtained from the Chinese, depending on the delicacy of the work and the elegance aimed for. I have never seen a Gilyak woman use scissors during her sewing and embroidering, although they know of them, thanks to the Chinese and have a special term (*ksiam*) for them. Instead they only use a knife. For smoothing (*ulu kalak*) they use a smoothed piece of wood (*gaim*), which is

[424 cont./]

from me for a small consideration the dogs that had become useless on a trip. The Gilyak do not consume their dogs, however, as Shaman an urgent reason. Such a reason can be only totally enough, however, if individual animals are injured or rendered useless; or if there are too many of them and, correspondingly, a shortage of food. In fact, even superstitious ideas can give rise to it. Thus, I have seen it happen, for example, in the village of Tyh on Sachalin, where I was delayed on account of severe snowstorms for several days in February, 1898, in the company of two traveling Tuchonsi and Tymi chiefs. Thus, in one of the cabins the bed weather, after other means had already been sought in vain, since young dogs were strangled and consumed, which was to be expected on the 21st of the month of Gilyak. The meat and the entrails of the animals were thrown into the kettle, a pot belong added to the pieces sung for the dogs, and - characteristically enough - I saw the woman occupied with these preparations bite off a piece of the bloody entrails behindhand the kettle and hide another little packet of it to a child, who likewise seemed to enjoy it very much. On another occasion, in the village of Dif, I was witnesses to the entertainment of a large company of Gilyak with dog meat. This happened only as a celebration subsequent to a bear festival held there a short time before, at which there will be to see in the exterior and interior decoration of the yurt. The dogs, among them a couple of invalids furnished by the, were killed in front of the yurt, and the carcasses, with a piece of meat and the bones cut up, and all the pieces belonging to one animal wrapped in its pelt. *Ikhk* inside the yurt, the place between the rear sleeping bench and the hearth, where the scaffold with the bear's head had stood during the bear festival (1), was

1. The details concerning this will be found in the pertinent section specifically devoted to this subject.

marked off by two shelves, which, on the floor, there was a stick decorated with a bundle of thin, curly, crimped wood

[446/]

Needless to say, there are a number of superstitions concerning the wife, the husband, and the hearth. Thus, if the husband will cast her out or take a second wife, who, if blessed with children, is to be treated as the first wife, Such a woman can reach be in the household. Needless to say, the wife shares the husband's desire and scorn no means that might serve to fulfill it, and the prevailing superstition gives her many such means. For instance, I saw many a woman wear the tooth of a bitch around the neck in the belief that this would make her fertile. Presumably other amulets specially carved for the purpose are worn by the women, though I am unable to name a particular object of this sort.

After all this, it is all the more surprising that there exists among the Gilyak an inhuman, cruel custom in connection with the birth of a child, the custom, that is, that a woman must never give birth in the house, but must always leave it, regardless of the weather and of the time of the day or night. I have described this custom in the case, but myself witnessed it. When I visited the village of Kufh on April 24 (May 6), 1855, and entered one of the house, I saw a woman going out unsteadily but heavily (obviously) and sinking down nearly on a prepared bed of straw, where she was immediately joined with labor pains. The husband stood in front of the door, calmly looked on for a while, and then went back into the house, whereupon I, too, left. A few hours later I heard, while sitting in the cabin, that the village chief had been delivered of a child, but the child died soon afterward. The mother was still alive. The mean temperature on this day was 2.8° R. in nearby Nikolayevsk. At 7 o'clock in the morning the thermometer registered only 1.1°, at 2 o'clock in the afternoon it rose to 6.3°, and dropped again to 3° at 8 o'clock in the evening. The river had not yet thrown off its cover of decaying ice, and, with the sky slightly cloudy, for the most part, a moderate east wind was blowing from the Liman (1).

1. Cf. Vol. IV., p. 20, of this work.

During the colder season, in the less fall and winter, delivery does not take place in the open, but rather in a birch-bark tent

[461 cont./]

the help that they give in the household, a fine bride price. A second reason, however, is more important. If the bride price is not paid, the husband will cast her out or take a second wife, who, if blessed with children, is to be treated as the first wife. Such a woman can reach be in household. Needless to say, the wife shares the husband's desire and scorn no means that might serve to fulfill it, and the prevailing superstition gives her many such means. making a trip from Dul to the villages to the south on the same coast, since the sea ice sometimes breaks up immediately in

Magic arrow for exercising storms.

Bone of the beak of the traveler. In the village itself several methods of performing the ceremony of exorcising the storm used. At the top of a long pole stuck in the snow there was fastened a large piece of sealskin, which evidently was to serve as a sacrificial offering to the storm. A second method served the same purpose, but in a much more attractive form. It was an ordinary raised arrow made with two prongs at the tip and provided with two curls of wood shavings on the shaft. Between the two prongs, likewise bearing small wooden curls, the strong center rib of a tobacco leaf and a few small feathers of finest down were inserted and the arrow shot off in the direction of the stormy *ainkhalg*-wind. Finally, a third method consisted in sacrificing a number of whelps to the storm. In the village of Tyh their number came to three, and, if the storm did not stop the next day three

[871 cont./]

others were to follow (3). This method was at least more powerful

3. Concerning this, see p. 602 above.

powerful, for it increased the body of the people and saved dog food, the lack of which was already making itself felt at the time.

I never saw or heard of a Gilyak who, upon entering a house, greeted the host, hamsar, or any other acquaintance with the word or gesture, nor is it done upon his departure. As I gather from Middendorff's handwritten notes, given to him to use, this coming and going without any salutation happens but little, too, with me they likewise constantly came and went without a greeting, and I was, therefore, with a heavy heart (*ksuhrbachlik*) learned from the Russians. Only in the presence of the Manchu and Chinese do they imitate the *Ritt*/ Tungusic Amur peoples by dropping down on their knees in front of them and bowing their heads, but this is done only in order to gain their favor and to avoid being punished by them, since the Manchu officials in Dmitrievsk and other places strictly insist upon such a show of deference.

But what surprised me even more is the fact that the "Gilyak" never seem to be missing anybody from their footsteps. I never heard it used by them, either among themselves or to a stranger, expressing the idea of being missed or regretted. I should like to ascribe this to the incompleteness of our word list, which is in general very poor in expressions for abstract concepts and emotions, but I have heard the Gilyak use the same expression, that they really had gratitude in their hearts, they would not have a word for it and that it should simply have always eluded us. After all, we saw them in all kinds of situations when they received services or help and hospitality offered almost to excess. Is it possible that guests who have been darkened, despite notwithstanding masts, for days as a result of storms setting in and who have been fed along with their dogs, as the Gilyak are among dog eaters, depart without having said a word of thanks? Is everything based only on national commonness or on the certainty of reciprocity in similar cases? With regard to me,

[761 cont./]

condition, reaching any pretensions of a religious one or complaining. Thanking our and replacing that empty concept of God among the Gilyak.

I realized that the wooden idols of the Gilyak do not resemble the Tungusic Amur idols (and kin). From Sakhalin I obtained an amulet in the form of a carved bow with a human face (see Plate LIII Fig. 1255/, Fig. 9). (Bm. 1, pp. 57, 58.)

2. Gilyak. The village of Pogibshi on the west coast of Sakhalin. In one yurt I saw my host cut long curls of wood-shavings with a knife. On these shavings he placed a piece of fish, and the whole bundle from the top of the stick and tied it together there. This much was intended as a sacrifice to the bear. The Gilyak, who take pride in her chest and set there grooming and complaining. The *nech* was tied round her neck, and she tucked the ends carefully in her bosom, pretty much as a Russian girl tucks her baby. This was supposed to be a remedy. In fact, after the bad received this medicine, the woman stopped crying and behaved very calmly and quietly the rest of the time. Thus, in this case, as often happens, a superstition may have a curative effect. The *nech* is therefore still used on Sakhalin as a remedy for nervous sickness and seems to take the place of the various forms of idols and similar figures used for the purpose in similar purposes along the Amur and Ussur.

(V. W. 8. 1, p. 6.)

4. Gilyak. The idol in human shape illustrated on Plate LIII (Fig. 1255/, Fig. 1) was given me by the Gilyak of Dul. Fig. 1 is distinguished in shape by having only one arm; the other one was omitted intentionally. I was unable to learn what the circumstances were with regard to this representation. This idol, too, is carved by a shaman, or upon the advice of one, for winding off yarn. Unknown. I acquired it in the village of Kufh. In the same village among the belongings of the Gilyak that had been put away for the summer in a storage chamber, I found carved idols of another kind, but likewise of human shape. They were cylindrical pieces of wood; on one side of which was a crudely represented human face. The upper end of the wooden piece is carefully depicted and bears a sort of cap of thin strands of bark, which hang

[762 cont./]

it is not the gestural custom to wave back around the neck. Often it is not exactly an idol, but some other kind of amulet, steps blessed by the shaman. In the village of Kufh I saw a little man's neck on the advice of the shaman and worn even after recovery.

Such an amulet is gotten from the shaman. From Sakhalin I obtained an amulet in the form of a carved bow with a human face (see Plate LIII Fig. 1255/, Fig. 9. (Bm. 1, pp. 57, 58.)

2. Gilyak. The village of Pogibshi on the west coast of Sakhalin. In one yurt I saw my host cut long curls of wood-shavings with a knife. On these shavings he placed a piece of fish, and the whole bundle from the top of the stick and tied it together there. This much was intended as a sacrifice to the bear. The Gilyak, who take pride in her chest and set there grooming and complaining. The upper end of the wooden piece is carefully depicted and bears a sort of cap of thin strands of bark, which hang

[753 cont./]

was Sojan, far above Nikolayevsk on the Amur River. Another, less famous shaman, lived, in fact, in the village of Kufh, near Nikolayevsk. In case of sorrowfulness, such as sickness, death, and the like, they are called in to cure the village where there are no shamans (1). There are human implements, however, such as

1. That among the Gilyak the shamans have less a religious significance than a practical one, mixed with superstition, to be sure, also follows from the fact that they never designate as shamans, or regard as corresponding to their ancestors, the priests, but rather physicians and apothecaries, because they heal sicknesses. Nevertheless, the shamans are not, as I thought, to be sure, but not "to shamanize"; see pp. 1153. 1169. cf. also p. 880.)

drums and the like, among other Gilyak, for example, the bodhrans Tagin and Kalmyk in Kuh, though quite other material was shaman. Also, the art of dancing, of beating the drum, and the like, as it is customary in the shaman performances, is known to many other Gilyak and is exercised upon request or as desired without is being regarded as similar or the practitioners being shamans. For example, in the village of Kufh I saw a little girl of about 10 to 12 years old, shaman's work very well, without being a shaman himself. A part of this among the Gilyak, it seems to me, rather than skill in dancing, singing, and the like, is the ability to do certain tricks, such as apparently plunging a knife into the body and the like. Sort for which they particularly praise their great shamans. (Bm. 1, pp. 34, 35.)

[1054 cont./]

2. Gilyak. The shaman performance. I learned that many are especially feared from information given to me by an eyewitness to the conjuring of spirits by a shaman among the Gilyak of Pogibshi. After singing and bowling had been performed by the onlookers, the shaman turned to the god ruling heaven, sun, moon and stars (*ahsun whum*), incidentally, he could say nothing more

G 756 787 789 [522]

/754 cont.: such as epilepsy, for example, by the Gilyak Kappun in Tebach, about whom the following miracle is reported. His hands are tied to his back by rings, and he is then likewise strangled by a strap. Then he sits down on the floor of the yurt, in which the light and the hearth fire are extinguished. As soon as it is dark, he begins singing, which, in shaman fashion, is performed with long prolongation, mentioned by the upper respiration and transposition of the same words, and with a trembling, wailing voice. After this the shaman falls down as if dead.

/755/ Now all these present in the yurt, men, women, and children, begin a song that serves to conjure up a kkgn.

During this conjuration a kkgn appears, invisible to everybody except the shaman, loosens the straps on his neck and hands, and gives him new life. As soon as the singing has died away, the shaman stands there, restored to life.

G 756 787 789 [524]

The shaman Chorvin from Tschcharbach is less powerful, but he is only a boy, a mancherlaigo-tscham. Nevertheless, he, too, does miracles with kkgr. This shaman, Chorvin, also has his sits down in the yurt with his hands tied to his back, the fires are extinguished, and all the onlookers begin a shamanistic song, in which the kkgn is called upon to come and to dance, and in fact, while the singing is still going on, a single kkgn appears larger than a nail comes and dances on his arms. As soon as the singing ceases, the boy shaman stands there unfettered.

G 756 553 787 [525]

Each shaman has his own songs; I could not find out what they mean and whether they are also sung in Gilyak dialects. It seems certain that every shamanistic song serves for conjuring up a kkgn who is supposed to appear and to lend assistance, be it for curing a sickness or for divulging the future, etc. It also seems that, according to the conception of the Gilyak, kkgn always produces his effect while dancing, a conception that may be connected with the practice of dancing on the part of the shaman himself. In the aforementioned shamanistic songs the kkgn is repeatly invited to dance (ifrrr). But the appearance and the dancing of the kkgn are never visible to anyone in the yurt other than only the shaman, and this is precisely the mark and proof of his higher power and supernatural strength. (Bm. II, pp. 47, 48.)

G 756 787 789 [526]

/755 cont.:

31. Gilyak. The Gilyak Junchin from Patchi gave me a minute description of the procedure during the conjuration of a spirit which is done through the power of a shaman. His report corresponded to the shamanistic performances described above to a large extent. I shall let it follow here.

It is night and dark in the yurt. On the floor, in the center of the yurt, where the dogs' table has been removed, a shaman is lying with his arms tied to his back, a noose of straps around his neck, both ends of which are held by two Gilyak sitting far apart and at some distance from the shaman. There is not a sound in the yurt until the shaman shouts the word tfwtsj, whereupon a noise which sounds like dancing pieces of wood is made in the yurt — it emanates from one or several kkgr who have appeared in the yurt. The Gilyak sitting around immediately address the kkgr, asking him various questions as to why he has appeared: whether he needs berries, or elk fat or a root, and the like, or whether he has simply come, etc. The kkgr answers each question affirmatively, negatively, or evasively, expressing himself by different kinds of noise. If the question is followed by a simple hammering, the answer is affirmative; if a more scraping follows, it is negative; finally if a single hammering and then a scraping follow, it means "I do not know."

/756/ Now the kkgn, during constant noise, approach the shaman being bound and noisily dance on him. The shaman breathes his last, audible to everyone. If he is dead, all the Gilyak sitting in the yurt begin the continuation song of the kkgn, but if he is alive, only one of the Gilyak sings, for the choosing of whom the kkgn is questioned. This is done by asking him, "Should this one (the name in question) sing? Should that one (so-and-so) sing?" etc., until the answer is affirmative. The song which the Gilyak begin to sing after the death of the shaman runs: "Restore to life soon, come soon, why hesitate? Come soon, dance soon!"

G 756 787 789 [527]

This song moves the kkgr to dance noisily again down from the shaman. Once more one hears him brave a deep sigh — this time breathing in life anew — and now he stands there freed

1-4. Gilyak idols for various illnesses. 5. Gilyak amulet.

G 756 787 789 [528]

bindings and alive again. With the words, kkunchek via, kkunchek via! (?) which he calls out to each kkgn, the shaman now banishes all kkgr from there again, it is quiet in the yurt, the shaman performs a prayer, and the fire in the hearths may be rekindled. (Bm. II, pp. 55 and 57.)

G 756 787 789 [529]

32. Gilyak. In the village of Tyk on Sakhalin I was told that there are likewise shamans among the Gilyak on Sakhalin; moreover, they are said to have the same conceptions of their art as those on the mainland, drum (kasfj), shaman's belt (Olcha [ongzd]), etc. (Plate LXI /p. 126/, Figs. 2, 4). (S W. R. I, p. 10.)

The large village of Tschoi-wo, on the east coast, consisting of at least 100 yurts, was said to have a shaman who was famous among the Gilyak. (2 W. R. II, p. 7.)

G 756 787 789 [530]

33. Samagir. One evening I heard the sound of drums in the village of Nyfgin. I was told that there was a sick woman, and a shaman's drum was being beaten, and I went there immediately. There was no light in the yurt, and even in the two hearths there were only glowing embers, in front of which women and children were sitting. The dull tones of the drum, the monotonous and melancholy and monotonous singing, resounded from a remote, dark corner of the large, dim room and occasionally became so powerful that the whole yurt rumbled. Accompanied by my guide, I drew closer to the place of the shaman, and I was soon in the middle of the eerie music. When I inquired as to why there was no fire in the yurt, I was told that the shaman sounds were meant for a sick woman in the yurt and that no fire was permitted in connection with this. And, indeed, when after a time the flames were fanned in the hearths and the night-lamps were lighted in the yurt, the drumming and singing instantly ceased. I now approached the shaman, who was sitting on one of the sleeping benches. Next to him lay the sick woman, a pan of coals (jachalacco) with dying

G 789 [531]

225 mu-ssind on the boat supports the assumption that at one time or another the Gilyaks, it seems, regarded a boat as a living thing. Mu-ssind on the boat serves, it seems, as a test to prove shooting distance of the seals in a boat.

If there is an extra man in the boat, if, for instance, there are five oarsmen, one pilot and one other man, then the pilot

226 of the five oarsmen, one pilot and one other man, then the pilot

476 -if he is the oldest man in the boat - sits at the stern without

551 doing anything, and his junior takes over the rudder. The

885 Gilyaks illustrated this point to me by the following example: if Xitkun and Kaun are among the hunters in the boat and if Kaun also takes the place of the pilot, because Kaun is the oldest, would sit at the stern and do nothing except for giving orders and Kaun, who is Xitkun's junior, would take over the rudder. If, on the other hand, Tujun, Xitkun, Pl'akuk and Kaun and younger hunters set out in a boat then Pl'akuk and Kaun, who are younger than Tujun and Xitkun, are at the oars, Xitkun takes over the rudder and Tujun, as the oldest of them all sits at the stern. It happens that the pilot is younger than the extra man. In that case the pilot takes the place of the rudder and the extra man sits at the stern. I personally know of such a case. I was once asked to go hunting with him in the boat old man Onkan who sat at the stern and did nothing while Noryp tended the rudder. When Noryp was at the helm shooting at the seals and, to whom Noryp had turned over the steering oar, tended the rudder, Onkan again sat at the stern. Jesting about his weak eyesight, Onkan said to me: "I was simply sitting without doing a thing, but I spy my share." I found out from others that during the hunt he helped build the campfire and prepare how of theheat northward, towards the cape barely visible in the distance. The Gilyaks rowed calmly and quietly. They need for nothing. At the stern of their boat sits an experienced pilot, tested in trips. At the bow are placed a representation of the sea bird ... and the figuiines (?-ij). They will vigilantly look out for and protect their course.

When the boat became a tiny spot in the distance and its outlines blended with the water, the women who saw off the hunters left the shore for home.

225 After leaving the village the hunters turn northward. They

223 first go to Ul'-xaf "sacred cape." (1) Once there, they put

774 Mi-ri-d is performed at the stern of the boat. Two short

791 sticks, the thickness of a match are driven into the stern board. The distance between them is approximately two fingers. Then they tie a thin thread made of sette fibres around the sticks. The Gilyaks usually perform mi-ri-d on bands of children. They believe that a thread made of hair of a dog and sette fibre and tied around a child's hand protects the child from illness. The fact that the Gilyaks perform

G 789 [532]

411 called yaldnas and the sea-end is called ja-bax-puks

225 "master's stone tie.' To this end, which is lowered into the

198 sea, is tied a stone called 'ine' or 'master stone,'

225 which, according to the Gilyaks, weighs two poods. This stone, the Gilyaks explained to me, forms the anchor of the seine. In place of Gilyak seines, stones are attached to the bottom of the seine. They are called tatr-pax . Large wooden floats

[vx.] are fastened to the upper cord of the seine. When the head of a siwuch gets caught in the net, the siwuch starts to flounder; at times so violently that it throws the lower edge of the net, which is provided with pieces of glass over the upper cord and finds itself literally in a sack. Sometimes dolphins fall into

[ml] the seine. The seals pro-t are shrewd and are seldom caught in the net.

In the past as well as at the present time the Gilyaks of the village Kul set the tolaxta at Ko-jalu, Ki-xalu, Vilk, Lo-ri, and -r.

According to old man Virp, some clans in the village Kul owned seal hunting places in the past.

223 Thus clan Qavjuj owned L. Luivxj-pur, 2. Ayuqej,

924 3. Ko-ri-pur, 4. Ko-ri-pur.

471 Luiv. -p-r and a'reqej are names of rocks sticking out of the water. Seals crawl out of water onto these rocks.

225 1 is called Gilyak Xitkun who, having already returned from

502 a hunt, put out to sea with the hunters a second time. Five

225 hunters sat in the boat and paddled by strong and simultaneous strokes of five pair of oars the boat took lightly and quickly to sea. Xitkun, firmly gripping the rudder, set the

225 bow of theheat northward, towards the cape barely visible in the distance. The Gilyaks rowed calmly and quietly. They need for nothing. At the stern of their boat sits an experienced pilot, tested in trips. At the bow are placed a representation of the sea bird ... and the figuiines [vx]. They will vigilantly look out for and protect their course.

When the boat became a tiny spot in the distance and its outlines blended with the water, the women who saw off the hunters left the shore for home.

225 After leaving the village the hunters turn northward. They

223 first go to Ul'-xaf "sacred cape." (1) Once there, they put

edominantly of a practical disposition and are not fond of
mination. Moreover, they do not yet have firm beliefs
l their prophets, the shamans, often misuse their imag-
tion so boldly that their assertions contradict those of
er shamans or of everyday experience. From conversa-
ns, from customs and actions, we may conclude that the
yak believe in a supreme being, in many lesser spirits,
h good and bad, and in immortality, but they have not
erged from fetishism.

God (Kush or Kur) made everything, he lives in heaven and
ver appears. He is held to be good, but otherwise nothing
said of his characteristics. In one village, however, I
rd that God is very angry if a shaman is put to death. In
s we may already see something like priestly self-glorifi-
tion. Kush is not worshipped, in fact, one does not bother
ch about him, only now and then something is sacrificed
him, but it is questionable whether this is meant for him
for his subordinate spirits. For instance, when a Gilyak
osses a dangerous passage on his journey, he pours a
wl of spirits on the earth or in the waters: this is the
crifice to God. Sometimes one of the best dogs is
crificed to him, whereupon it is eaten. Near a village a
ke is sometimes rammed into the earth and beneath it
llet or fish are buried, or tobacco and such things [240]
tied on top, - all this is meant to be for the supreme
ng. Such a stake remains standing until it rots.

The bear usually appears as the executor of divine
dinances, and he punishes the bad people during their life-
me. As a matter of fact, there are a number of superstiu
us ideas connected with the bear, and thus he may be
garded as a "sacred" animal, but nobody regards him as
od or demigod.

The Gilyak do not bother much about the tiger, for they
dom encounter him. But the Goldi and Manchurians re-
rd him as much more than a wild animal. He is regarded
having some mysterious power, he is spoken of with a
rtain caution and referred to as "the honorable colored
e". (1) It is also said of him that he only attacks bad

nure. On a high, precipitous river bank
formerly stood; of this only a few stone
aring Chinese and Mongolian inscriptions.

771 More frequently one finds those who recognize a supreme being and immortality, but do not bother much about them. Some do not even believe in the idols, and these may already reflect the opinions of those of other beliefs. Thus the little village of Kula near Nikolayevsk has for some time already had neither idols nor shamans. I was visited by two brothers who were born there and who were both wide-awake and good-natured chaps; they confessed to me that they believe in god, but regard the idols as foolishness.

756 The shamans are the mediators between the visible and
789 invisible world; they always excel in experience and
782 perspicacity, whereby they know how to predict many things, for instance, changes in the weather, and thus they exert their influence. Their chief function consists of driving out sickness which is mainly the work of evil spirits. Incidentally they are [243] also consulted on other occasions. For instance, there may be few fish at one place or another; the shaman is consulted and orders a dog of such and such color to be killed and offered up in the river at the designated place. The sacrificial gifts are generally made according to the shaman's prescriptions. A competent shaman knows how to "drive away the rain" by threatening the clouds and denouncing them loudly. Likewise, of course, he understands how to make rain and thunderstorms. "As soon as he begins his magic song, rain clouds immediately appear", a Gilyak believer told me. His magic practices can also bring harm. For instance, he can cause a human somewhere far off in some village to die of a fish or a drink which does not harm others. He can flood a village, and so forth. Occasionally the magic practices are feared, but the magician is never persecuted. However, the shamans are usually merciful enough to stick to threats only, if someone irritates them; and besides, not everybody believes in them.

755 If a shaman is invited to visit a sick person he appears
534 in his official costume. He wears a girdle on which hang numerous clinking tin objects. In his hand he carries his drum and his staff. The drum is about two-thirds meters long and consists of a wooden ring on which is stretched a pig skin or the skin of a stag, and on which hang a number of little bells. He alternately beats his drum and sings

116, 789

"Our attention was attracted by a curious noise from some settlement far up the river, sounding like the beating of a bass-drum. This, upon inquiry, we learned to a party of Gilaks invoking the spirits to attend them and crown their efforts in fishin with success."

174 Thus, it is indisputable that the Gilyak are relatively late arrivals on Sakhalin. There are, however, many reasons for believing that the territory occupied by the Gilyak at the present time cannot be considered very ancient, that, strange as it seems, the Gilyak arrived in their present territory from more northerly areas closer to the Arctic Circle. Indeed, some of the peculiarities of Gilyak life seem to be clear survivals from a period of residence in a colder climate. The most typical proof of this kind is a remnant connected with their winter abode -- the dugout. The Gilyak dugout is built in the manner of the Kamchadal. But while there is no door in the Kamchadal yurt, because of the severity of the arctic winter, and its function is performed by the smoke opening, among the Gilyak, due to the lesser severity of the winter, the dugout has a passageway from which a low, sliding door leads into the yurt.

174 171 342

342 796 178 There are also times when the smoke opening in the Gilyak yurt once again performs the function of a door as among the Kamchadal. This is during the days of the bear festival, when the furthest echoes from the most remote antiquity come to life from the mist of millenniums, when a ritual which has not changed for tens of centuries is observed with reverential strictness. Then there returns the memory of the smoke opening, which at one time served as the only entrance into the yurt; through this opening a Gilyak with the skin and the meat of the bear killed during the festival descends down a pole which is specially set up for this occasion. At the end of the festival all the accessories of the ritual, as well as the bones of the bear, are carried out of the yurt through the same smoke opening. The violation of this ritual is regarded as the greatest sin. Those Gilyak who have adopted the Manchu [177] yurt, where there is no smoke opening, are forced to open their windows of fish skin during the days of the festival, in spite of the February frost, so that in this extraordinary /18/ way they can take the sacred relics in and out and thus, albeit approximately, perform the ancient ritual. That the fact cited by us is actually a [192] remnant of their way of life is clearly proved by the fact that the very concepts for "enter" and "exit" from the yurt are expressed in Gilyak by words whose literal meaning is "dive in" and "dive out"

(kuzind and jugynd), which is fully consistent with the manner of entering and leaving through the smoke opening.

I shall not at this point speak of any other aspect of the arctic way of life. I shall mention only the remarkable fact that riding on dogs (we encounter it among the Yukagir, the Chukchee, the Eskimo, the Aleut, the Koryak, and the Kamchadal) is undoubtedly a characteristic peculiarity of the purely arctic way of life adopted by the natives of the Amur region, the Ainu, the Goldi, and the Orochi, from the Gilyak. The Gilyak term "tu" -- dog sled -- became the property of both the Ainu and the Tungus tribes. The priority, as it were, of the Gilyak in this respect is clearly revealed in everything. The Ainu and the Tungus tribes (the Goldi and the Orochi) have adopted from the Gilyak not only the term and the principle of conveyance on dogs, but also the details of building the sled, the ways of sitting on the sled (astride, with the feet on ski along the sides of the sled), the harness of the dogs, and driving them. It is remarkable that among the reindeer Chukchee, among whom dog-raising is preserved only in legends, the Gilyak way of sitting on the sled (astride) has been preserved to the present. The same way of sitting was habitual among the Kamchadal as well.

In connection with this hypothesis, it is interesting to compare a very widespread legend.

Among the numerous legends that I have collected about the origin of the Gilyak clans, I have frequently encountered a legend about how this or that clan came to Sakhalin on the so-called "hovykh." By "hovykh" the Gilyak mean everything that is carried on the current of a river or sea, for the most part clods of earth or tundra turf broken off from the bank, and also floes of ice which are carried on a sea current. One such hovykh is still pointed out on the eastern shore of Sakhalin in Nyyvo Bay, where it formed a minuscule island opposite the settlement of Takrvo. It is alleged that a part of the clan now living in the settlement of Tangi on the western shore appeared on this hovykh. There is nothing impossible about conveyance on a hovykh. It not infrequently happens that during the spring hunt for seals a sudden

traps begin. This is perhaps the most interesting season in the manifold yearly activities of the Gilyak. He leaves his home for several weeks and betakes himself to his inherited sable stream to watch for the valuable little beasts. During the daytime he inspects his snares and traps, shooting birds and any kind of animal that he meets along the way; for the night he betakes himself to his little balagan. He must live through some difficult moments in this little balagan. Here, in the wild taiga, amidst the gloom of night, the silence of the wilderness, or the howl of a snowstorm, to the lonely savage, cooped up at his minuscule hearth or vainly trying to warm himself /27/ at the temperature of the freezing of mercury, each rustle, each strange sound, each snap of a tree, howl of the wind, moan of a night bird, and, finally, the hallucinations of his own frightened imagination depict in all their terrible reality all the horrors of the Gilyak demonology. The devils and ogres of all the elements in the imagry of the Gilyak appear to him, to cause his destruction. And the terrible exhaustion after his labors, the lack of food -- all this aggravates the horror of the situation, bringing sickness often even death. Sable hunting, however, promises more than just terrors and adversity. A successful catch, gay company, a triumphal return home with the catch, stories about experiences, all this fully rewards the hunter worn out with suffering. But, on the whole, the Gilyak is not a hunter. Hunting with dogs is unfamiliar to him, the risky pursuit of bears, of which the Tungus are so fond, does not attract the Gilyak. By and large he is an ichthyophagist, and someone has very correctly said about him that he lives by frutti di mare /the fruits of the sea/.

The winter months are the gayest ones in the year. The supplies of fish have not yet been exhausted. On the earnings from the catch, tea, tobacco, rice, and buda were stored up, and the Gilyak cares little about the future. Endless visiting begins, and listening to the storytellers at night, and, beginning in February, there are the bear festivals, the happiest days in the life of the Gilyak. In March, however, the results of the winter extravagance begin to tell, and there come the hard days of hunger and sometimes scurvy, which carries away dozens of flourishing lives. In

/52 cont./

825 distinguished by the same meekness with regard to man and for this very reason is worshiped by the local natives.

The bear that awakens early from its winter sleep and in a frenzy of hunger throws itself upon a man is a crazy bear or a vagrant who has been driven away by the "master." In those rare cases when a Gilyak, while hunting, is killed in a fight with a bear, this is ascribed to extraordinary circumstances: either that it was not a bear, but a devil in the shape of a bear or that it was a female bear who fell in love with the Gilyak and who wanted to transplant his soul inside herself.

If a bear falls prey to a Gilyak, it is only because the bear itself wants it. In its struggle with the man, the bear itself offered a good spot for the fatal blow. After all, it loses nothing from it. After breathing its last, it actually casts to the Gilyak only its apparent covering, its shaggy skin, while it remains alive and unharmed as before. A few days later, at the end of the
796 bear festival, when /53/ its meat has been eaten and the bones placed in a storehouse of honor, the Gilyak kill several dogs, in whose company the bear gaily runs, with all its ornaments and presents, to the "master" of the highest mountain.

The whale-like, large-toothed sea animal -- the kosatka -- is worshiped no less than the bear on land. One would think, what could be stronger and more terrible in the eyes of the Gilyak than the whale, this tremendous and mighty monster, spouting fountains, for whom a storm is a diversion, and each of whose vertebrae is heavier than the largest Gilyak? Yet there is a beast before whose sharp, cone-like teeth the whale flees without a backward glance and throws itself with a roar of despair on the banks and the shallows of the Sakhalin coast where the Ainu and the Gilyak make opulent feasts of him. This is the kosatka. It creates an imposing impression, even on a European, when a kosatka unexpectedly appears near his boat, and the general flight of all the inhabitants of the sea begins. At the sight of this terrible beast fish, seals, dolphins, and eared seals scatter as if seized, and forgetting all caution,

/57 cont./

123 the women rushed to their storehouse to fetch the precious buda
776 reserved for sacrifices, in order to feed me and my companions
782 and thereby fulfill the will of the Head of the earth. Thus, thanks to the piece of candy, I, in the opinion of the Gilyak, not only saved my life, but unexpectedly obtained for my companions and myself a dish which we had not seen for a long time.

782 The Gilyak also has live sacrifices, the objects of which are dogs. A dog is killed, by strangulation, before the season of sable hunting, during the bear festival, before departure for a long journey, during sickness, and generally on the solemn occasions of life. Before it is killed, it is fed, and at that time, depending upon the circumstances, it is given one or another
[796] mission. Thus, during the bear festival, the dog will be told: "Follow your bear to the highest mountain. May the master love you. Change this hair and come down next year as a bear
[755] so that I may see you." When a dog is killed on the occasion of sickness, it is asked to be the intercessor for the sick man before the god to which it is being sent.

Thus the victim is a simple envoy, whose soul, after its death, will reach the master who lives on the highest mountain.

775 Clan gods constitute a special category of gods. As a
614 matter of fact, these gods play a most important role in the life of the Gilyak, and it is most often to them that the Gilyak offers his sacrifices. In each element there is a clan god. The clan gods are of particular /58/ interest, because in this tribe we can most clearly trace the very genesis of this very common fact of primitive religion. Even among the Greeks and the Romans the worship of clan gods was a common phenomenon. The clan gods of the Gilyak are not supernatural mythical beings, as among the Greeks and the Romans, but their very own clansmen who, for a variety of reasons, have entered the clan
775 of one or another god "master." A particularly fortunate com-
614 bination of circumstances, if I may express myself thus, is re-
766 quired to attain such an honor. If, while hunting, a Gilyak was killed by a bear, if he fell prey to the waves on the water, if he was murdered or burned to death through his own carelessness, if, according to the shaman's explanation, a woman died from

/59 cont./

614 as well as of the cult of ancestors, but I shall confine myself
171 here, for the time being, to what has been said, all the more since the institution of totemism has not assumed the same sharply pronounced form among this tribe that it did among other, specifically totemistic tribes, for example, the Australians, the North American Indians, the ancient Egyptians, etc.

614 Sacrifices to the clan gods are offered periodically. All
782 sorts of delicacies of the Gilyak cuisine are prepared by each
796 family prior to the day of the festival, and they are placed in particular vessels reserved especially for this occasion. On the next day the entire male population of the clan sets out in boats or, in case of a disturbance on the sea, on foot in the taiga and stations itself on its clan plot of ground near its clan sign. The elder in the clan takes a handful from each dish and throws it, crying out at the same time, "chukh!" i.e., "This is for you!" After this the feasting, games, wrestling, and other such diversions begin. In the spring, with the appearance of the seals, the sacrifice for the "sea or river" man is arranged, consisting of the solemn throwing of viands into a hole in the ice. On the Amur these sacrifices are made from a boat immediately after the opening of the river; the boats are decorated with sacred shavings, and gay races in them are arranged.

796 The Gilyak have a great number of clan festivals, but
614 the most important of these is the so-called bear festival. This
628 festival plays a tremendous role in the social life of the Gilyak. In fact, it is not even a clan, but an interclan festival. The
[574] clan arranging the festival takes on itself only the expenses and trouble of arranging the festival; the most important role is played by the outside clans invited to participate in it. Since a year does not pass without such festivals occurring in one place or another, assembling representatives of many clans for a number of days, these occasions play the same role in the social intercourse of the Gilyak tribe as the Olympics and other games once played in Greece. The winter bear-festival is called a game (chkhyf-lekhernd -- the bear game).

/60/

796 231 This festival has already been described many times, and therefore I shall consider for the most part those features that have not been noted before. First of all, it is remarkable [969] that ordinarily the festival is generally celebrated in memory of a dead clansman, being a kind of funeral feast for the deceased. A very close kinsman of the deceased buys for money or catches for himself in the taiga a bear cub, which is brought solemnly and amidst cries of joy and music into the native village. Here a separate framework is built for it out of thick poles and spars and decorated in the corners [614] with sacred trees. The feeding of the cub is done, not by its specific master, but by the entire clan: One or another family in turn, feeds the honored guest for the duration of the appointed time, cleans the framework, and in general takes care of it in every way. On appointed days the bear is taken from its cage for a walk. This is a great event in the life of the settlement, taking many hours and giving extraordinary pleasure to young and old. The procedure of getting the bear out of the cage is quite complicated. First of all, while the bear is still in the case, they hobble its legs, sticking through the spaces between the poles thongs which end in quickly tightened nooses and are put on sticks. After this they take away a few links of the top part of the cage, providing the bear with the opportunity to stick its head out; then they put a stick into its mouth, which it violently clenches with its teeth, and at this time they very tightly bind its mouth. After this, it is calmly pulled out of the cage, and an iron ring is put on it, clasping it at the belly. Long thongs are attached to this ring on both sides, and several men hold fast to them, pulling them hard in opposite directions; they do not give the bear any opportunity to attack the surrounding people. Only then do they free it of its hobble and take it for a walk.

/60 cont./

796 231 Having bathed the bear and teased it to their satisfaction and made fun of it, they tie it between two posts and leave it alone. It generally uses this respite to give in to the instinct, now futile for it, to dig the ground with its paws for a lair.

The feeding of the bear continues for several years, until the cub becomes a well-fed, large beast, and then they begin the prefestival preparations. This means extensive preparations. For several days, one will have to feed and entertain with all kinds of delicacies, not only clansmen and villagers, but also a great number of guests from other places and, /61/ in addition, the numerous dogs on which these guests came. All this requires trouble, work, and great expense, because, besides dishes of local products, large purchases of rice, buda, flour, tea, sugar, and vodka or Chinese grain vodka are made. Here is [614] [182] displayed that remarkable clan organization of the Gilyak, so impressive in its harmonious combination of social solidarity and individual freedom.

796 621 476 There is no compulsory organ to assemble products, to compel, demand, or control. Conscious of its obligation to participate in the common religious affair, each family works with all its might, not out of fear, not from conscience, cooks all sorts of dishes, helps with the chores, and contributes its mite, according to its means, toward the expense of the purchases. The money and supplies are handed over to the master of the bear, who disposes of them without control. No one reprimands anyone, for each one strives to make the festival 796 come off most brilliantly. Several days before the festival, which is generally celebrated in February, a different kind of work begins -- the building of an arena for the killing of the bear. The arena consists of a small stamped-down plot of [778] ground, in which, depending on the number of bears that are being killed, is placed one or several pairs of sacred trees-posts hung with inau and covered with complicated ritual carving; a bear is tied between them. Up to this plot of ground is stamped a long, narrow alley, on both sides of which, in two rows, are set up 30 pairs of young trees: the first 15 pairs are fir; the other 15 are purple willow.

/61 cont./

796 778 The eve has finally arrived. This day is called Nau-vakhnku, the day of the preparation of the inau, i.e., sticks with sharpened ends, which play an important religious role in the festival. These sticks, of various forms and sizes, represent orators-intercessors, which, together with the slain bear will set out to go to the master of the taiga and remind him of the needs of the Gilyak, and will be his talismans as well. Each kind of inau is made in pairs; each pair is spouses, so that they will be happier, and so that they will propagate and multiply. Some of the inau are hung as ornamentation on the posts of the 796 arena; some are attached to them at the bottom. While the 574 preparation of the inau takes place, the clan elder, together 614 with the master of the bear, and several clansmen ride out to greet the so-called narkh'i. These narkh'i are honored guests and play a very important role in the festival: the killing of the bear is left to them alone, to them /62/ alone is given all the meat of the killed beast and even the skin. The narkh'i are not arbitrarily chosen people, but of necessity representatives of that clan into which the daughters of the master of the bear, as well as the women of his clan in general, marry. [606] Most often, therefore, a narkh is a son-in-law /zyat'/ of the master of the bear /see navkh, p. 82/. The narkh'i in turn take along their sons-in-law and decide among themselves which one of them is to kill the bear. If several bears are killed at the same time, narkh'i are invited from all the clans from which the clan arranging the festival has taken wives, so that sometimes up to ten clans participate in such a festival. It is these narkh'i whom the master of the bear must solemnly greet and lavishly entertain when he meets them, and transport them with honor to his village.

796 231 The following day is the day of the killing. It is called Na-khan-ku (the day of the killing of the bear) or Chkhyf-aryn-ku (the day of the feeding of the bear). Early in the morning the bear is taken out of its cage in the same way as to take it for a walk. A large woven belt to which are tied bags full of assorted viands is put on it, and it is tied up near a yurt and given the opportunity to enjoy the last hours of life remaining to it in this

/62 cont./

796 231 semifreedom. Around noon it is untied and, held by thongs on both sides, is taken for a walk. This walk, however, gives the bear little pleasure, for from every side they tease it in every way and try to drive it beyond patience. The bear at first lets out some grumbling, but gradually becomes enraged, attempts to attack the people, and gets up on its hind legs, but it is held by dozens of hands, and all its rage is lost in fruitless thrashing. But now, seizing the moment, the master of the bear cautiously steals up, seizes it by the head, kisses it good-by, and, without waiting for a return kiss, speedily jumps away. Most often, however, the bear freely returns the good-by kiss to its protector, who considers himself quite lucky if the clumsy one limits itself to tearing off a good chunk of meat and does not get its teeth into, say, an eye or the throat arteries. A wound inflicted by a bear on such occasions, however, is considered an expression of good will on the part of the good-natured beast. The walk ends in leading the bear three times around the yurt of its master. Beforehand everything living, even suckling babies and animals, is removed from the yurt; only the clan elder stands in the passageway, and every time the bear comes around even with the entrance he teases it with a long pole with an uncut crown of coniferous needles at the end and speaks gentle words. /63/ At the end of this procedure the bear is led to the plot of ground and tied between the two trees which have been ritually decorated. The pole with which the bear was teased is fixed to the hearth, so that its spreading crown of coniferous needles rises high above the smoke opening. After that there is an intermission. The 796 574 bear is again left to itself, while the people assemble in a dense throng in the yurt of the master of the bear, where lavish entertainment begins. They literally sit on one another's heads; nonetheless the gaiety is extraordinary; the loud talk, the laughter, and the jokes never cease. Only the narkh'i are serious: they bend their bows, sharpen their arrows, and prepare themselves for the crucial moment. Meanwhile all kinds of cold viands are carried in huge troughs on dog sleds to the sacred plot of ground; there are frozen fish of all kinds, rice,

/63 cont./

796 574 buda, and beans, and, finally, all kinds of the ritual dish, "the mos'," whose method of preparation I have already described in the second chapter.

796 231 This is all placed in rows near the bear. The clan elder or the master feeds the bear for the last time from a big spoon on a long handle, giving it a taste of each dish, while asking it to offer a "good spot" at the time of the killing. Finally he addresses the bear with the following farewell words: "Good-by. I am feeding you for the last time. Go quickly, go quickly to your master, and may your master greatly love you." Other clansmen also try to offer something to their old friend; even 796 [562] small children participate in this kindly affair. After the short break all the people pour out of the yurt, with the exception of the women, who are forbidden to be present at the killing of the bear -- otherwise it will not offer a good spot -- and arrange themselves in fighting formation. The master of the bear or the clan elder walks in front with a kettle and an ax in his hands. Next to him is the elder of the narkh'i, also with a kettle and an ax. Behind them are the remaining narkh'i, with bows and arrows, and, finally, all the participants in the festival follow on ski on both sides in a picturesque, happy throng. Within a hundred paces of the place where the bear is tied, the people stop, the master drives his ax into the snow and places the kettle next to it; the narkh does the same with his kettle and ax. The ax and the kettle bear the characteristic name of nich, i.e., mine -- thine. The master of the bear and the narkh elder exchange these nich'i at the end of the festival as a sign 796 526 of eternal brotherhood. When the nich'i have been placed, the next to the last act of the tragedy begins: the preliminary competitive archery. Once, when the bow played a more important role in the life of the Gilyak, this shooting /64/ no doubt had the character of a great competition; now, however, it is reduced almost to a simple formality. The target is a board placed behind the bear. The narkh'i shoot first, and after them the clansmen of the master; the latter try not to embarrass the guests and make intentional misses. The crowd follows with

/64 cont./

796 [526] rapt attention, and each shot is accompanied by loud appro or by noisy outbursts of laughter. After this preliminary sho ing the crowd moves closer to the bear and stops a few steps away from it. Amidst the deep silence that prevails, the selected narkh steps forward, takes his bow in his hands, an begins to watch the bear, waiting for the time when it "wil offer the good spot," i.e., will turn so that it will be easy to get right to the heart. The bear often calmly remains in his place, however, digging in the snow with its paws and caring very little about offering a good spot. In order to dr it out of its calm state and compel it to offer a good spot, and also to drive it into a rage and thereby lighten for it, i their opinion, the pain from the wound inflicted, they begi tease it. The bear thrashes in all directions, throws itself a its tormentors in helpless anger, and stands up on its hind le Meanwhile the archer follows it with the most rapt attentio and, seizing the right moment, finally releases his sharpen arrow. The bear at first stops perplexed, then clutches its breast with his paw, tears appear in its eyes, and blood app from the throat out of its mouth. Sometimes it begins to th furiously, but most frequently it falls calmly with perplexe hurt in its eyes. Although, as a rule, death comes immedi nevertheless, just in case, several people throw themselves the slain animal and begin to strangle it to hasten its death and prevent it from suffering. After this they take the chai off the bear, carefully straighten out its fur, and put it in a pose of majestic calm, with outstretched front and hind pa the head, turned to the west, rests on the front paws. In th pose it resembles a man stretched out on the ground, lost in thought, leaning on his elbows. The people seat themselve ceremoniously in two rows, some on dog sleds, some direct on the snow, others on ski, and there begins the annihilatio those cold dishes which were brought for the feeding of the Having eaten, the guests gradually disperse; only the closes clansmen, who begin to skin the bear, remain. This proce is surrounded by strict ritual: the method of cutting the me

/64 cont./

796 cutting up /65/ the bones, and so forth -- everything is done in conformity with permanently established rules. The first moment of this procedure, immediately following the removal of the skin, presents a very imposing sight for the Gilyak. The white (from the heavy layer of fat), soft body, stretched out on its back, those front paws with long and even fingers, resembling, to the point of illusion, human hands, amid the gloom of night, must irresistibly evoke in the savage the notion that he is not in the presence of a dead beast, but of a man of a particular nature, who has taken off his hairy skin and now majestically rests, following the least movement of his knife. The entire, detached skin of the bear, together with the head, is carried into the yurt, not through the door, but through the smoke opening, and down the high pole with the crown of coniferous needles, which still rises above the earth yurt. The clan elder carefully takes hold of the skin and, striking it lightly with a stick, says: "Remember that you were fed by such and such old man and by such and such old woman." Meanwhile the women greet the sacred head with a solemn [534] march played on a most original instrument. This is a dry log of larch hung on a frame, on which several people in turn beat out in rhythm relatively monotonous sounds. To the sounds of this charming music the clan elder installs the head of the bear on the plank bed of honor, covered with coniferous needles. Under the head there is a quiver with arrows and, by its side, tobacco, sugar, and other viands. [774] The bear takes along the souls of all these things. The carcasses of meat stay outside on a special wooden platform, and parts are brought in through the smoke opening. The day ends with eating, conversations, games of the youth, dances, and fencing with sticks. The next day is called the day of the feeding of the head. From morning until night kettles boil inside the yurt, and all kinds of dishes of the Gilyak cuisine are prepared. A portion of each dish is put in a separate vessel and placed next to the bear's head. This, then, means "to feed the head." [372] On the same day the boiling of the bear meat begins. The meat is boiled outside in a special kettle; the fire is ignited with the sacred steel, which is not used on any other occasion.

/65 cont./

796 574 On this day, however, no one is allowed to taste the prepared bear meat. This takes place on the next day, which is called the day of treating the narkh'i (narkh-arin-ku). The narkh'i seat themselves ceremoniously along the plank beds, while the host solemnly walks among the rows and distributes pieces of [576] bear meat. More gracious hosts feed their guests with their own hands, sticking into their mouths /66/ a huge piece of fat; the guest bites off a piece, leaving it to his neighbor to finish [262] what he has started. Only the narkh'i are allowed to eat bear [614] meat; and his clan are denied this right; they are allowed to eat only a soup of rice or buda with the fat from the bears' carcasses. This soup is prepared and consumed in enormous quantities.

796 264 576 It is considered the greatest honor for the host to feed his guests to satiety. His graciousness goes so far that when a guest who has eaten too much of the fatty soup begins to vomit it, the host respectfully offers his mouth and drinks the vomit. It would be hard to imagine more refined graciousness. In intervals between feasting, dog races, games, fencing with sticks, and circle dancing are arranged.

796 533 273 All day the girls take turns playing music on the suspended log and accompany their primitive music with humorous and at times very frivolous songs. Not the least role in the feast is played by Russian vodka or Chinese grain vodka, which lifts [554] the gaiety of the feasters to its apogee. To make one's guests drunk is considered the greatest honor. "At my house yesterday the narkh'i got drunk two times," the master of a bear once boasted to me.

796 Finally the last day of the festival comes, the day of departure of the narkh'i. Carcasses of bear meat and all kinds of viands prepared for their families and clansmen are placed [782] on their sleds. At the last moment the narkh'i lead several dogs into the yurt and tie them around the plank bed of honor to the bear's skull. In addition, as a present, they put a spear, a thong, and other such items next to the head of the animal or stuck into it. Again, in farewell, the nark'i are lavishly

/66 cont./

6 fed, and then, exchanging farewell glances with the dogs, they silently leave. Upon passing over the threshold, it rema for them to conclude the last ceremony, which bears the char teristic name of "lymyzyn zychyvynd" -- "the stamping of the threshold." This ceremony consists in placing nich'i (a kettle and an ax) on both sides of the threshold, the nich of t departer -- on the inner side, and the nich of the host on the outer side; the departer must first step over the inner nich wi one foot and then over the outer one with the other.

6 On this same day the last act is concluded -- the sacr 2 of the dogs. The dogs presented by the narkh'i, as well as th dogs sacrificed by the master for this occasion, are led out to plot of ground where the bear was killed and tied up to those same trees /67/ to which the bear was tied. The head of the bear with all the presents given to it, is also brought here. E pair of dogs consists of a male and a female so they will be 8 happier on the journey. Pairs of inau of the same kind as tho that were prepared for seeing off the bear and equal in numbe to the number of pairs of dogs are then stuck into the ground the neighborhood of the trees. The heads of the dogs are orn mented with shavings, which are painted with the juice of berries and attached to them. Before they are killed, the do are fed with choice viands and are exhorted in the following way: "Go, go to your master, take yourself up to the highest mountain, change your skin, and next year come down here, come down here as a bear so that I may have a look at you, this, come down, farewell, travel well!" After this, they kil the dogs by strangulation. This procedure is carried out some peculiarly. Two men seize a dog by its hind legs and forcefu pull the unfortunate animal as far as possible away from the t to which it is tied with a tightening noose. At that time, tw other men seize the two front paws; a fifth presses on the dog's neck, accelerating the process of strangulation, and a

/67 cont./

796 sixth sticks a sharp stick in its rectal opening to prevent ex-
782 cretion from the intestines. When the dogs are strangled, they are laid down on the snow with the same ceremony and in the same pose as the bears. A fire is ignited; they skin the killed animals and throw the meat into a kettle.

796 All participate in the feast of dog meat, both men and
[262] women, but only clansmen.

[766] The following day the head of the bear and his bones, as well as the vessels, the arrows, the thongs, and so forth -- everything is transported to a traditional storehouse which
796 serves as a sepulcher for the remains of the sacred beast. At
774 this moment the soul of the bear finally sets out on the
825 journey to its "master." Burdened with the presents given to it and accompanied by the souls of the slain dogs friskily running alongside and by the souls of the sharpened sticks (inau), it reaches the highest mountain where its "master" lives, who is also the master of the taiga -- Pal'yzr.

796 What is the genesis of this strange festival which offers to many an amazing riddle.

796 In order to understand the idea of it, we must first of all
224 consider the fact that the bear festivals are celebrated not only on the occasion of killing a domestic bear, as people usually erroneously think, but every time that a Gilyak succeeds in killing a bear while hunting. True, in these instances the dimensions of the festival are less /68/ grandiose, but the essence remains the same. When the skin and the head of a bear killed in the taiga are brought into the village, a triumphal welcome is given with music and a solemn cere-
[782] monial. The head is placed on a sacred platform, is fed, and is given the same sacrificial offerings as upon the killing of a domestic bear; the narkh'i are similarly called together.
[766] Dogs are similarly sacrificed; the bones are preserved with the same ceremony and in the same place as the remains of a
796 domestic bear. Consequently the ceremonial of the great
825 winter festival is only the widespread ritual performed at every killing of a bear, logically stemming from that respectful attitude toward the bear which I mentioned earlier.

lyak, who is convinced of the constant
wds /69/ of evil spirits eternally threaten-
alth, must be extremely beneficial. The
ighty creature, like a very strong disinfectant,
away any insidious spirit. It is not by

/69 cont./

[796] [825] accident that the death of a relative, i.e., the fact of the extraordinarily malicious designs of an evil spirit, forces him to catch or buy a bear cub, whatever the cost. That a bear [787] by its mere presence drives away evil spirits may be seen [755] from the single fact that during the bear festival the shaman [756] is forbidden to consult in his dreams his kekhn (see below) about curing a sick man, i.e., driving out the evil spirits residing in him, for the bear will be offended; he himself can drive them away with his own strength. Analogies to [171] such beliefs in the purifying influence of the bear and of many other animals are to be found in vestiges of our own survivals and ceremonies. As is well known, in Little Russia /Ukraine/ there existed the custom of leading a bear through the village on certain holidays for purification... In our grand stables the custom of keeping goats, who are supposed to protect the horses and the grooms from evil power, has [614] been preserved up to the present. And so, similarly, the clan that feeds a bear performs an important social function, securing all their own against the evil designs of their strongest, though invisible enemies. Unique religious sanitation, but the only kind available to primitive man!

Let us consider the meaning of those ceremonies that accompany every case of bear killing. First of all we should say that the Gilyak does not consider the killing of a bear a sin. In spite of all his respect for it, he is convinced that in the first place those bears that fall prey to him are sent to him by the "master" of the taiga, for whom the bears play the same role that dogs do for the Gilyak. "The bear is the dog of the master of the mountain," such is the formula of the [974] Gilyak. In addition, the bear loses nothing by its violent death, for death to it is only leaving its body to the Gilyak, while its soul -- that living duplicate -- then gaily runs to its master as if nothing had happened. Therefore no expiation whatever is required here. But the bear, even though only the dog of a forest man, is nevertheless a creature of a higher order, of a higher rank, than man. From the point of view of primitive man, there is nothing derogatory to the sacred

/69 cont./

796 beast in the notion of the bear as a dog of the "master."
825 We should remember that the genesis of the cult of animals rests on the /70/ worship of the animal as such, without any allegorizing. "The reason of the universe," said the Avesta a long time ago, "is governed by a dog." But, as we have already seen, according to the subsequent evolution of the cult of the bear, in this last there may be concealed a "mountain man," a clansman of the "master of the mountains," or even a Gilyak's own kinsman turned into a "mountain man." Therefore one must show every courtesy to the one killed, feed its head, generously supply it for its journey with various kinds of provisions, not defile its body, not spill its blood upon the ground, and so forth -- all these are the inevitable consequence of viewing the bear as a higher creature. The importance of the holiday, however, is not exhausted with this display of respect for the higher creature. The soul of the slain bear journeys to its master, that master on whom the welfare of man depends, It is the most apt occasion for sending to this distant lord various presents, such as dogs, arrows, bows, viands, and so forth. All this is repayed a hundredfold. Moreover, the bear itself, pleased by all the honors and the food, may turn out to be useful in petitioning for various favors from the master of the mountains.

796 From this it can be seen that the killing of the bear during
782 the winter festival is not a sacrifice to the gods, as, for in-
825 stance, Lang, a famous investigator of primitive religion, be-
[114] lieves it to be, but merely provides an occasion for the sacrifices. The best proof is the fact that the Gilyak sacrifices to each god only that which the god himself does not have, and the master of the taiga has an abundance of bears. He needs dogs, fish, tobacco, sugar, thongs, and arrows -- and it is these objects that are given to him by the Gilyak; the bear is merely the honored envoy who carries them. It is a deity itself, albeit a small one, and therefore cannot itself
796 be a sacrifice. Finally, there is another important moment
825 in the holiday -- eating the body of the bear. As a general
261 rule, the greater part of the meat is given to the narkh'i, i.e., to the clan of the son-in-law /zyat'/ of the master of the

/70 cont./

796 slain bear, but the head is always respectfully divided among
825 the clansmen to whom the bear belongs. This eating must
261 be looked upon, not as a simple act of eating, but as taking
into one's body the mighty qualities of the bear. A woman,
[562] for instance, cannot partake of the heart of the bear, which
imparts courage, a quality completely useless to her, and
therefore such eating, as aimless, must be offensive to the
bear.

796 Thus the religious significance of the bear festival amounts
825 to the following: 1) feeding the bear gives /71/ the settlement
182 security and protection from evil spirits -- a very important
775 matter if we take into account the views of the Gilyak with
774 regard to the origin of sickness and of death (see below);
2) eating the "deity" imparts strength; 3) the soul of the
slain animal, pleased by the honors, may independently and
through its "master" do good things for man; 4) it -- and this
is of the utmost importance -- is an envoy, a transmitter of
all kinds of gifts to the "master of the mountains," on whom
796 the welfare of the Gilyak depends. With regard to the last
825 point, it is important to remember what we said about clan
614 gods. Every clan has clansmen among the "mountain people,"
775 i.e., clansmen who sometime in the past fell in a fight with
a bear and were then taken into the clan of the "master of the
bear." Every such clansman in turn becomes a small "master,"
a god-protector of his clan. Actually, every clan receives
its catch, not directly from the "master of the mountains"
himself but from this, his clan god, who specifically resides
in the hunting territory of his clan. Thus, the presents sent
through the bear are actually sent, not to the supreme "master,"
but to the nearest "master of the mountains" -- clansman.

796 That is why the celebration of the festival is purely a clan
614 affair. This also perhaps explains two extremely characteris-
tic, but puzzling facts concerning the bear festival. In the
first place, not only is no member of the clan arranging the
festival allowed to kill the bear, but even the clansmen of
women who are wives of the members of that clan are not
allowed to, in a word, none of the agnates in either the male

/71 cont./

or the female line; the only kinsmen allowed to kill are the "*ryat'ya*" /kom-in-law, brothers-in-law/, i.e., persons married to women from this clan, persons whose blood was never mixed with the celebrating clan. In the second place, the entire carcass of the bear, with the exception of the meat of the head, is given to a different clan, the clan of "*narikh'i*" and, on the other hand, forbidden to the clan to whom the bear belongs. Once perhaps even the head was also prohibited for the celebrating clan. Are these prohibitions not caused by the totemistic caution against killing and eating the body of a clansman? After all, could not the slain bear accidently turn out to be a clansman of the mountain-man clan and therefore a clansman of those who are celebrating the holiday? In such a case killing him and eating his meat would be criminal and fatal for the given clan.

But for a different clan, i.e., the clan of the "*narikh'i*" this is permitted, because /72/ another "master" sends bears to it, its own clansman, so that it is completely safe for them to eat the meat of the bear of an alien clan.

The coexistence of such norms as, on one hand, the permission to kill a bear, though not personally, and to eat it head and, on the other hand, the prohibition against the rest of the meat may seem a strange and irreplovable contradiction. Among totemistic tribes, however, we often meet such contradictions. The Samoans, for example, on solemn occasions kill owls and honor them as their deified ancestors, while at the same time they do not dare to touch the meat. In the works by Spencer and Gillen we read that among the tribes of central Australia, among whom it is normally prohibited, for example, to kill kangeroos and to use them for food, on a certain solemn day two or three of the forbidden animals are killed, and pieces of the meat are distributed among the clansmen. There are many such examples.

/72 cont./

As indirect confirmation of our hypothesis as to the origin of the above-mentioned prohibition among the Gilyak is to be found in an interesting legend of the Orochi and the Orok, whose religious views are very similar to those of their Gilyak neighbors. According to this legend, a certain Orochi woman was once abducted (in other words, eaten) by a bear and bore two children by him. The woman was subsequently often encountered by the Orochi in the form of a she-bear who warned them not to shoot her. It happened, however, that she was shot by accident. That it was actually she was clear from the fact that women's ornaments were found in her viscera, a bracelet and so forth. Dying, she requested in her testament to the Orochi who killed her that in the future, upon killing a bear, the ritual that is usually observed now during the festival be observed, for any bear that is killed may turn out to be her descendant and, consequently, a clansman of the Orochi.

Let us return to the gods. Up until now I have mentioned the gods that are beneficial to the Gilyak. Besides these, however, there are other supernatural beings who are evil and harmful to him. These devils are "*mil'k'i*" and "*sang'y*." These beings appear in all kinds of forms and are classified according to their degree of harmfulness. They appear sometimes in the shape of a Gilyak, sometimes in the shape of animals, from the bear to the toad and lizard. They are encountered on dry land and in the sea, under the ground and in the sky.

/73/ Some of them constitute special clans of insidious creatures, destroyers by their very nature. Others are individual degenerates, "the prodigal sons" of the clans of beneficient beings, who only in exceptional cases become enemies of man. The first, of course, offer the most danger.

Some devote themselves exclusively to robbing the Gilyak on the road (the spirit of lost -- get-rich'i), others ravage storehouses, snares, and traps and harm him in all sorts of ways, while still others make attempts on his very

/89 cont./

cremation, and the oars are placed upright, facing each other, in order to be noticeable from afar.

clansmen serve as daily reminders of them.

But the bond of the clan with its divine clansmen is not limited to piety and grateful recollection; these ties are rooted in a more practical and stronger motive force -- the very instinct of self-preservation. For the Gilyak there is no more indubitable truth than that all his prosperity, all that nature gives him in return for his desperate efforts in the struggle for existence, all this is due to the free gift of the gods, his benefactors, without their benevolence, all the efforts of man would be fruitless. And the gods-clansmen, as we know, take part above all else in this life-giving benevolence; they are the true sustainers of the clan, and there is no weightier obligation for any clansman than to promote this benevolence to the best of his ability. That is why the clan sacrifices and festivals, held once a year according to rule, /90/ for the mountain and sea people are most important acts of clan life, in which everyone, in the name of self-preservation, considers it his most sacred obligation to take the most fervent part.

In the section on religion we dwelt in detail on these periodic sacrifices to the masters of the sea and mountains. Without exaggeration one can say that the whole social activity of the Gilyak is principally devoted to preparation for the clan sacrifices and to preoccupation with celebrating them most magnificently. Wealthy and poor man alike, according to their abilities and means, not from fear but for conscience's sake, make all possible efforts, sometimes denying themselves their last possessions, in order that the sacrifices be as ample and varied as possible and that the festivals be as magnificent as possible; this is the general interest of one and all.

/90 cont./

In its evolution, this solidarity in the sacrifices to clansmen, fostered for ages, becomes the principle of the clan relation to the gods in general. When in wholly individual affairs, during illness, say, the Gilyak makes a sacrifice, he will without fail summon his absent clansmen even from afar, so that they may enjoy the beneficial consequences of the sacrifice.

The principle of common clan deities, the sustainers of the clan, is the foundation of the institution of hospitality and the most extensive fraternal mutual aid.

It should be evident to anyone acquainted with the institution of hospitality among primitive peoples, even if only from travelers' descriptions, that it must be based on something more than mere social etiquette or even ordinary sympathy for one's fellow creatures. The Arab, at his own hearth manifests the warmest hospitality to even his enemy, concerning whom he knows full well that only one imperative -- kill, evidently is impelled by a more powerful motive, a motive which has behind it religious dictates.

And this must be said about the hospitality of the institution among all other primitive peoples, including the Gilyak. The Gilyak considers it his obligation to extend hospitality, not only to the traveler, not only to the actually hungry man, but also in cases when the guest is not hungry there is no necessity whatever for displaying this feeling. No matter how many times a day a neighbor may appear at his hearth, no matter what time of day it be, the guest is immediately offered all the viands in the possession of the host, not to mention the inevitable handful of tobacco for his pipe.

/91/ If there is no extra tobacco, the host takes turns with the guest in drawing on a common pipe. These attitudes are most striking in the handling of rare, costly dishes and delicacies. If you bring the host a glass of vodka, he will never allow himself to drink it alone, he will merely put his lips to it, and then it goes around to all the dwellers in the house, although there may be dozens of them, including the children, even suckings. To do otherwise would be a very great sin; one might die.

/92 cont./

worn on ceremonial occasions and in which the dead are garbed.

such as will inevitably find its way back to the clan of the testator, so that to the ymgi clan, i.e., the clan that takes its wives from the clan of the testator and consequently pays it bride price, can only be willed the so-called iron shagund, which in any case will return to the clan in the form of bride price, while to the akhmal'k clan, the clan of father-in-law, only the silver shagund can be willed, since it will return to the clan in the form of the bride's dowry.

4. One bear: the common obligation of the clansmen to share in the burning of the bear and in the bear festivals, both on the occasion of the slaying of a domestic bear and the hunting of the forest beast. "Khal'-gu, ut-gu, narikh mu-ev'i". "Clansmen, men, be guests!" -- with this summons the youths go around to the yurts, summoning the clansmen to the eating of the sacred meal of the bear slain in the forest and the viands jointly prepared for the occasion by the whole clan.

The importance of common rights and obligations with respect to the bear festival, as the exclusive privilege of the clan, proceeds directly from what we said regarding this in the section on /93/ religion and the clan gods. As we saw, the bear festival is characterized by two basic features: first, by the honoring of the very person of the bear as a possible clansman of a "mountain" man and, consequently, a possible clansman of their own, or his descendant, who had passed into the clan of the mountain masters; and, second, by the transmittal through him of various gifts to the mountain master and his clan and, consequently, to the god-clansman, their sustainer. Thus the bear festival has an incomparably greater significance for the welfare of the clan than other clan sacrifices and festivals, because the sacrifices go to the highest master of the mountains, to the chief disposer of

/116 cont./

Or: one or another family is temporarily impoverished. There is no /117/ clansman that must take care of them; it is unnecessary, because the family will find hospitality and assistance in any house they choose, even of the most distant clansman, until the hard times change. And this is not offensive to anyone, for it is a rare thing for someone neither to enjoy hospitality nor to offer it to someone else from time to time.

Suppose it is necessary to arrange a troublesome and expensive clan festival. There are neither collections nor contributions, no organization for the reception of guests, and so on. Each person prepares as much as he can according to his conscience, each bears his share of the labor, and only the man who is a little richer than the others takes upon himself the trouble of the arrangements. Everyone takes to his house the prepared viands and purchases; they meet at his house to share in the prefestival work.

During the bear festival, dozens of additional persons assemble from all sides. For several days it is necessary to feed not only the people, but also their many dogs. How much trouble, how much expense! Nevertheless, everything is arranged simply and to the general satisfaction of all. Each guest prefers, of course, to stay with the one who is closest to him in kinship or sympathy, where they take him in, not as a duty, but because they want him; but in any home at all every arriving guest finds a sincere, cordial reception, because during the days of festive enthusiasm everyone wants to display his sympathy and to have broad intercourse with new people.

Hunger has appeared, the specter of terrible misfortune, which can carry off the whole population of a village! All the hungry ones who have not succeeded in dispersing to more fortunate areas gather at the home of the man who still has some supplies, and the laws of hospitality are just as strong on this black day as in days of plenty.

/120 cont./

blood flows equally /123/ in the veins of both of the newlyweds, the children of brother and sister. Standing in close connection with this rite is the previously described moment in the bear festivals, when, before sacrificing the bear, the master of the bear (the akhmal'k) and his ymgi each sets beside himself an ax and a kettle, which are also called nich and which are also mutually exchanged. If the first rite symbolizes mutual sustenance, the second symbolizes reciprocal co-operation in hunting, which, as we shall soon see, has a quite real basis.

The principle of "sustenance" is not limited to periodic visits to the relatives of the wife, although they have some economic significance. The akhmal'k's each time, in addition to the hospitality shown, give a valuable present to their ymgi, especially on the first visit after the marriage, when the son-in-law /ryat'/ is customarily given, depending on the resources, one or several pairs of smart garments for men. Cases of actual need are much more important. There are times when one's own clan is powerless to aid its clansman, the same misfortune, or bad luck, has overtaken one, has overtaken all. Let something happen during the season of the fish run to turn them from their accustomed path, and general disaster is at hand. At such a time there is a simple way out. A man gathers up his family, his dogs, and all his movable goods and chattels in general and emigrates for the whole season to the settlement of his father-in-law.

Here he is met with outstretched arms, and from the first minute he feels himself at home, where they give him food and drink and share everything with him. The son-in-law /ryat'/, of course, is not a do-nothing; he helps in one way or another, but this is far from making up for the expenses involved in the long and unexpected visit of a whole family, often at a time when the supplies of fish have already been prepared and it is impossible to increase them.

Similar fraternal relations between akhmal'k's and ymgi are manifested in sea hunting and land undertakings.

The most important of these require the participation of several persons: hunting bear in summer and winter (taking it

/125 cont./

614 violated its own law, protected itself by another fiction; the
615 whole clan of the "unlawful" father-in-law received the title
194 of akhmal'k and became, as it were, a lawful clan for mar-
583 riage unions. As such instances increased, the bride price,
whose exclusive genesis had been forgotten, became the gen-
eral rule in all marriages, even with lawful clans.

Such, perhaps, was the origin of the bride price among other peoples as well.

Another weighty factor which consolidated the bonds between matrimonial clans is the participation of the pandf'y in the bear festival.

614 615 194 583 In the sense of cementing interclan relations it plays another and a greater role than the Olympic games for the actual unification of the Greeks. The bear festival takes place every winter, now in one, now in another settlement, while in populous settlements a rare winter passes without a festival. Attendance at such a festival involves no difficulties. The sled, which every household possesses, is harnessed, and off they go; the rest is not the guest's worry.

Everywhere on the road, as in the village where the festival is held, his dogs will be fed and he himself will be treated to the choicest dishes. And in return for the small anonyance of travel there is a whole array of high social gratifications: in the first place, the very size of the festival -- the procession, the shooting at the target, the killing, the skinning of the bear, etc.; then, meetings with the ablest and most respected representatives of the tribe; finally, the competition /126/ in wrestling, races, and dances, the feasts, conversations, jokes, and songs, in a word, an endless series of enjoyments. Against the somber background of his gray existence, the hungry days, the deprivations, dangers, and monotonous impressions, the bear festivals appear as the most joyous moments of existence, as it were, landmarks of everyday life which one recollects and dreams about. But these noisy, populous festivals are strictly regulated. Besides clansmen, only ymgi are invited, and they have, and in invite their own ymgi, akhmal'k.

/126 cont./

* 614 615 796 583 This rule is so strictly observed that the very host who has been most diligent in receiving and making presents to his ymgi is not even invited by the latter to the festival, but, on the other hand, he will be the honored guest of his own akhmal'k. Thus there is formed an uninterrupted chain, uniting the long series of clans in their socio-religious festivals.

We have already said something in the section on religion about the important part played by the ymgi in the bear festival. One goes out many versts to meet them and gives them the most honored function at the festival, namely, the killing of the bear, and all this time they are the center of attention for the whole clan. They are everywhere fed to the bursting point, dragged around from yurt to yurt, and, finally, before departure gives a large part of the bear carcass. All these acts of hospitality and respectful attention are crowned with serious religious rites, sanctifying the fraternal union of the clans. At the beginning of the festival, the ymgi exchange nich'i (symbol of united co-operation in hunting, etc.) with the host; before departure, the ymgi presents to his akhmal'k in parting dogs, which, together with the dogs of the latter, will go to the master of the mountains, the common sustainer of the clan; finally, at the last moment the ymgi perform the ceremony of the "trampling of the threshold" (see above). Such things are not formalities for primitive man, they strengthen the ties of kinship with the higher sanction of religious authority.

But these ties are not limited only to ceremonial "sustenance" hospitality, invitations to hunts, and festivals.

* 614 615 621 They go still further, rising in their intensiveness to the power of a true clan bond. When a man has few clansmen, or he gets along badly with them, he leaves his native settlement and goes to live forever with his pandf'y. This is why, by the way, there are so few settlements made up of inhabitants belonging to one clan; everywhere /127/ clansmen are intermixed with their ymgi or akhmal'k'i. But these ties prove of

/291 cont./

II.

A Legend about Pilavo (1)

1. Recorded in the settlement of Takhta in 1910. Pilavo is four settlements; two on Sakhalin, one Khes'-Pilavo, and Yky, the Goldi settlement near Khabarovsk. The inhabitants there still hem their dead, and there is a bear festival. The terrain is identical in all four villages.

539 On the north of Sakhalin a father had many children. During the sharing they quarreled over a stone with a hole, or, which, on a silver chain, is put on the breast of a bride. One brother said: "You have divided everything, now give the stone to me." He put it on the neck of his daughter, and through the night it was not possible to take it off. The others said: "Daughters are not of our clan, they leave to marry, how can one leave them such an expensive article?" The eldest brother: "We consider only sons, daughters are not ours. You can make as many children as you wish, but you cannot find such stones." After this the eldest brother always wanted to kill the little girl, while the younger brother guarded. The younger brother became angry and ran away from the south of Pilavo to the north. There was a famine. During the most severe famine they killed a seal, they killed a small seal. They boiled it, they divided it up into pieces, they ate it, and the bones remained. The children began to chew, to fight. One of the brothers came up and began to beat the son of another brother on the "mug" with the same bone: "You, dog, take it, gorge!" and he was beating the youth. The youth began to cry. His father was not at home. The mother stepped in for her son, and the mother got it. In a little while the father arrived. The mother complained to her husband, and a fight took place.

/296 cont./

614 194 The following case occurred in Macha (the left bank of the
173 648 Amur), opposite Kal'ma. The Gilyak set out to hunt and built a balagan; coming back they saw a great number of people. Then they ran away undetected, gathered together people from all the villages, and set up ambuscades in different places behind the rose-willow trees. When the Russians came out, they shot them all.

Sometimes the Gilyak used the following method of fighting: They tied a cut tree trunk in such a way that it leaped out and struck the legs, and the enemies fell; then they completely killed them off (the settlement near Kaski).

Recollections have also been preserved about the relationship between the Chinese /297/ officials and the Amur natives. The Goldi even paid for dogs, the Gilyak -- per person; the Chinese officials collected by whim, and their khalki (boats) with people had to be fed. In exchange for this, they gave receipts which gave one the right of entry into the town of Sungari (Ychih-khoti). Otherwise the natives would be tortured in the town. The storyteller, a Samagir, in his youth was holding a receipt; he said that they paid 40 rubles for a folder /hormovogo/ man and 20 rubles for an ordinary person, and one sable from each person.

IV.

The Union of Clans and the Bear Festival

614 796 Two clans come together -- k:khal m'ekn; yytch. They
come together in a single yurt; outsiders may also be present.
They discuss, and, if there are no obstacles (for example, they have not taken wives from one another), the khlaj nivuh declares that the two clans may join into one. The other representative answers: "It is true, we have accomplished great things together; you also helped us, and we also helped you. Once we form one clan, we shall become k:khal." He says; "There are no obstacles. Our sons and daughters will be our brothers,

/297 cont./

614 194 but we have daughters and in-laws, and it is necessary that
everybody know, and therefore necessary that we should celebrate
a common bear festival." Each k:khal should buy one, or better,
two-three-four bears. They agree. They buy a bear and prepare
mos'. The bear is fattened as far as possible; they feed it about
two years; they prepare mos' and buy racing dogs. The time for
the festival finally arrives; they play games, wrestle, then kill
the bear. Before the killing of the bear, an old man is selected --
he does not have wives, children, or a boy; his master; he is the pipif-
ni'vuih; he cannot decline. He says the word to the bear: "Chi
pilf pal' urgur p'ach ads; kukuj4 pihylava:r chajpidugujf!" --
thou, big mountain (mountain man), shake off well our Gilyak
dust. Turn around, not share unequally. Give the tibial bone
to the elder sons-in-law, give the pelvic bone to the sons-in-law.
"Pilynga urgur kymlyj4, umgunlagu pilf, nanakagh pilf,
okongh-tokh urfj chm' ngokh ta nagqj4, ylia n'lvukhokh
malg-ghet'ijf khuskagudokh khukkiogujal Kikhalgu pila,
hejmartokh, rafut ijf k:orkh khet'ijf. Tereng pilv okhomdokh
khtirf4, pyjkh n'yn'yv pöradokh khet'ijf, murak ngokh vard
rusjf ta rongujf..."

After preliminary consultation, a certain person finally brings in the bear and hands it over to the important person, who then, in the presence of several udla n'ivukh (good people), inquires: "Why?" The person who brought in the bear answers: "I want to enter into ceremonial brotherhood." "All right,"

Next k:khal are consulted without him. During the festival the new clansmen buy dogs and prepare food. During the eating the son-in-law says analogous things, while the father-in-law call him father-in-law, brother-in-law, etc. At the end of the festival they give the adopted one their own flints -- tugur, but they do not give him the real uig tuur (the tabooed fire). There are no more than two or three uig tuur in a village. They light the fire at a bear festival; on a hunt only the udla n'ivukh taken it when he goes for bear.

/298 cont./

* 614 615 796 583 A bear festival is held also for other reasons, /299/ for
instance, for reconciliation with one's son-in-law /297/; for
making a purchase, he keeps silent, and the k:khal keeps silent
but they will continue to talk until a bear festival is held by the
offender for reconciliation (ulir lymyk).

796 415 A bowl, hyr, for the head is necessary for each new bear
festival. The head of the bear is always placed in a new bowl
while the old one is used for meat and the like. Anyone can
prepare a bowl for the bear festival. The bowl for the meat is
bound with the penis of the bear. A bowl from which the bear
is fed for the last time in the yurt, and always on the side
opposite the door, is called pukzor-n'ir.

When a brother gives his sister a bear as a gift, he himself
796 431 [231] is not permitted to bring it; he must come after it with pomp.
The bear is greeted with zade-chadr music. When the master
feeds his bear for the last time, he says to it: "U'ur humyldi
Winigan ilgan ilgan humyjf--live well! When you live well
The gift giver does not shoot the bear and departs as soon
as the festival is over; without even tasting (a morsel), while
he must bring with him mos' and all kinds of dishes.

796 When a bear falls sick, then they hold pylgr-tvyuk and
pare uig, mos', from all sorts of delicacies and all sorts of be-
Lisk; -- a dog which has been born specially for the uig.

[792] When a dog is sacrificed, its skin, head and bones are
[793] in a wooden frame near the lating where the bones of the bear
[663] placed. Some clans hang bear heads on trees. This place is
called k:orh ngangof.

/298 cont./

614 194 583 A bear festival is held also for other reasons, /299/ for
instance, for reconciliation with one's son-in-law /297/; for
626 629 making a purchase, he keeps silent, and the k:khal keeps silent
but they will continue to talk until a bear festival is held by the
offender for reconciliation (ulir lymyk).

796 415 A bowl, hyr, for the head is necessary for each new bear
festival. The head of the bear is always placed in a new bowl

V.

Slaves

569 [176] The son of a slave remains free to the neck (i.e., his h
[176] is free), his grandson -- to the belt, his great grandson -- to
[176] the knee, the fourth generation -- the descendants are "pans."
[663] [249] Then he is a k:khal, i.e., a kinsman of the master, and if an

/308 cont./

765 has cuckooed for a long time, drinks water from a cup. Go well,
775 live well, (observe) the law of your fathers, the law of your mothers, the law of your elder brothers. Go." These words are said at the ordinary funeral repasts.

769 After a while they buy a bear, feed it for two years, and then
796 hold a bear festival. If a kinsman of the deceased does not buy a bea
626 he is treated with contempt and reviled -- "inain khardz:." "What sort of a person are you? Your mother brought you up, cleaned up your excrement. A good man does not even abandon his pryski like that." One cannot be tried for such a vilification. One's clansmen always help one to hold a bear festival.

587 The woman cannot marry until the major funeral repast
768 is over.

766 They inter a baby up to a week old on a tree, up to half a year old -- in the ground. If a child who died before he was
[842] three days old were cremated, his mother would not have children for a long time.

[184] On the Amur four little firs with roots are placed over the grave.

[731] During pila-dakh (smallpox epidemic) the dead are not cremated, but must be buried in a grave.

Drowned persons. Uiglyf -- the place where a drowned man has been pulled out. When a man has drowned, he is cremated, and on the third day they make a toln'ir, i.e., a cup for sacrifices to the master of the water, a trough, and a kinys -- a cup for the drowned man; mos' is placed in the trough, in the cup -- red currants. They pity the man; they select two or three /309/ brave men, put the deceased in a boat on the bank there by the water, and place a kinys nich, a Chinese kettle, and one rose-willow branch standing to the height of a man. At this point one man says: "Kettle, boil, steam, rise, move upwards, you, rose-willow branch, widen, make a good covering so that the devil does not see the Gilyak."

824 /312 cont./
778 Only representatives of the clan, k:khal n'akhr:, gather
782 at the place where the chédzigr stands. They bring rice, buda,
[614] a pig, and vodka. Before the tree there is a bench /labaz/ for dishes. The pig is slaughtered, and its blood is sprinkled around with the comment: "Kur, indyjá -- god, look!" No images of any sort are made on the tree.

The tree is also a road. Everybody gives to the tly-n'ivukh; the sacrifice goes along the tree, then along the thread which goes from the tree and serves as a trail. They start a fire in order to tar the pig. They do not feed the fire, but they do protect it, do not stamp it out. It is absolutely necessary that the sun shine during a sacrifice, and therefore it is occasionally necessary to wait. When a balagan is placed in a new place, they make a new chédzigr.

● 796 Tlyrokh -- Sacrifice to the sky. Everyone assembles in one yurt.
782 Early in the morning they set out in search of a larch (for the chédzigr), while the women prepare various dishes; then the tree which has been brought in is made fast, and all the dishes are
[184] carried in Chinese or Japanese dishes. There are villages where the tlyrokh is never made; in Tevkh only a red dog pag:r kh:an:, is slaughtered instead of a pig and a cock. They tie it up to the chédzigr, strangle it, cut out the heart and throw it upward, treat one another with vodka, and rub the chédzigr with vodka. They celebrate once a year in January -- chamlong. The "word" during tlyrokh: "n'jongarja kinynguch: humguja', kholafti lygyguja'," i.e., "please, that I live well, that there be no sickness."

Then they make a new birch bowl (han'gar:), place it on the ground, and put the sacrifice in it. Ski, a stick, and a crossbow (narródz:) are placed there; the "word" (prayer) is not said, and they quietly leave. At home they "make" a fire, and when everything is cooked, all the sacrifices are placed between coniferous branches and then placed between two forked pieces of wood (tuurg'a'vk); the fork is thrown into the fire and
[789] taken back. This fork is placed under the head at the end of a
[776] hunt to protect against the milk'a (the evil spirit). In /313/ the

/313 cont./

● 796 morning it is necessary to take back the ski and so forth quietly
782 and stealthily. These things are placed so that the Tly-n'ivukh descend the tree, and by these objects they find out the nature of the Tly-n'ivukh and "if he has a good heart," if he will give "risk" /fart/ or not. "After all, five of us go, one caught something while another goes on and on pursuing but gets nothing. What is the reason for this?"

731 During a takh -- smallpox epidemic -- in Tyr all the
782 Gilyak assemble, make a sacrifice -- bow, present rice, roots,
[165] and berries. First the 120-year-old man Zyavkayu from the village of Dyl'myu sacrifices. They pray before the tree chédzig This old man remembers four big takh.

776 Pal likes a tree with different peculiarities, and on solem
782 occasions such objects are selected. A sacrifice is always mad to one's clan Pal-yz' (the master of the mountains), but they a not made to Pila-yz' (the great master). He is most frequently seen on a knoll. One must not shout to him. There is a conversation going on on the other side -- that is Pal-yz'. Pal -- mountain master -- likes a black dog; Tol -- sea master -- a
[372] white one. Each large house has two fires, Pal-tuur and Tol-tu
[354] If a person has one stove, it is only Tol-tuur, and if he must b bear meat, he goes to a clansman of that khala who has two stoves.

778 Tol-takhej -- a takhej of larch; a hammer, chong-cht
782 is hung on it. Near it is a halynyr (bench /labaz/)on which are
224 placed the carcasses of dolphins, kaluga, and reindeer. And h
225 they invariably boil the dolphins, here the bones are left to lie except the skulls and heads, which are carried away to k:khor n'angof, i.e., a place where they put skulls. During the fynyr only two dishes are placed on the halynyr -- mos' and muvi (kissel/ a jelly-like dish/). It is also from here, in the presen of the entire khala, that they throw a little of everything into Amur, but say nothing -- otherwise another misfortune will occur. -- Then on the takhej they hang tobacco, ag:a (akhyd a bunch, yukola -- pys' and announce that everyone should co out and feed it. This is the main office of Tol. People are se

/313 cont./

778 782 224 225 to shout: "Yrk-lu? -- Is it enough?" -- "Yrkrá! -- It is enough!" Everyone approaches by houses and feeds it, and each says his own: "Send the dolphin! Send the little fish!" After this everybody must return together at the same time, for otherwise it would be a heavy sin if they were to meet each other.

778 688 The customary takhej of a hunter is the individual uig. Anybody who touches it gives a dog. If a member of another clan has insulted a lezing (the place for the bear festival), the vopund kymlydz: assembles, and they judge him; they demand a bear or 782 a luk -- a shaggy dog. Pyl-yz' -- the spirit of the master is fed each month. If they have caught a tasty fish, /314/ they cut themselves a piece and him a piece, and when his pieces have stood for half an hour, they eat them themselves.

796 346 782 When they build a pila uigryf (house in which the bear festival is celebrated), it is imperative to celebrate a bear festival. If there is nowhere to buy a bear, they must kill a luk: -- a shaggy black dog ("it is just like molk," i.e., like a bear). If the house is simple, they kill only dogs, two to four in number, without regard to kind. If a post falls on a lezing, they kill two black dogs. It is not at all necessary that a man be killed by a bear for a pila uigryf. After a bear festival, when the members of other clans are leaving for (their own) homes, the bear bones are tied together with a thong and their dogs are killed at a special chédzigr.

It is not permissible for a single clan in a single village to make two lezing, but there can be several uigryf. Any house where a bear festival takes place is an uigryf.

/323 cont./

756 774 776 [578] When shamans fight, the one who has more souls wins. The killing of one shaman by another is accompanied by the acquisition of the kekhn of the opponent. During his supposed death, the soul of the shaman travels over islands of the sea (tol). On these islands, which are of various colors, the houses are of stone tol-kekhn. Sometimes his soul goes into the mountains to the abode of pal-kekhn. The shaman kekhn fears only Pal milk and Tol milk, but not the milk of sables, foxes, otters, and rats (1).

1. Concerning the rat, see Chapter VII, "Miscellanea." S. Sh.

Among the kekhn there are variously colored eared seals, iron trout, and tigers.

756 539 How the shaman Chomkx resurrected a woman (the settlement of Rykovskoye). A husband and a wife were fishing. The wife fell sick and died before morning. The husband said: "All you shamans are deceiving me. Now my wife is dead. Well, make her live!" The shaman became angry and said: "I shall shamanize all night; if before morning she moves her left little finger, she will live." That is what happened.

756 A shaman stabbed himself and shot himself in the mouth, and "nothing."

756 84 754 562 578 833 A female shaman has more spirits than a male shaman. She kills her shaman competitor, sending her kekhn to rub her competitor's eyes with the menstrual blood of shankh-chokh. A feature of this blood is that a drop in food makes a person waste away. Copulation during the menstrual flow also leads to local ataxia.

756 796 158 The kamlanie of a female shaman, who, according to her own words, was milkternd (mad) after the birth of her first daughter. She first made inau and then rubbed her face, breast, and so forth with marsh tea, lighted it on the hearth, and warmed her tambourine... Then she bound her legs and arms with shavings and girdled herself with shavings. She yawned. Moderate blows... The sounds grew stronger. She sighed loudly and whispered. She

/323 cont./

756 796 began to walk around. She sat down. She became blind, saw nothing. The milk drank ten cups of horrible liquid. Clink, clink /as in touching glasses/! She drank it down in a gulp... then demanded a pipe and began to smoke and to exhale the smoke through her nose. She then (said): "Kyrndra" -- I am hungry! And she began to eat saranka. Then they gave her takr -- marsh tea. "Heavy (to lift the tambourine)!" The milk did this. She demanded my cigarette. "Give tobacco to the spirit," and ordered some distributed to everybody to smoke. She beat her breast, while a maiden beat the tambourine. Then she said: "Make a fire!" She sat down, /324/ then rose suddenly, began to dance, and ran through the door, but she was caught. The words of the female shaman: "People assembled to listen. There is no danger whatsoever. I cannot speak of various things. Naked people (i.e., not animals), a misfortune, cannot say anything. I hear the talk of the sea, I hear the talk of the mountain, I hear the talk of the sky, and I heard the talk of the sea fish. I hear the talk of the fish on all sides. Everybody listen only to me: everything was born from Pal, born from the middle of the existing mountains. They call (me) Protyst. The name of my husband is Zabrayn. The surname given by my husband -- They call me Vee'lyk. I am an old woman. Smoke tobacco, all you (who are sitting) in the yurt! Small and large, all smoke with my risk! I am not afraid of any devil (1)! I am a mother-in-law to all of you.

1. Here there is evidently an omission in the notes. S. Sh.

I am the only big old man (?). Yellow-copper squirrel, come my way! (When you ascend from the sea) to his grass house (sit down to rest. When he ascended from there, cannibals were located before eight bear cages at the edge of an opening through which they push a trough, rest.

182 /354 cont./

[504]

5. The members of the clan are bound together by common sacrifices and festivals. The "festival of the bear," known to everybody, is held, not by an individual settlement, but by the clan, even though /355/ guests from other clans are invited to take part. The bear is bought by someone in the clan, but all the expenditures in connection with the festival are covered by the clansmen. These expenses often reach a sum of several hundred rubles. Clansmen assemble from all directions, as well as great numbers of specially invited guests from other clans, who have to be entertained and fed for many days, and not only they, but their numerous dogs as well, devour a great amount of food during the festival. The opinion that the bear festival has a religious character or that the bear is considered to be divine or a spirit by the Gilyak is completely unfounded. The bear festival is purely a
[224] clan festival. Naturally, there were times when a successful attack on a bear, an attack conducted in those days collectively, by the whole clan, was a real triumph for the clan, which devoured the huge beast at a common feast. Since the attack on the bear was most conveniently made in winter when the sleeping animal was captured in his lair, the custom of celebrating this holiday in winter was perpetuated. The experience of centuries evolved a full ritual for the festival, which, like everything old, assumes in the eyes of the barbarian the character of something sacred and inviolable
[782] All the sacrifices during the festival are made, not to the bear, but
[776] to the god of the taiga, the master of the bear -- "Pal'-nivukh."
[825] It is also understandable that the bear itself has acquired a position of honor: Its meat cannot be thrown to the dogs, it cannot be eaten with seasonings, etc. "Pal'-nivukh" himself will exact revenge for such offenses, ordering other bears to bite especially
[562] hard. To sum up, the bear festival is a clan festival, and, on this basis, women, as the nonpermanent element of the clan, are not present at the killing of the bear, although they
614 participate in the eating of it. The fire in the stove in which
372 the meat of the bear is cooked is started only by the clan
[252] steel. A touching custom among the Gilyak is

/664 cont./

Gilyak. Finally, the hierarchy of the deities is based on the number of benefits received by man from each of them, and the sea and the taiga give the Gilyak more than the dog. Imagining the elements and the powers of nature as divine, even often referring to them as gods, a Gilyak at the same time believes that each element has its own master -- nivukh, who is a god -- "kur." These nivukhi are real Gilyak, not only in their striking similiarity but even their dress (let us remember that "nivukh" also means "Gilyak"). These are not a product of the imagination; "one can see them." "A certain man," -- a Gilyak acquaintance told me seriously, "once met the master of the sky ("kur"). He was riding on a sled pulled by wolves, but, upon encountering the Gilyak, the wolves turned upward and disappeared into the sky with their rider." One can hear about many "nivukhi," that a Gilyak of such and such a settlement has recently seen "him" in this or that place. Like the Gilyak, the nivukhi have children, perhaps there are whole clans ("shal") of them, and, like the Gilyak, finally, they are mortal. The god of the taiga and of the mountains, the master and the father of all forest beasts, is called "Pal'-nivukh" (pal' -- mountain, taiga). All the sacrifices /565/ at the bear festival belong to him. It is he who orders the bear to bite "very hard," in case of a violation of the ritual of the festival. The god of the sea, the father and master of all inhabiting it, is called "Tolles," "Toll'-nivukh, and is just about the most powerful deity of the Gilyak; it is he who sends illness and healing. The sun, the moon, and the stars are all deities of the Gilyak, and the first two are spouses: the sun is the wife; the moon, the husband; and, of course, on these heavenly bodies are gods -- masters. "Have you never seen," a Gilyak said to me with assurance, "the nivukh on the moon when it is large? He is fully a Gilyak!"

There is among them an idea of something like devils "gohldaranda". This is a whole shal', living in the sea and dangerous for the Gilyak when they are hunting seals. They ride about in boats and when they see a boat with Gilyak killing seals, they loudly ask: "What are you doing here?" Woe if the Gilyak reply

On March 6/18, 1856, when, returning from Sakhalin, I reached the village of Tschcharbach at the mouth of the Amur, the Gilyak there were near the end of their fish supplies and impatiently awaited the thawing of the river, for then the sturgeon would immediately collect in great numbers in order to ascend the river. But farther up the Amur some are caught at practically every season of the year and even throughout the winter. In 1855 and 1856 the Gilyak supplied the Nikolayev post so amply with sturgeon meat and caviar, especially from the tukki-tsche which, it seems, is more common in the lower Amur, that this was our principal and almost daily food in the winter, /429/ and, despite its initial tastiness, we became very tired of it in time. They especially liked to sell their caviar in particular, since the Russians paid them a good price for it, whereas they themselves, although they likewise use it as food, do not prize it very much. The meat of sturgeon and hausen, however, which they always eat raw in the manner indicated above, is regarded among them as one of the tastiest of foods. Enormous quantities of sturgeon and hausen are consumed especially during the bear festivals, which take place in the winter. On such occasions I saw whole rows of the mighty great animals lying on the floor of the yurt decorated for the celebration, though they are not on the menu of the actual feasts at the bear festival and are only eaten in between them or on the days preceding or following the festival. Like the human beings, the dogs, too, get their share of these fish, in that a soup is cooked for them out of the discarded, less desirable pieces and especially out of the gristly skeleton with the meat clinging to it, but the gristle itself is fished out of the kettle in order to be sold, cleaned and dried, to the Chinese.

the English by Pichard, Paris, 1837, Vol. I, p. 312. John Bowring, "Die Chinesen, ihre Sitten und Gebräuche /The Chinese, Their Usages and Customs/" (Petermann's Geogr. Mittheil., 1855, p. 319). Girard, France et Chine, vie publ. et privée des Chinois anc. et mod., Paris, 1869, Vol. II, p. 32. Others, like the English missionary Milne (Petermann's Geogr. Mittheil., 1857, p. 436) and Poussielgue (Voyage en Chine et en Mongolie de Mr. et de Mme. de Bourboulon, Paris, 1866, p. 272), deny the use of rats for food among the Chinese.

*262 Gilyak were taught better by experience, perhaps as a result of painful or even fatal cases of trichinosis? Among all the land mammals there are only two that are of special significance as food for the Gilyak, and, to be sure, both on account of their general and frequent use and the great importance that they place upon them. These are the bear and the dog.

*262 231 ●796

Bear meat and bear fat are the greatest delicacies that there are for a Gilyak. For the purpose of eating it, the bear is taken from its lair and kept in captivity for a long time and fed. But, according to Gilyak custom, it may not be eaten except at certain times and with the observance of a number of ceremonies and practices that are undertaken in large ad hoc festive gatherings. I have had an opportunity, as an eyewitness, to become acquainted with these bear festivals, which play a most important role in the life of the Gilyak, in all their individual acts from beginning to end, and therefore I am obliged to discuss them in a special, later section of this work. Besides that, however, they gave me considerable insight into the food and cooking of the Gilyak in general, for to entertain the large festive company assembled many dishes must be prepared in a way to suit the palates of the Gilyak. And so most of what is presented below concerning their culinary achievments was observed by me on such occasions.

/439 cont./

252 *262

are a popular ingredient in many dishes of the Gilyak, for example, among others, one of the most important of these, the so-called mossj. This is a mixture of ground fish-skins, or, lacking them, of chopped jukola, with fish oil and berries. For the preparation of mossj, the fish skins, from lyghi-tscho or tengi-tscho, are cut up in small pieces, well cooked, ground, and stirred with fish oil to a mush of a white color, to which, finally, bilberries are added (2). This gives a thick substance like thick cream (sour

[171]

2. A quite similar dish, made out of cooked and ground fish-skins with an admixture of pounded cedar-nuts, was used by the Kuriles on the southern tip of Kamchatka, according to Steller (op. cit., p. 325).

●[796]

cream). I saw mossj prepared for the bear festival in Tebach, for it is an essential part of it and is both eaten by the participants and given to the bear. At other times, however, I saw it made out of finely cut jukola that was cooked and mixed with fish oil and bilberries. If the substance is cooled sufficiently or freezes a little, it can be cut into slices with a knife. Depending on the kind of fish used, the Gilyak distinguish between lyghi-mossj and tengi-mossj, giving preference to the former. They like to take a small supply of it along on winter journeys. For the midday meal around the blazing fire I have seen them perfectly satisfied with a few strips of jukola warmed or slightly roasted at the flames, several slices of mossj, and a drink of snow-water. Next to the bilberry, Empetrum nigrum L. (Gilyak yghych) is the most commonly used and favorite berry among the Gilyak. Just like the former, indeed often in place of it, it is used both as an accompaniment and as an ingredient for mossj and other dishes, /440/ and is likewise collected and stored in great quantities. In the Tymy Valley on Sakhalin it is even more common and more frequently used than the bilberry. Elsewhere, for instance, near Tymi on the Liman, the cranberry, Vaccinium oxycoccus L.

re quite different with respect to those vegetable foods
egion itself does not produce and which the Gilyak can
y by trade with the adjacent civilized peoples, the
Japanese, and Russians. These foods, a few cereals
nes, are, to be sure, much more nutritious but on the whole
significance for them, and indeed to a certain extent
be called luxury items because they are directly avail-
to those who are better off and not always to them.
are eaten only upon certain occasions. In daily life
eal only rarely or hardly at all by the Gilyak. During
festivals, however, great quantities of them are con-
and since these festivals are celebrated rather frequently
eeping with the communistic spirit of the Gilyak, are
by numerous participants, the foods of this kind, stored
individual who becomes the host for the occasion, are
ared with a greater or lesser number of other and less
Gilyak. On such occasions I have learned in detail
s foods of this kind that are customary among the Gilyak
erin in which they are eaten. As was said, there are not
them. First come the cereals obtained from the Chinese.
common and the most popular among the Gilyak is
or, as they always say, Manchurian millet, Setaria
(Gilyak budŷ), and next Chinese barley (Gilyak mudŷ).
and lens popular is Sorghum vulgare L. (Gilyak mjuxj) (2).

2. The first two have the same designation
among the Olcha; the latter is called
sujunu by them and by the Goldi.

rice, on the other hand, is highly esteemed by the Gilyak,
is only very rarely found among them. Judin, a very
hed Gilyak, the host of a bear festival which I attended
ter of 1856 in the village of Tebach, still had the
of a supply which he had acquired years ago from the
(Siam) on Sakhalin, but there was not enough to set
e numerous guests. As soon as the Russians settled in the

/444 cont./

114 certainly a wholly correct one, "that all those peoples who live
263 almost exclusively on animal food -- hunters, fishermen, nomads
171 (and the Gilyak belong among them) -- either are not familiar
with salt, or, if they are familiar with it, detest it, whereas
people nourishing themselves predominantly on vegetable foods
have an irresistible desire for it and regard it as an indispensable
food" -- an attitude that on the basis of his excellent explanations
from the chemico-physiological point of view has been fully
263 confirmed (1). With respect to the Gilyak, however, I find myself

(113) 1. Cf. also his Lehrbuch der physiolog. und
patholog. Chemie /Textbook of Physiological
and Pathological Chemistry/ Leipzig, 1887, pp.
109 ff.

induced by the above-mentioned explanations by Dr. Bunge to
make a few remarks concerning the use, or rather the non-use,
763 of salt among them. The bear festivals are the only occasions
114 at which the Gilyak, as is to be seen from the above statements,
114 eat plant food, and, to be sure, cereals and legumes, in large
262 quantities. It is therefore not surprising that at that time the
Gilyak for salt not only does not disappear, but, quite the
contrary, is especially noticeable, for during a bear festival it is
regarded as uitsch (unlucky) merely to add salt to the dishes? Yet,
this does not seem to me to contradict Dr. Bunge's final conclu-
sion and its chemico-physiological proof. For, first of all, the
bear festivals take place for only a short time here or there, which
does not alter the very predominantly animal character of the
Gilyak diet on the whole; secondly, the amount of plant food eaten
at them is considerable only in case the host is a very prosperous man
who trades with Chinese, Russians, or Japanese, and otherwise,
and in general, it is likely to fall behind the amount of animal
food, especially bear meat and fat; thirdly, and finally, the bear
festivals are an ancient national custom permeated, as we shall
see, with a number of deep-rooted superstitions for the Gilyak,
among whom any innovation would meet especially stubborn
resistance.

2: Schrenck--681 E-5 (1854-1856) 1881-1895 RX2 Gilyak RX2

/444 cont./

000 resistance. It certainly existed among them long before they be-
263 came acquainted with salt, as can be seen from the fact that
263 they do not have any independent designation for it, but only a some-
796 what modified foreign one. For the Gilyak designation tafxsch for
192 salt was probably /445/ borrowed from the Manchurian dabsun
(Mongolian: dabasu) (1). On the basis of this etymology, I would

(113) 1. Klaproth, Asia polyglotta, p. 298;
Sprachatlas /Linguistic Atlas/ p. XXXXVI.

also presume that the Gilyak first became acquainted with salt at the
time when a Manchu tribe, the Djutscheren, engaged in agriculture,
livestock-breeding, and the like, lived along the lower Amur from
the mouth of the Sungari to below the mouth of the Usuri, from
where they were transplanted to the Churcha in the middle of the
seventeenth century upon orders from the Chinese government (2).

2. See p. 318 above.

In the two centuries since then salt has found no acceptance among
the Gilyak -- certainly proof that there was no physiological need
for it.

Whereas the Gilyak aversion to salt is so pronounced and
general, sugar (Gilyak sakta), on the other hand, finds great ap-
proval among them, and to be sure, in the form in which they
became acquainted with it from the Russians (3). The Chinese

(192) 3. Could it not be that the Gilyak designa-
tion given for it was borrowed from the
Russian ("sachar")?

sugar already known to them earlier, brown in color and only
faintly sweet in taste, had no attraction for them, and since,
moreover, it is to be had only for a high price and only by way
of exception from the Chinese traders along the Amur, who
usually carry with them only small quantities of it for their own use,

XXXIII, Fig. 6), and, to be sure, more often noisily drunk than
eaten with a spoon. For the enjoyment of solid food, fish, meat,
blubber, and the like, rectangular shallow bowls, Gilyak ex-ngir (3)

[104] 3. The i is soft in this word and is to be
pronounced like the French e.

415 (ibid., Fig. 7), are used. Also used for the same purpose are
wooden, circular, rather shallow bowls or plates (Pl. XXXIV, Figs.
2 and 3), about a foot in diameter, which among the Gilyak bear
the name xam-ngir, ring bowls or thumb-ring bowls, obviously on
account of their round form similar to the above-mentioned thumb-
[192] ring (xam) (4). The Gilyak, however, do not make them them-

[192] 4. Among the Olcha they are called kota.

selves, but obtain them from the Goldi, who occupy themselves
415 with turning them. At the bear festivals they are used in great
531 numbers by the Gilyak, as well as by the Olcha, in particular for
796 eating the above-mentioned kinds of groats, though they are not by
any means /447/ implements used exclusively in connection with
these festivities, as might be concluded from their exotic origin and
the complete lack of any ornamentation and carving. I myself saw
the Gilyak use them often enough in their everyday life. In contrast
to these mass-produced, undecorated bowls turned by the Goldi,
all the other above-mentioned vessels made freehandedly by the
Gilyak themselves always stand out because of all sorts of decora-
tions put on them, which, however, remain far behind the artistic
carvings which we shall discover on the implements used exclusively
322 at the bear festivals. For the manufacture of all the vessels pre-
412 sented above, bowls, spoons, etc., for the execution of the carvings
on them and on other utensils, the Gilyak use, in addition to the

Gold RY3

/464 cont./ This is how the Chinese
273 merchant on the Amur does it as he deals with his customers
197 and offers them an occasional sip from his little bowl; this is
433 how he is imitated by all well-to-do Goldi, Samagir, Olcha,
or Gilyak who are able to provide themselves with the precious
beverage and the utensils required for drinking it, and this is
precisely how Mamia Rinō describes the manner in which the
Smerenkur on /465/ Sakhalin drank their "aka" brought from the
Amur. I also saw the libation preceding the drinking, which
consists of first moistening the tips of the thumb and forefinger
with liquor and a few drops are sprinkled to the right and to the
left, up and down, and toward one's own chest, more or less
carefully executed, just as by the Manchu and Chinese on the
Amur, also by the Gilyak, Olcha, Goldi, and even Orochi
in Hadshi Bay. Thus, the enjoyment of liquor among these peo-
ples is done in a definite way sanctioned by usage, from peculiar
foreign utensils required for it, and with the observance of cer-
tain formalities prompted by superstition. Undoubtedly this
circumstance, besides the others mentioned above, the procure-
ment of the liquor from a great distance and its high price in the
retail business of the Chinese merchants on the Amur, must have
had a beneficial effect on the consumption of liquor among the
Amur peoples in impeding and limiting ways and trained them
to moderation in the enjoyment of it. In fact, I must testify to
such moderation among them, and especially among the Gilyak,
whom I knew best, during the time of my stay in the Amur
region. Despite the fact that with the settlement of the Russians
along the lower Amur, in Nikolayevsk and Mariinsk, a new and
very close source for this prized and popular drink opened up for
them, there was nevertheless so little drunkenness among them
during the first few years afterwards that I never came across a
single case of it, despite my many contacts with them, not
even during the numerous bear festivals which I attended. This
273 last seem especially striking to me, but is explained by the fact
796 that, according to their own statements, the drinking of spirits
during the bear festival is regarded by them as uitsch (unlucky) --
a conception which may owe its origin to the feeling for the

222 sponge that it is dangerous to step on it, or is covered with
water -- this usher in the most meager and difficult period for
the river-dwellers, since human beings and dogs live on only
the scanty remains of the winter supplies. Moreover, all com-
munication between the villages on the Amur ceases at this
time. The Gilyak therefore waits impatiently for the opening
of the river, when it becomes lively anew and fishing and
traffic on it are again possible. The opening up of the Amur
River is therefore always a joyful and important event in the
lives of the Gilyak and is appropriately hailed by them. As
796 soon as the river is entirely free of ice, a boat manned by as
222 many oarsmen as possible sets out from every village of any size
792 in order to offer it, on a swift journey and amid loud shouts of
114 joy, the customary sacrifices, that is, to toss pieces of lukola,
berries, millet, tobacco, and the like into the water. On
May 14/26, 1856, shortly after beginning my upstream return
trip from Nikolayevsk, I had the good fortune to meet, between
the villages of Walr and Magbo, such a boat on its sacrificial
voyage (see Pl. XXXIX /see p1069/). It was a long boat with
[50] twelve oarsmen and 13 oarsmen. The latter, each with two oars,
sat in a row up to the prow of the boat. Above them rose three
light racks, each consisting of two upright rods connected at
the top by a crosspiece. The oarsmen rowed in perfect time
and with full force, and the steersman for his part helped at
each stroke of the oars with a powerful stroke of the steering-oar.
Thus, amid the wild shriek of its occupants, the boat shot past
us like an arrow. It is therefore not improbable that some of its
equipment escaped me. For instance, I saw nothing hanging
down from its racks, and yet they must have the purpose of
carrying something, even though, in view of their very weak
nature, it could only be quite light objects. And so this
192 automatically leads me to the conjecture that they are intended
194 to carry the so-called zach, i.e., long, thin, curled wood-
shavings, such as are customary in connection with all the
events in Gilyak life that are bound up with superstitious ideas,
the bear festivals, funeral ceremonies, and the like (1).

1. See p. 662 ff. above.

2: Schrenck--804 E-5 (1854-1856) 1881-1895 RX2 Gilyak RX2

/517 cont./

796 Presumably only loosely hung over the racks upon departure,
222 they could only too easily have fallen off during the rapid
792 and wild voyage and could have been carried into the river by
the wind. Indeed, the latter may even have been the precise
intention of the sacrificers, for the entire sacrificial voyage is
supposed to serve to gain the favor of the river or the river-
spirit through the gifts mentioned, and through that to secure
good luck and success in fishing and during all river travel in
the coming /518/ summer and fall. My opinion concerning the
zach in connection with the sacrificial voyage on the Amur
was confirmed by the fact that in the fall, as soon as a new
covering of ice has formed on the river, another celebration
with sacrifices and zach takes place. The Gilyak then go out
on the ice in front of their village: here a hole is cut in the
covering of ice, and beside it a pole decorated with zach is
erected. Now the above-mentioned gifts are thrown into the
river by means of this hole, obviously to obtain its favor for
the winter fishing and perhaps also for the traffic on the ice
covering.

226 Immediately after the Amur is open, there comes up
796 from the sea the best and largest fish that it has to exhibit:
222 the Amur sturgeon (Acipenser schrenckii, Gilyak tukki-tscho)
792 and the even larger Amur hausen (Ac. orientalis, Gilyak patch-
tscho). Both go far up the Amur and its major tributaries, the
Usuri, Sungari, etc., and, indeed, of the latter, the kaluga
the Russians, it was reported as early as Pallas that it also occ

5. Putesh. na Amur /A Journey to the Amur/, p. 75.

Manegir smear their arrows with a putrid fat acting as a poison, but I am not familiar with anything of this kind among the Tungusic tribes of the lower Amur region.

The quiver (Gilyak pi) used for stowing away the arrows among the Gilyak is as a rule made of wood, decorated with carved arabesques or other figures, and is provided at the top with a fur edging or a fur flap for the protection of the arrow points (Pl. XLV /see p.1025/, Figs. 6 and 7). Characteristically it is relatively heavy and clumsy, and therefore is not very suitable for being carried on the hunter's back, which probably happens only rarely and to a very limited extent. If, on the other hand, one holds the exceedingly light and portable quiver of the Orochi from Kaiserhafen, made solely out of animal skins (ibid., Fig. 8)(6),

6. It is made out of pieces of reindeer and elk leg-fur; the crossband in the middle is made of otter fur.

this in itself would show that hunting among the Gilyak, in comparison with their Tungusic neighbors, falls far behind.

I doubt very much that the Gilyak are skilled archers, though I do not have sufficient experience to be able to say anything more definite about it. The one time I saw them shooting was under conditions which would not permit drawing any conclusion as to their skill. It was at the bear festival in Tebach, when the three bears, held by chains and led about, were finally shot. The marksman in each case approached the erect animal from the right side to within about five paces. The first two bears went down with loud roars after the first shot, struck in the right lung; in one of them the arrow had penetrated to the middle of the shaft. The third marksman had struck his victim too low, in the abdomen, and therefore had to send a second arrow, which cut down the animal and caused it to die slowly.

/563 cont/
it to come out from its hiding place (2). For the shamans among

2. Arth. Nordmann, "Ueber den Fischfang und die Jagd der am Amur wohnenden Giljaken /On the Fishing and Hunting of the Gilyak Living on the Amur/ (Bull. de la Soc. Imp. des Natur. de Moscou, 1861, Vol. XXXIV, Sec. Part, p. 251).

the Gilyak, quite apart from the character ascribed here to their songs, which in reality never at any time belonged to them, have nothing whatever to do with hunting, either for bears or for other animals. They never interfere with the pursuits of the practical life, fishing, hunting, trading, of this superstitious, to be sure, but vigorous and enterprising people, and, on the contrary, as we shall see in the following, practice their arts on entirely different occasions. The Gilyak, by the way, do not regard the capture of a bear as an offense perpetrated against it, because through this it is introduced to a life with abundant food, a good home, and many marks of respect. The spirits of revenge can be aroused only by its death and being eaten, and therefore the bear festivals, leading to this outcome, are surrounded by a number of rules of behavior dictated by superstition, whose observance is supposed to ward off misfortune. The other animals are given less consideration, but even with regard to them there are many rules that are not to be neglected without causing future mishaps in connection with the hunting concerned, and, along with this, depending on the kind of animal involved, more or less grievous injury to the profits. /564/ For example, I by accident came across the following superstition concerning the hunting of sables. When I entered the yurt of Miwwach on the lower Tymy on Sakhalin, I saw a sable hanging from the wall beam, which was still completely intact and evidently had just been brought in from a trap. As I was looking at the animal, the wife of the absent owner entered; obviously distressed because I had seen the

"Emerging from the hut into a crowd of yelping dogs, we were attracted by the bear-cage. In front hung a birch-bark basket, as seen in the illustration (opposite p. 196), [LSS: See Visual File] containing fresh water for Bruin. His owner fetched a piece of dried fish, and holding it before a hole in the cage, the bear, who was of full size, thrust his great paw out to grasp the fish, the while I snapped him with my camera. This animal, having already attained his majority, was due to play the chief rôle at a festival in the following January.

The bear fête, which probably originated as a purely religious festival, has become a 'Bank Holiday' in the Gilyak calendar, the great break in the monotony of the long winter. The proceedings are unique and interesting. [196] The animal having been captured young, and fed up until he attains the age of four, a fête is decided upon for the following January. Invitations are then sent round to neighbouring villages, whose inhabitants, however, need no such announcement, for they are already well aware of the coming event. On the morning before the fête the village presents a busy scene as the guests arrive in great numbers, their sledges, drawn by teams of dogs, dashing up from all parts of the snow-mantled forest. [LSS: See category 527, pp. 196ff. for a full description of the bear fête.]"

ection with the opening of the river.

/697 cont./ From now on

it belongs, so to speak, to the whole village, for all its members have to attend to its care and feeding and, accordingly, are entitled to participate in the forthcoming festival in its honor, ultimately ending in its death and the consumption of it. The bear festival, then, in a very eminent sense is a communistic festival which unites all the individual members of one village community and therefore understandably represents the climax of the social and co-operative life of the Gilyak. The original owner of the bear, the man who bought it or who arranged for its capture, has only the right to determine the time when the festival is to take place and to direct it, always, of course, within the limits of traditional practice. Similarly, as the host, he may make the feast a more or less opulent one by adding culinary delicacies other than the ones furnished by the bear and, accordingly, to invite to it relatives, friends, and acquaintances, even of a foreign tongue, living beyond his village. Finally, after the festival is over, the skin of the bear goes to him.

The feeding of the captive bear by all the inhabitants of the village takes place in accordance with a previously established order. The food given to it, through the little window in the prison consists exclusively of fish in a raw or dried state (jukola), mossj, i.e., a mush made of ground fish-skins or cut-up jukola, fish or seal /698/ oil, and red bilberries or crowberries (1),

1. Concerning its preparation, see p. 671 above.

and water, which in summer may be given to it in liquid form, but in winter only as ice or snow. The long spoon (Gilyak nichyr) illustrated on Plate LI /p.125/, Fig. 2, is used for presenting the food, in particular the mossj and the water. From time to time, but only rarely and chiefly, no doubt, for the purpose of cleaning the cage, the bear is taken out of it. For this procedure, however, which I witnessed in the village of Tschomi on the Amur-Liman, it must be partly bound again. This is done by carefully pushing apart a couple of the boards on top of the cage, throwing a noose

Feeding a bear.

the sea. Both the Nivkhi dwelling and every river had its yz', who took care of man. The sky was thought to be inhabited by "sky people." The sky people—the sun and moon—had no close relations with man, but the Nivkhi were always in close relations with the yz'. "Receiving" from them fish, sea animals, etc., the Nivkhi had to "give" them in return—to sacrifice to them. The cult connected with the "masters" of nature was of pronounced clan character.

The "mountain man," the "sea man" and the bear, in the Nivkhi thinking, were common to the clan. And the bear festival (chkhyf-le-kherno—"bear game") was a clan festival. The clan which celebrated the festival assumed the expense and work of arranging it. This festival was connected with the cult of the dead, since it was usually held in memory of a dead clan kinsman. A bear cub was caught in the taiga or bought and placed in a special frame building. The cub was reared by members of the given clan. On specific days it was taken out and led on a chain through the encampment. The bear was reared for several years. Before the festival, all the clan members gave the bear's master products and money. The master's family prepared food for the holiday (usually held in February), built a platform—a shooting ground with one or several pairs of trees—poles hung with ritual shavings (inau) and covered with carving. The bear was tied between them. The honorary duty of killing the bear was given the narkha—people of the clan in the relationship of "son-in-law" to the clan holding the festival. The festivities sometimes lasted several days and consisted of a complex ceremony of killing the bear with a bow and arrow, ritual feasting on the bear meat, the sacrifice of dogs, and so on. The bearskin with the head was lowered into the yurt through the smoke vent on a high pole. In the intervals between eating, there were dog races, shooting matches with bow and arrow, fencing with sticks, and dancing. After the festival the head and bones of the bear, the ritual utensils et cetera were put away in the special clan storehouse. Wherever a Nivkhi lived, he retained his contact with his clan storehouse, where he always brought the skulls of the bears he killed.

The burial rites of the Nivkhi differed sharply from those of the Tunguso-Manchurians of the Amur regions. The Nivkhi characteristically

Playing a wooden percussion instrument.

The wooden religious sculpture was akin to that of the Orochi, Ul'chi and Nanay. The figurines of bears on dippers and spoons used in the bear festival were finely made and realistic in style. The bear dippers were often remarkable in their craftsmanship. Some of them were carved with pictographs, relating the history of the hunt or rearing of a given bear. The carvings on the dipper handles were also symbolic; they indicated by a variety of symbols whether the bear was killed in a hunt or reared in captivity, whether it was killed in the summer; and so forth.

The musical culture of the Nivkhi was very poor. They played a primitive one-string instrument (t'yngryng) and a lip jew's-harp (kkangga). During the bear festivals they used, instead of musical instruments, an ordinary log, which the women struck with sticks.

Education was entirely lacking among the Nivkhi before the Revolution. The Nivkhi-Nanay alphabet written in the 1880's by the missionary, Protod'yakonov, was not used by the Nivkhi.

In 1895 an elementary school was opened in the city of Mariinsk; two others were opened in 1899. By 1905 they were closed for lack of funds. Only a few individual Nivkhi attended Russian schools.

Contemporary Life of the Nivkhi

In 1918, soon after the establishment of the Soviet government in the Far East, this area, and especially the Amur Basin and Sakhalin, became the scene of civil war and intervention. Guerrilla units were organized to fight the White Guards and interventionists. The bitter fighting lasted several years.

171 among the Goldi, are in use throughout the Gilyak people
751 and are essentially the same as those discussed earlier
301 (Number XIII, p. 207) [see Goldi source 18: Genest--
Analyst]. The Gilyak on Sakhalin Island whose houses
372 Jakobsen entered were likewise highly indignant whenever
462 he left the house with a lighted pipe or when his companions
776 extinguished the fire burning in a hut by pouring water on it.
For in their opinion such things tended to conjure up destruction not only over the inhabitants of the one hut but over the whole tribe. The inhabitants of one house in the village of Varki below Nikolayevsk predicted the same result when Jakobsen was about to light a fire for making the tea, and they forced him to wait till the house-wife saw to this task, since, in their opinion, this was a job only to be performed by her. Plainly this conduct has its basis in the sacred position of fire. [380] Though this no longer leads to a personification of a fire god among the Goldi and the Gilyak, it no doubt existed among them at one time as it still does today among the Buryat.

776 The system of gods of the Gilyak is in no way behind that
171 of the Goldi in variety. Human and animal figures in color-
825 ful diversity serve as representations of celestial beings.
796 Here, too, there is a great similarity to the religious conceptions of the Goldi; the most important difference seems to me the one that was touched upon earlier (XIV, p. 223), [see Goldi source 18: Genest--Analyst] the fact that the Goldi pay zealous homage to the tiger while the Gilyak do honor to
796 the bear. It is true, though, that this homage is disastrous
415 to the bears since it means keeping a number of these
531 animals imprisoned in the cages in every village and killing
231 them at a bear festival. Before the festival the bears are fed plentifully for an extended time by means of large wooden spoons prepared especially for the purpose and decorated
796 with ingenious carvings. These bear festivals are usually held late in autumn and in winter and they are affairs of the greatest importance to their celebrators. I will now give the description of the festival that Jakobsen had the opportunity of observing in person.

796 On the 7th of February, 1885, the traveller arrived in
622 the early morning at the Gilyak village Vaida about 30 versts
574 above Nikolayevsk, where, as he had been informed, a festival was to take place on that day. From several other villages, some of which were considerable distances away large numbers of guests had come in already, and the whole place was astir in anticipation of the festival at hand. The opening of the bear festival is in the hands of the village

village there is a kind of fence made of sturdy
which has an opening for an avenue that is also
oth sides with similar willow sticks. Inside
the bear, after it has finished its tour through
tied between two tree trunks. There it is left
while, while the inhabitants of the village amuse
th the dog race almost always held at these.
In the village visited by Jakobsen they also had
ally constructed for this purpose, which, how-
very long. After the dogs had been led to the
owners and placed next to each other, they
at intervals of a few seconds, but they all
finish about the same time. There is, by the
f winning prizes at this race, since such do
Rather, it might be called a purchasing race
serves to place the good qualities of the dogs
ht and thus to arouse a desire for buying. The

796 sled race has the same purpose and is likewise held on this
541 occasion. Here it does not matter either whether the draught
231 dogs show outstanding speed. This is shown by the fact that
437 only one sled races along the track at time; the test is,
rather, how accurately the team and especially its leading
dog run along the prescribed route. Such leader dogs, which
show themselves to be particularly reliable, especially in
understanding and following exactly the calls of the leaders,
are very highly valued among the Gilyak who pay from 30 to
796 60 rubles for them. It was interesting to watch how, to take
541 part in the race, some of the Gilyak who were standing by the
522 track threw themselves on the sleds that travelled by them at
a speed almost equal to that of an express train. Some Gilyak
succeeded very well in this attempt; others, on the other hand,
were thrown along some distance by the speeding sleds and
sometimes suffered grave injuries, which they bore, however
with the best good humor despite the pain and the ridicule of
their luckier companions.

796 At the end of the race, the whole crowd, closely followed
by the traveller, of course, went back to the enclosure
mentioned above and released the bear from its prison. Then
the entire male population of Vaida, together with the guests
from outside—altogether more than 100 persons—led the
bear down the hill on which the fence was erected, to the vil-
lage. On the way, one half pulled the bear forward by the belts
described above since it gave indications of no longer wanting
796 to follow its tormentors willingly. The others steered the bear
522 more or less by means of the belts attached to its back. During
this, the company raised a terrible racket. Now both parties
would shout methods of procedure at each other, now one or
another would fall into the deep snow to the amusement of his
companions, and those that came after him would kick and
jostle him in the most merciless manner, without this, how-
796 ever, spoiling his good humor in any way. Then again, the
bear would attempt to seize one of its tormentors with its
teeth and claws and it always had to endure a resounding,
scornful laughter if it did not succeed. In short, it was a
highly agitated scene that presented itself here to the eyes of
our traveller. When they arrived in the village, [381] they
stopped first of all in front of the house in which the bear had
enjoyed its last meal the evening before. He a beam about
three meters long had been attached to a stand in front of the
door in such a manner that it hung down vertically about a
796 meter above the ground. Beside this beam there stood six to
533 eight girls and women who were provided with club-like sticks

6 with which they hit the beam rhythmically, two slow hits
3 followed by one fast one; this activity was not accompanied
by any songs. They led the bear slowly past these women and
6 then placed it so that its head was turned towards the house,
as though he should take another good look at the place where
he had received its last nourishment from the inhabitants of
the village. After a very brief halt they then dragged it further
along to the river bank and then forced it to go on the ice to
about the middle of the river. Thereupon the whole crowd
returned to the village and moved to the house inhabited by the
former owner of the bear. Here the bear was awaited by a
very similar reception as that described above, except that in
this place they forced the bear to stick its head inside the house
and thus, in a way, to take leave from its master and nourisher.
Then he was again led to the enclosure, and there they tied
him up as before.

Only now had the moment come in which the bear was to lose its life. Amid general silence which was also commanded with solemn mien to our traveller, an old Gilyak--whether he was the owner of the animal or not is not indicated in Jakobsen's account--stepped forth from the crowd and grasped bow and arrows which were lying there ready for him. Then he slowly took off his under-jacket, wrapped some leather belts around his left hand in order not to injure it with the bow string, and picked out an arrow with much solemnity and circumstance which made a rather comical impression, and finally he placed the arrow on the bow. At first it seemed as though he was going to shoot in the air because he raised his bow while he stretched it. Then he lowered it again very slowly till the arrow was directed exactly at the bear's heart, and then he shot it off. The bear fell down on the spot, as far its bonds permitted it to do so, it rolled to and fro a few times, and then died after a few convulsive movements, thus proving what a steady hand the archer had preserved in spite of his old age. During this whole procedure, which lasted rather long, there reigned a breathless silence among the Gilyak standing around the fence, and this created an even more solemn impression since it was in such sharp contrast to the foregoing deafening tumult.

After the bear's death its former owner came and embraced the animal tenderly like a dear friend of whom he wanted to take leave. Then they pulled a number of the sticks of the fence out of the ground and laid them down to serve the dead bear as a resting place. Later they drag the animal into its owner's house, as the traveller was told, since he did not have the time to await the end of the festival. In the house they lay the bear

796 on a bed of fir twigs as on a bed of state and the participants
in the festival visit it for the last time. After two or three
days they pull off its hide and the meat is distributed among
796 the guests who eat it with relish. There is a strange con-
825 tradiction in these bear festivals. On the one hand, they honor
531 the bear as a celestial being, as is proved not only by its
pictures serving as idols and amulets but also by the tender
attentions that they show the animal during its imprisonment.
For this speaks also the solemn way of killing it, as well as
the ceremonious procedure used in treating the corpse; also,
the circumstance not mentioned above, that the traveller was
not allowed to take with him one of the willow sticks of the
fence which was later used for the bed of the dead bear. He
would all the sooner have done so since the stick was distin-
796 guished by tasteful carving. On the other hand, they are not
825 afraid to kill this animal that they honor as a divine being,
756 and by a death, even, that is only the conclusion of a rather
barbaric torture. Furthermore it is a curious circumstance
that during the whole course of the festival, as far as Jakobsen
was able to observe it, the shaman was not even visible, even
though the latter plays such an outstanding role at all the
796 religious ceremonies of the Amur peoples. What, besides, is
782 the purpose of leading the bear out on the ice of the river?
776 [in the bear festival; see p. 381--Analyst] Should it suggest
the idea that the animal is to be offered as a sacrifice to the
river honored as a god? And if this is really the case, what
a strange idea it is to sacrifice one god to another and to eat
him up in the end. And why don't they kill the bear on the
river bank and let at least its blood flow into the water, just
as the fish gods are entrusted to its waves? What, further-
more, is this sacrifice meant to effect? and what is its
nature? Are we to imagine it as a sacrifice of thanks offered
up to the river dispensing blessing and nourishment, or as a
sacrifice of expiation by which the river is supposed to be
made favorable to the dwellers near it, because the latter are
well aware of their dependence on the river and its power to
bring them destruction? In the former case one would think
that the celebration would take place as soon as possible after
the time fishing ended, that is, about September or beginning
October, while these festivals actually are not till later. The
second assumption does not agree, again, with the circum-
stance that the nature of the festival is a thoroughly joyful
one, as is proved, at least to my mind, by the description
of it given above. This is not contradicted, either, by the
solemn silence which reigns during the lethal shot and the
796 preparation for it. For it is by no means necessary to see

796 in this the proof of seriousness or mourning; rather, it is entirely enough to assume that in this way they want to avoid making the archer unsteady by noisy behavior, and thus to bring him into the danger of missing his mark. Or is the torture that they impose on the poor animal before its death meant to be a symbol of the serious nature of this festival? Even this conception seems untenable to me, for why should one torment an expiatory sacrifice that already has to suffer enough by its innocent death, as happens in this case; and, besides, does not the cruel treatment of the bear before its death give the impression of proceeding entirely from the overbubbling festive joy of the celebrators? Unfortunately, the traveller was unable to give any hints as to the significance of the ceremonies described, since the Gilyak were themselves unable to explain them. They celebrated [382] the festival the way their fathers and forefathers had celebrated it, without worrying any further about the meaning of the various actions. Jakobsen's friends in Nikolayevsk were equally unable to give him adequate explanations on this subject. Probably, therefore, we need more frequent and more detailed observation than is available today before we can see into the matter clearly.

115 173 539 Finally, a saga current among the Gilyak which Jakobsen heard from a Russian station master who had lived in their territory for a long time. It goes as follows: A long, long time ago there appeared on the Amur coming from the east a small vessel full of enormously strong people of a dark complexion. These went ashore, attacked the villages, burned them down, and, without distinguishing age or sex, killed and ate all the inhabitants that they could lay hands on. Sailing up the river, they acted in the same fashion in the land of the Goldi till finally the invaded tribes recovered from their terror, banded together and moved in large hordes against the barbaric enemy, whom they then defeated in a bitter battle. All the cannibals were killed and their ship was destroyed. From this time on, the Gilyak always add, no more foreign people came to the Amur River from the east up to the time when the Russians appeared at the mouth of the river and took possession of the land.

825 middle of a village, and there fattened upon fish. On fete-
796 days he is led, or rather dragged, in procession, and of course is thoroughly muzzled and bound. Finally a great day arrives on which Bruin takes a prominent part in the festival by being killed. There are many superstitious ceremonies carefully observed on such occasions. The ears, jawbones, and skull of the bear are hung upon trees to ward off evil spirits, and the flesh is eaten, as it is supposed to make all who partake of it both fortunate and courageous.

I did not have the pleasure of witnessing any of these ursine festivals, but I saw several bear cages and looked upon a bear while he lunched on cold salmon. If the bear were more gentle in his manners he might become a household pet among the Gilyaks; but at present he is not in favor, especially where there are small children.

231 Ermines were formerly domesticated for catching rats, the
825 high price of cats confining their possession to the wealthy.
839 Cats have a half-religious character and are treated with great respect. Since the advent of the Russians the supply is very good. Before they came the Manjour merchants used to bring only male cats that could not trouble themselves about posterity. The price was sometimes a hundred roubles for a single mouser, and by curtailing the supply the Manjours kept the market good.

756 The Gilyaks, like nearly all the natives of Northern Asia,
759 are addicted to Shamanism. The shaman combines the double function of priest and doctor, ministering to the physical and spiritual being at the same time. When a man is taken sick he is supposed to be attacked by an evil spirit and the shaman is called to practice exorcism. There is a distinct spirit for every disease and he must be propitiated in a particular manner. While practicing his profession the shaman contorts his body and dances like one insane, and howls worse than a dozen Kamchadale dogs. He is dressed in a fantastic manner and beats a tambourine during his performance. To accommodate himself to the different spirits he modulates his voice, changes the character of his dance, and alters his cos-

drink offering, in which the women also took part with renewed weeping, completed the ceremony. The manner of placing the head on the [123] pole is shown in Fig. 88, which is copied from Dr. Scheube's drawing. The general appearance of the hedge is best seen in Plate CXII.

In the short account of the mythology and folk-lore of the Ainos given further on, there are some bear stories which are of interest in connection with the ceremonies described, indicating how the Ainos regard the animal in its relations to themselves. As Dr. Scheube has said, the bear is more to them than a mere beast of the forest, to be hunted and killed for food and raiment.

Fig. 88.
THE BEAR'S SKULL ON THE SACRED HEDGE.

A [778] A G 171 796

The Ainos are not the only people who worship the bear in the manner described above. In the northern part of Saghalien there are a people quite distinct in their physiognomy and language from the Ainos known as the Gilyaken.* Mr. W. Joest observed a bear feast among the Gilyaken, the description of which, as quoted by Dr. Scheube in a later communication, is substantially as follows. The mother bear is shot and the young one is caught and reared, but not suckled in the village. When the animal is large enough he is bound with a thong around the neck and another on one of his hind legs, and then led in triumph through the village. He must enter every house, where he receives food, while his manner of entrance and conduct are observed as omens. The bear is then for a time provoked, tormented, and annoyed until he is enraged and furious. The animal is then secured to " stake and shot dead with arrows. The head is then cut off and dec ..ed with shavings corresponding to the inao of the Ainos, and placed upon the table upon which the feast is spread. The people then beg his forgiveness and offer prayers to him. They then eat the flesh roasted (not raw, as do the Ainos, nor do they drink the blood) with schnapps, but without any ceremonies. Finally the brain is eaten and the skull is placed with the shavings in a tree near the houses. Then follows dancing by both sexes in imitation of bears.

DANCES AND OTHER CEREMONIES.

585 It is noteworthy that such a ceremony of "stamping the kettle"
788 takes place among the Tungus tribe of the "Negda," who since
171 olden times have concluded marriages with the Gilyak, from
797 whom they have undoubtedly borrowed the custom.

585 A year after the wedding the newlyweds, usually already
594 with a child, come to stay a little while with the wife's family,
788 and when they again depart they once more go through the ceremony of "stamping the kettle," only this time, instead of kettles, they use cups.

593 The vicissitudes of marriage. Just as in our society, marriages
586 are not always happy, Since the consent of the woman to the
[584] marriage is not asked, and rarely does any girl resolve to disobey the will of her parents, and very rarely do the parents yield to the protests of their daughters, not backing down from their decision even in the face of a threat of suicide, life after the
593 wedding is fraught with tragedies. Either a woman runs away
586 with her lover, or she runs away to her parents, especially in
839 the case of ill-treatment by her husband. In such cases the husband often tries to take back the fugitive by force, and otherwise he demands the return of the bride price. Since no
[697] one has a desire to part with something once it has become his own property, litigations to recover the bride price are endless.
[123] During my wanderings among the Gilyak, who at first took me to be one who had power, I had to listen to complaints concerning
593 the return of bride price in every settlement. They preferred,
586 however, to ask for the forcible return of the wife, which was
839 often done by the Sakhalin administrators with the favorable
171 assistance /284/ of the priests. The fact was that persons who
797 had lured away or abducted another man's wife appeared before a missionary with the request to be baptized and married, in order to guarantee themselves against the wife's being forcibly taken back by her former husband. The missionary willingly fulfilled such requests and gave them a marriage certificate, which gave to her owner the right to a police order demanding her return in case she was forcibly taken away. And this led to tragedies. One such case deserves to be immortalized.

1: Shternberg--412 E-5 (1890-1897, 1910)1933 RX2 Gilyak RX2

593 /284 cont./
586 From an Amur Gilyak named Tys', 22 years old and from the
839 settlement of Mkhyl', another Gilyak, Urgayn from Vayda,
171 stole the wife and went with her to the missionary Moskvitin.
797 The husband overtook them and began to beg the missionary not to marry them, but he carried out the request of the abduct for a certain bribe. Then the husband collected his clansmen and took back his wife by force. The original abductor presented his marriage certificate to the police, who, for a bribe, [762] ordered the woman to be returned to her lawful owner. It ende
[682] with the husband's shooting his wife and himself. They return
586 the bride price without litigation when the wife dies childless soon after her wedding, or when she runs away because her husband is poor and is not in a position to feed a wife, and, finally, when a wife betrothed in childhood dies.

117 Separate Materials on the Ethnography of the Amur Gilyak
(Extracts from Notebooks and Diaries)

I.

The Tribal and Clan Composition of the Population of the Lower Amur

[534] A legend. Long, long ago the Gilyak, the Orochi, and t
Goldi were one people. They were born on one branch of an alder tree. The brother and sister did not know where to go. The sister said, "down to the earth," and was the first to descer

Settlement of Bulava. Due (Kugi /Ainu/) -- 35 people;
[162] one finds them also in Patu, Tebakh, and Mago. When three
[103] men came, they found one house of an Ulcha khal'a. Mongol khala -- Djakhsul came down from the Goldi village of Chol'chi (1896).

766 /368 cont./
ceremony is not observed, namely, when a person falls victim
to a bear. There is a whole ritual for such cases. I shall be brief.
Immediately after receiving news of the Gilyak's misfortune, they
set out in search of the bear, following its fresh tracks. After they
find and kill the bear, they place the slain person astride it and
solemnly carry the bear and its ill-starred rider to the settlement.
They immediately begin to /369/ build a large balagan in which
they place the bear and its rider. The balagan is enclosed on all
[782] sides; they leave only small openings in which are placed small
[761] troughs with sacrifices, which are at first renewed very often and
then less and less frequently (in a year). This epopee is fully
completed only in the third generation, in the presence of the clans-
men of the slain man, with the final sacrifice of several dogs at
182 the source of the local stream. The meaning of this whole procedure
766 is, I think, the following. The bear is killed in conformity with
the principle of revenge (the kindred bones must be raised). The
posture of the slain man (astride the bear) is the symbol of the
triumph of revenge. Leaving the slain man in the pose of a rider
and honoring his memory for generations stem from a desire to
crown the brave members of one's clan with a halo of fame. It
may be that all this is done for the edification of the youth. Sacri-
[782] fices are made to Pal'-nivukh, in this case to propitiate him
so that such misfortunes will not be repeated in the future. This
example shows, incidentally, that the Gilyak are very far from
regarding the bear as a god. The last respects paid a person who
has drowned are also accompanied by a special ritual. He is
buried, it is true, but without fail on the seashore. The boat in
617 which he drowned is no longer used. In the presence of the entire
[782] clan a rich sacrifice is made to Toll'-nivukh on the shore. A new
yurt is built, in which the parents of the deceased or one of his
brothers settle. Again in this case, the procedure is to foster con-
tempt for danger, and, on the other hand -- to propitiate the
capricious god of the sea.

● 797 In conclusion I must say a few words about the spread of
Christianity among the Gilyak. On the entire western shore I
have met only two baptized Gilyak, who took the "sacred"

● 797 /369 cont./
baptism exclusively for the purpose of obtaining a certificate of
legal marriage to such and such a Gilyak woman, certificates
which give the right and opportunity to secure governmental
assistance for the return of the wife in case of her abduction. I
have, moreover, met a great number of baptized Gilyak from the
mainland, and from my conversations with them I have been
convinced that they do not have the slightest idea of even the
ritual side of Christianity, let alone its substance. Nevertheless,
the Gilyak is capable of grasping the idea of the one God with His
attributes as taught by the Christian religion. I could say a great
many things about the methods used on the Amur to convert the
natives to Christianity, but this /370/ is not the appropriate place
for it. As for the Sakhalin Gilyak, an especially talented mission-
ary could perhaps make some progress; many generations will have
to pass, however, before the Gilyak breaks his ties with the gods
which provide him with fish, seals, and sable. The baptized
[797] Goldi and the Amur Gilyak are now pronounced skeptics in their
[797] attitude toward religion in general, but they continue to make
[798] sacrificial offerings as before. It must further be added that the
Sakhalin Gilyak have no idols.

IV.

Juridical Life

581 Marriage. Despite all the remains and remnants of the old order
of life of which I have spoken, the modern marriage of the Gilyak,
from a juridical point of view, has a completely individualistic
form. One cannot call it, in the strict sense of the word, either
monogamy or polygamy, but one cannot call it communal, either.
581 In the eyes of the world every married woman is the wife of
684 a given individual, and her children are the children of that
individual. Violations of fidelity on the part of the wife bring
684 bloody retribution from the husband. The Gilyak who catches his
wife in flagrante delicto with a stranger kills the seducer and beats

29 Chinese origin (1). To make the fish-skin robes the Gilyak use
301
000

1. During my stay in the Amur region,
175 among such decorations several little brass
301 crosses with the inscription "Souvenir de
● 797 mission" and a bronze medallion bearing
29 the picture of the Savior with a Chinese (?)
648 inscription were found on a woman's robe
from the village of Wair or one of the nearby
villages. In all probability these pieces came
from the French missionary, de la Brunière,
who in 1846, after he had spent the winter in
Wair, was murdered and robbed by the Gilyak.
His colleague Venault, who by order of the
Apostolic Vicar of Manchuria made a journey
in 1850 from Ashe-ho on the Sungari to the
Gilyak on the Amur to investigate the crime,
saw many of their children wearing such
crosses and medallions (Nouv. Annales des
Voyages, fifth series, Vol. XXX, 1852 [Vol.
II], p. 218). To supplement the reports col-
175 lected by Venault concerning the killing of
648 de la Brunière, it should be noted here in
797 passing that it took place, according to what
114 I learned from the Gilyak, on the left bank
of the Amur, between the villages of Wair
and Ssabach, at the point where the rocks in
a strange gate-like formation come close to
the river. I visited it during my winter journey
on March 29 (April 10), 1855. The already
aged Gilyak in whose house I stayed in the village
of Wair was named for me as one of the
murderers. He evaded or declined to answer
my questions concerning the details of the matter.
Since, however, the Gilyak consider it bad
luck (ufuch) to destroy a piece of paper with

/388 cont./
175 1. (cont.)
648 characters on it -- no matter whether
● 797 written or printed -- I hoped that perhaps
114 through him I would succeed in obtaining
possible diaries or other written notes of
de la Brunière. But despite the high
monetary reward that I offered the Gilyak
for them, only a few scraps of one of
D'Anville's maps of China were brought
to me by them after the lapse of some time,
when I had already again returned to the
Nikolayev post.

281 To make the fish-skin robes the Gilyak use
29 the most common species of salmon in the waters of the Amur
[136] region, Salmo lagocephalus (Gilyak lyghi-tscho, on Sakhalin
laghi-tscho). For this purpose the skins stripped from them have
the scales removed, which is done by pounding the soaked skins
in a wooden vessel; then, by scraping, they are cleaned of the
adhering muscle and fatty parts, flattened and smoothed, and the
individual pieces sewed together. A material varying in quality
is obtained, depending on how carefully these operations are per-
formed. On the robes intended for everyday use or for protection
against rain, which are of a yellowish-gray color and usually
without any ornaments, the places where the scales were attached
to the individual skins can be clearly recognized (Pl. XVIII).
The more elegant robes, on the other hand, look as though they
were made of a fine yellowish-white leather. This contrasts
281 especially sharply with the wide black edgings with which the body
29 of the robe in front, above and below, as well as the sleeves
531 at the shoulders and hands is provided with the above-mentioned
color by means of paint. Various kinds of embroidery is put on
in the intervening spaces, and the back in particular is distinguished
by pretty, intertwined arabesques embroidered with differently
colored threads, as they are shown on Plate XXIII, Figs. 2, 3 and
[301] 4. The above-mentioned metallic ornaments, too, are never
lacking onthem.
(See Category 116, p. 998--Analysis)

578 out somewhere in the taiga for a whole year, the consensus
586 usually favors them and the first husband must abandon his
claims. In recent years many Gilyak have resorted to a
177 special ruse in order to make sure of their wives. Such
586 chaps who are probably not of the best and who may thus be
● 797 faced with the prospect of eventually being deserted by their
wives, have themselves baptized by a Russian priest, be-
cause they know that, according to the Greek religion,
marriage must be permanent, and they would consequently,
in case of desertion, be entitled to the ispravnik's protection.
However, it is doubtful whether this maneuver will help them
much in the long run, for such baptized individuals who later
have no intention of keeping their Christianity alive, are soon
forgotten in official circles. No one knows who or where
they are, the wilderness is vast, and looking for them is
more than troublesome.
If the abducted woman had had children by her first
marriage, these usually remain with the father. [129]
171 Child training. Toward the end of her pregnancy, a
844 woman is taken out of the house for 10 (1) days and brought to
183
343

1. The duration of this exile is not the
same everywhere. From some Gilyak
I learned that eight days sufficed; on the
island of Sakhalin, however, 12 days were
given.

a hut made of birch bark, in which a small fire is burning.
This custom which is known to exist among other primitive
peoples, for instance among the Ostyaks, is, up to the pres-
ent, very strictly observed by the Gilyak even in winter dur-
ing the most severe cold, as a result of which the newly-born
child often freezes to death. Conceivably a child which sur-
vives such a test must be strong. The mother also proves by
this what rigors these people are capable of enduring. Dur-
ing her entire stay in the hut only women are permitted to
come to her, often she must be her own mid-wife. No one
could tell me the actual meaning of this custom: most proba-
bly it cannot be explained on the basis of "impurity" of the
woman, but it is related to another superstition of which we
shall speak later, and which was originally perhaps some
hygienic regulation. That no mystical idea of "impurity"
underlies it may be seen from the fact that when the woman
854 returns to her house she undergoes no "purifying" ritual.
515 The bathing of the newly-born is also done in the impro-
302 vised lying-in establishment, and it is given its other baths there.

755 softly or whispers magic formulas, walks back and forth
534 like a pendulum, far into the night. Sometimes he leaps
over a burning pile of wood, or he makes the sick person
755 run about if he is able. Some shamans impress their publi
786 with more difficult tricks. They appear laden with chains
778 whirl about like mad, and in a state of ecstasy may hurl
themselves into the fire and make believe it does them no
harm. Narcotic drinks are not given, but the sick person
sometimes gets certain herb infusions from which the
shamans expect healing effects. The magic feats are
corroborated with various prescriptions relative to the
spirits. For instance, an idol in the shape of a human bei
is placed next to the sick person, its face smeared with
cranberry juice, and the sick person himself has wood chi
hung around his neck, etc. Or the shaman orders that the
clothes of the sick person be hung out in the woods and tha
he be [244] dressed in others. This is done in order to
outwit the kobold who saw him only in his old clothes.
755 This medical magic is usually begun in the evening, at
789 twilight, when the imagination is more active and also wh
deception can be more easily concealed. The shamans al
seek to consolidate their authority by means of various
magic tricks that otherwise have no practical meaning. F
instance, they swallow knives and needles. Not long ago
there lived a celebrated magician near Sofiyskoye who
gouged out his eyes and thrust a knife into his belly, which
was afterwards excreted. He was later exposed in these
juggling tricks by an itinerant Russian merchant. It was
shown that the knife blade, instead of penetrating his belly
disappeared into his pants and passed into a receptacle.
After that the magician was completely discredited.
789 Finally, there are a few superstitious practices we mus
372 mention. If a Gilyak goes on a journey he must drink som
271 water in the yurt shortly before he leaves; he does the sa
thing as soon as he has returned. The hearth fire is also
to a certain extent sacred for the Gilyak; it is not carried
outside and the Gilyak do not like to have a traveler ligh
his cigar at it and then leave the house.
177 This chapter is also the place to say a few words about
● 797 baptized Gilyak. There are not many of them, but no one
knows exactly how many, first of all because many of the
"Christians" let themselves be baptized several times, in
the city, for instance, as well as by their village divine.
Form this we may see how much they really understand o
their new religion. We have said before that they regard

baptism a means of guarding against abduction of their women. Those who are baptized live just like the unbaptized ones, their children are usually not baptized, and their corpses are cremated. Their fellow-tribesmen by no means persecute them. A baptized Gilyak is regarded by the others somewhat as though he had shared in some special acquaintance.'

XVI. Intellectual Development, Time-Computation, Legends.

The Gilyak count to quite a high number: 2000, 5000 and more, but of course they almost never use such high figures. The Gilyak year is half as long as the real one: winter which probably lasts half a year, is regarded as a whole year, the [245] remaining year being regarded as another one. Moreover, there are special names for the four seasons.

The Gilyak know how to find their way by the stars, and the Big Dipper and pole-star are their guides. They seem to have no particular assumptions with regard to the characteristics of the heavenly bodies. From some I heard that the sun and moon were inhabited by people. I could not learn anything definite about whether they might not be "the beyond". It can only be said that the other world is somewhere up above, not under the earth, as with the ancient Greeks.

The Gilyak do not count their years. Only of quite young people one can hear it said approximately how old they are. Older people cannot remember their age and immediately say: "the Gilyak does not count his years". This means his own age, for with them there is no question of chronology or history.

The majority know nothing about their past. But from several intelligent Gilyak I heard that once "a long time ago", there was a war between the Amur-Gilyak and those of Sakhalin; that the latter came with a great many boats, but were defeated. There is also a tradition on Sakhalin which has it that three or four generations ago a long war raged, whose cause was the abduction of a woman. It is difficult to say whether this war is the same as the one of which the Amur-Gilyak tell. In any case, the long intervals between such wars testify to the peaceableness of this tribe. The Gilyak knew nothing of fighting with the first Russians who arrived.

In answer to the question whether they had always occupied their present settlements, most of them answered simply: "I do not know". However, I heard from one of

ll their ceremonies and are the advisers of the communities.
d by them to be gifted with supernatural powers, and are
nce."

22: Knox T-2 (1866) 1870 Gilyak

The shamans possess great power over their superstitious subjects, and their commands are rarely refused. I heard of an instance wherein a native caught a fine sable and preserved the skin as a trophy. Very soon a man in the village fell ill. The shaman after practicing his art announced that the spirit commanded the sable skin to be worn by the doctor himself. The valuable fur was given up without hesitation. A Russian traveler stopping one night in a Gilyak house discovered in the morning that his sledge was missing, and was gravely told that the spirit had taken it.

In 1814 the small pox raged in one of the tribes living on the Kolyma river, and the deaths from it were numerous. The shamans practiced all their mysteries and invoked the spirits, but they could not stop the disease. Finally, after new invocations, they declared the evil spirits could not be appeased without the death of Kotschen, a chief of the tribe. This chief was so generally loved and respected that the people refused to obey the shamans. But as the malady made new progress, Kotschen magnanimously came forward and was stabbed by his own son.

In general the shamans are held in check by the belief that should they abuse their power they will be long and severely punished after death. This punishment is supposed to occur in a locality specially devoted to bad shamans. A good shaman who has performed wonderful cures receives after death a magnificent tomb to his memory.

The Russians think that with educated Gilyaks they can succeed in winning the natives to Christianity, especially when the missionaries are skilled in the useful arts of civilized life. Hence the school in Mihalofski, and it has so far succeeded well in the instruction of the boys. Russian and Gilyak children were working in the gardens in perfect harmony, and there was every indication of good feeling between natives and settlers.

177 166 The Soviet authorities transferred the Udege from the isolated huts which were scattered over a wide area to larger compact settlements. This brought them within the range of medical attention and educational facilities. As a result of this contact with Soviet Russian culture, the young generation of the Udege now speak the Russian language 'almost without any accent'.[38] The next step in the development of the Udege will be that they will forget their own native tongue, and soon 'the last of the Udege' will really have disappeared.

THE NIVKHI

Gi

131 161 101 Near the mouth of the Amur is the National District of the Nivkhi. They number just over 4,000, of whom 1,700 live in Northern Sakhalin, and the rest on the Soviet Far Eastern mainland and on three small islands lying off the mouth of the Amur. These islands, Udd, Langr and Kevost, were ignored by the Soviet authorities until 1936, when the famous Russian pilots Chkalov, Baidukov and Belyakov, landed on Udd Island during their trans-polar flight. From that moment the islands became very popular. They were renamed after the three pilots, [167] and it became almost a Russian patriotic duty to develop and colonize the little archipelago. The Soviet Far Eastern fishing industry established [228] a plant there, and Russian workers' settlements were built on both Chkalov and Baidukov Islands, which had previously been inhabited exclusively by Nivkhi.

186 798 The Nivkhi of the Asiatic continent are very conscious of the fact that, together with the Nivkhi of Northern Sakhalin, they form one single people. Accordingly, under pressure of persecution by the Soviet authorities in the late 'twenties', the Shamans of the mainland Nivkhi fled to their kinsmen on Sakhalin. But these Shamans only fell out of the frying-pan into the fire, because of the activities of the local anti-religious fanatics. In 1930 the League of Militant Godless in Northern Sakhalin even destroyed the Nivkhi cemetery in an attempt to cure the 'natives' of their religious prejudices. This action caused considerable unrest among the Nivkhi, who lodged a complaint with the authorities. The latter apparently condemned the 'left-wing excesses' of the Sakhalin atheists.[39]

634 161 In theory, the Sakhalin Nivkhi live in two National Districts, the 'Western Sakhalin National District', and the 'Eastern Sakhalin National District' which, together cover a large part of Northern Sakhalin. In point of fact, both National Districts have been completely fictitious right from the beginning of their existence. The so-called Western Sakhalin National District, for instance, had, in 1933, only a few hundred natives among its 17,000 inhabitants.

/592 cont./

437 trade or even otherwise in their life and household has been de-
435 veloped among them. This necessarily presupposes, however, the existence of an accepted absolute unit of value among them, through the multiplication of which the appraisal of the objects is made or their price standardized. What is this unit of value or of what does it consist? /593/ It was not easy for me to determine this, as one will see from the following reasons. Since the Gilyak are only familiar with barter, they answer any question about the price of an article, as a rule, by mentioning the quantity of goods desired in return (for instance, three bundles of tobacco, two fathoms of cloth, etc.). A question as to the absolute value of the foremost goods and objects, their price in themselves, the basis of even barter-trade, is rarely understood and only by the more intelligent, and even then the answer consists of only a number preceding the verb "to cost, to be worth" (Gilyak tschalhatsch), without the stating of any unit of value. In this connection, however, that form of the numbers which serves for the counting of animate objects is always used. I cannot say for what reason. To the question as to how much an article costs, properly understood in the above sense, the Gilyak will therefore give as an answer: "njunj, mor, tschor (1), etc.

[802] 1. Not njakr, mjakr, tschakr, etc., as the ordinary form of the numbers used for counting inanimate things runs.

tschalhatsch, or -- with the addition of the suffix ra meaning "is" -- tschalhara" (2), that is, it costs one, two, three, etc.,

2. Similarly, just as kauk means "not," kaukra means "is not"; or ngalskotsch, "bad," ngalskora, "is bad."

[435] and nothing more. The unit of value under consideration is never
[437] expressed, as if it were self-evident, as if it needed no special designation. I was therefore able to make a numerical list of the

101 resettled. In southern Sakhalin, individual families live in the village of
[361] Taran, Poronayskiy Rayon.

Administratively, the Nivkhi territory belongs to Sakhalinskaya Oblast and the Nizhne-Amurskiy and Takhtinskiy Rayons of Khabarovskiy Kray.

197 The Nivkhi language is usually classed with the group of paleo-Asiatic languages. But among the languages of this group, it has a distinct
[194] place.

In its structure, the Nivkhi language belongs to the synthetic-agglutinative languages. The synthetic features are the fusion of the nominal
[193] and verbal elements (kkan—dog; pil'a-gan—big dog). The agglutinating features include the addition of affixes (kkan-gu—dogs). The phonetics of this language are very complex. The language has the following parts of speech: nouns, numerals, pronouns, verbs, and adverbs. The adjectives
802 have many similarities with verbs. The Nivkhi numerals are interesting: in the Nivkhi language, there are no numerals common to all objects, instead, there are various groups of numerals, for the counting of: 1) long objects (sticks, staffs, trees, plants, etc.); 2) small round objects; 3) large, round, cylindrical objects and objects of indefinite shape; 4) thin, flat objects; 5) animals and insects; 6) people and manlike spirits; 7) paired objects. For example, t'ig'r-n'ekh—one tree; k'u-n'ik—one bullet; tyv-n'akkr—one house; tamkh-n'rakh—one tobacco leaf; kkan-n'yn—one dog; nivkh-n'in—one person; mu-n'im—one boat; t'u-n'irsh—one sled; and n'a—one handbreadth, etc.

197 As a result of the Nivkhi's close ties with the Tunguso-Manchurian peoples, the Nivkhi language contains a large number of words in common with the languages of these peoples.

In the Lower Amur Basin, the Nivkhi are unquestionably old inhabitants.
174 There are enough grounds to consider them the most direct descendants of the neolithic population of this territory. This population left behind numerous pits—marks of old dugouts of square or round shape, polished stone implements, and a special type of ceramic ware—flat bottomed, with spiral ornament. Such pits have been found both along the Amur and in Sakhalin. There are different points of view as to which is the older site of Nivkhi habitation—the Amur or Sakhalin. The well-known student of the Amur peoples, Academician L. Shrenk, held that Sakhalin was the original home of the Nivkhi, whence they spread to the continent. The opposite viewpoint was expressed by L. Ya. Sternberg, who insisted on the continental origin of the Nivkhi and their considerably later migration to Sakhalin. Historical data indicate a larger northward distribution of the Nivkhi along the coast of the Sea of Okhotsk in the past. It is also beyond question that the Nivkhi once lived farther up the Amur than they do today. According to Chinese sources, tribes of Chi-Lia-Mi lived on the lower reaches of the Amur in the 12th century; there is every reason to conclude that these were Gilyaks, or Nivkhi.

175 The first Russian data on the Nivkhi date to the 17th century. According to these data, the Nivkhi did not pay tribute to China. The first Russian to travel down to the mouth of the Amur was the "writing chief" Vasiliy Poyarkov (1643-1646). He was followed by Yerofey Khabarov, Ivan Nagiba, the boyar's son Pushchin, the official Stepanov and others. In the Cossack reports of the 17th century, both the Nivkhi and the Ul'chi are referred to
[361] as "Gilyak peasants." According to these reports, they lived in large vil-
[342] lages in wooden winter houses, flanked by barns, racks for hanging fish and
[343] log structures for bears. The Nivkhi wore clothing of fishskins and animal
[247] pelts; they kept many dogs, engaged in fishing, and their diet consisted
[231] mainly of fish. They traded with the Chinese, Ainu and Tungus.
[232]
[429]

177 baptism a means of guarding against abduction of their
797 women. Those who are baptized live just like the unbaptized ones, their children are usually not baptized, and their corpses are cremated. Their fellow-tribesmen by no means persecute them. A baptized Gilyak is regarded by the others somewhat as though he had shared in some special acquaintance.

802 XVI. Intellectual Development, Time-Computation,
805 Legends.

The Gilyak count to quite a high number: 2000, 5000 and more, but of course they almost never use such high figures. The Gilyak year is half as long as the real one: winter which probably lasts half a year, is regarded as a whole year, the [245] remaining year being regarded as another one. Moreover, there are special names for the four seasons.

821 The Gilyak know how to find their way by the stars, and the Big Dipper and pole-star are their guides. They seem to have no particular assumptions with regard to the characteristics of the heavenly bodies. From some I heard that the sun and moon were inhabited by people. I could not learn anything definite about whether they might not be "the beyond". It can only be said that the other world is somewhere up above, not under the earth, as with the ancient Greeks.

805 The Gilyak do not count their years. Only of quite young
561 people one can hear it said approximately how old they are. Older people cannot remember their age and immediately say: "the Gilyak does not count his years". This means his own age, for with them there is no question of chronology or history.

173 The majority know nothing about their past. But from
181 several intelligent Gilyak I heard that once "a long time
721 ago", there was a war between the Amur-Gilyak and those of Sakhalin; that the latter came with a great many boats, but were defeated. There is also a tradition on Sakhalin which has it that three or four generations ago a long war raged, whose cause was the abduction of a woman. It is difficult to say whether this war is the same as the one of which the Amur-Gilyak tell. In any case, the long intervals between such wars testify to the peaceableness of this tribe. The Gilyak knew nothing of fighting with the first Russians who arrived.

In answer to the question whether they had always occupied their present settlements, most of them answered simply: "I do not know". However, I heard from one of

439 on its quality, ... equals 10 ja an
A lynx pelt with head, the leg pieces, and the tail . . . . . " 8-10 "
A lynx pelt without head, leg pieces, and tail . . . . . " 5 "

/596/

A river otter pelt is estimated according to its size; each finger-span of it is equal to . . . 1 ja
A sealskin, either Phoca nummularis (pyghi) or Ph. barbata (kighitsch), provided it is very good, equals . . . . . 1 "
Four fathoms (1) of ordinary cotton cloth (possj) cost . . 1 "

[804] 1. That is, arm spans, since the Gilyak do not have any measure other than arm and finger spans.

Two fathoms of terry velvet (poibröz-possj) (tsch) cost . . . 1 ja
One and a half fathoms of cloth (dshangta) . . . . . " 1 "
Four fathoms of Manchurian (2) (very colorful) silk fabric (tscharp) are equal to . . . . . 5 "

2. More correctly stated, Chinese. Four fathoms of it constitute one piece.

The value that the Gilyak give to their various pieces of clothing is judged according to the quality and price of the materials; thus, it costs for:

A long, wide-sleeved robe of Manchurian silk (ucht) . . . . . 5 ja (3)

3. Perhaps reckoned somewhat too low.

/673 cont./

114 157 123 snowstorm had set out from Tägl merely on ski, continued on his way without considering us /674/ in the hope of reaching his nearby native village of Kulij before nightfall. Nor did he appear on the following day, and thus he gave up the fee due him. The other guide, a Tro Gilyak from Lub-wo, named Eospin, who had guided me through part of the Tymy Valley, behaved worse: he was forced to spend the night in Tafiz-wo in a small tent-yurt, where after the fire had died down the mercury froze, he crept out of it, cut the straps of one of my pack-sleds, burrowed through the contents, and made off with a few of my people's garments.

484 805 Only in one respect should the Gilyak never be trusted, namely, when it comes to setting the time when something is to happen, for instance, when a guide or somebody else is to arrive, etc. This is undoubtedly due to the fact that they have no proper conception of time and only a very inaccurate way of determining time and reckoning time. Apart from general designations, such as day (muw) and night (urk), morning (tyt) and evening (padf), the time of the day is determined only according to whether the sun (keng) is rising or setting (k. myrtsch or padntsch, is being born, and k. jugtsch or mutsch, is dying, respectively), whether the sun is climbing (k. tytyrach bokirtsch) or going down (k. kotretsch), and whether it has reached its approximately highest position, its height at noon (k. muwutytsch). As for the sequence of days, they have special designations for only the two days closest to today (nych), such as yesterday (nymr) and tomorrow (pyt or pat), the day before yesterday (nymrynk) and the day after tomorrow (possjch). There are, of course, no names for the days of the week, and the days of the month are not counted either. In order to designate a day back or ahead of the next two days, the Gilyak are content to give the number of night rests that there 484 have been in the meantime or will be. On journeys, the spatial 804 distances familiar to them from experience, come to their aid in 805 that they know exactly what stretch they can cover in a day by boat or sled under normal conditions without tiring themselves or their dogs too much, and where they have to make their camp for the night. Such localities as a rule have special names among

/674 cont./

484 804 805 them, even without being inhabited. Their designation of spatial distances in terms of days of travel or the number of night-rests is usually, under normal weather conditions, quite accurate. The Gilyak naturally used this system of designating distance by the time required to cover the stretch during their first encounters with the Russians for information about the distances in their country. Therefore, in this case, too, even before I learned the [192] Gilyak expression for "to sleep" (k(ch)otsch or k(ch)ontsch), I came across the word borrowed from the Russian and only suitably Gilyakized, esspanytsch (from the Russian sspat'), with the derived verbal form esspara, essparor, etc. Under unfavorable conditions, however, during stormy weather, heavy snowdrifts, etc., the designation according to days of travel is very uncertain and fluctuating, for it depends merely on how much one /675/ trusts the capacity of himself or his dogs, and that is always very little, because in such cases the Gilyak generally prefer not to move from the spot.

805 821 It is most difficult among the Gilyak to set a date somewhat further in the future on which something is to happen, if they are pursuing their activities undisturbed in their own surroundings, for these usually take such a regular course that a mistake in the number of night-rests that have passed is all too easily possible and always more likely than the opposite. The Gilyak, indeed, also observe the various phases of the moon, and, to be sure, in a very careful fashion, and they have special designations for the full and new moon (long tscharntsch--is full, and l. mutsch--is dead), the waxing and waning moon (padywu-l. and muiw-l.), the half moon and the quarter moon (l. putytsch and l. per(ch)kotsch), and the waxing or waning of these phases of the moon (padywu-l. putytsch and muiw-l. putytsch, or padywu-l. per(ch)kotsch and muiw-l. per(ch)kotsch)--but for the above-mentioned purpose of predetermining a definite day, this is only an approximate method, and if the sky is overcast for any length of time, as it by no means rarely is in the Amur region, it does not work at all.

805 184 (191) The Gilyak divide the year into twelve months (1). But

1. Among the Eskimo it has 13 months.

805

805 ORDERING OF TIME--sense of time; conception of a minimal unit of time (e.g., a moment); divisions of the day and night (e.g., hours); divisions of the year (e.g., weeks, months, seasons); longer time spans; solar, lunar, and stellar reckoning of time; methods of dating; calendar and calendrical knowledge; use of aids to measure the passage of time (e.g., sundials, clocks); etc. See also:

Annual cycle of economic activities	221	Holidays, birthdays, and anniversaries	527
Clocks and watches	455	Age levels and age terms	561
Routine activities of a typical day	512	Ceremonial calendar	796
		Conception of time	822

/525 cont./

226 [114] The dates given here for the migrations of S. proteus and S. lagocephalus at the mouth of the Amur agree very well with the dates given above for various points of the northern part of the Sea of Japan, especially if one keeps in mind, as is required on the basis of the available data, the multiple, intermittent, more or less large migrations or ascents of one and /526/ the same species. If one also takes into account the greater or smaller numbers in which they appear at the points mentioned above, one comes to the conclusion that S. proteus and S. lagocephalus, moving northward from the northern part of the Sea of Japan reach the Amur-Liman and the mouth of the Amur River, in the course of which the former, especially toward the end of its migration period, enters all the bays and inlets, and even the smallest rivers of both coasts, in great quantities, whereas the latter visits only the larger and major ones among them, but avoids the smaller ones, and in the main, moving against the current coming from the Liman and strongly mixed with fresh water, strives for the mighty Amur in order to go far up into its extensive network and in particular into the large tributaries of its lower course. In the following, while discussing the fishing of the other peoples of the Amur region living upstream from the Gilyak, we shall repeatedly encounter it on its migration. First, however, we must remain for a moment with the appearance of S. proteus and S. lagocephalus in the Gilyak area.

226 192 805 The arrival and the mass migration of these two fish especially important for the economy of the Gilyak are, of course, phenomena of such extraordinary significance for them that they are used by them to designate the periods of the year, the months, in which they occur. For instance, May is known among them as the month in which the tengi-tscho (S. proteus) first comes upstream, walten-tengi-long, and June, in which its mass migration takes place, tengi-wota-long (1). August

1. Long in Gilyak means "month"; I am unable to offer a detailed explanation of the expressions "walten" and "wota," but

/526 cont./

226 192 805 1. (cont.) it seems to me that in these as well as in the following designations for the months the first expression refers to the first and still sparse appearance of the fish concerned, and the latter to the main or mass appearance of it.

during which the lyghi-tscho (S. lagocephalus) goes up the Amur River in colossal numbers and the activity of the entire population is required for the preparation of winter supplies, is called among the Gilyak lyghi-wota-long or pilja-tschrar- (2), or simply

2. The word "tschrar" is undoubtedly related to "tscho," fish.

pilja-long, i.e., the "great fish-month," or also simply "great month." This latter designation gives especially convincing evidence of the great importance which S. lagocephalus has for the entire economy of the Gilyak. In comparison with June and especially with August, July is only poor for fish. Among the species of fish peculiar to it S. lycaodon (Gilyak well, the nerka of the Russians) is the most prominent. This species of salmon, however, only plays a certain role farther upstream, among the Olcha and Goldi, which will be discussed at the appropriate place, but for the Gilyak it is of no special importance, inasmuch as it does not appear by far in such quantities as S. proteus or even S. lagocephalus and does not provide as good and as long-lasting a jukola as these do; indeed, in view of the certain quantities of lyghi-tscho to be expected soon, the Gilyak regard it as useless and not worth the trouble /527/ to prepare jukola supplies from the well. In contrast to August, the "great fish-month," July is therefore called by the Gilyak matschn-

/527 cont./

tschrar-long -- "the little fish-month" (1).

1. At the appropriate place in the following there will be a discussion of the other designations which the months May-August bear among the Gilyak and which are derived from factors other than the periods of the migrations of fish, as well as the names customary among them for the other months.

The direction and the time of migration of S. proteus and S. lagocephalus along the east coast of Sakhalin seem to be somewhat different than in the northern part of the Sea of Japan, in the Liman, and at the mouth of the Amur. According to Mizul, the former goes along this coast from south to north, reaches the Bay of Patience about the middle of June, and in July and until late August goes up the Plyi or Poro-nai and its tributaries. During the first half of August it also appears along the island's coast located to the north of the Bay of Patience, goes up into the Tymy River, and by the middle of this month and until late in the fall is found in its upper course and its tributaries. S. lagocephalus appears somewhat later than S. proteus, and, as Mizul expressly remarks, first in the northern part of southern Sakhalin and not until later in the southern part, so that its migration here, in contrast to that of S. proteus, seems to go from north to south; moreover, it appears there in smaller quantities and not in all, but only in certain rivers, in these, however, every year, though in variable numbers (2). It therefore seems principally to strive

2. Mizul, op. cit., pp. 46-49.

for the larger rivers on the east coast of Sakhalin also, that is, the Poro-nai and especially the Tymy. At the mouth of the latter, in Nyi Bay, Poljakof in 1881 witnessed the mass appearance and ascent of S. lagocephalus into the river, which continued

/527 cont./

throughout the second half of August and did not decrease until the 30th (3). For the Gilyak living along the Tymy River, and

3. Poliakov", Putesh. na o. Sakhalin" v" 1881-1882 gg. /Journey to Sakhalin Island in 1881-1882/ (supplement to Vol. XIX of Izv. I. R. Geogr. Obshch., p. 97).

For the Gilyak living along the Tymy River, and especially along its upper course in great density, September is therefore chiefly the month that brings them the greatest quantities of laghi-tscho, so essential to their economy, and in which, traveling to meet the ascending fish, they devote themselves entirely to fishing and the preparation of supplies of fish for the winter. This explains the fact, repeatedly told to me by the Tymy Gilyak, that among them not August, but September bears the name pilja-long, "great month," whereas August, less rich in fish in comparison with it, is designated only as matschki-long, "little month." Thus, as a result of somewhat different natural conditions, a shift in the names for the months customary among the Amur Gilyak takes place there (4). Whether this also extends to the Tro Gilyak, for

4. The shifts or other differences in the names of the rest of the months that occur among the Tymy Gilyak in contrast to their countrymen on the Amur will be discussed later where appropriate.

whom the names customary along the Amur would actually be more appropriate, I am unable to say because I had too little contact with them. But it is not impossible, since the Tymy Gilyak speak the same dialect as they do and generally have a /528/close and, to a certain extent, decisive relationship with them, similar to the one that the Amur Gilyak have with those of the Liman, the west coast of Sakhalin, and the south coast of the Sea of Okhotsk.

/673 cont./

snowstorm had set out from Tägl merely on ski, continued on his way without considering us /674/ in the hope of reaching his nearby native village of Kulij before nightfall. Nor did he appear on the following day, and thus he gave up the fee due him. The other guide, a Tro Gilyak from Lub-wo, named Eospin, who had guided me through part of the Tymy Valley, behaved worse: he was forced to spend the night in Tafiz-wo in a small tent-yurt, where after the fire had died down the mercury froze, he crept out of it, cut the straps of one of my pack-sleds, burrowed through the contents, and made off with a few of my people's garments.

Only in one respect should the Gilyak never be trusted, namely, when it comes to setting the time when something is to happen, for instance, when a guide or somebody else is to arrive, etc. This is undoubtedly due to the fact that they have no proper conception of time and only a very inaccurate way of determining time and reckoning time. Apart from general designations, such as day (muw) and night (urk), morning (tyt) and evening (padf), the time of the day is determined only according to whether the sun (keng) is rising or setting (k. myrtsch or padntsch, is being born, and k. jugtsch or mutsch, is dying, respectively), whether the sun is climbing (k. tytyrach bokirtsch) or going down (k. kotretsch), and whether it has reached its approximately highest position, its height at noon (k. muwutytsch). As for the sequence of days, they have special designations for only the two days closest to today (nych), such as yesterday (nymr) and tomorrow (pyt or pat), the day before yesterday (nymrynk) and the day after tomorrow (possjch). There are, of course, no names for the days of the week, and the days of the month are not counted either. In order to designate a day back or ahead of the next two days, the Gilyak are content to give the number of night rests that there have been in the meantime or will be. On journeys, the spatial distances familiar to them from experience, come to their aid in that they know exactly what stretch they can cover in a day by boat or sled under normal conditions without tiring themselves or their dogs too much, and where they have to make their camp for the night. Such localities as a rule have special names among

/674 cont./

them, even without being inhabited. Their designation of spa distances in terms of days of travel or the number of night-rest usually, under normal weather conditions, quite accurate. Th Gilyak naturally used this system of designating distance by th time required to cover the stretch during their first encounters with the Russians for information about the distances in their country. Therefore, in this case, too, even before I learned t Gilyak expression for "to sleep" (k(ch)otsch or k(ch)ontsch), I came across the word borrowed from the Russian and only suita Gilyakized, esspanytsch (from the Russian sspatj), with the de rived verbal form esspara, essparor, etc. Under unfavorable c ditions, however, during stormy weather, heavy snowdrifts, e the designation according to days of travel is very uncertain a fluctuating, for it depends merely on how much one /675/ tru the capacity of himself or his dogs, and that is always very lit because in such cases the Gilyak generally prefer not to move the spot.

It is most difficult among the Gilyak to set a date some further in the future on which something is to happen, if they pursuing their activities undisturbed in their own surroundings, these usually take such a regular course that a mistake in the n ber of night-rests that have passed is all too easily possible and ways more likely than the opposite. The Gilyak, indeed, also serve the various phases of the moon, and, to be sure, in a ve careful fashion, and they have special designations for the full and new moon (long tscharntsch--is full, and l. mutsch--is d the waxing and waning moon (padywu-l. and muiw-l.), the h moon and the quarter moon (l. putytsch and l. per(ch)kotsch), the waxing or waning of these phases of the moon (padywu-l. putytsch and muiw-l. putytsch, or padywu-l. per(ch)kotsch a muiw-l. per(ch)kotsch)--but for the above-mentioned purpose predetermining a definite day, this is only an approximate me and if the sky is overcast for any length of time, as it by no m rarely is in the Amur region, it does not work at all.

The Gilyak divide the year into twelve months (1). But

1. Among the Eskimo it has 13 months,

/675 cont./

1. (cont.)
and the time from one new moon to another is called taktuk, like the moon itself. Klutschak, Als Eskimo unter den Eskimos /An Eskimo among the Eskimo/, Vienna, Pest, Leipzig, 1881, p. 208.

these have several different designations, not merely in one and the same place, but also in various parts of the Gilyak area. In particular there are those used by the Gilyak of the Amur River and the Amur-Liman, the west coast of Sakhalin, and the south coast of the Sea of Okhotsk, and, on the other hand, the others used in the interior and along the east coast of the island, by the Tymy and Tro Gilyak. I shall give them next as I noted them myself after repeated inquiries and shall later add a few remarks.

List of the Gilyak Names of the Months:

	on the mainland and the west coast of Sakhalin	in the interior and on the east coast of Sakhalin
January . . .	Tscham-long	Klu-long.
February . .	Karr-long	Tscham-long.
March	Tschrad-long	Karr-long.
April	Arkail-long	Tschrad-long.
May	Walten tengi-long, also Kopengwa-l. and Kittägtsch-l. (2) . . .	Pittun-long.

2. In the Gilyak word-list compiled by Dr. Grube the last two terms have erroneously been applied to April instead of to May: see the appendix to Vol. III of this work, pp. 44, 58, 59, and 120 /the appendix

/675 cont./

805 184 [114]

2. (cont.)
referred to is not included in the book translated here/. Tschrad-long (March) is likewise erroneously identified with July (op. cit., p. 108).

/676/

June	Tengi-wota-long, . . . also Pota-long	Arkail-long.
July	Matschn-tschrar-long . .	Tscho-taghr-long.
August . . .	Lygi-wota-l., also Pilja-tschrar-l., and simply Pilja-l.	Matschki-long.
September . .	Ngarwi-long, also Tschitsch-ngar-long	Pilja-long.
October . . .	Oni-lami-long, also Pottschawo-long . . .	Ngadgho-long.
November . .	Tlo-long	Kawekö-long.
December . .	Anj-long	Tlo-long.

114 805 Unfortunately, Glehn does not indicate in which of the two above-named parts of the Gilyak area he learned their names for the months. According to him, they run as follows:

January, February, March } just as according to me.

April . . . Pitul-long.

May . . Arschkai-long.

/676 cont./

805 114

June . . Tingi-long and Tingivata-long.

July, August, September } are not given.

October . . Iging-long and Mugiti-long.

November . Klu-long and Anj-long (in the north).

December . Tschlo-long.

114 184 805 From the fact that the first three months in Glehn bear exactly the same names as I noted down according to statements of the Gilyak of the mainland and the west coast of Sakhalin, I venture to conclude that he, too, inquired about them there. The same is true for June, whose name refers to the mass migration of the tengi-tscho (Salmo proteus), which, according to him, is called tingi-tscho. The other names of the months found in Glehn, however, seem to me to have been learned among the Tro Gilyak.

805 184 [122] My knowledge of the Gilyak language does not extend far enough to explain all the names of the months given above. For only a few of them shall I venture a word or two of explanation. It could readily be assumed that they are based upon especially striking natural phenomena and conditions characteristic of the month concerned, which, however, with regard to time, might now and then differ considerably in the habitation area of the Gilyak. This happens particularly in the case of the mass migration upstream of Salmo lagocephalus in the Amur and in the Tymy River on Sakhalin and calls forth among the dwellers along the latter a corresponding shift in the names of the months as compared to the Amur Gilyak, as I have already mentioned in detail on another occasion (1). In a similar manner, /677/ the

1. Pages 819-823.

/677 cont./

805 184 805 825

Tymy Gilyak shift the designations current on the Amur for January, February, and March one month ahead -- a shift for which I could not find an explanation. According to the sound of the word, tscham-long (January or February) means eagle-month, karr-long (February or March) crow-month, since the former seems to be named after the white-tailed eagle (Haliaëto albicilla), and the latter after the raven-crow (Corvus corone). Both birds play a not unimportant role in the superstitious ideas of the Gilyak, and the former, moreover, also in their trade with the Japanese (1), but it is a mystery to me why these particular

[439]

1. See pp. 668, 669, and 883 above.

months are named after them. During the winter the white-tailed eagle even leaves the mainland and northernmost part of the Gilyak territory because of the lack of fish for its special diet, and at this time of year it holds out only on the northern coasts of the Sea of Japan, where the ice is often broken up by storms, and in the interior of Sakhalin along the upper Tymy River which does not freeze in winter (2). There the white-tailed eagle is

2. See pp. 226 and 227 of Vol. I of this work.

indeed an impressive sight in the midst of the snowy landscape at a temperature falling below the freezing point of mercury. But in this respect January and February are alike, and the shift of the designation current on the Amur for the former month to the latter one by the Tymy Gilyak is not explained at all by this. Could it be that the name "eagle month" is foreign, perhaps of Chinese origin (3)? In the Tymy Valley I heard January called klu-long

805 825 191 113

3. Among the Chulyma Tatars and the Baraba inhabitants March is called "eagle month" (kutschugen-ai and kutschigar-ai, resp.) Falk, Beytr. zur topograph. Kenntn.

/677 cont./

805 825 171 113

3. (cont.)
des Russ. Reiches /Contribution to the Topographical Knowledge of the Russian Empire/, Vol. III, St. Petersburg, 1786, pp. 557 and 539), just as among the Samoyed of the great tundra (lembi-jirij; see A. G. Schrenck, Reise nach dem Nordosten des europ. Russlands /Journey to the Northeast of European Russia/, Dorpat, 1848, Vol. I, p. 537, where the eagle arrives as the earliest migratory bird, January among the Ostjak (Falk, op. cit., p. 466).

805 184 114 In the Tymy Valley I heard January called klu-long -- a designation which Glehn, obviously erroneously, like the one for December (anj-long), ascribes to November. According to my information, on the other hand, the name customary on the mainland and along the west coast of Sakhalin for the last-named month, tlo-long, is transferred to December by the Tymy and Tro Gilyak, with which Glehn, who calls it tschlo-long, seems to agree, and which would be quite analogous to the aforementioned shifting of names. The name anj-long, i.e., "year month," or perhaps "year-closing month," which I heard the Amur Gilyak use for December, may be easily explained by the observation, which presumably did not escape them either, that in this month the sun reaches its lowest position above the horizon and from then on begins to climb again. Finally the most fluctuating and uncertain name is arkail, which remains unintelligible to me and which, according to my information is supposed to designate April on the mainland and on the west coast of Sakhalin, June in the interior and along the east coast of the island, but, according to Glehn's inquiries, May. The last two assertions, however, are evidently based on an error, for they contradict the events of Nature which the Gilyak themselves mentioned to me as characteristic for the
805 individual months. Thus, they said /678/ that arkail-long (April) is the month when the ice breaks up on the Amur, May -- the one

2. Schrenck--1100 E-3 (1854-1856) 1881-1895 RX2 Gilyak RX2

/678 cont./

805 when the river becomes free of ice, September -- when the kalchalch geese (Anser grandis) migrate, and November -- when an ice cover again forms on the Amur and much snow falls. The uncertainty in which the Gilyak live in general with regard to the current month naturally makes fixing a date further in the future especially difficult among them.

The twelve months of the year are distributed very unequally into the individual seasons of the year by the Gilyak. Actually, they distinguish only two seasons: winter (tulf or tulv-anj) and summer (tolf or tolv-anj), for which the decisive factor is probably whether they live in their winter or summer dwellings. Accordingly, there are seven months (October to April) in the former, five (May to September) in the latter. Autumn (tvlf or tvlv-anj) and spring (chonf or chonv-anj) hardly count at all, and one very seldom hears them mentioned. But if the distinction is made, each of these seasons has only one month -- they are the months of the customary transfer from the summer dwellings to the winter ones and vice versa, in October and April, respectively. In this case, then, there are among the Gilyak:

5 months of winter -- November to March.
1 month of spring -- April.
5 months of summer -- May to September.
1 month of autumn -- October.

821 In connection with the reckoning of time, a few words might be said about the cosmic conceptions of the Gilyak. As a result of the visible rising and setting of the sun, the Gilyak naturally assume that the earth (mif) stands fast and the sun (keng) moves about it. On the basis of the circular horizon, they believe further that the earth has the shape of a circular disk. As a rule they do not give any account of where the sun stays after it has set and night has fallen, and to my question concerning this they answered, amid smiles, with a counterquestion as to whether I had seen it then. From the constant succession of day and night,

9. Hawes--211 T-3 (1901) 1903 Gilyak
116, 224, 527, 805

"Among the Gilyaks the hunt is preceded by an interesting ceremony. The sable (Mustela zibellina) and seal hunts commence each a new year in the Gilyak kalendar, and thus he has two years to our one. If only the Gilyak child kept 'birthdays,' he wou be the envy of his western compeers. These two years which begin in October and Ap respectively, are called the winter year (tulf-an) and summer year (tolf-an), and are opened by holiday festivals. The sable holiday goes by the name of Pal ni vookh chi-sonch, or 'the prayer to the lord of the forest.' "

177 baptism a means of guarding against abduction of their
797 women. Those who are baptized live just like the unbaptized ones, their children are usually not baptized, and their corpses are cremated. Their fellow-tribesmen by no means persecute them. A baptized Gilyak is regarded by the others somewhat as though he had shared in some special acquaintance.

802 XVI. Intellectual Development, Time-Computation,
● 805 Legends.

The Gilyak count to quite a high number: 2000, 5000 and more, but of course they almost never use such high figures. The Gilyak year is half as long as the real one: winter which probably lasts half a year, is regarded as a whole year, the [245] remaining year being regarded as another one. Moreover, there are special names for the four seasons.

821 The Gilyak know how to find their way by the stars, and the Big Dipper and pole-star are their guides. They seem to have no particular assumptions with regard to the characteristics of the heavenly bodies. From some I heard that the sun and moon were inhabited by people. I could not learn anything definite about whether they might not be "the beyond". It can only be said that the other world is somewhere up above, not under the earth, as with the ancient Greeks.

805 The Gilyak do not count their years. Only of quite young
561 people one can hear it said approximately how old they are. Older people cannot remember their age and immediately say: "the Gilyak does not count his years". This means his own age, for with them there is no question of chronology or history.

173 The majority know nothing about their past. But from
181 several intelligent Gilyak I heard that once "a long time
721 ago", there was a war between the Amur-Gilyak and those of Sakhalin; that the latter came with a great many boats, but were defeated. There is also a tradition on Sakhalin which has it that three or four generations ago a long war raged, whose cause was the abduction of a woman. It is difficult to say whether this war is the same as the one of which the Amur-Gilyak tell. In any case, the long intervals between such wars testify to the peaceableness of this tribe. The Gilyak knew nothing of fighting with the first Russians who arrived.

In answer to the question whether they had always occupied their present settlements, most of them answered simply: "I do not know". However, I heard from one of

812

812 PHILOSOPHY--degree of development and acceptance of elaborated metaphysical and epistemological systems (e.g., theories of being, of supersensible reality, of experience, of understanding, of knowledge); theoretical foundations of ethics (e.g., divine will, moral order of the universe, free will and moral accountability of the individual); ethical systems (e.g., hedonism, utilitarianism, perfectionism); teleological evaluations (e.g., theories of the highest good, idea of progress, pragmatism); theologians and philosophers (e.g., number, characteristics, status, sources of support, activities); etc. See also:

Ethics	181	Cosmology	772
Ethical ideals	677	Theological systems	779
Legal liability	672	Social philosophy	829

/740 cont./

771 powers always only directed against him and superior to him in strength, and which he more or less personifies in concrete, but
771 crude representation. This feeling of his own helplessness in the face of the forces hostile to him, and yet the inalienable wish to
● 812 avoid their harmful encroachment upon his life -- these causes, together with the inevitable, involuntary, and unconscious view that in the action of these powers, as in his own actions, there is a cause-and-effect, cause-and-consequence relationship, lead him to a series of conclusions through which his own acts and the action of the powers hostile to him are brought into a causal nexus
771 And this is the origin of his many-shaped superstition which gives
812 rise to customs and special performances that are intended to
532 pacify the evil forces or to keep them away, as well as to the personified representation of the evil powers in this or that crude, approximate fashion, through carving animal and human figures in wood, and to shamanism The many wooden figures of bears, lizards, toads, snakes, and even of human beings which are found among the Gilyak may have this origin and meaning. The Gilyak does not regard them as gods and does not worship them. They are only representations or intimations of hostile powers in Nature from which he seeks to escape. The fact that human figures are also found among them should not be interpreted as though they were personified representations of divine beings, such as anthropomorphism has created in more spiritual fashion in other places.
771 In the view of a primitive people, and the Gilyak, too, man stands
812 wholly and exclusively within Nature; according to their superstition he stands /741/ in a close and immediate causal relationship with the events of Nature (or evil powers), and this in itself may make the representation of a human being necessary for the per-
[006] formance of many a shamanistic act. The conception of God, the Good One, however, is much too vague and lacking in content among the Gilyak to make it possible to speak of any connection with it and thus also of anthropomorphic ideas and representations. But though the Gilyak do not regard this superstition and shamanism, etc. as divine service or prayer, but only as a practical act in their lives in order to escape all harm, nevertheless we are obliged to call this their religious consciousness. And thus we find a strange

2: Schrenck--1192 E-5 (1854-1856) 1881-1895 RX2 Gilyak RX2

/741 cont./

771 and monstrous contradiction in the religious conceptions of the
● 812 Gilyak: on the hand, the idea of a single supreme and benevolent being, even though so completely empty that it precludes the worship of it, and, on the other hand, the purification of countless evil powers, along with a crude cult to ward them off and keep them away; many representations of animal and human forms in the yurts, and yet the Gilyak say that they have no representations of God; countless superstitious and shamanistic acts, and yet they deny that they pray. And, on the other hand, they speak of a supreme, wholly good being and have the word "pray" (mjägratsch) and yet do not worship this god. How is this to be ex-
174 plained? It seems to be that there is not a dualism of conceptions
771 here, but rather a matter of two completely separate concepts with
812 connection with each other and also historically distinct. -- The former is a thoroughly attenuated, obscure, and now only traditional deism which among the Gilyak consists of no more than merely a few traditional words -- God, the Good One, pray; and exerts no influence upon the rest of their so-called religious conceptions and acts (superstition, shamanism, idols) other than that those words are not carried over to these conceptions and acts. The second religious conception is probably basically identical with that of many primitive Siberian peoples and aims at keeping evil spirits and powers away from human beings by means of various superstitious observances and performances. The former deistic belief is probably the echo of an ancient conception perhaps commemorative of the cradle of the Gilyak. In fact, in the
[171] attribute of "God," Kingulätsch, and in the abstract, nihilistic character of the conception there is accord with the Central Asiatic religious systems, but the second conception may have originated at a much later time, after the Gilyak tribe had moved downstream into the wilderness of the eastern forests of the Asiatic continent (?) and therefore shows many points of contact and similarities with the religious conceptions of the neighboring Siberian peoples, and even of the Ainu. The first conception was completely lost, except for a few words, and another, a cruder and more concrete one developed, without, however, on account of the persistence of

2; Schrenck--1193 E-5 (1854-1856) 1881-1895 RX2 Gilyak RX2

771 /741 cont./
174 tradition, reaching any pretensious of a religious one or completely
driving out and replacing that empty concept of God among the
812 Gilyak.

I realized that the wooden idols of the Gilyak do not
778 actually enjoy any very great esteem or reverence among them
[126] from the fact that the Gilyak from Kulk from whose deserted yurt
/742/ I had appropriated a collection of their idols in the summer of 1854, did not seem to notice the loss upon their arrival in the village, or at least did not consider it worth mentioning. In the same village I also once saw a small boy come out of the house playing with a wooden bear figure, a sign that these things were not as inaccessible to him as they certainly would be if they enjoyed special veneration. (Bm. 1, pp. 22-27.)

Idols and Amulets in Human Shape

778
789 2. Gilyak. The various idols carved in wood, some-
532 times human or sometimes animal in shape, which served to ward off danger, misfortune, sickness, and the like, were designated to me by the Gilyak with the general names of kāgn and tschngai (1).

[192] 1. The word mafk also seems to refer to idols in general.

In addition, however, special names for individual figures were also given to me. A crude representation of the whole human form (Plate LIII /p. 1253/, Fig 1) or at least a bust of one is found as a rule in the yurt of the Gilyak on the crossbeam of the roof-frame, above the sleeping benches along the narrow side of the yurt away from the entrance (that is, above the place where among the Olcha
778 and Goldi the similarly-shaped sāwa stand). Sometimes, however,
789 the Gilyak wear similar small idols on their chests, to which they
755 give the name pangch (Plate LIII /p. 1253/, Fig. 5). If a Gilyak is seriously ill, the shaman carves such an idol for him, or advises
532 him to carve one and to wear it so that he will become well. But
[756]

82

82 IDEAS ABOUT NATURE AND MAN--general statements covering several types of speculative and popular notions concerning phenomena of the external world and of the human organism.

/50 cont./
823 formed where his sacred feet stepped; from the lashes of his whip appeared the rivers... Here is Kryuspal', a marvelous cone, one of the highest peaks of Sakhalin, which impresses everyone approaching the island from the sea with its grandeur, a lonely, stern demon of the sea, who, in a fit of anger, killed his children and compelled his wife to run hundreds of versts away from him and form another cape in a new place. And even the lonely cliffs sticking out of the water all along the shore of the island -- all of this is alive, gods who ran away from their clans under the influence of internecine wars.

82 All the rest of nature is equally alive: the menacing "tol'"
774 (the sea), the somber forests of the mountainous island, the
776 fast mountain rivers, etc. When cutting down a tree, the Gilyak is afraid to destroy its soul and places upon its stump a special being, the "inau" (chekhn-kun-inau), soul-creating "inau" (1), which returns soul and life to it. The mountains,

[177] [178] 1. A sharpened stick. The cult of "inau" has been borrowed from the Ainu, and I shall discuss it separately /in an untranslated section/.

the ocean, cliffs, trees, animals -- this is only a mask under which the gods conceal themselves from the curiosity of man. The peculiar profundity of this sort of metaphysical analysis by
825 the Gilyak is striking. Once when a Gilyak began to explain to me that the small kosatka (Orca gladiator) accompanying a large one in the sea constitutes in fact only the sword of the big kosatka, and I expressed my bewilderment at this, he began to prove that it only seemed to me that that is a kosatka, but in fact it is the sword of the large kosatka-"master," just as that the latter in reality has the form of a real Gilyak, and that which seems to us to be a sea animal is only the boat of this Gilyak-kosatka (2).

2. Kosatki travel in the sea in packs, within which are distinguished the older -- leaders, and the younger -- soldiers. In an attack,

/50 cont./
825 for example, on a whale, the latter hold the flanks, while the leaders follow behind.

82 /51/ Once visible nature is only a mask and is not what
771 appears to be, there is a natural tendency on the part of the Gilyak to seize upon the smallest sign having resemblance t the human body or a part of it, in order to discover the hum shape that is concealed under it. Hence fetishism -- the psychology which discovers a supernatural human-like being every object which has an unusual form, be it a high mount a petrified object, or simply a piece of stone.

825 If inanimate nature is capable of arousing in the mind o the Gilyak the imagining of live creatures which conceal th selves under the dead form, then the cult of animals should the more not amaze us at all. It is generally believed that lies at the base of the cult of animals. Primus in orbe deos timor. In fact this is far from the case. First of all, we m remember that primitive man not only does not recognize a sort of gulf between himself and the animal world, but on contrary, in many respects admits the superiority of the latt over himself. A hunter by profession, he has invested in his art of hunting all his intelligence, all his inventiveness, all his human genius. See how brilliant his snares and traps are and nonetheless how often and maliciously the insignificant little beast -- a fox, a sable, and others -- will laugh at all machinations! Dozens of valuable sables run past his trap, leaving their footprints quite close to it; they guessed the cleverness of man and departed unharmed! How sensitive is the elk to the smell of a human being whole versts away! Never, never would a single beast be caught by the Gilyak, but for the will of the gods, the "masters" of these animals, which care for the well-being of the Gilyak. If a god does not will this, dozens of man's crossbows remain without a catch. Therefore the Gilyak sees in animals beings in no wa inferior to himself, even though a god may sometimes give

/314 cont./

IX.

Ideas about Animals

825 Choramladz: (chkhoramland) -- like a cat or a polecat, even smaller than a cat; black lip. They move in herds; their footprints have been seen. They are considered most dangerous animals. If you come upon them, you must climb a tree; they surround the tree, but cannot climb it. The man ties his hat to a twig and lowers it down, the animals jump up; the man back, they fall, chew the hat, etc. Finally he saves himself; he waves a long pole around, and they run from the noise.

825 The oldest of all the land animals are pal-miv-kmyg:
773 myg:nga igagö syktymu yz'mudzigu. They are of the human race. Once the lion, the tiger, and the bear were human beings. They "did it through the rear" with their wives. Kur, by accident, saw this. He said to them: "Since you have intercourse like beasts, so remain beasts in the future." Then they became beasts. Therefore they are considered to be of the human race. The bear was also a human being, but he used to walk on all fours. Kur saw this: "Since you walk like a beast, so walk like a beast." But he does not have intercourse through the rear.

839 There is no bestiality. -- On Sakhalin there was once
732 born a boy with a tail.
842 The lark causes thunder, and therefore one must not kill it.
821 It is a sin to approach its nest with baby birds -- there will be thunder.
The thunder bird -- tet lyj zevrk: -- makes thunder and, opening its mouth -- lightning.

825 /315/ The loon is the principal water bird. The oldest loon, ugn, with a tail, cries in the humanlike voice, "o-o-o!" The second -- kzaktr, agn'i, is smaller, cries "ka, ka, ka," or "vakh, vakh!" The third loon -- am' is the smallest and cries in an almost human voice "a-a-a!"

/320/

Separate Materials on the Ethnography of the Sakhalin Gilyak

I.

Religion

773 Cosmogony and the spirits-masters. Kum, the master of the uni-
(772) verse, created everything: in the past everything was water; he "made the earth, the stream, and the tree." "Working" the earth, Kum lost his reindeer, which turned into Lavro-pal. The large rivers are the tracks of his reindeer, while the small streams (were formed) as he waved his lash at the reindeer -- tlangi-z'ach:.

821 The sky -- tly -- is like our earth, but it moves, turns first
(772) with one end, then with the other. When the sky moves away from us with its sunny end, night falls.

The stars: the largest are as large as a yurt. They are white, and therefore they cannot be seen during the daytime; in the light of the sun they become pale.

The sun: shines at night in Mlyvo (the world beyond the grave).

773 People descended from a tree: the Orok from a birch, the
824 Gilyak from a larch, the Ainu from a fir.
776 The master of the mountains and of the taiga, Pal' n'gyvyn,
614 looks like an Ainu. Each clan has its own Pal n'gyvyn.

821 Thunder lives in the water in winter, and Pal'-nivukh pierces him in the eye through the water; in summer thunder attempts to avenge this. Since Pal'-nivukh has the ability to turn himself into the most minuscule creatures and to get under the skin (?) (1)

1. Illegible. S. Sh.

of a person, a Gilyak, when his finger itches during a thunderstorm, immediately lets some blood; otherwise thunder will kill the man in order to kill Pal'-n'ivukh who has gotten into the finger (a story by Gibel'ka, heard by him in Nyyde).

/320 cont./

821 The god of the wind -- Layzn (the evil wind -- Lamangnd):n
(772) po chukh-chugad (sacrifices) are made to him. He is shot at with bows; he is not shot at with rifles for fear of evoking thunder and a storm. The wind comes about thus: "Layzn, just like man, blows from his mouth."

773 The bear, the sable, the fox, the otter, and the squirrel
825 were created by Pal yz'n (the master of the mountains).

Tuurmam -- the god of the hearth, the mistress of fire,
776 the old woman -- is one among all the clansmen. The head of Tuurmam is curly, the snout red, /321/ the hair short (there is no braid), the height that of a man, the clothing -- fish skin, lives in the fire.

Tajmandz: the only one who sends fish; he is a large and robust man. All his dogs are white. He rides through the air,
(821) along the Milky Way (Taimandz: -- tlf); he lives there. He also makes thunder. Each kikhal has its own Pal-n'ivukh, its own Tol-n'ivukh, even its own milk'i, but there is one Taimandz:. They set up three trees for Tol-n'ivukh: a fir, an ashberry, and a rose willow. Strips of bark are cut out of these trees and their branches are bound with sedge. One chkhnaj has saranka attached to it.

Oskyz'n master of the hare, big like a cow, long nose. They throw the head of a hare, with puchka tied to it. Tlangi-yz'n -- master of the reindeer, looks like a reindeer. Mekvon'-gi -- master of the kabarga.

Evil spirit -- Ge-n'ivukh. His yurt is an earthen mound near Tekhrvo. He opens a window (kugutf), extends two fingers, and asks for something. If something is given to him he leaves. If one gives him a hot coal, he does not understand what is happening, throws the coal back and forth from one hand to the other, and says: "as' kavkhaj, khavrkhaj, avguja" -- "it is hot, if you do not have (anything), do not give!" Ge-n'ivukh likes to kidnap people, especially children. The only way -- is to inflict a wound upon oneself. For Ge-n'ivukh is afraid of blood. Pumkin's brother sat in his balagan guarding reindeer and suddenly saw two ge-n'ivukh. He began to shout and inflicted a wound

/364 cont./

776 Gilyaks. Finally, the hierarchy of the deities is based on the num-
(372) ber of benefits received by man from each of them, and the sea and the taiga give the Gilyak more than fire does. Imagining the
(771) elements and the powers of nature as divine, even often referring to them as gods, a Gilyak at the same time believes that each element has its own master -- nivukh, who is a god -- "kur." These nivukhi are real Gilyak, not only in their striking similarity, but even their dress (let us remember that "nivukh" also means "Gilyak"). These are not a product of the imagination: "one can see them." "A certain man," -- a Gilyak acquaintance told me seriously, "once met the master of the sky ("kur"). He was riding on a sled pulled by wolves, but, upon encountering the Gilyak, the wolves turned upward and disappeared into the sky with their rider." One can hear about many "nivukhi," that a Gilyak of such and such a settlement has recently seen "him" in this or that place. Like the Gilyak, the nivukhi have children, perhaps there are whole clans ("nhal") of them, and, like the Gilyak, finally, they are mortal. The god of the taiga and of the mountains, the master and the father of all forest beasts, is called "Pal'-nivukh" (pal' -- mou-
(782) tain, taiga). All the sacrifices /365/ at the bear festival belong to
(746) him. It is he who orders the bear to bite "very hard," in case of a violation of the ritual of the festival. The god of the sea, the father and master of all inhabiting it, is called "Tolles," "Tol'-nivukh; and is just about the most powerful deity of the Gilyak; it
(821) is he who sends illness and healing. The sun, the moon, and the stars are all deities of the Gilyak, and the first two are spouses: the sun is the wife; the moon, the husband; and, of course, on these heavenly bodies are gods -- masters. "Have you never seen," a Gilyak said to me with assurance, "the nivukh on the moon when it is large? He is fully a Gilyak!"

There is among them an idea of something like devils "sakhamnh". This is a whole nhal', living in the sea and dangerous for the Gilyak when they are hunting seals. They ride about in boats and when they see a boat with Gilyak killing seals, they
766 loudly ask: "What are you doing here?" Woe if the Gilyak reply
(764) on his face as the deceased. But it is well-known that the Sakhalin Gilyak burn their dead. There is, however, one case when this

/367 cont./

577 in any case, it is characteristic. The Gilyak therefore have a
773 clear conception of sin ("umgyrh"). It goes without saying /368/
773 that such things as stealing and murder are a sin but, to be sure,
there are a great number of acts, indifferent from our point of view, that are considered sins by the Gilyak, for instance: to heat seal fat on a fire and not in the sun is a sin, and, in general, to deviate from the old ways is a sin. It is curious that in many cases a sin, even when it consists in insulting a deity, is atoned for by a fine paid to one or another person; for example, for the slightest harm to the fence of the hearth, the one who caused it must pay a dog, a cup and saucer, and a few other small things to the master of the yurt; otherwise, one of the two will become ill. Even this small episode illustrates the idea of the necessity to
(682) atone for a sin. The damages paid for a murder are provided by the clan of the murderer not by necessity (such necessity does not always exist), but as an atonement for the sin before an angered deity. On the other hand, the gods do not allow an evil deed (sin) of people to go unpunished. They send storms and rains, a scarcity of fish and fowl, send down diseases and various other
(842) misfortunes. The Gilyak think that thunderstorms and lightning
(821) have become more frequent since the arrival of the Russians; this is because the god has been angered by the sins of the Russians.

771 Imagining his gods as mortal, the Gilyak merely expresses
795 his extremely anthropomorphic view of them. In fact, human existence, according to his belief, does not end with this life.

There, beyond the flame of the fire, is another world, another land where a Gilyak lives again, with the same needs and the same ideas; only there the poor man will be rich and the rich man poor. After death a Gilyak receives a different name, and it is a sin to call a deceased person by his old name. They also believe in the transmigration of souls, or, more exactly, in many rebirths. Thus, there is a legend which tells that after the death of a Gilyak who had on his face distinctive scars from wounds received in a fight
766 with a bear, a boy was born to another Gilyak with the very scars
821 on his face as the deceased. But it is well-known that the Sakhalin Gilyak burn their dead. There is, however, one case when this

/670 cont./

574 took part, and until far into the night one small pipe after
another was smoked, passing from hand to hand, always in the same tranquil, deliberate manner. Hospitality also requires that the dogs be fed before they continue on their journey the following day.

484 The Gilyak thus travels only in short daily trips from village
574 to village. If, with greater distance between the villages or when bad weather has him by surprise, he is forced to spend the night out-of-doors, and he reaches the next village after the regular dog-feeding has already taken place there, the fire under the kettles is rekindled without further ado, and a special meal is prepared for the dogs of the newly arrived guest. Needless to say, he then stays there for the night and does not continue his journey until the following morning after the dogs have again been fed.

In any case, however, the weather is first carefully checked,
484 especially in the villages located along the seacoast, where
821 strong winds and blizzards very often occur and put the traveler
(114) in danger. During the several days of bad weather which detained me in the village of Tŷk on the west coast of Sakhalin in February of 1855 and 56, I frequently witnessed the indecision which overcomes the Gilyak when the weather is still rather doubtful and the question arises as to whether going on under such conditions would be too risky. In most instances the con-
(157) sultations ended in another day of rest, for haste is quite foreign to the Gilyak, and an almost excessive caution always guides them on land as well as on sea journeys. On several occasions,
(114) however, I also had an opportunity to marvel at their knowledge
(123) of the climatic conditions of their country /671/ and the experiences that they had with them, for I had once made ready to continue my journey and found myself forced to return to the hated village where I had been received so inhospitably. On another occasion I reached the seacoast, which was 3-7 versts from the village, and continued my journey along it, but had
821 to endure very bad weather and snowstorms. The Gilyak especially feared being surprised by an ady (north and northwest) or

/671 cont./

821 tchlangi (east and northeast) storm sweeping over the Sea of
Okhotk and almost always accompanied by snowstorms, whereas
the ladwilantsch (southeast wind), the tungyrsch and ngaluwa (1)

(104) 1. Soft, to be pronounced like the French z.

(484) (west and southwest wind), and the kongrsch (south wind) cause them less concern (2). The latter are especially dangerous in

(823) 2. On the Amur the winds are, as a rule, distinguished less accurately, and simply by the four main directions: ady, tschlangi, kongrsch, and tungyrsch (north, east, south, and west).

making a trip from DuÏ to the villages to the south on the same coast, since the sea ice sometimes breaks up immediately in

(782) (789) Magic arrow for exorcising storms.

821 front of the sleds of the travelers. In the village itself several
784 methods of appeasing the unleashed storm-spirits were used. At
782 the tip of a long pole stuck in the snow there was fastened a square piece of sealskin, which evidently was to serve as a sacrificial offering to the storm. A second method served the same purpose, but in a much more attractive form. It was an ordinary-sized arrow made with two prongs at the tip and provided with two curls of wood shavings on the shaft. Between the two prongs, likewise bearing small wooden curls, the strong center rib of a tobacco leaf and a small piece of glowing tinder were inserted and the arrow shot off in the direction of the storm ady-wind. Finally, a third method consists of sacrificing a number of wheltps to the storm. In the village of Tŷk their number came to three, and, if the storm did not stop the next day three

/671 cont./
882 others were to follow (3). This method was at least more pur-
883
884 3. Concerning this, see p. 662 above.
885

poneful, for it increased the food supply of the people and saved dog food, the lack of which was already making itself felt at the time.

576 I never saw or heard of a Gilyak who, upon entering a
574 house, greeted the host, hostess, or any other acquaintance with
[127] a word or gesture, nor is it done upon his departure. As I gather from Middendorff's handwritten notes, given to me to use, this coming and going without any salutation surprised him, too.
576 With me they likewise constantly came and went without a
574 salutation, or at most, later, with a "dèdèrtu" and "proschschâi"
[128] learned from the Russians. Only in the presence of the Manchu
[123] and Chinese do they imitate the /672/ Tungusic Amur peoples by dropping on one knee in front of them and bowing their heads, but this is done only in order to gain their favor and to avoid being punished by them, since the Manchu officials in Saghalin and other places strictly insist upon such a show of deference.

576 But what surprised me even more is the fact that the
574 word "thanks" seems to be missing entirely from their lexicon. I never heard it used by them, either among themselves or to me. Middendorff and Glehn had the same experience. I should like to ascribe this to the incompleteness of our word list, which is in general very poor in expressions for abstract concepts and emotions. On the other hand, it is hardly to be assumed that if they really had gratitude in their hearts, they would not have a word for it and that it should simply have always eluded us. After all, we see them in all kinds of situations when they received services or help and hospitality offered almost to excess. It is possible that guests who have been sheltered, despite notoriously scanty means, for days as a result of storms setting in and who have been fed along with all their dogs, as the Gilyak do among one another, depart without having said a word of thanks? Is everything based only on national commaisim of on the certainty of reciprocity in similar cases? With regard to me,

/674 cont./
884 them, even without being inhabited. Their designation of spatial
[192] distances in terms of days of travel or the number of night-rests is
805 usually, under normal weather conditions, quite accurate. The Gilyak naturally used this system of designating distance by the time required to cover the stretch during their first encounters with the Russians for information about the distances in their country. Therefore, in this case, too, even before I learned the
[192] Gilyak expression for "to sleep" (k(h)otsch or k(h)onssch), I came across the word borrowed from the Russian and only suitably Gilyakized, ssapsapi (from the Russian ssapaj), with the derived verbal form ssipara, ssaparar, etc. Under unfavorable conditions, however, during stormy weather, heavy snowdrifts, etc., the designation according to days of travel is very uncertain and fluctuating, for it depends merely on how much one /675/ trusts the capacity of himself or his dogs, and that is always very little, because in such cases the Gilyak generally prefer not to move from the spot.

885 It is most difficult among the Gilyak to set a date somewhat
882 further in the future on which something is to happen, if they are pursuing their activities undisturbed in their own surroundings, for these usually take such a regular course that a mistake in the number of night-rests that have passed is all too easily possible and always more likely than the opposite. The Gilyak, indeed, also observe the various phases of the moon, and, to be sure, in a very careful fashion, and they have special designations for the full and new moon (long tscharrnsch--is full, and l. munsch--is dead), the waxing and waning moon (padywu-l. and mulw-l.), the half moon and the quarter moon (l. purytsch and l. per(ch)kotsch), and the waxing or waning of these phases of the moon (padywu-l. purytsch and mulw-l. purytsch, or padywu-l. per(ch)kotsch and mulw-l. per(ch)kotsch)--but for the above-mentioned purpose of predetermining a definite day, this is only an approximate method, and if the sky is overcast for any length of time, as it by no means rarely is in the Amur region, it does not work at all.

886 The Gilyak divide the year into twelve months (1). But
884
[191] 1. Among the Eskimo it has 13 months.

/678 cont./
805 when the river becomes free of ice. September -- when the
kaichakh geese (Anser grandis) migrate ; and November -- when
an ice cover again forms on the Amur and much snow falls. The uncertainty in which the Gilyak live in general with regard to the current month naturally makes fixing a date further in the future especially difficult among them.

The twelve months of the year are distributed very unequally into the individual seasons of the year by the Gilyak. Actually, they distinguish only two seasons: winter (tulf or tulx-anj) and summer (tulf or tolx-anj), for which the decisive factor is probably whether they live in their winter or summer dwellings. Accordingly, there are seven months (October to April) in the former, five (May to September) in the latter.

Autumn (tulf or tylx-anj) and spring (chonf or chonx-anj) hardly count at all; I find one very seldom hears them mentioned. But if the distinction is made, each of these seasons has only one month -- they are the months of the customary transfer from the summer dwellings to the winter ones and vice versa, in October and April, respectively. In this case, then, there are among the Gilyak:

882 5 months of winter -- November to March.
1 month of spring -- April.
5 months of summer -- May to September.
1 month of autumn -- October.

882 In connection with the reckoning of time, a few words
might be mentioned about the astronomic conceptions of the Gilyak. As a result of the visible rising and setting of the sun, the Gilyak naturally assume that the earth (mif) stands fast and the sun (keng) moves about it. On the basis of the circular horizon, they believe further that the earth has the shape of a circular disk. As a rule, they do not give any accoiunt of where the sun stays after it has set and night has fallen, and to my question concerning this they answered, amid smiles, with a counterquestion as to whether I had seen it then. From the constant succession of day and night,

/678 cont./
882 the thought of a continuous movement of the sun around the earth
and thus an alternation of day and night on the side of the earth turned toward or away from it did come to the deeper thinkers among them, such as lutschin and Balgun --a thought which immediately gave rise to the question as to whether there were also animals and men on the other side of the earth. Moreover, the idea that the earth did not have a disk-shape, but a globular-shaped form was accepted by them more easily than I had imagined. According to their view, the stars moved around the earth just like the sun. They have, however, a cosmic conception of them advanced to the point that they regard them as celestial bodies similar to the earth, which appear so small to them only because of the great distance. This /679/ undoubtedly arose from their indiscriminate use of the designations unghyr, "star," and unghyr-mif, "earth-star." Some of the constellations bear special names among them. For example, the three stars in the tail of the Great Bear are called tscharw(r)ghrtsch, the four in its body ningnap (1), that is, rats' storehouse, a constellation with

[192] 1. In the Tymy dialect, nio = nio on the mainland.

numerous stars near the Great Bear, perhaps the Pleiades (?), bears the name lumr (table) on the Amur and, on Sakhalin, taghr-nio, that is, storehouse of Tamias striatus, or also tammi-unghyr (many stars), the sword of Orion is called tschichwâk, the Milky Way
533 taighomantif, which means roughly "unknown way," etc. One of
512 their first and most frequent questions was whether there were
[195] human beings on the stars. To my answer that these objects were too small to be seen even with a telescope because of the great distance of the stars they replied with great assurance that nevertheless their shamans had seen them, and from their stories they firmly believed that on the stars there are tall trees and extensive forests, various animals, such as sable, otter, foxes, bears, dogs, etc., and, finally, even human beings. These human beings, whom they called, again indiscriminately,

/679 cont./
882 sometimes unghyr-nibâch (star men) and sometimes unghyr-mif-
[196] nibâch (star-earth men), wege of especially gigantic stature, the eyebrows bushy, the nose long and strong, etc. Occasionally an aunt-in-law again forms on the Amur and the shamans have now one would have to behave toward him. The story of such a meeting followed, but unfortunately I was unable to follow it in its fantastic and confused details.

128 If for the moment, however, we glance away from the
shamans, their arts, conjuring the spirits, dances, and songs, to which a later section of this work will be devoted, and still dwell on the phenomena of the everyday social life of the Gilyak, a few remarks concerning their amusements, songs, music, dances, and games remain.

533 The minds of the Gilyak are turned too much toward more
sober, serious, and practical purposes, such as acquisition, trade, and profit, for them to devote themselves much or often to singing. In particular I have never heard them sing at the bear festivals or at other occasional gatherings for the purpose of amusing or pleasing themselves and others. Only when the Gilyak knows that he is alone and unobserved and in the stillness of Nature surrounding him, does a melancholy mood come over him as he is sitting, for instance, beside the dying fire in the silent forest or drifting down the river in a light boat with the wind still and without the stroke of an oar -- only in such and similar cases have I heard him sing in the daytime, and then the prolonged guttural notes of his song come over to one sounding so monotonous and melancholy. On the other hand, he very often sings at night in order to shorten the slowly creeping, sleepless hours. Stretched out on the sleeping bench under his dog-fur coats, he begins to sing in a loud voice, unconcerned about the repose of his neighbors and the other sleepers. When he has finished a stanza, a guttural aa usually comes from here /680/ or there as a sign that he has found a fellow-sufferer and his song should by all means go on. With this encouragement, a second stanza follows, then a third, etc. Sometimes it is a man, sometimes a woman, who renders the nocturnal song or the encouraging aa. Sometimes, when it lasted too long for me, I

"Mention has been made of four gods—the lords of the forest, sea, and fire, and the creator, or judge of right and wrong; but these do not exhaust the whole polytheistic conception of the Gilyak. They have also a pantheon of minor deities, the most intimate among a crowd who are too numerous to maintain communications with. The sun, moon, and stars each has its ni vookh, but the Gilyak has no intercourse with them."

/762 cont./
[197] on the earth, while the soul of a murdered person has flown to
[195] heaven and therefore no longer needs earthly food. Furthermore, this idea may in part also give rise to the reverence, devotion, and often very anthropomorphic treatment of the bear by the Gilyak. (Bm. II, 57-59.)

[197] 44. Gilyak. Among the Gilyak, as among the Olcha (**),
[195]
[125]
[170] ** See Appendix 45, below.

The soul of a person drowned in the river or in the sea (according to Jutschin's report) does not go to heaven or to Mlygh-wo, but goes into a seal dog, and, to be sure, into a kighitsch or pyghilangr, i.e., the adult Phoca vitulina or nautica. A number of utisch are therefore connected with the catching of a sea dog. For example, when the sea dog is caught and before any use is made of it, a cut with the knife must always be made through each eye so that the liquid can flow out. This is caught in the hollow of the hand and thrown back into the river. Only then may the sea dog be used as needed (†).

†. See p. 851.

[197] It is difficult to say how the Gilyak conceive of heaven (tlö),
[195] where the souls of the murdered are said to go. As an answer to
882 my question as to whether these souls go to one of the stars, which are also earth, I was told that they also went beyond these, nilr, i.e., "inland" from the stars (††). (Bm. II, pp. 62, 63.)

†† Therefore beyond them; see the star-dwellers, p. 1101.

[197] 45. Olcha. From Chostiambo I learned the following about the
[195] views of the Olcha with regard to the fate of the dying and the
[115] metempsychosis into aquatic animals and bears:

9: Hawes--269-270 T-3 (1901) 1903 Gilyak
116, 266, 821, 823

"There were legends which seemed to indicate that Cape Maria (or Cape Elizabeth), in the extreme north of the island, was regarded as the 'end of the world.' We heard of 'black men who were cannibals,' (1) but beyond them and their country, Vanka assured

1. What the origin of this report about black men was I do not know, but in the old legends the Gilyak hero is often represented as slaying his opponent and eating him.

us lay our goal. The Gilyak canoe seemed a poor sea-going craft, and the ignorance of the stars shown by the natives stamped them as a land race. On the other hand, they were noted for their [270] excellent orientation in the dark. From Vanka we could get no information about the moon, and so I asked if he knew anything about the man in it. No, his father had told him something about him once, but he had forgotten, and, though he knew he was there, he really couldn't tell if he were a bad man, condemned to live there, or a good man."

177 baptism a means of guarding against abduction of their
797 women. Those who are baptized live just like the unbaptized ones, their children are usually not baptized, and their corpses are cremated. Their fellow-tribesmen by no means persecute them. A baptized Gilyak is regarded by the others somewhat as though he had shared in some special acquaintance.

802 XVI. Intellectual Development, Time-Computation,
805 Legends.

The Gilyak count to quite a high number: 2000, 5000 and more, but of course they almost never use such high figures. The Gilyak year is half as long as the real one: winter which probably lasts half a year, is regarded as a whole year, the [245] remaining year being regarded as another one. Moreover, there are special names for the four seasons.

821 The Gilyak know how to find their way by the stars, and the Big Dipper and pole-star are their guides. They seem to have no particular assumptions with regard to the characteristics of the heavenly bodies. From some I heard that the sun and moon were inhabited by people. I could not learn anything definite about whether they might not be "the beyond". It can only be said that the other world is somewhere up above, not under the earth, as with the ancient Greeks.

805 The Gilyak do not count their years. Only of quite young
561 people one can hear it said approximately how old they are. Older people cannot remember their age and immediately say: "the Gilyak does not count his years". This means his own age, for with them there is no question of chronology or history.

173 The majority know nothing about their past. But from
181 several intelligent Gilyak I heard that once "a long time
721 ago", there was a war between the Amur-Gilyak and those of Sakhalin; that the latter came with a great many boats, but were defeated. There is also a tradition on Sakhalin which has it that three or four generations ago a long war raged, whose cause was the abduction of a woman. It is difficult to say whether this war is the same as the one of which the Amur-Gilyak tell. In any case, the long intervals between such wars testify to the peaceableness of this tribe. The Gilyak knew nothing of fighting with the first Russians who arrived.

In answer to the question whether they had always occupied their present settlements, most of them answered simply: "I do not know". However, I heard from one of

173 them that the old people had told him that one part of the
181 Gilyak came across the ocean, the other, from above, that
721 is, from approximately there where the city of Blagoveshchensk lies. May we not understand this to mean that they crossed over from Sakhalin and that the first immigrants mingled with the Goldi who were already to be found on the Amur?

153 If one asks how intelligent the Gilyak are, it may be said that for savages they are rather intelligent. In the arts, however, they are very backward. They know how to draw or carve various animals. The figures are coarse, but nevertheless [246] recognizable. Music and poetry are absolutely embryonic, but at least they like to hear music. Their memory for places and persons is astonishing. If a Gilyak meets a stranger somewhere, he recognizes him instantly after many years, and at the same time recalls all kinds of minor circumstances accompanying the original meeting. In languages, too, their memory is not bad, at least many of them speak Russian, but the reverse is not true. It is, however, doubtful whether the Gilyak's memory would be adequate for systematic instruction. In instruction the different facts cannot be directly understood but must be interpreted from the words of another, and thus a certain
212 imagination and judgment are needed. For a time there was
872 a school in the village of Mikhaylovskoye where Gilyak children were taught to read and write. This they learned very well, but nothing else was taught. The Gilyak, of course, do not have their own writing.

153 Curiosity and a desire for knowledge are average. The
609 former I judge in comparison with other uncultivated peoples whom I had the opportunity of observing, especially the Bashkir. The latter are so intrusive in their curiosity that they give the traveler no peace. Of course, the Gilyak also gather around a stranger who stops at their yurts, but not in great numbers; they keep at a certain distance and soon disperse. If they come into the house of a Russian, they look about them with curiosity but they do not immediately reach for everything that strikes them and do not ask for presents. In this, as in many other respects, they are decorous people.

153 If I must praise them in this connection, I must also say
821 that their desire for knowledge is not sufficiently matured
177 that they would be interested in the main springs of culture. It seldom occurs to them to ask a Russian about a machine, about economic questions, nature, institutions, religion,

153 etc. If such topics are brought up, however, one may
821 converse with the more intelligent of them for a short time
177 As an example of a philosophical discussion with a Gilyak, I should like to quote the interview of a Russian priest (1)

1. The deceased V. Kasansky.

with a Sakhalin-Gilyak who maintained he had observed nothing of God's ways. After [247] a religious discussion the Gilyak suddenly asked: "and why do the Russians say th the earth moves around the sun, when what we see is exact the opposite?" "Do you have lice in your hair?" was the priest's counter-question. The Gilyak became somewhat embarrassed, but admitted that occasionally he had them. "Good", replied the witty priest, "now if such a louse sits in your hair and sees nothing but your hair, and then goes walking about, it begins to think that it alone is moving, bu that your head is standing still. And yet your head, meantime, might be gliding along with you in your boat. Even so is it with us lice on earth: the earth may be moving and we may not be aware of it." The Gilyak grinned but did not reply to the extemporaneous astronomical proof of the little father.

147 XVII. Sickness and its Treatment.

838 In general, the Gilyak are healthier than civilized people. Their endurance of cold and hunger is amazing. To go without food for a few days and yet continue the hunt in the taiga, or to stand for hours up to their chests in the coldest water - all this is nothing to them. Moreover, weakness in body structure, congenital defects, paunches, bad teeth, etc. are seldom found among them. Hermaphroditism was the only deformity that was known to me.

164 Constitutional illnesses and later sicknesses did not have many representatives. I did not find cancer, tuberculosis and scrofula. I saw two cases of leprosy in father and son in one village; another son was healthy. Syphilis occurs, but rarely, in isolated cases, and near cities and military posts. In any case this disease does not have the significanc among the Gilyak that it has gained among the native Kamchadals. In spite of the fact that they are hardened toward wind and weather, they suffer rather frequently from rheumatism. Toothache is rare.

977 For him, the prototype of everything that exists is, naturally, man, as the creature whom he knows and understands best. Everything reduces itself to man: everything visible in nature is a form in which is invested god-man. With such a world view, the religion of the Gilyak represents a combination of pantheism, the cult of animals, fetishism, demonism, polytheism, etc., all of them against the general background of anthropomorphism.

992 992 The Gilyak calls the universe "kurn," but with this same word he denotes the concept of a personal, man-like god. With the word "pal'" he denotes mountain and the god -- "master" of the mountain; with the word "tol'" -- the sea and the god of the sea. The universe is only the form which has been assumed by great image of the personal god, "kurn."

● 823 The Gilyak calls his native island "mif" (the earth). It is a living, divine creature, whose "head" (Cape Marii) and "chin," "Pytykry," lie in the Sea of Okhotsk, while its "legs" are two peninsulas in the Korsakov okrug which lie in La Pérouse Strait.

[780] I myself have made some trips across the "Chin." have been how respectfully sacrifices were made by my companions and prayers were delivered to the earth concerning our successful journey. I made my way up to the top of the very "Head" [998] of the earth, which, according to the beliefs of the Gilyak, does not leave unpunished a sacrilegious offense against it by the feet of mortals, and saw the majestic bald spot of this divine Head, covered with sharp stone teeth instead of hair /50/ (the result of weathering), which bring superstitious terror on the Gilyak... The majestic crest of the top of the high cape looking out on the boundless sea is indeed very imposing!

Moreover, the parts, even the smallest ones, of this grandiose being -- the "mif" -- are the same kind of living independent creatures as the divine whole. Here is the majestic mountain Engel'pal', which rises alone over the northern dunes; it is the living reindeer of the god of the universe, "kurn," on which he traveled over the island, putting it into its present state, habitable for man. The valleys were

/50 cont./

● 823 formed where his sacred feet stepped; from the lashes of his whip appeared the rivers... Here is Kryuspal', a marvelous cone, one of the highest peaks of Sakhalin, which impresses everyone approaching the island from the sea with its grandeur, a lonely, stern demon of the sea, who, in a fit of anger, killed his children and compelled his wife to run hundreds of versts away from him and form another cape in a new place. And even the lonely cliffs sticking out of the water all along the shore of the island -- all of this is alive, gods who ran away from their clans under the influence of intemecine wars.

82 All the rest of nature is equally alive: the menacing "tol'" 774 (the sea), the somber forests of the mountainous island, the 776 fast mountain rivers, etc. When cutting down a tree, the Gilyak is afraid to destroy its soul and places upon its stump a special being, the "inau" (chekhn-kun-inau), soul-creating "inau"-(1), which returns soul and life to it. The mountains,

[797] [998] 1. A sharpened stick. The cult of "inau" has been borrowed from the Ainu, and I shall discuss it separately /in an untranslated section/.

the ocean, cliffs, trees, animals -- this is only a mask under which the gods conceal themselves from the curiosity of man. The peculiar profundity of this sort of metaphysical analysis by 825 the Gilyak is striking. Once when a Gilyak began to explain to me that the small kosatka (Orca gladiator) accompanying a large one in the sea constitutes in fact only the sword of the big kosatka, and I expressed my bewilderment at this, he began to prove that it only seemed to me that that is a kosatka, but in fact it is the sword of the large kosatka-"master," just as that the latter in reality has the form of a real Gilyak, and that which seems to us to be a sea animal is only the boat of this Gilyak-kosatka (2).

2. Kosatki travel in the sea in packs, within which are distinguished the older -- leaders, and the younger -- soldiers. In an attack,

685 for your master!" And thus /305/ they go around the entire vil- 754 lage, meanwhile pulling on the tendon. Then the thief begins to suffocate from fright and confesses. A shout goes up; it happens that the thief dies from it.

627 An oath is taken also in controversial matters. Before the 695 court, in a balagan where the khlaj-nivukh sits, nothing is allowed to be boiled; they eat raw yukola.

A stick (kyt') -- about an arshin in length with a human chkhnaj.

If the matter reaches the point of breaking the stick, then they pay more -- double. Both big and little assemble in the balagan of the khlaj-n'ivukh'a (the settlement of Karga, 1896).

88 Women, Childbirth, and Children. A maiden who has reached 31 sexual maturity makes two braids. Women pierce both ears in 178 order to put in earrings (mes'kh); formerly men also pierced their ears. A wife who is a minor can be slept with only after she be- 88 gins to menstruate. During menstruation the woman puts on her 583 oldest clothes and does not sleep with her husband. Women wash 341 [302] themselves, but not with hot water, for otherwise the rügurmam (the mistress of the fire) takes offense.

171 Among the Kekhal (Orochi) a man who has two wives ac- 834 commodates a guest under one blanket.

343 A pregnant woman must not look at the Amur when it be- ● 823 gins to break up, in order not to slow up the opening of the river.

844 They give birth in the balagan (midwife -- langyv-mam). In winter the mother spends one and a half days in it, in summer -- three days.

84 One must not cry out during delivery -- a sin. The husband at this time does not go anywhere. If a child has died during birth, the woman must not travel on the river or sea for a whole year -- there would not be any fish. For a month before childbirth, it is not permissible to bind anything tightly or to drive in stakes; it is not permissible to repair anything for an alien.

[789] During difficult deliveries they open up boxes, tear off patches, and unscrew their rifles. The newborn baby is washed with cold water. The midwife is not paid. Until the umbilicus heals, the

XI.

Miscellanea

● 823 The cliff Uj-pame, in the form of an isolated stone pillar, is between Khez' and Chil'mi. Formerly one could hear how the 782 master of the cliff beat on a tambourine. Three times (a year) 776 they made sacrifices to him and addressed to him the request: "Pkhys'kyt ururungid'! -- do good for us with your risk!"

731 During a pila-dakh (smallpox epidemic) they bring fire- 758 wood and water to the sick, but do not themselves enter the house.

731 When they learn that it is all over in all the settlements 753 (i.e., the epidemic is over), then the dead are taken out of their 766 graves and burned; they are afraid of burning them earlier for they believe that smoke spreads infection. The only thing that is allowed is the smoking with marsh tea in the yurt.

538 The Female Character. Proverbs. 1) The female character is 562 like a whirlwind, similar to the wind. 2) With just a tug you will change the female character. 3) A woman is like a fire started in a clear field; the wind blows and it is out.

158 Meryachen'e. In Charbakh two people suffer from the disease [143] meryachen'e -- two women; this sickness is inherited in the female line. Those who suffer from meryachen'e repeat literally everything, even in a foreign language; they repeat even actions. The attacks come during a fright. The sick woman is then unconscious, but later she comes to. If attempts are made to compel her to repeat something many times, she is ready to attack with a knife. In their youth they did not suffer from meryachen'e.

There are other such sick people in Tymvo and Pronga.

/342 cont./

197 The Tymovsk and the Okhotsk Gilyak have one language.

/343/

● 823 A legend about three brothers-cliffs in Aleksandrovsk on Sakhalin.

773 Three Heng brothers went with a bear to look at a cast-up whale (kem), and then all of them turned into stone. Two jags -- mother and daughter -- look after them.

825 A rat must not be killed with an ax; a stick is necessary.

761 Nakhvun's wife is dying because her father killed a rat with an ax; his son died for the same reason, and now his daughter is dying.

825 The attitude toward incest among dogs. According to the words of the Gilyak, among dogs a brother and sister do not copulate; exceptions are rare and are attributed to the milk. Dogs are killed for this; otherwise this heavy sin falls on the master; he will be punished with sickness and so forth. Father and daughter among dogs frequently have intercourse, but they are not killed for this.

302 Hair may be thrown away in any place.

752 A person who has been rescued from death by a bear sacri- 825 fices chukh-chugynd -- a dog -- to Pal-n'igyvyn. No one may [782] look at a person wounded by a bear; only an old man or an old woman binds his wounds. His bed is curtained off with a sail.

724 In need they sometimes eat a bear that has died, and 825 they treat him like a killed one. When they set off some- [261] where (hunting) or in general on important business, they always take along their favorite ymgi (son-in-law).

703 In Mil'kvo one Gilyak had two women. Once his daughter with the grandchildren came to visit him. She went to gather berries while the men went out to hunt seals. Then

/606 cont./ They are not permitted

430 by the Manchu-Chinese government to go farther upstream, just 434 as they and all the other peoples of the lower Amur region are 484 not permitted to enter the Amur above the mouth of the Sungari, 484 the so-called Sachali River -- a prohibition whose observance the 648 Manchu officials stationed in Dshang-dshu at the confluence of the two rivers have to watch over very strictly (1). Hence this is

1. Cf. pp. 73 and 800 above.

also the extreme western and southern boundary of that part of the Amur and Sungari region known to the Gilyak through personal observation. What they have to say about the towns of "Kirchik-choton" and "Nungdy-choton" (Ninguta?) located, respectively, [103] above Itscha-choton on the Sungari and on its above-mentioned tributary, which they call "Ula" (which, however, in Manchu and Tungusic, as is well known, simply means "river"), as well as about the "large" town of "Aicho" (Aigun) on the Sachali River is based only upon hearsay, on tales which they may have heard in part from the Chinese on the Sungari and Amur and in part perhaps through Daurian-Yakut traditions in Burukan. The 430 fact that the Manchu-Chinese government grants the Gilyak 434 access to the Sungari, which is prohibited for all foreigners, 484 indicates /607/ that it views them as its subjects, though it does nothing in their region to give proof of its rule over them and does not send either military or tribute-collecting officials to them, as a consequence of which the Gilyak regard themselves as independent of it. Perhaps it neglects to do this for reasons of precedence, in order not to expose itself to resistance, the removal of which would involve more cost than benefit. On the other hand, it tries to make up for it by collecting from the Gilyak coming to trade in Ssan-ssin as high a tribute as possible for permission to do so, which must be obtained from it first. The Gilyak have no choice but to submit to any demand, if they are not to lose their anticipated profits from trading and to have undertaken the whole long journey in vain. At the same

/612 cont./

439 prized Haliaëtos albicilla, the amount of rice desired. Furuhjelm,
[435 at that time head of the agency of the Russo-American Trade Company in Ajan, Nikolayevsk and the Murawjof post, estimated the total number of animal furs annually obtained in trade from the Japanese by the Ssisam voyagers in Ssiranussi at about 2,400 otter pelts, 1,300 sable pelts, and 640 fox pelts (1). This rich

1. Tikhmenev", Istor. obozr. obrazov. Rossiisko-amerik. Kompanii, Part II, p. 128.

supply of furs which the Gilyak and Olcha bring home from their Ssisam voyages is used by them in the trade with the Chinese on the Amur and especially on the Sungari in the manner described above and thus contributes greatly to the maintenance, stimulation, and augmentation of all their trade operations.

439 Meanwhile, the stay of the Ssisam voyagers on Sakhalin
484 for the purpose of trade with the Ainu and Japanese often ex-
487 tends over a considerable length of time. In particular those arriving in the summer either wait for winter in order to return with their dogs on the above-mentioned route via Kussunai, Manuë, the Poro-nai, and the Tymy sources, or even remain through the entire winter in the southern part of the island and not until the next spring or summer set out on the return voyage by boat along the west coast of Sakhalin. On this voyage they
[231 still carry on trade with the Ainu so far as they can and, as Fr. Schmidt reports (2), are especially anxious to get bear cubs in

2. "Histor. Ber.," etc., op. cit., p. 54.

order to raise them at home.

648 The Japanese do not permit the Ssisam voyagers to go
439 beyond Ssiranussi and to visit, say, the Japanese settlement of
484 Kussun-kotan in Aniwa Bay. This, then, as in Ssan-ssin, is the
●[823 southernmost boundary of the world known to the Gilyak from

/612 cont./

439 their own observations, and concerning Japan, the homeland of
484 the Ssisam, they know only that it is a land beyond Sakhalin
648 (Lär-mif) and separated from it by a "small sea" (matsch-kerchk).
●[823 /613/ In the years immediately following the occupation of the
105 Amur region by the Russians, however, the Japanese also tried
648 to keep the traders from there away from Ssiranussi and Endungomo,
439 their second-largest settlement on the west coast of Sakhalin and, at the same time, to extend their colonization of the island as far north as possible in order to prevent any eventual expansion of Russian power beyond it and especially any alienation of the Ainu subjugated and exploited by them (1). In 1859, for instance,

1. Concerning these events, see pp. 153-156 above.

the Gilyak coming to Sakhalin to trade were no longer admitted to Ssiranussi by the Japanese but only as far as Endungomo, and in the following year the Olcha traders were prohibited from entering even that place, so some of them remained in Kussunai and some went to Taraika on the east coast (2). Even Judin, the

[113 2. Brylkin", "Pis'ma s" Sakhalina /Letters from Sakhalin/" (Zap. Sib. Otd. Imp. Russk. Geogr. Obshch., Book VII, pp. 22, 26). Also, Schmidt, "Hist. Ber.," etc., op. cit., pp. 107 and 108.

Gilyak from Tebach, was affected by this prohibition, though in former years he had often been in Ssiranussi and was well known there; in fact, he had frequently been used as an interpreter, thanks to his knowledge of the Ainu language, which was familiar to him from his mother, stemming from this people. But these, as well as all the later changes and upheavals in trade conditions caused by the Russian occupation of the Amur region, fall outside the scope of our considerations.

/671 cont./

821 tchlangi (east and northeast) storm sweeping over the Sea of Okhotsk and almost always accompanied by snowstorms, whereas the ladwilantsch (southeast wind), the tungyrsch and ngaluws (1)

[484 them less concern (2). The latter are especially dangerous in

●[823 2. On the Amur the winds are, as a rule, distinguished less accurately, and simply by the four main directions: ady, tschlangi, kongrsch, and tungyrsch (north, east, south, and west).

making a trip from Dul' to the villages to the south on the same coast, since the sea ice sometimes breaks up immediately in

[982
[989

Magic arrow for exorcising storms.

front of the sleds of the travelers. In the village itself several
821 methods of appeasing the unleashed storm-spirits were used. At
989 the tip of a long pole stuck in the snow there was fastened a
982 square piece of sealskin, which evidently was to serve as a sacrificial offering to the storm. A second method served the same purpose, but in a much more attractive form. It was an ordinary-sized arrow made with two prongs at the tip and provided with two curls of wood shavings on the shaft. Between the two prongs, likewise bearing small wooden curls, the strong center rib of a tobacco leaf and a small piece of glowing tinder were inserted and the arrow shot off in the direction of the stormy ady-wind. Finally, a third method consists of sacrificing a number of whelps to the storm. In the village of Tyk their number came to three, and, if the storm did not stop the next day three

Gi /776 cont./

766 fir branches were lacking, which is not permissible for a person who has been torn to pieces by a bear.

Gi The inhabitants of individual villages and localities differ
764 with respect to the position in which they put the corpse in the coffin in relation to the points of the compass. The decisive
823 factor seems to be, not the sun, but, among the coastal dwellers,
184 the sea, and, among the Amur dwellers, the river. But different customs prevail, depending on the locality. The Orochi of the coast from Nangmar to Idi are said to place the corpses in the igda-chôldochsa with the head toward the sea, that is, to the east. At the Orochi tomb in Pjedanj, however, the head was turned toward the Pje River, that is, to the west. The Olcha of Pjedanj, like those on the Amur River in the villages of Kidsi,
Gi Dshai, etc., give their dead this same position in the chôldocha,
[162 In de Castries the chôldocha, which are not far from the village and are said to belong to the Olcha who died there, although the entire population now consists of Orochi, have their doors toward the west, that is, toward the distant Amur River, and not toward the sea to the east. The door on the chôldochsa, however, is always at the head end of the burial house. Thus, these Olcha, if they actually were such, had it oriented according to the customs of their homeland. But the same custom is not found in all the villages on the Amur. In Darachta, for instance, on the left bank of the Amur, where its direction is to the north, the corpses are said to be placed on one side in the coffin, so that they are turned with the face and the chest toward the east, with the head in an upstream direction toward the south, the feet in a
G downstream direction toward the north. Among the Gilyak, the
764 river seems to be absolutely decisive for the position of the raff,
●823 because I always saw the door of the raff turned toward the river, no matter what its direction was, for example, in Kulk, Kalgho, Tacht, Kalm, and Chjare, at the first two places, therefore, toward the south; at the latter, toward the west. (2 S.R.I. pp. 25-27)

ooo /Page 777 contains a list of errata which have been corrected in the text./

225 mu-ziyad on the boat supports the assumption that at one
789 time or another the Gilyaks, it seems, regarded a boat as
774 a living thing. Mu-ziyad on the boat serves, it seems, as a
751 means of guarding the boat against and protecting it from misfortunes.

782 Aside from mu-ziyad, tnaj is performed on the boat. Tnaj
778 means 'image', 'figure,' 'picture.' With shavings (inau) of
532 a branch of rowan (qosk-ŋks) the pilaŋ makes two figurines.
225 One of the figurines is placed at the prow of the boat and the
789 other - at the stern. I once saw such a figurine on the neck of a representation of the bird ugŋ, placed by the Gilyaks at the bow of the boat. The figurine placed at the bow has its face turned to the sea. We shall come back to these tnaj elsewhere.

782 There is one other ceremony performed on the boat. Before
789 setting out on a hunt the Gilyaks expose the boat to smoke.
225 They light fires of spruce and bogulnik on both sides of the
372 boat and they try to build the fires so that the smoke hit the boat. The pilaŋ takes a branch of spruce or of bogulnik and, starting from the bow and going towards the stern, hits the outside and the inside of the boat as well as the rowlocks with the branches so as to elvlaf-psk-zzq --"lose bad places (evil)". Then the hunters push the boat past the fire into the sea and are off.

225 I watched Gilyak Xitkun who, having already returned from
502 a hunt, put out to sea with the hunters a second time. Five
554 hunters were at the oars. Propelled by strong and simultaneous strokes of five pair of oars the boat took lightly and quickly to sea. Xitkun, firmly gripping the rudder, set the bow of the boat northward, towards the cape barely visible in the distance. The Gilyaks rowed calmly and quietly. They need fear nothing. At the stern of their boat sits an exper-
777 ienced pilaŋ, tested in trips. At the bow are placed a representation of the sea bird ugŋ and the figurines tnaj. They will vigilantly look out for and protect their course.

When the boat became a tiny spot in the distance and its outlines blended with the water, the women who saw off the hunters left the shore for home.

225 After leaving the village the hunters turn northward. They
● 823 first go to Ulŋ-krŋ "sacred cape." (1) Once there, they pull
766
782 1. It seems that there are "tombstones" in memory of drowned men on the cape.

the boat out of the water. The pilaŋ picks up a scoop containing the usual refreshments called for by the occasion and

throws them into the sea. Each of the hunters has with him similar gifts which the pilaŋ throws into the sea together with his own gifts. If the hunters go past Uiŋ-krə̂, then they throw their offerings into the sea from the first floe at which they stop. The Gilyaks believe that on every cape (krə̂) there lives a ə̂tik- an old woman. These old women must also be given something at the time of the sea voyage. It is believed that tvax-ə̂tik, 'the old woman of the mouth of the river,' who lives in the mouth of the river Kul helps during the hunt.

[83] In the past the Gilyaks would go as far as T'uurf (Bay of Tugursk) during a seal hunt. They would sometimes spend the winter there and engage in fox hunting. The Gilyaks told me that their ancestors apparently did not go to kəvr-mif (Shantar Islands). (1) At present they do not go beyond

1. According to the account of Schrenk, the Gilyaks did not hunt on the Shanter Islands (On the natives of the Amur region), v. II, p. 288.

Lo ri. In former times the Gilyaks would put out to sea when the ice began to break. They would hunt at sea until the end of the summer and then they would return to the village to fish salmon. When the ice was gone and, consequently, seal hunting on floes ceased, they would hunt seals by means of tola-k'e, 'a heavy drag net.'

At present the Gilyaks put out to sea for short periods not exceeding one or two months. Thus, for instance, Norp put out to sea with the hunters on July 8 and returned from the hunt on August 2. In 1930 two boats of hunters hunted seals off cape Litke and stayed there for two months.

The Gilyaks of today also hunt by means of a drag-net, tola-k'e. (2) Tola-k'e is made of heavy rope called locally

2. Of the very old seal-hunting implements in the village Kul, a very large floating harpoon tla is completely out of use. It was made out of a few long sticks turned of the trunk of a larch. I got acquainted with its structure and I observed how it is being used in the village Chayvo. This harpoon is sometimes 18 ruchnykh sagenes long.

matauza. The rope is 45 ruchnykh (makhovykh) sagenes long. Each of the meshes is large enough for the head of a sivuch. Tola-k'e is set not far from the shore. The upper cord of the

/80 cont./
and wound him should be gay, jest, and laugh. Silence in the house of the deceased is a sin. When all the preparations are finished, the deceased is tied with thongs to a dog sled and his favorite dog is placed over him. For some time the little soul of the deceased will live in this dog. The dog will subsequently be tied to the place where the deceased slept and will be fed the best dishes, and after several months, when the small soul is once again settled in its place, the dog is sold.

Finally, the deceased is brought to that place where his remains will stay forever. Here his last bed on earth awaits him -- a high, symmetrically arranged pile of wood, on which he is carefully placed with his face toward the west. For the last time the wife, the husband, the mother, if the deceased is young, the wife of the elder brother, if the deceased was unmarried, climb up to him and weep, and then, making a sacred fire by means of friction, they set fire to the platform from all sides. When the fire reaches the body of the deceased, everyone hastens to pay their last tribute to him by throwing firewood into the fire. Even small children take part in this. Four men stand on the sides and, with long poles, regulate the firewood and poke the body to the fire. It will burn faster and better. At the same time they break the sled, kettles, and spears and kill the dogs, which free the souls of these objects to follow the deceased.. The ashes are covered with birch bark, and of the deceased there remains only ashes, in the literal sense of the word.

/81/ A tree torn up with the roots is placed over the spot where the deceased was burned.

After this the people seat themselves around the kettles containing the meat of the slain dogs, part of which is eaten and part thrown in all directions. On the way back they drop in for only a short time at the yurt of the deceased to taste the viands placed there, and then dispense.

/305 cont./
mother has her own fire. After childbirth a woman washes herself for three days and then moves to her yurt, but for seven days the sin apart and eat from a separate kettle. For ten days after childbirth, it is not permissible to drink cold water or to eat raw fish, but if twins were born, then it is permissible. When a child is born, they bring in two sticks, put them into his hands and lift him up. Similarly, sticks will be placed in the infant's hands when he falls ill, and he will be compelled to lift himself up (1).

1. On another page of the same notebook, we find the following notation: "These sticks are called ŋyŋaŋdr (from ŋyr -- risk, luck, and ŋuŋydr -- to seek)," which probably refers to the above-mentioned sticks.

/306/ If two children were born, they make two pain of ŋmuŋ, two ŋoŋ ŋ'ŋkh, two sticks made of rose-willow, cut as strips (ŋ'ŋ'ŋ), two small bows (gudu) and arrows of a special shape (ŋ'ŋ'ŋ), and attachments for the cradle -- ŋinaŋ'. When they prepare food, these trees -- ola' bituŋ' -- must be fed (settlement of Ka'wu).

While a child is growing up, his umbilical cord -- ŋ'ŋ'ŋ'ŋ is at home, and then he himself must carry it into the forest and hang it on a tree. O'ŋ'ŋ (ŋ'ŋ'ŋ) is a figure that they make when a child is suddenly frightened during his sleep. The chkhaŋ is the figure made when a person himself, without the shaman, does that which he dreams.

The child's excrement is poured out near a fir tree (both male and female). After being cut, hair is also thrown here (it is not permissible to throw it into the yurt or yard). One must watchfully to see that no female blood drops on the urine or the refuse, for then the child is lost. The child will die if the tree growing there is broken. This tree is called pila ŋuŋ', and the place is called ki markf -- literally -- "urine pouring out place."

/306 cont./
A child's amulet -- ola bituŋ consists of two slender fir trees -- ŋruŋ, which are uprooted on the day of birth of a boy; these trees are set apart from each other. Then they are reinforced, encircled with simple sticks, and bunches of leaves of Ledum palustre -- the marsh tea (ŋ'ŋ'ŋ) are attached to them, as well as the sharpened bones of a young fish, the head of a pike (ŋuŋ), and hooks for the boy's clothes. If the boy dies, all this is thrown away, but if he survives, everything goes to the next child (settlement of Ka'wu).

VII.

Religion

The soul and the ceremonies after the burning of the corpse. The shaman -- chdaŋ, chkhdaŋ, ŋ'ŋ'ŋ, ŋ'ŋ'ŋ (the pain as in a tree). A man has three souls: one major one -- chdaŋ, and its two shadows, assistants. When the chdaŋ of a shaman is wounded, the shaman dies.

If in sleep something is dreamed clearly and comes true, it is the activity of the chief soul, and if it does not come true, then of the shadow-assistants. There are interpreters of dreams. If one sees a cow, there will be a storm; if a red berry, he will soon fall ill.

In the morning on the next day after the cremation of a dead man, his family arrives, rakes together the ashes, encloses them with wooden boards on four sides, and covers them with fir branches, and on top with dŋuŋ; then birch bark and wooden boards, which are then attached to the ground with wooden /307/ hooks. The skull bone (chonge nyŋrr), which is picked up from the ashes, is placed between two wooden boards, and fastened together with an umbilical cord ("the root from which man is born"); this is the way they make the mu n ŋ'ŋ'ŋ k'ŋk. Some place the bone in the upper part, other -- ŋ'ŋ'ŋ

/311 cont./
before becoming a shaman -- pobkhrydr-chaŋ -- a shaman who can lead a soul into the next world (from pobkhrydr: -- to lead a soul into the next world), he is ill and tormented until our of his mouth come gulk (Goldi nilin) -- a shaman's copper mirror, tore (Goldi ŋ'ŋ'ŋ) -- a piece of copper for a shaman's fumigating smoke, then bones -- muk', and, finally, a lalbich -- a knife of palm /ŋ'ŋ'ŋ/. The lalbich of the Gilyak shaman is his own work, but he does not have horn, and he buys pulk. Uz'mu kekhn -- the spirit protector of the shaman, ajami among the Goldi, lives in the ŋ' of the shaman. Uz' -- one of the three souls of the shaman, literally, the path of a tree.

VIII.

Beliefs and Rites Connected with Hunting and Fishing

chkdrŋr-tut, toigo, Chkdaŋ -- tree (a larch) which is placed in the taiga beside the hunters' balagan and before which they sacrifice to the master of the sky. Every year they place a new chkdrŋr, but the old one cannot be touched, not even touched with one's hands. /312/ If it falls down by itself, it will be carried to a storage place -- chkdrŋr nar'ŋof (1). In the

1. In another place it is said that the chkdrŋr is repaired until it falls down.

settlement of Ka'wu on the chkdrŋr, on its crossbar -- two figures, ŋ'ŋ'ŋ -- peasant man and woman. A chkdrŋr is fed on the first day of the month ainong (December) and a second time in July. Everyone who has a chkdrŋr, and all man-eaters, have two forked pieces of wood (tuŋr ŋ'ŋ'ŋ), the fork is thrown into the fire and chkdrŋr takes back. This fork is placed under the head at the end of a bear to protect against the mish-a (the evil spirit). In /313/ the

Religion

Cosmogony and the spirits-masters. Kum, the master of the universe, created everything: in the past everything was water; he "made the earth, the sewers, and the trees." "Working" the earth, Kum lost his reindeer, which turned into Lavro-pal. The large rivers are the tracks of his reindeer, while the small streams (were formed) as he waved his lash at the reindeer -- tlangi-r'kech.

The sky -- ŋ'ŋ -- is like an iron earth, but it moves, turns first with one end, then with the other. When the sky moves away from us with its sunny end, night falls.

The sun: the largest are as large as a yurt. They are white, and therefore they cannot be seen during the daytime; in the light of the sun they become pale.

The sun: shines at night in Mlyvo (the world beyond the grave).

People descended from a tree: the crook from a birch, the Gilyaks from a larch, the Atna from a fir.

The master of the mountains and of the taiga, Pal' n'ŋgvŋŋ, looks like an Atna. Each clan has its own Pal' n'ŋgvŋŋ.

Thunder lives in the water in winter, and Pal'-ŋ'ŋ'ŋ'ŋ pierces him in the eye through the water; in summer thunder attempts to avenge this. Since Pal'-ŋ'ŋ'ŋ has the ability to turn himself into the most minuscule creatures and to get under the skin (?) (I

1. Illegible. 5. Sh.

of a person, a Gilyak, when his finger inches during a thunderstorm, immediately turns into a snake, otherwise thunder will kill the man in order to kill Pal'-ŋ'ŋ'ŋ'ŋ who has gotten into the finger (a story by Gibel'ŋa, heard by him in Nyvde).

/326 cont./
a man) and one purne (mily) for tinder and flint.

8. Hoŋŋk -- a tobacco pouch, also of dog's skin, for both men and women; tobacco is placed in the pouch, and the hoŋŋk.

A husband dresses his wife, a wife her husband, parents their children, and vice versa. The deceased is given nothing more than the things enumerated, except -- valuables -- are hung around outside and inside the yurt.

Before the funeral guests are entertained from morning until night. Among the rich the entire village is entertained; they drink vodka and place vodka before the deceased. It is necessary to be gay, but they do not dance.

Sews, ties, or sings (are recited -- purine).

On the following day the men go to cut firewood for the cremation of the deceased. They cut down larch and fir, and birch, and poplars -- rose-willow; to cut birch or fir is a sin. One must select a good tree; otherwise it is a sin. They cut down one or two trees. The firewood is cut lengthwise and unfailingly a definite length /327/ among some, up to a span in length (the clan of Pletunka); among others, one sagene less one hand. The roots are not touched, and the branches are thrown away. The logs are placed in three rows lengthwise and crosswise.

During the second night, too, nobody sleeps; everyone feeds the deceased (ne r'ŋgvŋŋ achkinŋ), but they do not put anything in his mouth. On the third day the yurt of the deceased is burned, the floor is swept, then the fire is purified -- tugur mund, mot' is prepared, and tugur amind is performed -- "they feed the fire" (the new master, or a clansman, or a stranger) into a fire started with the branches of a fir, but nothing is said.

When all the preparations have been completed, they eat, drink vodka, and then bring in a dog sled. The deceased is placed on the dog sled, bound to it with thongs, and four men lift the dog sled and carry it on their arms out to the place of cremation. A "grave" (ŋ'ŋ'ŋ) is dug at the place where the deceased died. They walk around the funeral fire three times with the dog sled and the deceased, and they have a respite three times. After this the dogs and the dog sled are taken to the idol, and the deceased,

/327 cont./
and with the ridge. The remaining finer latticework of the roof is made up of thin poles and sticks set crosswise and then covered with tree bark, in particular fir bark, and finally with a layer of dry grass or Calamogrostis straw, etc., which is pressed down and held in place by poles placed parallel to the ridge of the roof. The entrance is found in one corner of the house, and, to be sure, if one stands in front of one of its long sides, always to the right, in the transverse wall or in the longitudinal wall, with an ordinary door (ŋ), which contains of several boards held together by a few cross-strips, and also always with a high threshold by means of which the influx of cold air over the floor, as well as the penetration of drifting snow and coming rainwater into the house, is supposed to be blocked (ŋ'ŋ'ŋ'ŋ).

Plan of a Chinese Winter-Yurt of the Gilyak (ŋchadryf).

/387 cont./

29 and wide in comparison with the foot part, are made out of the
thinner and more pliable skin of the last-named species of seal,
with the hair turned outward; they almost reach the knee and,
after the ends of the trousers have been tucked in, are tied under
[142] it with a leather strap sewed to or on them. In view of the heavy
320 growth of hair of the Gilyak, a head-covering is usually unnecess-
sary during the summer. Nevertheless, for protection against
rain and sunshine, they wear a peculiar, rather shallow-conical
[531] hat made out of birch bark (Gilyak chihr-tu, i.e., in literal
translation, "birch-bark hat"), which as a rule is decorated with
different kinds of black and red arabesques arranged to radiate
out around the tip and, likewise cut out of thin birch-bark,
sewed on the hat by means of fine catgut (see Pl. XVII and Pl.
XX, Figs. 1 and 2)(2).

[386] 2. The colors (black and red) are not
washed off by rain. I therefore suspect that
they are produced by a mixtuge of Chinese
ink or iron ocher with fish or seal train-oil.

29 The women wear quite similar undergarments, but a longer
shirt reaching far below the knees, and over it a robe /Rock/ pro-
vided with sleeves, arranged in front for buttoning, and made
either of similar material or of fish skins. Shirt and robe usually
have a broad edging of material in a different color, over which
is put as decoration, especially on the robe, one or several rows
of variously shaped brass disks of Chinese workmanship hanging
down on little straps, or /388/ of the well-known Chinese copper
coins with a square hole, running all around (cf. Pl. XVII and Pl.
XVIII). As a result, all the movements of the women, every step
that they take, is accompanied by a clatter made by the striking
together of the above-mentioned metal disks or coins. This
custom, as the ornaments themselves reveal, is undoubtedly of
1/2 [See Category 116, P. 997 -- Analyst]

/394 cont./

29 the neck or head, or with the fur cap (see Pl. XIX), and in which
[177] they continue to sit, even after throwing off the fur coat, inside the
yurt. Furthermore, in order to keep the chest and abdomen in the
area of the pit of the stomach especially warm, a flap lined with
fur, the so-called koch-passj, is worn there under the shirt, on
the naked body, hung round the neck with a small band and at the
bottom knotted around the body by two others. The example of
[177] the type pictured on Plate XXII, Fig. 5 which I saw in the possession
of the Gilyak Judin in Tebach, was of Goldi workmanship. It
was of pentagonal shape, rounded off at the bottom, lined with
fox fur, and trimmed all around with otter fur, but provided on
the outside with multicolored and in part artistic embroidery on
black cotton material, which I shall come back to below. Here
there must still be mentioned a peculiar undergarment that I
noticed in particular among the Tro Gilyak in Nyi, both among
adults and on a boy about seven years old; this is a pouch tied
around the loins and of use to the male sex only. For the Gilyak
sitting astride their sleds it is especially important to protect
the knees against wind and weather, and a knee sheath (Gilyak
pain) made of sealskin and tied around the leg below or above
the knee serves for this purpose.

/395/ The footgear has already been mentioned above. In
29 winter, for warmth, the Gilyak put some dry grass in their boots,
171 as more or less all the northern primitive peoples do (1). Accord-
105
324

1. Thus, besides the Siberian peoples, the
Eskimo of northwestern America and Green-
land, for example (Rob. Brown, "Das Innere
von Grönland /The Interior of Greenland/,"
in Petermann's Geogr. Mittheil., 1871,
p. 384).

ing to the statements of the Chinese U-tschen, who wrote a
description of the town of Ninguta in 1722, it is also customary
among the Manchu there, and for this they use a soft, fine,
longish grass growing in the vicinity of water, which they call

29 /395 cont./
324 ula (2), and which is regarded in popular tradition, along with
the
2. According to Maximowicz /Maksimovich/
("Primitiae florae amurensis," in Mém. prés.
à l'Acad. des sc. de St. Pétersb., Vol. IX,
1859, p. 509), probably a Cyperaceae. Ac-
cording to R. Brown, the Eskimo of northwestern
America and Greenland use Hierochloë alpina
and similar types of grass for this purpose.

ginseng and the sable, as one of the three treasures of Ninguta (3).

[113] 3. U-tschen, in the translation by Wassiljef
/Vasil'ev/: "Zapiski o Ningutie /Notes on
Ningutie/" (Zap. Russk. Geogr. Obshch.,
Pt. XII, 1857, p. 95). The translator adds
in a note that boots whose soles are stuffed
with this type of grass are also sold in Peking.

29 I am unable to state whether the Gilyak use the same type or
824 any specific type of grass for the purpose mentioned, but this
much seems to me to be beyond doubt, that they do not act in
this without making some sort of selection, for when, in the
winter of 1855, I asked the owner of the yurt of Poghobi on
Sakhalin to give me some of this grass, he refused my request
with the remark that he himself had very little of it.

128 Finally, an important piece of Gilyak clothing is the belt,
415 in particular as a holder for some of the implements always
[297] accompanying the Gilyak. First and foremost among them is
a large knife, the so-called ngawla-dihakko, which is used
both in eating and, if necessary, as a defensive or offensive
[531] weapon. Like almost all of the iron implements, it is always
of Gilyak workmanship and usually simple, with a large blade
and a short, wooden handle diagonally striped as a rule (Pl.
XXXI, Figs. 1) (4), or sometimes wholly of iron with inlaid silver

[104] 4. The caption concerned, "ngawta-dihakko,"
should be corrected to ngawla-dihakko.

GOD
4. Mamia Rinô (Siebold, Nippon, VII,
p. 193) says that the Gilyak (Smerenkur) on
Sakhalin found the Japanese sugar that
he gave them to try very tasty, but did not
ask for more of it.

123 On the other hand, they are
263 very avid for Russian sugar; at the time of my stay there, next to
tobacco, it was the main object of their frequent and very im-
portunate begging, during which, as a rule, they pushed the chil-
dren forward and, to arouse sympathy, pretended that they had an
eye disease, maintaining that it could be cured only with sugar.

439 Not infrequently they also bought some in Nikolayevsk in order to
252 add it to their dishes, especially to the aforementioned flour-cakes
263 and to those prepared with cranberries or bilberries and the like.
They even declared that they would not hesitate to do this to the
dishes prepared for the bear festival, if it were available in sufficient
quantity, which shows their entirely different attitude toward sugar
and salt.

To conclude our statements on the food of the Gilyak, there
follows here a brief discussion of their most important implements
and utensils used for holding the foodstuffs, as well as for the
preparation and consumption of the dishes. First, only the ordinary
objects of this kind used in daily life will be mentioned, while the
special utensils used in connection with the bear festivals will be
discussed later at the proper place. As was already stated above,
415 close to the entrance of the yurt there is a bucket made of birch
[824] bark and filled with water, on which hangs a couple of bowls for
[Fig. 2] dipping and drinking. The water for this and for the other house-
hold needs is brought from the river by the women in pails, likewise
made of birch bark, hung on a shoulder yoke (Pl. XXXIII, Figs. 1
415 and 2) Gilyak dshamda and kormulk, respectively). /446/ Similarly
193 consideration has been given above to the large iron kettle (Gilyak
(3)
ormoch-wunj) which in the winter house is embedded in each of
1/2 [See Category 116, P. 1013 -- Analyst]

/446 cont./
415 the two hearths to the right and left of the entrance, but in the
197 earth yurt and in the summer yurt it placed on the platform of
the hearth on top of three stones. It is always of Chinese origin
and is used for the preparation of the fish broth for the dogs and
some of the dishes for the people. In addition, however, the
Gilyak also have smaller kettles which they use, depending on the
circumstances, in the earth yurt or summer yurt in the hunting
tent or, when camping, in the open, and which are in part like-
wise of Chinese, in part of Japanese origin, like those illustrated
on Plate XXXIII, Figs. 4 and 5; matsch-wunj (i.e., small kettle)
and kughi-wunj (i.e., Ainu kettle). To stir and ladle the broth
[412] made in the large kettle large wooden spoons (Pl. XXXIV, Figs.
5 and 6) Gilyak myich and mityr) are used, and for smaller
kettles, smaller ladles of iron (Pl. XXXIII, Fig. 5, Gilyak kombj).
415 To prepare and serve mush-like dishes, such as the above-
mentioned groats and the like, the Gilyak, according to need,
use larger or smaller wooden troughs (Gilyak odong and orong),
which are quite similar in form to those out of which the dogs
are fed and are sometimes used for this. A specimen of this kind
[531] from the village of Tebach, decorated at the ends with carved
arabesques, is illustrated on Plate XXXIV, Fig. 1. I saw other
[824] foodstuffs and dishes, such as the above-mentioned flour-cakes,
[531] beans, various berries, etc., served in low, roughly square bowls
made of birch bark, whose bottoms and rims were decorated with
various arabesques; they are the so-called tottangr in Gilyak (Pl.
XXXIII, Fig. 8). Like these vessels, which, in accordance with
their use, one might designate as the bowls of the Gilyak service,
so also the wooden spoons intended for the use of individuals as cups
and plates differ in accordance with the nature of the dish to be
served. If it is only a matter of a few strips of jukola, it is suf-
264 ficient, as was already mentioned (1), to have a small wooden tray
415

1. See p. 647 above.

(chachutchisch), on which they are cut up in order to be dipped
in fish oil and consumed. Liquid foods, like the above-mentioned

G /469 cont./
296 If the Gilyak run out of tobacco, they seize upon various
824 substitutes for it. The most common of these makeshifts is fine
dry wood shavings from any kind of wood, but always from a soft
type, presumably willow by preference. Such shavings are even
mixed with the tobacco when it is beginning to get low. When
it is all gone, the wood shavings mixed with tobacco oil are smoked
G in place of it. For this purpose the tobacco oil is scraped out of
415 the pipes from time to time and stored in a special small pouch
(Gilyak nirychsin), which /470/ is made of a few scraps of leather
fastened between two pieces of sealskin (Pl. XXVIII, Fig. 6) can
which the tobacco oil is smeared and, when required, is scraped
off, mixed with the wood shavings, and again returned to the
G pipe (1). Moreover, the Gilyak use some of their native herbs as
296
824
[171]

1. The very same tobacco substitutes is
also used by the Chukchee, who, however,
obtain it by putting the wood shavings in
the tube, much wider on their pipes, above
the pipe bowl, where it is gradually saturated
with nicotine from the smoke passing through
it (Bush, Reindeer, dogs and snowshoes, London,
1872, p. 429; Dall,

tobacco substitutes, for example, an herb that they named for me
in Allof on the Amur as tschomr, in Tyk on Sakhalin as wurpi, and
which, judging by the dried fragments that I saw, seemed to be a
G fern. Among the Goldi in Kôurmi on the Amur I likewise saw
296 hanging beside the tobacco which they called tojra and used as a
824 substitute for tobacco. For the present the taxonomic names of
these plants must remain unknown.

SS The taking of snuff and tobacco-chewing are not found at
297 all among the Amur peoples, at least in the lower Amur region (2).

SS 2. Among the Aleut, who became acquainted
[191] with tobacco through the Russians, it is mostly
chewed, taken as snuff very little, and not

Otd. Imp. Russk. Geogr. Obshch., Books IX, X,
p. 128).

G 4. With a fur cover, although otherwise they have about the same
481 shape as the former, in particular being likewise flat and level
[304] up to the front end gently curving upward. The cover is made
[229] sealskin, which the hair pointing toward the rear, is pas
as smoothly as possible over the whole underside of the ski by
means of isinglass and is turned up along the two edges. In
addition, for fastening it, there are two long strips of whalebon
or carefully polished wood running like rails along the edges of
ski and fastened by wooden pegs to the ski board. The straps fo

/483 cont./

3 central ich, that is, therefore, with only a quarter of its total length, while the other three-quarters, unloaded, rise more or less above it, and only as a result of loading do the soles come in contact with the ground farther toward the front and back. The mountings serving to protect them extend at least as far as the outermost ich, and very often almost as far as the ends of the soles. The ich opposite each other are connected on top by wooden cross-pieces (Gilyak tynyssj, e in the illustration). On these rest the long rods (Gilyak turssj, f in the illustration) which form the bottom of the sled; they are lashed to each of the crosspieces with straps, and where there are no crosspieces, in the front and back quarters of the sled, also by means of a pair of straps plaited across and stuck through the wooden, longitudinal side-pieces, and finally their ends are stuck through a crosspiece bored for the purpose (Gilyak warr(o)s, g in the illustration) which connects the two wooden, longitudinal side-pieces of the sled just in front of the above-mentioned kernghi. Finally, at each end of the sled there is a curved piece of wood (Gilyak mich, i in the illustration), which, in a gently sloping position, is lashed to both the longitudinal side-bars and to the ends of the soles projecting beyond the last cross-piece. The guide rope for harnessing the dogs is attached to the soles immediately below the curved piece of wood at the front end. The curved piece of wood at the rear end is used for knotting on a strap which the Gilyak takes in his hand or fastens to his belt when he follows the sled on ski, in order to have himself thus dragged along by the dogs and to prevent them from running away without him. Sometimes, however, the curved piece of wood in the rear is missing, and in this case the front and rear ends of the sled differ, whereas otherwise they exhibit no differences. The Gilyak make all the pieces of the sled out of birch wood (both from Betula alba L., Gilyak chiws, and from B. ermani Cham., Gilyak kedras) (1), which on Sakhalin they designated separately for me as

1. In both Gilyak words the final s is soft and should be pronounced like the French z.

"tulytynt-tschchar," i.e., "wood for sled-building," with the sole

/483 cont./

493 [192] [824] exception of the curved pieces of wood at both ends of the sled, which are made out of the particularly flexible wood of the black-alder tree, and the bottom of the sled used for sitting, which is either likewise made of black-alder or of willow switches.

/484/ As is to be seen from the above description, lightness is the basic characteristic of the Gilyak sled: it has no iron at all and throughout is made only out of thin, carefully selected and fitted pieces of wood also fastened together in part by means of straps. It owes to the resulting flexibility its ability to withstand even rough trails such as the forest or the river and sea ice all too often present to it. It is not suitable, however, for carrying much baggage and heavy loads. In this respect it falls far behind the Russo-Siberian narte. This, generally provided with larger dimensions and wide soles, rests on the same principle as the ski, the distribution of the load over the largest possible surface and the greatest possible elimination of friction-resistance in movement, for which purpose, before a trip, the soles are provided with a thin layer of ice with a damp cloth, which to a certain extent substitutes for the fur covering of the ski (1). The narrow soles of the

1. The above-mentioned covering of the sled soles with bone or whalebone plates serves the same purpose.

Gilyak sled encounter only a little friction-resistance and therefore do not need the ice coating; on the other hand, it does not allow for a distribution of the load over a large surface and hence, even with a small load, cuts too deeply into the snow to be able to glide along easily. In accordance with its lightness and small size, the Gilyak sled has little space for baggage, for the basket designed for it is, as was pointed out, very shallow, only as deep as the wooden longitudinal side-pieces rise above the switches forming the bottom of the sled, and this is very little. To prevent the [237] baggage from falling off, a cover made out of fish skin (Gilyak mytsch) is first spread over the bottom of the sled, the baggage is placed on it, wrapped in it, tied crisscross to the sled with a long strap.

/501 cont./

501 184 [36] [181] for subsistence as well as in their nature and character, are timid, circumspect, and cautious river and coastal navigators. And the single vessel serving the Amur Gilyak as well as the coastal Gilyak for fishing and for their communication and trading voyages matches this. It is a keelless, shallow-draft

501 boat in no way equal to the high waves of the sea, and essentially consists of only three long boards, forming the bottom and the two side-walls, to which, for closing off the front and rear ends, a few small boards are joined. The most significant and characteristic feature of it is that the bottom board projects toward the front quite a distance beyond the prow (see Pl. XXXVIII /see p.1018/, Fig. 1). It is not level, but curved in such a manner that it goes deepest in the middle, but gradually slopes upward toward both ends.

396 In order to learn more about the construction of the boat in greater detail, let us follow it as it is produced by the hands of the Gilyak. When the three long boards, each necessarily [192] consisting of one piece, with which the boat is to be put to-[824] gether have been readied, by means of an ax, from the trunks of Picea ajanensis Fisch. (Gilyak twissjk) or the larch (Gilyak koi), and their upper surfaces properly smoothed with a knife, the bottom board (Gilyak moch), about 3-5 fathoms long and one to one and a half feet wide, is given the above-mentioned necessary curvature. For this purpose it is placed with its two ends on two low trestles erected on level ground, each of which consists of two crossed poles driven diagonally into the ground. The unsupported center of the board sags, but, in order to achieve the proper curve, it must be pressed down farther until it touches the ground, which is done either by weighting it with stones or, more simply, by having one or two people sit on the board. It is fixed in this position with a pair of knee timbers driven into the ground on either side and gripping the board from [192] above. Now the two side-boards (Gilyak arp), each about two feet wide and with their lower edges beveled to correspond to the bottom board, must now be accurately fitted to the latter at a certain obtuse angle and temporarily held in this position.

/503 cont./

396 very delicately and carefully so that the boards, held together [824] only by wooden pegs, are not driven apart. Therefore, only [412] with the help of a knife, some moss is stuffed from the inside into the seams wherever they permit it, and then a narrow wooden strip is fastened over them, again with small wooden pegs. In addition, however, stronger and wider strips, obtained by splitting thick willow switches, are put over the two long seams from the outside, so that on land the boat rests, so to speak, on two soles, convex on the outside, which, in addition to protecting the seams, also have the utility of reducing the rubbing of the bottom board on the sand and gravel of the shore in pulling the boat into or out of the water [192] and thus protect it against damage. The analogy between these exterior mountings on the boat and the soles, or even more the sole-mountings, on the sleds is so obvious that even the Gilyak, despite the absence of generalization in their language, designate them with the same term as the latter (motassj), whereas they have a special term (twy) for the strips [192] put over the seams inside the boat. Finally, two, or in the case of larger boats even three, pairs of oar-pins /Ruderpinnen/ (Gilyak misgyr), that is, small boards, each equipped with a vertical prong, are put in the front part of the boat on the edges of the sides. They are likewise fastened to the side boards with wooden pegs, so that not a single nail or piece of iron of any kind is used on the entire boat of the Gilyak, or on their sled. Needless to say, the Gilyak do not fail to adorn their boats, too, [532] with a few decorations. For example, the tip of the bottom board projecting below the prow usually runs out into a crudely carved head of a snake, bird, or other animal, the two prow-boards always bear several carved arabesques on their inner surfaces, and, as a rule, a carved, black or colorfully painted figure, a square, star, or the like, is likewise found on the back of the stern-board. Finally, before the boat is put in the water, it is slightly charred from the outside on the bottom and the lower part of the side-boards for protection against rot,

/506 cont./

501 184 [192] trunk. I saw such a boat (Gilyak mlo-mu) (1) in the winter in the

1. Mu in Gilyak means "boat" in general.

village of Ytkyrn, standing on a trestle next to the yurt and with the snow carefully removed from it. It was about 20 feet long, widest in the middle, and narrowing toward the two ends -- the rear end, finally, blunted vertically and board-shaped, the front end provided with a small tip. On the edge on either side a strip as thick as the side walls was added, to which, from edge to edge at a distance of about two feet apart, cross-strips were fastened, which undoubtedly, like the knee timbers at several places in the interior of the boat between the bottom and the side walls, served to give the side walls more stability and power of resistance. Perhaps the boat was not quite new anymore and needed such supplementary bracing. It did not have any oar-prongs on the edges, such as the Amur boats had, and, accordingly, the oars lying nearby lacked the holes for setting them on such, but otherwise they were of the same form as on the Amur, except that the blade was not as wide. These [191] boats are certainly also propelled, especially over shallow places in the river, merely with the help of poles, as the Kamchadal do with their similarly shaped so-called batt, and as is done also among the Tungusic peoples of the Amur region with like vessels. Finally, just as is done there, here, too, /507/ 396 824 171 only trees with soft wood, namely, poplar, are used for making such boats (1). The Tymy Gilyak use the balsam poplar

1. Cf. Steller, op. cit., p. 56, 75; Krascheninnikof, op. cit., Vol. I, p. 257.

(Populus suaveolens Fisch., Gilyak musskrj), which they specifically designated to me as "mu-tschchar," i.e., boat wood. According to Schmidt, the Ainu of Sakhalin hollow out of the trunks of the same tree canoes which they use for communication on the rivers and short voyages along the seacoast, while for

G 396 824 171 /507 cont./ longer voyages they use the commonly built Japanese boats (2).

2. Fr. Schmidt, "Reisen im Amur-Lande und auf der Insel Sachalin" (Mém. de l'Acad. Imp. des sc., seventh series, Vol. XII, No. 2, p. 99).

G. Gi 501 Exactly the same type of boat as among the Gilyak is also in general use among their closest neighbors along the Amur River, the Olcha and Goldi. In appearance it exhibits no differences in shape or construction from those of the former. The Gilyak, however, asserted that their boats curved upward less at the prow end and therefore were better able to travel against the current than those of their neighbors -- an assertion whose accuracy I must leave undecided, though it agrees with some G Gi 396 824 Gi 184 of my own experiences. They are completely different from one another, however, in the kind of wood from which they are made. Whereas the Gilyak make their boats out of the wood of the fir tree (Picea ajanensis, Gilyak twissjk, Olcha and Goldi chassjchta), the Olcha and Goldi always use cedar (Pinus cembra, var. excelsa, Pinus mandshurica Rupr., among the Olcha and Goldi koldong). When, during our summer voyage of 1855, we Gi 114 501 landed near the Olcha village of Adi, the approaching inhabitants of the place, who, among other things, occupy themselves principally with boat-building and who therefore closely examined ours, immediately recognized from the wood in them that one of them (mine) was of Gilyak origin, and the other (Maximowicz's) was of Olcha origin, as was in fact the case. Gi 501 184 But whereas among the Gilyak on the Amur one sees only boats of this one kind, the Olcha and Goldi have some of quite different shape and construction. This is simply the result of the circumstance that, besides the Amur, they also navigate many of its torrential and, in spots, shallow tributaries along

/531 cont./

226 stuck in the snow behind him and leaned against a sled turned sidewise served as protection from the wind. There were several other fishermen sitting on the ice in this manner at some distance from one another. As soon as a considerable quantity of fish had been caught, they were carried away on the sled. It is bound to be surprising that the Gilyak do not use a more appropriate method for catching this fish: even a simple net would undoubtedly be far more successful. It seems, however, that the many superstitions associated with the kangi fish, as mentioned above, among them, for example, the one that they may not be put in a bag, makes them persist in the ancient and traditional way of catching them.

In conclusion, it remains for me to say a few words about 286 283 the making of fish nets by the Gilyak. The material for them is provided by a nettle, Urtica dioica L. (Gilyak chisk, Olcha and [824] Goldi pikta), growing luxuriantly, along with artemisia as tall as a man and other plants common to rubbish heaps, around their dwellings on soil fertilized by refuse of all sorts. Their stems are cut in the fall and soaked in water; in winter they are dried and tied into bundles, and the preparation of thread and twine begins early in the spring, as does the plaiting and repairing of the nets, for which there is a great need in summer. The first [462] part of this work, the preliminary readying of the nettle stems and the preparation of the thread, falls to the women; the twisting of the /532/ string, however, and the knotting of the nets are, [114] as a rule, done by the men. On April 18/30, 1855, I witnessed the preparation of the thread in the village of Kuik. With the help of a smooth, wooden knife /Falzmesser/ pointed at the end, called chukka in Gilyak, the dried stems are pressed flat, split lengthwise, and broken on one place, whereupon the skin is stripped off and stroked until it is completely reduced to fibers and all the woody parts removed. With the help of hand-spindles this fiber is spun into a fine thread, part of which is allotted to the women themselves for their sewing work, but the other and larger portion is used for making cord of varying thickness (Gilyak puksj) for the nets. Mr. Maximowicz had an opportunity to watch

/558 cont./

123 152 203 1. (cont.) of this event had spread from Ulban Bay to the Amur and Liman, and the Gilyak were afraid that I might have a similar magic wand.

41 171 In my time the only shooting weapons of the Gilyak were the bow and arrow, which they used on occasion against large as well as small animals. The bow (Gilyak puntsch, on Sakhalin [192] punt) is of the same nature as among the Tungus and other Siberian peoples. It is made of the wood of young ash trees [824] or, lacking them, of good birch wood. In the Tymy Valley [192] on Sakhalin the Gilyak designated to me the kind of wood called per by them, i.e., according to Schmidt and Glehn, Evonymus macropterus Rupr., /559/ as their "punt-tschchar" (bow wood) (1), as is also the case among the Ainu (2).

1. Or, as they said as a rule, "punt-lytynt-tschchar," that is, bow-making wood.

[113] 2. Schmidt, "Reisen im Amur-Lande und auf der Insel Sachalin, Botanischer Theil /Travels in the Amur Region and on Sakhalin Island, Botanical Section/" (Mém. de l'Acad. Imp. des sc., seventh series, Vol. XII, No. 2, pp. 99, 213, 215).

41 230 53 In order to protect the wood from dampness and to retain its flexibility, the bow has fine birch bark pasted on it, or, as I have seen on especially fine specimens, for example, on the bow from Tebach shown on Plate XLIV /see p.1024/, Figs. 4 and 5, is covered with fine elk skin on the inside, i.e. on the side turned away from the marksman when shooting, but on the outer side turned toward the hunter, with whalebone (Gilyak asm) (3),

534 made to vibrate. The second form (b), made out of a thin wooden board, is manipulated in the same way, but it is wider, and the initially likewise wide tongue-lamina suddenly tapers at half its length and is equipped there with a small hole and a peg which precisely fits into it in order to help the vibration and to permit modulating it as desired. Finally, the third form (c) consists of a narrow and rather massive bent piece of iron, between the shanks of which there is a thin lamina of the same metal, bent upward at the free end. In order to play on this jew's-harp it is ordinarily pressed to the lips with the iron blade of an ax, which makes the tone come out more clearly and at the same time serves for resonance.

517 533 534 During his leisure hours the Gilyak, stretched out on the sleeping bench, greatly likes to take up his jew's-harp and draw forth from it the trills, which in his singing, too, are so agreeable

534

Gilyak jew's-harps.

517 533 534 to his ear, and other melodies, which are always rather melancholy. And the skill which he shows at it is truly quite extraordinary.

534 /684/ The other musical instrument, which is also familiar to the Gilyak but is not nearly as widespread among them, is a stringed instrument, a monochord or very primitive violin (Gilyak tyngrsch, Olcha tankara). It consists of a small birch-bark cylinder-casing (Gilyak tyngr-tschobrai), which is closed on top by means of a tautly stretched fish-skin (Gilyak tschobrai-tywrch). A small stick is stuck through it crosswise, one end of which projects out of the cylinder-casing only a little, but the other end quite far.

[824] [237]

000 house alone. Hence it is quite understandable that during the

*796 entire bear festival, but especially during the night preceding the

252 principal feast, the Gilyak women are fully occupied with the preparation of the dishes required for it, which, as has been mentioned (2), is sometimes very complicated. /709/ They are al-

[354]

2. See p. 676 above.

ways prepared on the hearth which is located on the transverse wall of the house in a line with the bears arranged in the center area

*796 and is thus exposed to their gaze in particular. I shall therefore call it the bear hearth. In it, and in it alone, quite large quanti-

[824] ties of fresh fir branches (from the Picea ajanensis, Gilyak twissk) are burned by the women from time to time, not only during this last night, but throughout, for the entire duration of the bear festival, which may be one of the attestations of homage which are given to the bears or one of the offerings which are presented to them. Thus a bear festival is proclaimed by the prevailing fragrance of burned pine-needles in the houses and to some extent even outside.

*796 On January 13 at about 6 o'clock in the morning, the

231 leading of the bears finally ceased. After they had made their last rounds through the village, the animals were led to the place of execution prepared for them, the so-called kadhra of the Gilyak, and arranged and carefully bound there between the stakes standing in a row in the middle of it. The order of the bears was again the same so that the small bear was closest to the building in the back of the kadhra, the läsgn, the large one in the middle, and

*796 the medium-sized one next to the entrance. Then everybody went into Judin's house, where in the meantime the women had set out the foods prepared for the feast, in wooden troughs, round wooden bowls, and square bowls of birch bark, on the floor in the central area of the house, where the bears had previously stood

[504] The guests invited to the feast took their places on the bench along the transverse wall opposite the bear hearth, which on such an occasion is regarded as the bench of honor, though as a rule, it is probably less warm and often less light than longitudinal bench

/710 cont./

*796 amid the drumming of the women, some of the dog races of the

[54] day before were repeated; the best runners, each equipped with a fox tail or the tail of a black dog, were let loose down at the river

[264] and were reaught above at the house. A short informal breakfast on the leftovers of the feast concluded this interlude, whereupon the important schedule for the day began.

From all the houses of the village the people congregated

*796 around the place where the bears stood tied to their stakes. Three

824 Gilyak carried in their hands insignia of a peculiar kind. They consisted of a straight young fir tree (Picea ajanensis) from which all the branches had been removed except the crown and the uppermost branches closest to it, which were pressed up around the crown and tied with a string. A boa (Gilyak tolp) made of

[291] squirrel tails, such as the Gilyak wear around their heads and neck

[239] or a fox tail was wound around the crown of the little tree twice in serpentine-fashion and then also fastened. Two of these peculiar banners were of the first type, the third was of the latter type. The three banner-bearers were joined by a fourth, who, as far as I could see, had only a plain long stick in his hand, but he carried it as erect as the others their banners. While everybody now stood assembled around the bear place, the three men with their insignia entered the enclosure, went directly around the bears several times, always returning to the path that led to it and there turning around again, and, finally, planted one of their insignia in front of each of the bears. This was, so to speak, the signal for the departure: the bears were freed from their stakes and led out of the kadhra.

*796 Before going any further, the neck and body bands on the

231 bears had to be examined as to their strength. For the large bear this had been done the day before, and the animal had been provided with new auxiliary bands. Everything was likewise in order on the medium-sized bear. The especially bad-tempered and stubborn small bear, however, definitely seemed to need to have his fetters strengthened, and this is always a very dangerous experi-

[156] ment. Chusisin, Judin's only son, a young and strong man who evidently still had not had enough during the days of goading the

/714 cont./

*796 114 asked him to invite to his house this time instead a friend of mine ("amal," as the Gilyak say), namely, Mr. von Ditmar, and, as his companion, Mr. von Brevern, who was well-known to us. The [126] [127] former promised me to keep a faithful journal concerning the further course of the bear festival in Tebach, and the latter -- to make sketches of it -- a promise that both gentlemen kept, having put at my disposal the highly rewarding material which they brought back from Tebach (1).

[113] 1. Mr. C. v. Ditmar, now unfortunately deceased (since April, 1892), is the famous explorer of Kamchatka and the author of the work, Reisen und Aufenthalt in Kamtschatka /Journeys and Sojourn in Kamchatka/ (see Beiträge zur Kennt. des Russ. Reiches, Series 3, Vol. VII).

*796 824 When, on January 27 (February 7), at eight o'clock in the morning, Ditmar and Brevern arrived in Tebach and entered Judin's house, they found the dogs' table removed and the floor in the whole middle area of the house thickly covered with fir branches (again from Picea ajanensis, Gilyak twisk). In front of the second center-post of the house, standing opposite the bear hearth and near the bench of honor, stood a large, four-cornered rack profusely decorated likewise with fir branches, young fir trees, and curled wood-shavings (zach), and made out of alder poles, the trunks of small young trees, which, according to ancient custom, must always be unpeeled and tied together at the intersections only with bast and the yarn of old fish-nets. From the uppermost shelf *796 of this étagère-like rack, the unskinned heads of the two bears belonging to Judin looked down, as it were, into the yurt and upon the people in it, but the rest of the skins, except for /715/ the toes, claws, and soles, hung down to the ground behind the rack (1). On

[123] [126] 1. See Plate XLIX /p. 1249/. Because of the above-mentioned hindrances that the Gilyak

/716 cont./

*796 532 825 322 824

Toad made out of birch bark.

*796 252 graybeards, as a high post of honor; the women and girls, the boys and youths are excluded, and it therefore proceeds very slowly, [888] [887] deliberately, and, so to speak, solemnly. First the kettle in the fireplace was surrounded with a thick wreath of wood shavings, and a [784] similar half-wreath was spread in front of the vent hole. Then the kettle was filled with snow for it is ulïtsch to use water for cooking bear meat, and the fire under the kettle was kindled with shavings and fir branches, with the latter also used for incense from time to time. Simultaneously a large wooden trough was hung on straps directly under the bears' snouts so that it hung about three feet above the floor. [532] The trough was richly decorated with all sorts of arabesques and figures and in particular on one side showed a bear carved in relief and on the other side a toad likewise executed.

The work of the old men proceeded so slowly that it was not [887] until toward evening that they began to cut up the meat of the legs and feet. Each leg was first placed upon the fir branches in front of the bears, as though to ask first for their permission to prepare it; only then was it cut up and put in the kettle. The cooked pieces were fished out of the kettle with an iron hook and transferred to the trough

/718 cont./

*796 252 sturgeon lying in front of the bears, and a little to one side, in an unworthy place, so to speak, where they could not be seen by the bears, the women began to prepare various dishes, such as mossj, several kinds of groats, beans with fish oil or seal oil, and the like -- work which, undertaken quite differently and in the ordinary way, proceeded rapidly and vigorously.

*796 /719/ The morning of the following day (January 30) began with putting on the bear rack the two delves of the bears, three carp (Cypr. carpio, Gilyak pilengat) and a portion of all the dishes prepared the day before and put in various bowls of birch bark, whereupon an old man seated himself in front of the bears and immediately began to eat some of the freshly prepared mossj out of two bear-bowls.

There followed the customary feeding of the dogs inside the house and, as on the previous days, a race of decorated dogs along with drumming by the women. Next, strips of bear fat were again hung on the étagère and then, amid the heavy incense of fir branches, the internal organs of the bear were cut up and placed in [252] small bear-bowls. It seems that these parts are not cooked, but eaten raw, like the fat.

At the same time, the women congregated in one corner of the house around a little old woman and, out of motley rags, began to sew together a band about ten inches long and three inches wide -- the so-called tschudbas of the Gilyak. At sunset *796 825 this band is wound around the snouts of the bears just below their 532 eyes in order to dry the tears welling out of them. Fastened in the 322 middle of it, however, on the ridge of the snouts, there is a 824 representation of a toad, cut out of birch bark (1). I can give no

1. Like the one pasted on the window, see p. 1157.

interpretation for this symbolic act in connection with what has been said above other than the following. With the cutting up of its internal organs, heart, liver, and the like, the bear knows that its fate is sealed and sheds tears over the evil spirit, the toad,

/733 cont./

*796 342 184 out obliquely from the smoke vent and with a bundle of curled wood-shavings hanging from its tip, such as I saw in the village of Tyk. Here, the toad carved out of birch bark probably also mains on the smoke vent, while the bear's head and skin is lowered through the smoke vent directly onto the platform of the hearth.

*796 184 In the meantime, in the interior of the yurt there, the for the bear's head, made, just as on the mainland, out of unpeeled alder poles and richly decorated with fir branches, has been readied. It stands close to the rear end of the hearth platform in the passageway between it and the rear bench, or benc of honor, thus, in a place which corresponds exactly to the one which it occupies in the Gilyak houses built in Chinese fashion.

*796 184 354 252 Since the hearth platform in a large earth yurt is quite spacious, two separate fires can be kindled on it, corresponding to the two hearths in the tschadryf, over which the kettles used to cook the bear meat as well as for preparing the other dishes hang from th yurt beams. The fire closer to the bear rack is the kotr -- or [824] tschchyf (1) -- tur, the bear fire, in which fresh branches of fir

[192] 1. As the bear is usually called on Sakhalin.

trees, and especially of the cedar shrubs so common in northern Sakhalin, are burned during the preparation of the bear meat an at other times during the bear festival on account of the popular fragrance.

*796 778 353 184 The wooden curls (zach), being regarded as a symbol of holiness, purity, and inviolability, are an essential ornament in interior of the earth yurt. They always hang down in a long bur from the center of each of the four crossbeams supporting the co roof, and at the time of the bear festival there number is increa by four new ones, which /734/ are put in the four corners of the In the Gilyak houses, on the mainland one usually sees only two [171] them, and not always even these, suspended from the two suppo posts of the house, but their number seems to increase as one ap proaches the Ainu, among whom they are used under the name

/754 cont./

sick and dies, if he does not use the proper means to free himself of the mipitsch. The only means that can help him, however, is a shaman. He conjures up a kägn (a good god), who removes the mipitsch from the sick person. At the same time a mipitsch carved by the shaman himself or by someone else at the order of the shaman is hung around the patient's neck and must be worn by the sick person from then on to protect himself in the future. A sick man wears a single mipitsch, a woman a double one. The mipitsch are always carved out of wood, especially the wap-mipitsch. It is only on the snout-band of the dead bear (see pp. 1156, 1162) that a single mipitsch of birch bark may be found. This is made by the women, but the wooden ones are always made by the men, since wood carving of all kinds is an occupation for only the men, while the women are skilled at cutting arabesques and figures out of cloth and therefore also out of birch bark.

The ideas of the Gilyak concerning the lizard (mä(r)ngal) are similar to those concerning the toad and snake, except that much less power is attributed to it. It allegedly crawls into the head of the sleeping person and is removed in a way similar to the above by a shaman and by putting an iron amulet-ring (lalż) (1)

1. See Appendix 6 /p. 1196 /.

around the head. This ring bears the representation of a lizard on either side, in the region of the temples; in front, closer to the forehead, there is a human figure on either side, supposedly indicating a man on one side, a woman on the other. Finally, at the very front, on the forehead, the lalż bears a frog shape. This is striking, since the frog (dhal) is not regarded as unlucky, is not magä. (Bm. II, pp. 44-46.)

30. Gilyak. Amazing, miraculous acts which the Gilyak shaman performs are chiefly the means by which he wins admiration and esteem among his countrymen. The more these acts deviate from the natural course of things, the greater is the reputation of the sorcerer. Such is enjoyed, for example, by the Gilyak

/764 cont./

uitsch and took him back to the village, where he died in November, 1854. Although when he was still alive, they had invited me to his cremation, this was done (three days after the death) during a violent purga, without their giving any notification (Bm. I, pp. 18, 19).

47. Gilyak. Everything possible in the way of food is put beside the deceased lying in the yurt; indeed, even after the cremation of the corpse, all kinds of food, as well as liquor, are brought to the ashes for a period of one year because of the belief that the deceased takes nourishment for that long. The corpse, laid out on a sled in winter, is placed upon the funeral pyre, covered with loose branches, and the pyre is lighted. (Bm. I, p. 27.)

48. Gilyak. On May 19, 1856, we reached Chjare (with one yurt on the right bank of the Amur), where I had a stop made at noon. I inquired about fish, but was told at once that no fish had been caught, because the old owner of the yurt had died the day before and was still lying unburied in the yurt. I went there immediately and saw the corpse lying on a sled on the floor in front of the dogs' table (Plate LXII /p. 1262/). It was the same old man who the year before had gone hunting with me on the nearby small lake. The corpse was not yet disfigured, but the color of the face had grown darker and, in fact, copper-colored, and the long white hair contrasted sharply with the face. The corpse was clothed in new blue cloth and covered over the torso with a covering of gray material, on which, over the chest of the corpse, lay three folded pieces of colored cloth and two spears, a larger one and a smaller one, such as the natives use, equipped with crudely worked, short shafts. Around the head and at the sides of the face lay fir branches; over the eyes ran a string with longish pieces of alder bast, threaded on it, three for each eye; a large red bead lay at each ear, and on the neck there was a thick bundle of fine curls of wood-shavings. The legs and the feet were wrapped in the same blue cloth as the whole corpse and were /765/ tied with a string around the ankles and over the toes so that they had the shape of boots. Placed crosswise on the narte /sled/, behind the he

764 lay jukola (*), with several tobacco leaves wrapped in birch bark

* See p. 646 of this work.

[493] and a pipe on top of it. The narte was of the ordinary kind, except that the arched or curved pieces of wood (**) in front and in the rear

** See Plate XXXVI /p. 1016 /, Fig. 1, i.

were missing, and instead of them straight short poles projected out on either side. The corpse was tied to the narte under the gray covering.

After I had stood in front of the corpse for a few minutes, three dogs tied to a long strap, were brought into the yurt, and the strap was attached to the narte. Then several men lifted up the narte with the corpse, while another led the dogs, and thus the procession set out (Plate LXIII /p.1263 /). It went out of the yurt, passing by the storage chambers, and into the forest behind the village, where the burial place of the dead was located, marked by several raff (***). The wife of the deceased immediately fol-

*** See Appendix 50 /p.1232 /.

lowed the corpse, with her hair loose, a piece of birch bark in her hand, and setting up a monotonous wail, in which, however, she was not imitated by the other Gilyak, men, women, and children. When the burial ground was reached, the narte with the corpse was placed on the ground next to the pyre already prepared. The latter consisted of a few layers of wood placed alternately lengthwise and crosswise, the first of which was the same length as the corpse. Beside this a large heap of fir branches lay ready for the cremation of the body (1).

•[824] 1. This was Pin. picea, as is everything else used for the cremation of the corpse and the decoration of the yurt.

4:Ivanov et al. E-4 (no date) 1964 RX2 Gilyak RX2

439 with the Chinese. After the appearance of the Russians in the Amur region,
262 the Nivkhi began to use small quantities of bread, sugar and salt.
[263]

The immemorial, and until recently the only, domestic animal of the
231 Nivkhi was the dog. It served as a draught animal and provided for fur clothing and meat for food; it was widely used as a medium of exchange and played an important part in religious ideas and rituals. The number
[556] of dogs in a household was an index of wealth. As a rule, every household
[422] kept 30-40 dogs, which demanded considerable care. They were fed chiefly fish and seal-fat; feed had to be stocked for the whole winter, when dogs were used most as draught animals.

493 The old sled of the Nivkhi, which was still found in use by Shrenk in
[175] the middle of the last century, was so narrow that the driver sat astride it, resting his feet on small skis; sometimes he raised himself and ran in this position on skis. The runners of this sled were curved both in the back
492 and in front. The dogs were harnessed to the towing strap alternately on either side, rather than in pairs. The harness was a simple collar, so that the dog pulled with the neck.

492 Until quite recently, dog races were still a part of the bear festival; in
493 these, the Nivkhi used the old sled and the old type of harness. The harness and the sled which appeared among the Nivkhi in the beginning of the 20th
[526] century were considerably different from the old type. They were of the so-called Eastern Siberian type; the sled was of greater capacity and
[171] equipped with a vertical shaft-bow and paired harness, not in collars but in yokes, which the dogs pulled with the chest.

179 The development of the carting trade brought with it a new type of sled.
492 Its greater size and stability permitted the transportation of up to 200 kg
493 of goods. It was usually drawn by 9 to 11 dogs. The best trained and most valuable dog was the leader. The driver—kayur—usually called out his directions to this dog. The dogs were stopped with a shouted order and a brake pole. Dogs were sometimes also harnessed to a boat on a longer tow strap.

492 The horse as a draught animal appeared among the Nivkhi relatively
171 recently.

In addition to dog transportation, winter travel on land was done by
281 skis—bare skis without fur lining, or skis lined with seal fur. The former were used for short trips; the latter, for distant expeditions during the fur-hunting season. The Nivkhi skis were distinguished by the wooden strips nailed over the fur.

50 Travel along the rivers (particularly in Sakhalin) was in light hollowed
• [824] boats made of poplar. These dugouts were so light that they were carried by hand across barriers (shallows and isthmuses). They were propelled with oars or poles (usually employed for upstream travel). For long-
[171] distance travel, the Nivkhi had a large boat similar to that of the Ul'chi,
[824] Nanays and Orochi. It was made of three wide cedar boards, of which the bottom one was bent upward in front, projecting like a spade. It was rowed with 2 to 4 pairs of oars, by lifting alternately the right and the left ones.

361 The Nivkhi villages were usually situated near the mouths of spawning-rivers, and seldom exceeded 20 dwellings. Until recently, the dwellings of kinsmen were set side by side. Some 40 to 50 years ago, the
342 Sakhalin Nivkhi still widely used the dugout house. It was made by dig-
175 ging a pit some 1.25 meters deep, over which a wooden framework was built of thin logs, and covered on the outside with earth. The smoke vent
[354] served as a window as well; the hearth was built in the center, and
[352] plank beds were set around the walls. At the end of the 19th century,

225 The sketches do not include all the details of the beluga hunt. Mytka's account, dictated to me on June 29, 1931, in the village Puir, supplements the sketches. We give here a faithful translation of his account.

"During the ebb tide the belugas head inshore. After the tide receded, he gathered his friends (and said): 'Let us go after it (in the sea).' We went in pursuit. When the beluga headed out to the fairway we chased it back to a shallow. When it could not go any further the man at the prow who held a harpoon got ready and waited for it (the beluga) to appear (to come up). When it broke the surface, he lanced it. Then he threw the float. We let the beluga drag the float. When it got tired we approached it and lanced it a second time. Then we came close to it and hauled it to the side of the boat. We hooked the beluga and hauled it (out of the water). Then he hit it with a lance (that is, pierced it) (2)

2. The Gilyaks kill the beluga by lancing it in the area of the respiratory orifice.

When we killed it we tied a rope to it and hauled it ashore.
225 While we were hauling it, the old woman came down to the
533 shore and began striking the board with a stick. (3) When we
824
182

3. Only in Puir do they welcome the caught beluga by such music. I have not observed this custom in any other village.

brought it (to the shore), we came up to the shore prow first. (4) Having untied the beluga, we hauled it to the shore

4. Usually the Gilyaks come up to the shore stern first, but when they bring a beluga, they come prow first.

[112] and pulled it out. We put the board on which the woman was beating under the head of the dolphin. The old men sent the youths to gather dozgon grass and piskər plant. (1) Then we

1. The Amur Gilyaks "feed" the plant piskər to all captured sea-animals such as sea-lions, seals, and belugas. They put this plant in the mouth of the killed animal (cf. our article "Morskoĭ Promysel

Giliakov Derevni Kul'," [Sea fishing among the Gilyaks of the Village Kul] Sovetskaia Etnografiia, 1934, no. 5.).

fed the head of the dolphin. Then we came down (to the shore) and the old men cut up the dolphin. [113] When they cut it up, we called all the people (ordered them to come), spoke to them, and made each one of them take (let them take) his share. We gave less to the "sitting" men (that is, those who did not participate in the hunt). (1) We gave more

1. The Gilyak Shurman, from the village Lyangr, told me that they divide the beluga into equal parts. Only when they kill two--three belugas do they give somewhat greater shares to the hunters.

to those who went to sea. After they had taken away their shares, we cut up the head (literally, broke it up). After we cut up the head, in the evening, we sent the young men to cut some birch wood; we sent them to cut some rowan-trees. Then we got some rowan shavings and put them in the respiratory opening. We cooked some cereal and put it in the sea-dish [Russian, Morskoye blyudo] We prepared some berries and put it in the sea-dish. Then we sent the children to bury the head. When they were ready to go, an old man went with them. They put the head down on the place where offerings to the sea are made. (2) They took the eyes

2. Near each village, there is a separate place from which offerings are brought to the sea.

out of the head and, having dug a hole in the ground, they put the eyes in the center (of the hole). (3) After they buried

3. In the village Puir the eyes of the beluga are "buried" on the place where offerings to the sea are made. In other villages the eyes and the head are suspended in a birch tree.

the eyes, they scattered some rice and berries in the sea. Then they carried the head to Elzəs. (4) They hung the head

4. Elzəs--a place where the heads are "buried". Each clan has its own elzəs. When they kill a beluga, they

000 to it. In spite of the fact, however, that the material presented b
* 114 Shternberg convincingly testifies to the rudiments of class differen
565 tion among the Gilyak, he did not discover this, because he looke through the spectacles of the Populists and saw in the appearance class differentiation the manifestation, not of the immanent economic laws of every society, but merely the effect on the Gilyak of their neighbors -- the Russians.

* 114 A significant part of the monograph is devoted to the re-
777 ligion of the Gilyak. /xxx/ Here the conceptions of Shternberg
614 about the masters, first stated by him in "Sakhalinskie giliaki," are unwound in all their breadth. "Each element has its 'master'
[776] who is a 'god,' but, just as in each clan there are outstanding persons, wealthy men, of whom one is the richest ('the master,' a cording to the everyday terminology of the Gilyak), so are there 'masters' among the spirits, who, according to the beliefs of the Gilyak, also live in clans. With this concept Shternberg stresses the reflection of the social structure in the religious views. The views of Shternberg on the relationship of totemism to clan societ also deserves attention. According to Shternberg, "... it was not totemism, i.e., not belief in descent from one or another form o animal, that created the clan gods, which is the accepted way of thinking, but the other way around: the clan gods created totemis
[262] One cannot explain the interdictions among the totemists against using the meat of totems in their food by anything except a fear of killing some kind of clansman turned into a totem animal."

* 114 Shternberg contests the opinion that fear created god and
[777] advances his own understanding that the cult of a number of ani-
● [825] mals (e.g., the bear and swallow) is caused by their seemingly protective relationship to man.

[756] In "Giliaki" Shternberg also, for the first time, formed his opinion that the shaman is divinely selected.

* 114 "Obraztsy materialof po izucheniiu giliatskogo yazyka i
197 fol'klora" and Materialy po izucheniiu giliatskogo iazyka i fol'kl constitute the second group of Shternberg's works on the study of t Gilyak; included here also is the summary of a paper at the Fourteenth Congress of Americanists in Stuttgart, "Bemerkungen

/35 cont./

83 577 825 The views of the Gilyak in this regard are so strict that he transfers them into the animal world; dogs caught in an incestuous act are killed, being considered werewolves.

602 [829] The Gilyak speak of the Russian women who sell themselves for money with the greatest contempt. This strict loyalty with regard to persons of prohibited categories created a system of prohibitions against conversation and joking with whole classes of people. It is even difficult for us Europeans to imagine that the Gilyak man or the Gilyak woman does not have the right, not only to joke, but even to talk with his own brothers and sisters, or even with brothers and sisters of the most distant degrees of kinship, i.e., with the whole class of tuvn, because, on the one hand, familiar relations may lead to sexual intercourse in forbidden degrees and, on the other hand, to light quarrels out of jealousy in cases of permitted intercourse. On the same grounds, among the Sakhalin Gilyak, one is allowed to talk to, but not to joke with, wives of the younger brothers, because sexual intercourse with them is forbidden, and, conversely, one can both talk to and joke with wives of elder brothers, and generally with the group of an'gej (wives).

[576] Because of the prohibition against conversation with categories of close kinsmen among the Gilyak, the custom of saying hello and good-by upon arrival and departure is absent.

174 601 835 So far, I have cited only facts. But where did these strange facts come from? How can we explain these complex and confusing norms of sexual cohabitation, and the no less strange kinship nomenclature? Even if we can to some extent explain the mutual rights of brothers to their wives, the right of a person to the married sisters of his own wife or the married sisters of the wives of his brothers is completely incomprehensible. Why is it that a woman calls not only her own sister, but also her husband's brothers' wives sister? Why does a man /36/ call the sister of his father-in-law

174 601 835 614 his mother? Why, for instance, is it enough that a person from clan A, let us say, takes a wife from a completely alien clan for all the women of clan A to become forbidden to the representatives of the latter. The complex and confusing chain of these facts must doubtless be the result of the single, very simple basic fact of an original type of family and clan organization, a type which,

/50 cont./

823 formed where his sacred feet stepped; from the lashes of his whip appeared the rivers... Here is Kryuspal', a marvelous cone, one of the highest peaks of Sakhalin, which impresses everyone approaching the island from the sea with its grandeur, a lonely, stern demon of the sea, who, in a fit of anger, killed his children and compelled his wife to run hundreds of versts away from him and form another cape in a new place. And even the lonely cliffs sticking out of the water all along the shore of the island -- all of this is alive, gods who ran away from their clans under the influence of internecine wars.

82 774 776 All the rest of nature is equally alive: the menacing "tol'" (the sea), the somber forests of the mountainous island, the fast mountain rivers, etc. When cutting down a tree, the Gilyak is afraid to destroy its soul and places upon its stump a special being, the "inau" (chekhn-kun-inau), soul-creating "inau" (1), which returns soul and life to it. The mountains,

[177] [178]

1. A sharpened stick. The cult of "inau" has been borrowed from the Ainu, and I shall discuss it separately /in an untranslated section/.

the ocean, cliffs, trees, animals -- this is only a mask under which the gods conceal themselves from the curiosity of man. The peculiar profundity of this sort of metaphysical analysis by

825 the Gilyak is striking. Once when a Gilyak began to explain to me that the small kosatka (Orca gladiator) accompanying a large one in the sea constitutes in fact only the sword of the big kosatka, and I expressed my bewilderment at this, he began to prove that it only seemed to me that that is a kosatka, but in fact it is the sword of the large kosatka-"master," just as that the latter in reality has the form of a real Gilyak, and that which seems to us to be a sea animal is only the boat of this Gilyak-kosatka (2).

2. Kosatki travel in the sea in packs, within which are distinguished the older -- leaders, and the younger -- soldiers. In an attack,

/50 cont./

825 for example, on a whale, the latter hold the flanks, while the leaders follow behind.

82 771 /51/ Once visible nature is only a mask and is not what it appears to be, there is a natural tendency on the part of the Gilyak to seize upon the smallest sign having resemblance to the human body or a part of it, in order to discover the human shape that is concealed under it. Hence fetishism -- the psychology which discovers a supernatural human-like being in every object which has an unusual form, be it a high mountain, a petrified object, or simply a piece of stone.

825 If inanimate nature is capable of arousing in the mind of the Gilyak the imagining of live creatures which conceal themselves under the dead form, then the cult of animals should all the more not amaze us at all. It is generally believed that fear lies at the base of the cult of animals. Primus in orbe deos fecit timor. In fact this is far from the case. First of all, we must remember that primitive man not only does not recognize any sort of gulf between himself and the animal world, but, on the contrary, in many respects admits the superiority of the latter over himself. A hunter by profession, he has invested in his art of hunting all his intelligence, all his inventiveness, all his human genius. See how brilliant his snares and traps are, and nonetheless how often and maliciously the insignificant little beast -- a fox, a sable, and others -- will laugh at all his machinations! Dozens of valuable sables run past his trap, leaving their footprints quite close to it; they guessed the cleverness of man and departed unharmed! How sensitive is the elk to the smell of a human being whole versts away! Never, never would a single beast be caught by the Gilyak, but for the will of the gods, the "masters" of these animals, which care for the well-being of the Gilyak. If a god does not will this, dozens of man's crossbows remain without a catch. Therefore the Gilyak sees in animals beings in no way inferior to himself, even though a god may sometimes give

/51 cont./

● 825 them to him for his use. On the contrary, the strength of the large animals, and the shrewdness and resourcefulness of even such small creatures as the sable, the extraordinary sense of smell and a great number of other instincts inherent in animals and of which man is devoid, furthermore such phenomena as the change in the color of fur, shedding, and so forth -- all this provides the Gilyak with sufficient bases for regarding an animal as an extremely intelligent being in many ways superior to himself. The smaller the beast, the stranger its form, the more mystery it contains and the greater astonishment it causes with its miraculous instincts. Therefore, even such insignificant animals as the toad, the lizard, the bat, the gnat, and so forth /52/ arouse no fewer fantastic notions in the mind of the Gilyak and impress him no less than the largest beasts.

The form and dimensions of an animal are only appearances. Every animal is in reality a real man-like being, no, just such a "Gilyak" as he is himself, but endowed with intelligence and powers which often exceed those in man.

If, however, the strength, the intelligence, and the amazing instincts of the animal cause belief in the spiritual superiority of animals and the supernatural quality of their nature, the cult of some animals is caused by certain other special traits of these latter, namely, their meekness toward man and their apparently conscious protective and beneficial attitude toward him.

The bear on land and the kosatka in the sea particularly strike the Gilyak with these traits.

The bear is the strongest and the biggest animal of his taiga; all the other animals run before it in terror. With a blow of its paw it can knock down the strongest man and crush him like a fly, and yet it is generally very meek with regard to him! Actually, the Sakhalin bear never attacks a man first, and upon meeting him in the taiga either runs away from him, or -- especially in places where man is rarely encountered -- passes by him with complete indifference, only rarely rewarding him with a look of surprise (1). And the Gilyak regards it as a friendly member of a different clan.

1. In the Ussuriysk krai, the tiger is

/52 cont./

●825 distinguished by the same meekness with regard to man and for this very reason is worshiped by the local natives.

The bear that awakens early from its winter sleep and in a frenzy of hunger throws itself upon a man is a crazy bear or a vagrant who has been driven away by the "master." In those rare cases when a Gilyak, while hunting, is killed in a fight with a bear, this is ascribed to extraordinary circumstances: either that it was not a bear, but a devil in the shape of a bear or that it was a female bear who fell in love with the Gilyak and who wanted to transplant his soul inside herself.

If a bear falls prey to a Gilyak, it is only because the bear itself wants it. In its struggle with the man, the bear itself offered a good spot for the fatal blow. After all, it loses nothing from it. After breathing its last, it actually casts to the Gilyak only its apparent covering, its shaggy skin, while it remains alive and unharmed as before. A few days later, at the end of the [796] bear festival, when /53/ its meat has been eaten and the bones placed in a storehouse of honor, the Gilyak kill several dogs, in whose company the bear gaily runs, with all its ornaments and presents, to the "master" of the highest mountain.

The whale-like, large-toothed sea animal -- the kosatka - is worshiped no less than the bear on land. One would think, what could be stronger and more terrible in the eyes of the Gilyak than the whale, this tremendous and mighty monster, spouting fountains, for whom a storm is a diversion, and each of whose vertebrae is heavier than the largest Gilyak? Yet there is a beast before whose sharp, cone-like teeth the whale flees without a backward glance and throws itself with a roar of despair on the banks and the shallows of the Sakhalin coast where the Ainu and the Gilyak make opulent feasts of him. This is the kosatka. It creates an imposing impression, even on a European, when a kosatka unexpectedly appears near his boat, and the general flight of all the inhabitants of the sea begins. At the sight of this terrible beast fish, seals, dolphins, and eared seals scatter as if seized, and forgetting all caution,

/53 cont./

●825 run on the harpoon of the Gilyak. Woe to the animal who falls to his teeth; he tears the great eared seal in half. The most awful sight, however, is kosatki hunting a whale. "Sighting him, the school of kosatki divides into parties. The younger ones set out on the flanks, trying to contain the whale, while the older ones remain in the rear. Having thus stationed themselves for a battue (cautiously without noise so as not to frighten the whale), they suddenly appear on the surface of the water when they calculate that the catch should be in the middle of the circle they have formed. They then throw themselves savagely upon the whale and begin to tear his body into large chunks and greedily swallow them. They all vie in particular to try to get his tongue. The whale thereupon raises a soul-rending roar which can be heard for many versts. Hearing such a roar, I always knew that somewhere close by kosatki were hunting a whale." Thus the zoologist Voznesenski described this terrible sight in the Aleutian Sea, and I happened to see the same sight many times in the waters of the territory of the Gilyak.

And yet this same monster before whom quake the titans of the sea, this tyrannus balaenarum (tyrant of whales), as he was called by Fabritsius, an ancient specialist on whales, not only never touches the boats of the Gilyak, but is his true benefactor, driving nammals and fish to him!

[825] /54/ For hours on end the Gilyak waits in his fragile little boat for the appearance of the head of a seal on the surface of the water in order to throw his long harpoon into him. But the cautious seals prefer not to appear at all, or show themselves from under the water only to dodge in a most crafty way the blow directed at them. Then, quite unexpectedly, as if specially sent by someone, seals, eared seals, and beluga begin to run onto the harpoon of the Gilyak... The kosatka has appeared, forcing the inhabitants of the sea to throw themselves in all directions without a backward glance! -- How, after this, could the Gilyak not consider this mighty creature, who does not spare anyone but him and, in addition, is his bread winner, sending all sorts of sea animals, his god-benefactor? And he calls this animal none other than yz' -- "master."

/54 cont./

● 825 [796] The Gilyak never directs his harpoon at a kosatka, and when its dead body is thrown up on the shore, they solemnly bury it in a balagan especially built for this and decorate it with "inau." It is not only these large beasts (the bear and the kosatka) that the Gilyak regards with a feeling of religion, however. Signs of the deepest respect are shown toward any animal that falls prey to the Gilyak. The heads of captured seals are decorated with "inau" and solemnly lowered into the sea. The heads of belugas are put out on poles on the seashore, and likewise the heads of other animals.

825 796 The animals whom the Gilyak worship, however, are not independent gods and not even deities in general; they are merely the subordinates of the real deities, the "masters" of this or that element, this or that animal. These "masters" in their form and likeness are those same Gilyak who, according to need, assume the form of this or that animal. These gods live in the forests, the mountains, and on the bottom of the seas and lead the same kind of life as the Gilyak themselves, have wives children, and clansmen. Like the Gilyak, they are mortal. For each of the elements one of these gods, "yz'" -- master, is in command. It is these masters who send the Gilyak all that he needs each season: sables, bears, salmon, 825 seals. The notions about these "masters" of each element, 796 however, should not be understood in a strictly monistic sense. 554 It is just the same among the Gilyak: in each locality there are simply rich people and among them one kind that is richest, just as, in addition to the great gods-masters, every territory, every stream, each has its own "master" who takes care of those Gilyak closest to him (see below on the clan gods). [614] The term "master" is strictly an everyday term. /55/ In each clan every man who is outstanding for his intelligence, courage, and cunning, and consequently richest, is called "yz'" (master), and the most outstanding of them is the leader of the clan.

/55 cont./

796 825 For the Gilyak, the most important gods-"masters" are Pal'-yz' -- the master of the mountains and of the taiga, and Tayrnadz, the same as Tol'-yz' -- master of the sea. The first lives on the highest mountain, and with him, whole settlements of his clansmen. Bears serve him as dogs. All the beasts of the taiga are subordinate to him, and, at his discretion, he distributes them to the Gilyak. It is he who orders the sable to dress himself in a new skin and hurry into the noose of the Gilyak; he, again, orders the bear to offer a good spot for a true blow. The god of the sea, Tayrnadz, lives on the bottom of the Sea of Okhotsk. He is a very old man with a white beard, who lives with his old wife in an underwater yurt. In the yurt there is a huge number of boxes with all kinds of spawn, which he throws by the handful into the sea from time to time. It is he who, at the appointed time, sends the countless detachments of salmon, without which the life of the Gilyak would be impossible; it is he who sends out the kosatki to establish order in the sea and drive all kinds of sea animals toward the Gilyak.

796 Besides these most important gods, there is a great number of less important ones who watch over the Gilyak. In the house of the Gilyak the master of the fire and the mistress of the threshold, keep vigil over him. Some kind of "master" watches at every stream, looking after the well-being of the Gilyak...

Not all the gods, however, are on such close terms with man. The sky is inhabited by whole tribes of tly-nivukh'i, heavenly people, who only rarely interfere in the affairs of the Gilyak, and then to no purpose, for a joke; for example, out of mischievousness a heavenly man will lower a fishing rod with hooks to the earth in order to catch some Gilyak. This [538] does not always work, however. For example, the young Gilyak, Il'k, from the village of Arkovo told me that tly-nivukh once caught his father with a golden hook, and he just saved himself by grabbing a tree, thus getting away with only a scare and a torn coat.

/58 cont./

795 614 [766] a bear's love for her, etc. -- all such persons do not travel to the ordinary kingdom of the shades, but go over into the clan of the gods-masters who took a liking to them, of the mountain, water, fire, etc., and then become the smallest "masters" and protect their clansmen. In this way the clan pal'-nivukh'i -- forest people, tol'-nivukh'i -- sea people, etc. took form. It is to these gods-clansmen that the entire clan offers sacrifices. These are not mythical gods, not the fictional heroes of the Greek clans, but actual persons, authoritatively living in the imagination of their worshipers. The genesis of the clan gods 795 614 of the Gilyak sheds light on another dark phenomenon of 825 primitive religions -- totemism, the worship of a certain class of animals honored as the clansmen and even the ancestors of their worshipers. In fact, as I said earlier, the master of each element and his clansmen, although they lead the same kind of life as the Gilyak, always appear in the presence of man in the form of this or that animal, the bear (forest people), the beluga or kosatka (sea people), so that the Gilyak as well, having entered after his death the clan of this or that master, also assumes the covering of this or that animal. Therefore, that class of beasts that the chosen person entered is kindred to the clan of the one chosen and therefore becomes its totem. 795 614 Since in almost every clan there are contemporaries or predecessors who fell in a battle with a bear or drowned in rivers or at sea, a system of separate totems for every clan could not develop among the Gilyak. Unfortunately I cannot consider this vast question in more detail here; I shall say only that the genesis of the clan gods among the Gilyak clearly shows that it is not totemism, i.e., not the belief in descent from this or that /59/ kind of animal, that created the clan gods, as is commonly thought, but, on the contrary, it is the clan gods who created totemism. As we shall see below, we cannot explain the prohibitions of the totemists against using the meat of the totems for food in any way other than the fear of killing some clansman who turned into a totem animal.

614 171 The religious system of the Gilyak provides many other interesting facts for the explanation of the origin of totemism.

/67 cont./

796 782 sixth sticks a sharp stick in its rectal opening to prevent excretion from the intestines. When the dogs are strangled, they are laid down on the snow with the same ceremony and in the same pose as the bears. A fire is ignited; they skin the killed animals and throw the meat into a kettle.

796 [242] All participate in the feast of dog meat, both men and women, but only clansmen.

[766] The following day the head of the bear and his bones, as well as the vessels, the arrows, the thongs, and so forth -- everything is transported to a traditional storehouse which 796 774 serves as a sepulcher for the remains of the sacred beast. At this moment the soul of the bear finally sets out on the 825 journey to its "master." Burdened with the presents given to it and accompanied by the souls of the slain dogs friskily running alongside and by the souls of the sharpened sticks (inau), it reaches the highest mountain where its "master" lives, who is also the master of the taiga -- Pal'-yz'.

796 What is the genesis of this strange festival which offers to many an amazing riddle.

796 224 In order to understand the idea of it, we must first of all consider the fact that the bear festivals are celebrated not only on the occasion of killing a domestic bear, as people usually erroneously think, but every time that a Gilyak succeeds in killing a bear while hunting. True, in these instances the dimensions of the festival are less /68/ grandiose, but the essence remains the same. When the skin and the head of a bear killed in the taiga are brought into the village, a triumphal welcome is given with music and a solemn ceremonial. The head is placed on a sacred platform, is fed, and [782] is given the same sacrificial offerings as upon the killing of a domestic bear; the narkh'i are similarly called together. [766] Dogs are similarly sacrificed; the bones are preserved with the same ceremony and in the same place as the remains of a 796 domestic bear. Consequently the ceremonial of the great 825 winter festival is only the widespread ritual performed at every killing of a bear, logically stemming from that respectful attitude toward the bear which I mentioned earlier.

/68 cont./

000 respectful attitude toward the bear which I mentioned earlier.

796 Furthermore, with regard to the fact of the ad hoc feeding of 231 the bear, this at first sight may not at all appear to an element of a religious nature. In hunting, the Gilyak on some occasions may catch young animals, and, whenever he finds it profitable, he feeds them; thus, he feeds the fox for its fur, and young eagles for their feathers. Similarly, it is disadvantageous for the Gilyak to kill a bear cub, and he prefers to feed it in order to obtain later a huge carcass of meat and an enormous skin. Furthermore, there is nothing more natural it would seem than to use the killing of the bear for a solemn occasion like the celebration of the funeral feast [825] for a close person. By the way, the feeding and the killing 868 of a bear is an excellent means of education for the youth, who from childhood become accustomed to the most terrible animal of their taiga, learn not to fear it, and study its disposition, its strength, and its weaknesses. The procedure for getting the bear out of its cage is a simple rehearsal for getting it out of its lair.

796 Nonetheless, it is not these crude, utilitarian motives that 825 play the major role in the Gilyak's expensive, wearisome, and prolonged care in feeding a bear. He is governed here by other motives, perhaps also utilitarian, but of a quite different order. As we have already seen, in the eyes of the Gilyak, the bear is a creature sui generis. No matter what creature is concealed under the hairy covering of the bear, a divine clansman of the master of the mountains, a mountain man, or a real animal sent as a present to the Gilyak by its master, in any case he is a creature of a higher order, more powerful, and superhumanly strong. The presence of such a being for a long stretch of time in his native settlement, according to the view of the Gilyak, who is convinced of the constant conspiracies of crowds /69/ of evil spirits eternally threatening his life and health, must be extremely beneficial. The presence of this mighty creature, like a very strong disinfectant, must kill and drive away any insidious spirit. It is not by

/69 cont./

796 825 accident that the death of a relative, i.e., the fact of the extraordinarily malicious designs of an evil spirit, forces him to catch or buy a bear cub, whatever the cost. That a bear [787] by its mere presence drives away evil spirits may be seen [755] from the single fact that during the bear festival the shaman [756] is forbidden to consult in his dreams his kekhn (see below) about curing a sick man, i.e., driving out the evil spirits residing in him, for the bear will be offended; he himself can drive them away with his own strength. Analogies to [171] such beliefs in the purifying influence of the bear and of many other animals are to be found in vestiges of our own survivals and ceremonies. As is well known, in Little Russia /Ukraine/ there existed the custom of leading a bear through the village on certain holidays for purification... In our grand stables the custom of keeping goats, who are supposed to protect the horses and the grooms from evil power, has [614] been preserved up to the present. And so, similarly, the clan that feeds a bear performs an important social function, securing all their own against the evil designs of their strongest, though invisible enemies. Unique religious sanitation, but the only kind available to primitive man!

Let us consider the meaning of those ceremonies that accompany every case of bear killing. First of all we should say that the Gilyak does not consider the killing of a bear a sin. In spite of all his respect for it, he is convinced that in the first place those bears that fall prey to him are sent to him by the "master" of the taiga, for whom the bears play the same role that dogs do for the Gilyak. "The bear is the dog of the master of the mountain," such is the formula of the [774] Gilyak. In addition, the bear loses nothing by its violent death, for death to it is only leaving its body to the Gilyak, while its soul -- that living duplicate -- then gaily runs to its master as if nothing had happened. Therefore no expiation whatever is required here. But the bear, even though only the dog of a forest man, is nevertheless a creature of a higher order, of a higher rank, than man. From the point of view of primitive man, there is nothing derogatory to the sacred

/69 cont./

796 825 beast in the notion of the bear as a dog of the "master." We should remember that the genesis of the cult of animals rests on the /70/ worship of the animal as such, without any allegorizing. "The reason of the universe," said the Ave long time ago, "is governed by a dog." But, as we have already seen, according to the subsequent evolution of the c of the bear, in this last there may be concealed a "mount man," a clansman of the "master of the mountains," or e a Gilyak's own kinsman turned into a "mountain man." T fore one must show every courtesy to the one killed, feed head, generously supply it for its journey with various kin provisions, not defile its body, not spill its blood upon the ground, and so forth -- all these are the inevitable conse of viewing the bear as a higher creature. The importance the holiday, however, is not exhausted with this display o respect for the higher creature. The soul of the slain bear journeys to its master, that master on whom the welfare of man depends. It is the most apt occasion for sending to t distant lord various presents, such as dogs, arrows, bows, viands, and so forth. All this is repayed a hundredfold. Moreover, the bear itself, pleased by all the honors and t food, may turn out to be useful in petitioning for various favors from the master of the mountains.

796 From this it can be seen that the killing of the bear dur 782 the winter festival is not a sacrifice to the gods, as, for in 825 stance, Lang, a famous investigator of primitive religion, [114] lieves it to be, but merely provides an occasion for the sacrifices. The best proof is the fact that the Gilyak sacri to each god only that which the god himself does not have and the master of the taiga has an abundance of bears. H needs dogs, fish, tobacco, sugar, thongs, and arrows -- a it is these objects that are given to him by the Gilyak; the bear is merely the honored envoy who carries them. It is deity itself, albeit a small one, and therefore cannot itsel 796 be a sacrifice. Finally, there is another important momen 825 in the holiday -- eating the body of the bear. As a gener 861 rule, the greater part of the meat is given to the narkh'i, to the clan of the son-in-law /zyat'/ of the master of the

/70 cont./

796 slain bear, but the head is always respectfully divided among
825 the clansmen to whom the bear belongs. This eating must
261 be looked upon, not as a simple act of eating, but as taking
[562] into one's body the mighty qualities of the bear. A woman,
for instance, cannot partake of the heart of the bear, which
imparts courage, a quality completely useless to her, and
therefore such eating, as aimless, must be offensive to the
bear.

796 Thus the religious significance of the bear festival amounts
825 to the following: 1) feeding the bear gives /71/ the settlement
182 security and protection from evil spirits -- a very important
775 matter if we take into account the views of the Gilyak with
774 regard to the origin of sickness and of death (see below);
2) eating the "deity" imparts strength; 3) the soul of the
slain animal, pleased by the honors, may independently and
through its "master" do good things for man; 4) it -- and this
is of the utmost importance -- is an envoy, a transmitter of
all kinds of gifts to the "master of the mountains," on whom
796 the welfare of the Gilyak depends. With regard to the last
825 point, it is important to remember what we said about clan
614 gods. Every clan has clansmen among the "mountain people,"
775 i.e., clansmen who sometime in the past fell in a fight with
a bear and were then taken into the clan of the "master of the
bear." Every such clansman in turn becomes a small "master,"
a god-protector of his clan. Actually, every clan receives
its catch, not directly from the "master of the mountains"
himself but from this, his clan god, who specifically resides
in the hunting territory of his clan. Thus, the presents sent
through the bear are actually sent, not to the supreme "master,"
but to the nearest "master of the mountains" -- clansman.

796 That is why the celebration of the festival is purely a clan
614 affair. This also perhaps explains two extremely characteris-
tic, but puzzling facts concerning the bear festival. In the
first place, not only is no member of the clan arranging the
festival allowed to kill the bear, but even the clansmen of
women who are wives of the members of that clan are not
allowed to, in a word, none of the agnates in either the male

/95 cont./

*614 628 It is quite another matter between men of different clans. Here the principle is implacable: the bones of the clansman must be raised! To raise the bones is the technical term for clan vengeance. Blood must be redeemed with blood, and only in very rare cases can blood redemption be replaced by ransom. This obligation is clearly colored more by a religious than an emotional element. Vengeance is obligatory not only for the contemporaries of the slain man, but, in the event of its non-fulfillment by them, for the two [672] following generations as well. It is obligatory not only in the case of premeditated murder, but for completely accidental murder as well, even one which is only indirectly *614 825 672 connected with one or another person (1). And what is

1. One Gilyak of my acquaintance brought vengeance upon his clan when his rifle accidentally went off when he picked it up from the bottom of a boat, accidentally killing the helmsman.

still more instructive, it is obligatory also with respect to animals. Vengeance upon a bear who has killed a man is no less wrathful than it is with regard to a human murderer.

The ritual of such vengeance is extremely characteristic for understanding the psychology of this clan institution, and we shall begin our analysis with it. As soon as the news of a man's death in a struggle with a bear arrives, the whole adult population hastens into the taiga, in order to catch up with the "murderer" by means of his fresh tracks. If they do not succeed /96/ in catching the real culprit, it is necessary to kill at least three other bears (his "clansmen"). If this is not accomplished during the winter, it is necessary to do it during the summer, and in addition the "mountain man" gives them a "tkhusind," in the form of a plentiful catch of every beast.

/96 cont./

14 But if they are lucky enough to overtake the bear-
25 "murderer" or his "clansman," they wreak upon him their
72 most extreme wrath. As their first responsibility they knock
766 out his teeth with an ax, and, while they are skinning him, they stab him with knives from all sides and heap on him the choicest verbal abuse. Having stripped off the bear skin, they wrap the body of the murdered man in it (if his body has remained uneaten; otherwise it is replaced by a half-length representation in wood) and, seating him in a squatting position on the sled, place the bear head under his seat, and in this way, with loud howls mixed with exclamations in honor of the murdered man and in deprecation of his murderer, they bear him to the settlement. If the bear has not been found, they place under the seat of the dead man a half-length representation of a bear, while the body is arrayed in a cloak of shavings (1). Not far from the

[498]

1. Shavings are regarded by the Gilyak as sacred, as an object of magical power. The cult of the sharpened pieces of wood (inau; see the section on religion) plays an enormous role in the religion of the Gilyak. Ordinarily they bury chosen ones in cloaks of *shavings*. Such an honor, for example, is accorded to the mother of twins or triplets, who is regarded as a being of a higher order. Among the poor this finery takes the place of the magnificent traditional funeral garments of Chinese silk, which causes one to think that at a remote period garments of shavings were generally used and that antiquity has invested them with a halo of sanctity.

/96 cont./ Not far from the

*614 native village a framework in the likeness of a bear hunter is
826 set up, with openings for the proper sacrifices. On the out-
766 side, at the corners, four sharpened saplings are set up, while it is decorated on the inside with the sacred inau. Here are also deposited the remains of the murdered man and his murderer, in the same position in which they were brought from the taiga, as we described above.

A unique funeral feast with the carcass of the slain bear is held beside this framework. On both sides of a long uninterrupted campfire sit the clansmen with large pieces of bear meat in their hands. Each one cuts the meat into thin pieces, and as each piece is cut off he throws it from his knife across the fire to the one sitting on the opposite
[688] side of the campfire. The slice, caught on a knife, is slowly roasted in the fire (the greatest insult for the bear, whose meat may only be boiled), and then with a look of revulsion they each bite off a piece and scornfully throw the meat away, although ordinarily it is /97/ considered a great sin to let even the smallest piece of bone fall to the ground.

[782] After this procedure of "refined" revenge, a feast with
[767] sacrifices to the master of the mountains and the murdered man begins. First they throw into the fire the carcass, which has begun to be burned, then various viands. At night they place a guard of two men with spears over the framework, lest the spirit of the bear wish to take revenge. The sentries firmly assert in such instances that they heard the cries of the murdered man, "Ai, Bear!" and threw themselves with spears upon the invisible avenger. In the morning they will tell you, traces of blood are clearly visible on the points of the spears...

*614 With the end of the funeral feast, peace between
775 the mountain men and the clan of the murdered man has
782 been restored. The latter is accepted and will live to a
769 ripe old age in the clan of the mountain people, while his
766 clansmen for three generations will twice a year (summer and winter) make sacrifices: part to the master of the mountain, part to the divine clansman.

/152 cont./

835 applied both to individuals of an actually ascending generation (to own father, mother) and to their brothers and sisters, the significance not only of generations, but of ages completely disappears. The brother or sister of the father may be younger than the speaker, although they consider themselves mother and father in relation to the latter, and nevertheless the prohibitions are equally effective by virtue of the kinship classification alone.

Class of tuvn. It consists of two groups -- of 1) the group of the descendants of agnate brothers and male cousins, and 2) the group of the descendants of agnate sisters and female cousins.

Within each separate group in all generations, neither sexual intercourse nor marriage are permissible, which is in complete accord with the kinship nomenclature, since in neither of these groups are there individuals designating each other as pu and arĝ(e); they are all tuvn.

I noted only one deviation with respect to the descendants of sisters, /153/ and that only among certain clans, namely, if sisters are married to individuals alien to each other, the prohibitions are in effect only in the first two generations. But this is a purely local deviation, induced by the extreme inconvenience of the prohibition under conditions of an extreme lack of women. In general the prohibition is strictly observed both among the descendants of brothers and among the descendants of sisters. This prohibition, which is reinforced by a taboo and which seems to us unnatural, has become among the Gilyak an instinctive feeling -- namely, one of prohibition against mutually looking at each other and of conversing (see below). To what degree the prohibitions
●[825] within this group have gone into flesh and blood, even in the most remote degrees of kinship, even in relation to persons whom they call "tvĝund-tuvn" (agnate male cousin), transformed by tradition in their thinking into natural phenomena of nature, we may see by their attitude toward the infraction of this prohibition among their sole domestic animal -- the

/153 cont./

835 dog. Among dogs, according to the belief of the Gilyak,
●825 brother and sister do not copulate. Exceptions are very rare, and they are attributed to the evil doing of a milk'a (evil spirit). Therefore, when a Gilyak notes such a case of incest, he is obliged to kill the dog; otherwise the sin falls on him.

[782] It is true that the slaying takes place as a religious ritual, by means of a ceremony of strangling, and blood is sprinkled to all four quarters of the compass in sacrifice, but for the dogs this is a punishment for incest. It is curious, however, that incest between ascending and descending lines (son and mother, and so forth) among dogs is tolerated by the Gilyak, and they do not kill the criminals (is it not due to utilitarian considerations, since begetters are valued very highly by them?).

835 Cognate male and female cousins. Here, of course, only cognate male and female cousins, i.e., the children of a brother and sister, can be in question, inasmuch as the children of brothers, on the one hand, and the children of sisters, on the other, are considered tuvn, and we have already discussed the complete prohibition within each of these groups. From the kinship nomenclature we know that the terms used in reference to each other by cousins depend on whether the male or female cousin whom they are addressing or of whom they are speaking is the son or daughter of the brother of the mother, or of the sister of the father, namely: if "I" am a man, then I call the daughter of the brother of my mother arĝ(e) (wife), and, conversely, she calls me pu (husband), but my sister calls the son of the brother of my mother akhmaik, navich (father-in-law, husband of the wife's sister), and, conversely, he calls her n'ern -- wife's sister, i.e., terms which have nothing in common with matrimonial terms; and these terms correspond perfectly /154/ to reality. Sexual relations and marriage between the daughter of a sister and the son of her brother (and correspondingly between their tuvn) are not permitted; on the other hand, marriage between the son of a sister and the daughter of her brother is not only permissible, but is considered a regular phenomenon. And in this case, as in all others, the terms brother and sister are

/184 cont./

*835 levirate. Then, in order that the
183 woman remain in the clan of her
589 deceased husband, she is given, ac-
768 cording to the decision of the clan
[614] council, to any clansman of an ascending or descending degree of kinship with her late husband.

684 Ordinarily the very idea of sexual connection with persons
*835 of the forbidden categories evokes an instinctive disgust.

[776] In the rare instances where feelings of love arise between such persons, the Gilyak regard it as the inspiration of an evil spirit, as a phenomenon unnatural not only in men, but in
●[825] beasts. We have seen that in such instances they even slay a fornicating dog. The attitude toward people is entirely the
[767] same. Ordinarily lovers in the forbidden categories slay themselves by mutual agreement or under the direct urging
[533] of their relatives. In one last song of such an unhappy pair, the woman sings of how /185/ her elder sister called her a "bitch" for her love for her uncle, and called the latter a "devil," and how all -- her mother, father, and sisters -- urged upon her: "slay thyself, slay!" Incidentally, the object of her criminal passion, her uncle, could be of her age, could grow up far apart from her, and the love between the criminal pair might seem perfectly natural in our eyes.

*835 The feeling of sexual repulsion toward persons of the forbidden categories has been transformed into an instinct, like the very similar feeling toward one's mother or own sisters in our society. The impression of an instinct is also produced on us by that amazing ability of the Gilyak to suppress in himself the feeling of jealousy, an ability which he manifests when the question of the group-husbands of his individual spouse arises. Without these instincts, or in any case the noteworthy virtues of self-control and self-restraint, the realization of the sexual norms would be impossible; unrestrained jealousy would result in the destruction of group

/254 cont./

835 the goods that he had brought back, released his bear, which
831 he was fattening up for a feast, from its cage, and hanged
763 himself. The song which the unhappy girl sang at the mo-
533 ment of parting has been preserved. We present it in its
538 entirety in the section on lyrics. Here we quote only the first
[539] lines: "Take me with thee, the board of the bottom of thy bark will I become... Now one must think only about Mlyvo (1).

1. The world beyond the grave.

That you may remember me, keep the earrings hung up on the wall."

832 The Gilyak employ magic means against unrequited love.
●[825] One of these means is the dried-up brain of the cuckoo, which they mix with tobacco and offer to the girl to smoke. Or they surreptitiously sew the feather of a cuckoo to her dress. But there are also other means that are not so harmless and lead to tragic consequences.

As they relate, one who has tasted these potions, these drugs, falls into a deep melancholy and, after a few days, dies. I knew two persons, somewhat Russified, who used to sell such drugs for a high price, and several women died of them.

832 Among the Gilyak, as in our country, there are timid in-
[534] dividuals who cannot bring themselves to make a declaration of love in person. In such cases the intermediaries are old women, who, for this, must be given "tea" -- a present. Sometimes they send some present through these intermediaries, ordinarily cloth, in which they tie several knots, corresponding to the number of days until the admirer will pay his visit.

832 There remains to be discussed only what the stimuli of love are for the Gilyak, what individual traits comprise the attraction of the beloved. First of all, of course, there is the aesthetic side -- beauty, especially facial beauty. The word "beautiful" in the Gilyak language is expressed by the term poch urland, literally -- "of a good face."

/302 cont./

578 Quarrels and methods of reconciliation. If a son-in-law /zyat'/
627 has beaten his brother-in-law /shurin, wife's brother/, he must (present) a pack of racing dogs (three to five; they are sold only in packs) -- kylyn k:an. The first dog is kyly-k:an, the second -- k:akh, the third -- jerkhpe-k:akh, the fourth -- tyly-k:akh. If the first is sold separately, all of them will be useless. They are placed at a certain distance (10-15 paces) from one another and in reverse order, namely, the first -- kyly-k:an -- last, farthest away, and she must catch up with all of them and the object is that all should come together at the same time, and,
[435] if the kyly-k:an arrives first, then it is not suitable. The cost of a pack is up to 100 rubles. The son-in-law /zyat'/, in case of
[437] a fight with a brother-in-law /shurin/, gives him such a pack of dogs as a present, and, furthermore, he brings them himself or, if he is ashamed, through another, and they cannot be returned,
[435] except if the dogs are poor. On the other hand, if a brother-in-law /shurin/ offends a son-in-law /zyat'/, he gives for reconciliation a silk robe (35-60 rubles) or a bear as a present.

578 /303/ Quarrels within the clan. N left his wife, received back
614 his bride price, and began to carry on with Russians and so forth.
627 The old men assembled and decided to take the woman back, but the father-in-law did not agree: "A woman is not a dog, to try and throw away." Nevertheless, she was purchased for a certain young man. Then N, in Khez', began to storm and threaten because they took his abandoned wife. But they replied to him: "You did not buy her yourself but with your father's money" (clan money). The matter ended by their giving a racing dog, fur, and two bottles of vodka.

695 The oath. Oath -- simbi chakhci lambe -- in Goldi, chkhyz´u
686 nyydz:rá -- in Gilyak.
825 One must kill a wolf (lygyz´) and saw, in order, the tendons on both hind legs from the heel to the knee, and ask: "Where is the tendon for the thief? (ennikhrongz´? ennikh -- heel, tongz -- tendon), where is the stolen tendon? -- jeng:az´ tongz´ shamdzhna?" The tendon that twitches is taken out secretly and

/303 cont./

695 dried and preserved until there is an argument about a theft.
686 They seek a man who understands the oath -- chkhyz´u n´ivukh,
825 and this gift is passed on by inheritance (now the best clan is the
[424] Chkhyzyl clan; Il'ya Tobonka from Chil'bi belongs to it). If
[614] outsiders try, then it is a great sin.

A thief frightened by the threat of the oath arrives in the village of the plaintiff with his khal'gu -- clansmen; they make a large fire on the bank.

The plaintiff and his people also come out to the campfire; he shouts: "Pryja´, mygja´, n´i heg:at pkhalgun polagun prydz:rá chigy´ tuur pugusá enan´ivukh, jugut prydókh kaukrá, par:k prydz:rá. Ni sidzymral´ó, sidz:jejmralo cherakh jot´in (prydz:rá) helá eg:ur pkhog:e jakhgujá," i.e., "Come, come down, I and my kinsmen are frightened, I came here with my children; a fire is lighted on your bank; no strangers came with me, we came alone (I do not know anything). I came to you to ask what is the matter (what is the guilt). Well, hurry up and tell me what is on your mind." That one sends an envoy -- khimu n´ivukh'a (a leader during war) with a spear, on which he leans instead of a crutch, and he begins to speak. The thief sends a khimu-n´ivukh'a. Nothing results, and it is necessary to take an oath. The visitors and the local people then arrange themselves on both sides of the fire. The "juror" is also present at this point. They argue: "Ni valchg:aj n´erakh elyg:az´ó -- if I lie, let it go badly for me."

The juror slowly begins to warm the tendon in the fire, the thief begins to twitch, and then he confesses (pyimdz). "Yrk pyimdz: vurará. Navat taktó jakhojló. Ching vark kymlyvé" -- "I confess, /304/ for what else can I do. Think about it yourselves." If it is a false accusation, then the real, absent thief would begin to twitch.

The victim is paid whatever he demands, and, if the thief is poor, the victim is given a woman. The juror is provided for at their discretion. The juror, when they take out the tendon, says to the crow and cat: "I do not know whether it is true or not, do not harm me, for you, too, do not know. If this

/304 cont./

685 actually is the perpetrator, let the harm be to him." "Ni tajorá
615 mykyslu jag:yd-lu ta-n´erokh tokh elyygujá. Chi nar´ár; chan
maj:okhanú. Mykyz´ mra lytyng ivg:aj hukt6ókh elyyg:az´o."
685 While they argue, a crow (ves') and a cat are thrown into the fire
615 alive. If the crow caws, the man also caws and gets into the
825 fire. If the cat mews, so does the man.

An oath is performed for an inveterate criminal, wishing him death; the thief will twitch in any case. The crow and cat, while they are burning and still struggling in the fire, are told: "Chi ta:rodz: furará n´ivykh lerý mra cin unakhana ulkhyndor by nivukhdokh elyygujá." "You do not know, you will suffer for a petty offense (i.e., you will serve as an example to the Gilyak), following the law of sin, let it go badly for that man."

614 Only a certain khal knows the oath with each particular
825 animal. There is a clan whose kekhal is a wolf -- kekhr: ping chnarpung. They caught a wolf. They went hunting seals. The wolf was sitting on the ice, and it had been carried into the estuary. As soon as the hunters saw it, they approached the bank, bow first. That wolf came and sat on the bow of the boat. They wanted to kill it, but took pity on it. They let it off and let it go. Sometime later these same (people) were hunting, and a bear attacked them. Then that wolf appeared, began to circle round, attacked the bear and saved them. Thus (it happened) many times. This wolf multiplied and was frequently encountered (as a rule there were few wolves there). Chnar-pung do not kill a wolf, but whenever they see one they feed it. When the hunters, having killed many seals, leave the whole carcasses, the wolf spoils them, but if a Chnarpung is left, then he does not spoil them. They journey into the taiga, and the wolf goes along close by; they leave yukola, mos', and so forth there. The Chnarpung may call him atk. Wolves, like tigers, are of two kinds: docile and not docile.

685 This same wolf tendon is used in another way. When some-
654 thing is lost, they fashion a stuffed doll, like a man, out of a rotten piece of wood and place a seal bladder on its head. They bind its neck with a wolf tendon, and at night they walk around and knock in the corner of the first yurt, saying: "Pyz´ nyngjú -- look

/307 cont./

765 and bring over the favorite dog and feed it. This dog is called
231 pryski -- gzn (among the Gold -- khan'a, i.e., soul); every person, even a child, has without fail his own pryski. From childhood everyone has his favorite dog, and when a man dies, they select either his favorite dog or the best dog of those harnessed to the sled and make a pryski of it. If it dies, they
765 bury it and cover it with chocks. Each says the following to the
775 deceased: "Ning yvr: hdmnydz: kys'kuvr: tog:agán urgur vija mu-n´ivukh gudókh mlyvo-rokh (pimlykh-tokh). Vingán, /308/ erirózonydz:, hdin pyk tynakhanú, pyk tyké, chi jerinakhana hongan pi ozngan, cham nar:kir: pknuukuja plyngu tengu, hokharód vétana khan'a nyn'gtr: kiur kera'á, hyhagyskó vetajá kakgir, turi khei: tozja, pykn'ir: pyk chakh tanýdz: pyk tekó: pernakhanú. Urgur vir: namugur humyjá pytykhu dogra pymykhu dogra, pi ykyngudogra, vijá.

"To live near us, there is no happiness (not fate), in such a case, fine, go to the deceased, to the settlement of the dead (to your settlement of the dead). When you go, you will cross the river; a cuckoo will cuckoo there; after the cuckoo bird cuckoos for a long time, you will wake up. When you get up, you will shake off ashes and coal with eagle feathers; then you will dress yourself, make an insole out of the hair (1), put on

1. Out of the hair of the wife, sister, or mother.

this clothing, and, having made something like a little bridge from the figure, cross; a cuckoo bird, becoming tired (2) after it

[825] 2. All during the trip to the stream the cuckoo will cry; before the stream there will be no water and no food. It will become tired and will have to drink from the cup. There are cuckoos which squeal, which means that they are tired from accompanying the deceased.

/310 cont./

755 Mainly it is necessary to treat leprosy -- khachudz, and skin diseases.

The treatment of a leper. The shaman asks that a dog be brought into the isba. The sick man sits up with his legs hanging from the plank bed to the floor. In front of him there is an iron kettle with the opening upward. The man holds the dog, while the shaman moves around the yurt and kamlaet (shamanizes); then the shaman spits -- "emits the spirit," takes a small worm out of his mouth and carries it toward the dog. The dog jumps back -- it has been pricked. Then the angry worm is brought over to the sick man; the shaman stands opposite the sick man with the worm in his hands, and the head of the shaman turns into a large woodpecker -- ves'khr: -- black, with a red forehead -- and, squinting his eyes, he begins /311/ to look closely at the face of the sick man in order to determine where to peck a bald spot, i.e., to learn where the worm of the disease is (the shaman, having squinted his eyes, sees through the man, and the sick man sits "all naked"). The shaman finds a soft spot, pricks it with the worm, and pulls out of there another worm, which he throws into the kettle. He thus pulls out all the worms from the entire
[761] body, leaving only one worm, samui. Without a worm, a
[825] person cannot live, but this worm cannot propagate. Those who have seen these worms in the kettle say that they look like tree worms. This kettle is covered with other kettles. At the same time he orders his kekhn to keep watch at night over the cup. On the following day he orders the Gilyak to bind the kettle tight with a kaluga net and to bury it in the ground, while he himself shamanizes. The shaman carries it away over five rivers and five ranges. He sings, so that the small mountains become large, and the streams -- large rivers. There he digs out a pit, where he places the kettles together and binds them. Those who go must count five narrow valleys and five ranges. And the shaman sings once again, so that the dried up little springs turn into large rivers, the rivers -- into cliffs, and the kaluga net -- into the densest wire bag -- "become a wire bag, so that the worm does not come out." The shaman solders the kettles with words: "Two kettles, having melted together, merge and mutually become one."

/314 cont./

IX.

Ideas about Animals

825 Choramiadz: (chkhoramland) -- like a cat or a polecat,
even smaller than a cat; black lip. They move in herds; their footprints have been seen. They are considered most dangerous animals. If you come upon them, you must climb a tree; they surround the tree, but cannot climb it. The man ties his hat to a twig and lowers it down, the animals jump up; the man back, they fall, chew the hat, etc. Finally he saves himself: he waves a long pole around, and they run from the noise.

825 The oldest of all the land animals are pal-miv-kmyg:
773 myg:nga igagh syktymu yz´mudz:gu. They are of the human race. Once the lion, the tiger, and the bear were human beings. They "did it through the rear" with their wives. Kur, by accident, saw this. He said to them: "Since you have intercourse like beasts, so remain beasts in the future." Then they became beasts. Therefore they are considered to be of the human race. The bear was also a human being, but he used to walk on all fours. Kur saw this: "Since you walk like a beast, so walk like a beast." But he does not have intercourse through the rear.

839 There is no bestiality. -- On Sakhalin there was once
732 born a boy with a tail.

825 The lark makes thunder, and therefore one must not kill it.
821 It is a sin to approach its nest with baby birds -- there will be thu
The thunder bird -- tet lyj zevrk: -- makes thunder and, opening its mouth -- lightning.

825 /315/ The loon is the principal water bird. The oldest
loon, ugn, with a tail, cries in a thin, humanlike voice, "o-o-o!" The second -- kakhtr, ag:nl, is smaller, cries "ka, ka, ka," or "vakh, vakh!" The third loon -- arn´ is the smallest and cries in an almost human voice "a-a-a!"

/320 cont./

The god of the wind -- Layzn (the evil wind -- Lamangnd); no chukh-chugnd (sacrifices) are made to him. He is shot at with bows; he is not shot at with rifles for fear of evoking thunder and a storm. The wind comes about thus: "Layzn, just like man, blows from his mouth."

The bear, the sable, the fox, the otter, and the squirrel were created by Pal yz'n (the master of the mountains).

Tuurmam -- the god of the hearth, the mistress of fire, the old woman -- is one among all the clansmen. The head of Tuurmam is curly, the snout red, /321/ the hair short (there is no braid), the height that of a man, the clothing -- fish skin, lives in the fire.

Tajrnandz: the only one who sends fish; he is a large and robust man. All his dogs are white. He rides through the air, along the Milky Way (Tairnandz: -- tif); he lives there. He also makes thunder. Each k:khal has its own Pal-nîvukh, its own Tol-nîvukh, even its own milk'i, but there is one Tairnandz:. They set up three trees for Tol-nîvukh: a fir, an ashberry, and a rose willow. Strips of bark are cut out of these trees and their branches are bound with sedge. One chkhnaj has saranka attached to it.

Oskyz'n master of the hare, big like a cow, long nose. They throw the head of a hare, with puchka tied to it. Tlangi-yz'n -- master of the reindeer, looks like a reindeer. Mekvon'-gi -- master of the kabarga.

Evil spirit -- Ge-nîvukh. His yurt is an earthen mound near Tekhrvo. He comes to the Gilyak, opens a window (kugutý), extends two fingers, and asks for something. If something is given to him he leaves. If one gives him a hot coal, he does not understand what is happening, throws the coal back and forth from one hand to the other, and says: "as' kavkhaj, khavrkhaj, avgujà" -- "it is hot, if you do not have (anything), do not give!" Ge-nîvukh likes to kidnap people, especially children. The only way -- is to inflict a wound upon oneself, for Ge-nîvukh is afraid of blood. Pumkin's brother sat in his balagan guarding reindeer and suddenly saw two ge-n'ivukh. He began to shout and inflicted a wound

/331 cont./

775 The dead come in a dream. Thus Indyn's mother came to
787 him several times. The last time she said to him, "Your father took me again," and she did not appear any more.

774 The big soul inhabits the entire body, and in the head of this
[231] large soul live small souls -- tarn. After the death of a person, a small soul lives in his pryski' (dog), which is tied to his plank bed. Small souls resemble eggs and are white in color. During sleep the small soul goes everywhere, talks, sees, and so forth.
[735] A poor person "still has one tiny little soul." If a person dies away from home or drowns, his soul comes home. The soul of a dog which died accidentally roams all over.

Every body has a soul, and its shape corresponds to the body. Therefore, if the body is given a certain shape, it will acquire a corresponding soul, and therefore if a throat is sore, they make
[825] a tongue, and his soul lives in that tongue. A captured bird with which children have been playing must not be let loose, for it will carry away the soul.

775 The fate of the soul depends on the kind of death. 1. A person who has been eaten by a bear lives to a ripe old age with Pal-n igyvyn (the master of the forest), while a person who drowned -- with Tol-n'igyvyn, and then they go to Mlyvo.

2. A suicide (who hung himself) goes directly to Mlyvo.

3. Those who died from an epidemic (an epidemic is caused by the bloodshed during the wars of the Japanese, the Chinese, and the Russians) also go straight to Mlyvo.

4. One who died a wound (by a knife, a bow, or a rifle) lives, like a bird, in the air. The souls of such unfortunates shreik at night from the trees.

5. Until a tkhusind (ransom) is received, one who was killed by a person will also fly in the sky. If blood vengeance is taken for the dead person, both souls go to Mlyvo together.

775 The night bird takhch is of the size of a crow and just as
825 black, but its beak is red. If its cry is heard at night, one must not call it by name, but must say atk.

When a person is killed, a great number of these birds fly together into the village.

/332/

775 This bird (the soul of the slain man) enters the avenger of
• 825 the slain man and instills courage in him. Its image (vagn,
[532] takhchynnga) is made out of the roots of the alder tree and placed, with the roots upward, not far from the raf over the grave of the
[708] slain person. The chkhnaj of this bird must be made out of the root, and a small knife must be placed in its mouth.

775 The resurrection of the soul. The soul of the deceased will sometimes be born again. If a boy is born with a sign indicating his origin from a person who has died, he will say, even before sustained speech, words that indicate his knowledge of the past.

775 When he attains intelligible speech, his father puts a hat on him
789 backwards and begins to ask him questions about the past, and then he says quietly, "Well, that is enough, forget the past," and puts the hat on him in the proper way. Then the boy forgets everything and will live for a long time. If the father does not do this, the boy will die. The procedure with the hat drives away the milk.

II.

Hunting and Fishing

224 Sacrifices to the sea -- Tol vyzn:d (fynydz:). 1. When winter
782 sets in and there is not a single unfrozen patch of water on the surface of the sea, the men of the same khal'a (women do not participate) set out in the dark of night for the sea, a hole in the ice, and through it each of them throws wood -- "wood fire," which has been started with a piece of tinder -- to the sea. Later on, at home, they "eat," i.e., feast.

2. In summer, people who leave the shore in a rowboat throw things out of a bowl for sea offerings -- tol n 'ich: -- to the master of the sea, Tol yz 'dokh.

To Tol they always sacrifice a white dog, a white fir, everything smooth and clean; to Pal and Mif, on the other hand, everything fanciful; to Kur -- a red dog, a red cock, a bright cup, vodka.

/333 cont./

224 are carried into the taiga, there they find a tree with a hollow
782 trunk, make an opening in the hollow trunk, feed the head, and throw all the bones and the head there.

The otter is fed and buried in exactly the same way as the sable. The remaining beasts are uigynd kauk (i.e., there is no taboo on them).

• 825 When a pair of reindeer horns from a mature specimen are
177 found lying side by side in the taiga, the possession of them gives the Gilyak luck.

224 During the hunting with nooses (pochakhir n'arkhund), a
784 woman must not sew anything new or give anything from her own house to another, even a member of her own clan, if that thing has spent a night in the house. One must not carry the fire outside. One must not allow any guest to spend the night. In the taiga, one may enter another's balagan, but not spend the night. If a sable is caught in a noose, an alien may not take it with his hands without the permission of the master, and in general during the hunting season the captured sable cannot be touched even by a person from the same clan if he is not a participant in the hunting party; even a killed hazel-grouse may not be touched. If
[626] any person commits an uigind -- sin, they do not let him fish or hunt on the stream, and they do not attend his bear festival.

224 /334/ Sables, when caught, should not be killed by dogs. Catching a wolf. In Ikhdam (northwestern Sakhalin) they place a tree with a forked branch and sharpened edges not far from the yurt. Yukola is hung between the forked branch and the trunk; the wolf jumps up to seize it, sticks in his paw, which becomes caught, and he cannot free it. It is a sin to shoot at wolves.

225 Seals are caught thus: a net is placed around a tos' (?), and the seals sleeping on the sand are driven together; then they fall into the net.

221 Mos' is made twice a year (in summer after the salmon,
[252] and in autumn before the sable). In winter one must unfailingly kill a great number of dogs oneself (a minimum of four), make plenty of mos', and in summer catch a great number of bears (this will be pal n'ivukh tkhusind). In general a great deal is done for the sake of tkhusind.

/335 cont./

372 782 of the fire, the tugurmam, lives there). Then they feed the four inau. Furthermore, a hole is dug at the left front corner of the hearth, and they put sacrifices there, saying, "Urgur n'irá, nekhlang kun k:kholaf khavryr hunivaguja" -- "after eating well, make your children live without sickness," and after these words the hole is filled up. Finally, they feed the kel'nung ankh --" the bitch looking into a behind." At night, when everybody has gone to bed, it is necessary to burn a fir and say a prayer.

When the hearth is renewed in the winter quarters, small inau are set with sacrifices. In the evening they place three firs, tie them up with saranka and puchka, and then, when everyone has gone to sleep, they throw sacrifices up through the pipe: one is thrown by the women, another by the men. Before the beginning of the festival, the hearth is cleaned, covered with fresh earth, and lighted with the clan steel.

776 342 The spirits living in the house. Tav yzin -- the master of the house -- four chkhnaj, two male, two female, all pila hejmar -- old men. Tavyzing tugur yzing. This yzing was a tribesman in the past. His soul lives in the yurt in the tugur (flint box).

When the yurt breaks, the tugur must not be touched.

[688] If one breaks the tugur (box), he pays a fine.

Lymyz'n-mam -- mistress of the threshold. She is in fish skin, hunchbacked, gray, lulls crying children. When the ceremony of stamping the threshold is held, when a woman leaves for another clan, she sits in the corner at the entrance, near the cups which are placed on both sides of the threshold.

IV.

Women, Childbirth, and Children

832 Means for love. There is medicine to make another person [825] fall in love with one. The brain of a cuckoo is mixed into tobacco (then a man soon dies), or a cuckoo feather is sewed in a dress. The girl then goes around like a mad person.

/342 cont./

197 The Tymovsk and the Okhotsk Gilyak have one language.

/343/

823 A legend about three brothers-cliffs in Aleksandrovsk on Sakhalin.
773 Three Heng brothers went with a bear to look at a cast-up whale (kem), and then all of them turned into stone. Two jags -- mother and daughter -- look after them.

825 A rat must not be killed with an ax; a stick is necessary.
761 Nakhvun's wife is dying because her father killed a rat with an ax; his son died for the same reason, and now his daughter is dying.

825 The attitude toward incest among dogs. According to the words of the Gilyak, among dogs a brother and sister do not copulate; exceptions are rare and are attributed to the milk. Dogs are killed for this; otherwise this heavy sin falls on the master; he will be punished with sickness and so forth. Father and daughter among dogs frequently have intercourse, but they are not killed for this.

302 Hair may be thrown away in any place.

752 825 A person who has been rescued from death by a bear sacrifices chukh-chugynd -- a dog -- to Pal-n'igyvyn. No one may
[782] look at a person wounded by a bear; only an old man or an old woman binds his wounds. His bed is curtained off with a sail.

724 825 In need they sometimes eat a bear that has died, and
[261] they treat him like a killed one. When they set off somewhere (hunting) or in general on important business, they always take along their favorite ymgi (son-in-law).

773 In Mil'kvo one Gilyak had two women. Once his daughter with the grandchildren came to visit him. She went to gather berries while the men went out to hunt seals. Then

182 /354 cont./

614 5. The members of the clan are bound together by comm
796 sacrifices and festivals. The "festival of the bear," known to
[574] everybody, is held, not by an individual settlement, but by the clan, even though /355/ guests from other clans are invited to t part. The bear is bought by someone in the clan, but all the ex penditures in connection with the festival are covered by the cla men. These expenses often reach a sum of several hundred rubl Clansmen assemble from all directions, as well as great number of specially invited guests from other clans, who have to be entertained and fed for many days, and not only they, but their numerous dogs as well, devour a great amount of food during th festival. The opinion that the bear festival has a religious char ter or that the bear is considered to be divine or a spirit by the Gilyak is completely unfounded. The bear festival is purely a clan festival. Naturally, there were times when a successful at
[224] tack on a bear, an attack conducted in those days collectively, the whole clan, was a real triumph for the clan, which devoure the huge beast at a common feast. Since the attack on the bea was most conveniently made in winter when the sleeping anima was captured in his lair, the custom of celebrating this holiday winter was perpetuated. The experience of centuries evolved a ritual for the festival, which, like everything old, assumes in th eyes of the barbarian the character of something sacred and invi
[782] All the sacrifices during the festival are made, not to the bear,
[776] to the god of the taiga, the master of the bear -- "Pal'-nivukh.
[825] It is also understandable that the bear itself has acquired a positi of honor: Its meat cannot be thrown to the dogs, it cannot be eaten with seasonings, etc. "Pal'-nivukh" himself will exact revenge for such offenses, ordering other bears to bite especially
[562] hard. To sum up, the bear festival is a clan festival, and, on this basis, women, as the nonpermanent element of the clan, are not present at the killing of the bear, although they
614 participate in the eating of it. The fire in the stove in which
322 the meat of the bear is cooked is started only by the clan
[252] steel. A touching custom among the Gilyak is

342 /357/ This is exactly like the interior of the earth yurts,
352 in that low and wide plank-beds or sleeping benches (f) run along
354 three of its walls, on both sides and in the rear, opposite the entrance door (c), and in the middle, between them, there rises a hearth, shaped as they are there, over which an opening in the roof serves as a smoke vent and actually consists of two holes put in the two halves of the roof and joining at the ridge pole.
[417] Under this, several longitudinal and transverse poles are put over the hearth and a wooden hook is hung on them to hold the kettle
[353] over the fire. Some similar longitudinal and transverse poles run over the sleeping benches and are used for hanging up clothing. In the corners between the side benches and the front wall, to the right and left of the door, there are shelves with all sorts of utensils, a large container with drinking water, a small supply
342 of firewood for the hearth, and the like. Since the room as a
354 whole is not high and the roof is rather flat, the large smoke vent is not very high above one's head, which, together with the many crevices in the walls and the floor, actually makes the house very airy. If, in addition, the doors to the front space and from there to the outside are open, a strong draft is created. Therefore, as a rule, the summer dwelling is completely free of smoke and also quite free of gnats, which is very important. The front space (d) can also be specially ventilated, if the supplies stored there require it, for its walls in part consist only of vertically placed boards which can easily be removed in any number desired, as had been done in the case of the yurt at Mão at the
342 time it was drawn. Finally, another feature, a simple one, to
825 be sure, but a very important one in its consequences for the Gilyak, must be mentioned in connection with the construction of their summer dwellings. In order to make them inaccessible
[251] to the great number of rats in the winter yurts, a vital necessity because of the fish supplies assembled in them, a piece of birch bark is placed over the upper end of each of the piles supporting the yurt, extending around it on all sides, which, as experience has shown, is perfectly adequate to prevent the rats from climbing
342 up the piles to get into the yurt. The sleds are hung under the

2. Many more examples of the high esteem for the tiger and its skin in China could be given. I shall content myself, however, with referring here only to some of the older testimony of this kind. On account of its predatory nature, evoking fear and terror, its likeness is put on the garments of officers and and other persons in military service in China, as Barrow (Reise durch China im Gefolge der Grossbritann. Gesandtschaft in den Jahren 1793 und 1794 /Journey Through China in the Suite of the Embassy of Great Britain in the Years 1793 and 1794, translated from the English by Hüttner, Vienna, 1805, Vol. II, p. 31), Staunton (Des Grafen Macartney Gesandtschaftsreise nach China in den J.

825 171 113

2. (cont.) 1792-1794, nebst Nachr. über China und einen kleinen Theil der chines. Tartarey /Ambassadorial Voyage of the Earl of Macartney to China in the Years 1792-1794, with Reports on China and a Small Part of Chinese Tartary/, translated from the English, Frankf. and Leipzig, 1798, Vol. I, p. 341), and others have reported. Ellis (Journal of the Proceed. of the late Embassy to China, etc., second edit., London, 1818, Vol. I, p. 130) also saw several companies of soldiers who were wrapped from head to foot in long, yellow and black striped garments which were supposed to make them look like tigers to terrify the enemy. On the other hand, the tiger also seems to be the object of religious veneration in China. For example, Van-Braam (Voyage de l'ambassade de la Compagnie des Indes orientales Hollandaises vers l'Empereur de la Chine en 1794 et 1795, publ. by Moreau de St. Mery, Paris, year VI (1798), Vol. I, p. 270) reports that four stuffed tigers in a sitting position were set before the altar in the pagoda Huinon-tsu in Peking. In a similar manner, the Chinese (Man-dse) in the Ussuri region erect chapels for the tiger, in which they offer sacrifices to it and hang pictures of it (Arkhim. Palladii, "Usur. Man'tszy /The Ussuri Man-dse/," Izviest. Geogr. Obshch., Vol. VII, 1871, Sec. II, p. 376). I shall come back on another occasion to the value that the Chinese in their superstitious beliefs attach to the meat, gall, tendons, bones, and claws, besides the skin of the tiger.

/391 cont./

825 171

influence similar use of the tiger skin as a mark of honor has become established in Korea (3). The trading trips of the Gilyak

[113]

3. Thus, Przewalski (Putesh. v" Ussuriisk. kraie, 1867-1869 g. /Travels in the Ussuri Region in 1867-1869/, St. Petersburg, 1870, p. 116) reports that during his visit to the Korean border town of Kygenpu on the Tumen-ula the governor appeared, carried on a chair over which a tiger skin was spread. After he had descended, it was spread on the ground and the traveler was invited to sit on it.

825 439 171 The trading trips of the Gilyak

to Ssan-ssin on the Sungari gave them an opportunity to witness the extraordinary fear which the Chinese there (Man-dse), as well as the Goldi, have of the tiger and, prompted by this fear, the respect that they show for it everywhere, in that the former erect small chapels or temples for it and put up in them pictures of it (4), which the latter call it "ambanj," i.e., "master," and

6. Przewalski reports (op. cit., p. 233) that in 1867 no fewer than 21 Man-dse were killed and six wounded by tigers along the Zymuche, a tributary of the upper Ussuri.

contribute no little to the panicky fear and superstitious ideas that govern them with respect to the tiger. I have already discussed this above (7) and intend to add more occasionally below.

7. See my Reisen und Forsch. im Amur-Lande, Vol. I, pp. 90-97, where, in speaking of the distribution of the tiger and leopard in the Amur region, the beliefs of the Gilyak and other Amur peoples concerning them are given.

825 Since /392/, however, the tiger appears in the area of the Gilyak only as a most infrequent guest on its rovings from the south and is scarcely ever killed by them (1), it, and to an even greater

1. The Gilyak did not know of any instance of this kind to relate to me.

degree the leopard, belongs more in the category of mythical animals occupying only their imagination. On the other hand, [439] they meet in their forests, and not so very infrequently, another animal, which through its decidedly predatory nature and its total appearance, the cat-like habitus, the spotted and in part striped marking of its fur, the black tip of its tail, etc., resembles the tiger as well as the panther (2), and whose fur is highly

prized and dearly paid for by the Chinese (3). I am referring

[113] 3. Radde (Reisen im Süden von Ost. Sibirien in den J. 1855-1859 /Journeys in the Southern Part of Eastern Siberia in the Years 1855-1859/, Vol. I, "Die Säugethier-Fauna /The Mammalian Fauna/," St. Petersburg, 1862, p. 93) was unable to buy a lynx skin among the Manchu and Daur, even for silver coins, and heard the latter say that it, like a tiger skin, could be acquired only by high Chinese officials. Gerbillon (in Du Halde, Descr. de l'Emp. de la Chine, Vol. IV, p. 295) reported that the animal schulon (French "choulon"), a specimen of which Emperor Kang-hi killed during a hunt in 1692 and which he regarded as a lynx ("loup cervier"), which seems in fact to be wholly correct according to the description, provided one of the most highly prized pelts, which cost 15-20 ducats each in Peking. Elsewhere in Du Halde (op. cit., p. 29) this animal is called "chelason."

825 to the lynx. Therefore, the Gilyak transfer to it some of their conceptions about the tiger as a particularly noble, princely, or royal beast.

/392 cont./

825 291 554 royal beast. Hence it is no wonder that, in accordance with the proverb, "Clothes make the man," which is especially apt among primitive peoples, the Gilyak who can occasionally parade around in a whole coat of lynx skins, and who can thus scorn the profit that would accrue to him from the sale of these skins, is surrounded with an aura of extraordinary distinction and wealth in the eyes of his countrymen.

291 But let us return to the ordinary winter-clothing of the Gilyak. Like the shirt, the fur coat, too, is always buttoned by [177] the Gilyak from left to right over the chest, sometimes with several metal buttons of Chinese or Russian origin, sometimes with a large wooden button of Gilyak workmanship (Pl. XXIX, Figs. 4, 5),[1] and the skirts of the coats likewise overlap. To hold them together, however, the complete winter outfit includes, besides the belt, which will be discussed later, a special piece of clothing, the so-called kossjkha, that is, a short apron-skirt of sealskin extending around the body, which, for a better fit at the waist and in order not to hinder the movement of the body, is provided, at the top with a wide edging of fish skin, through which run the straps for tying it (see Pl. XVIII[2] and XIX).[3] [171] The kossjkha seems to be an article of clothing that is genuinely Gilyak in origin, though it may also be found among some of the Tungusic peoples neighboring the Gilyak and living as they do, the Olcha, Negda, etc. For /393/ the Gilyak always traveling astride his low dog-sled, the kossjkha gives the lower body excellent protection against the oncoming wind and snow or rain, and on many other occasions particularly conditioned by the practices of the Gilyak as we shall see below, it performs excellent service for him. To prevent wind and snow from entering the sleeves, they are wrapped in a swathing fashion and tied at the wrists by means of a wide sleeve-band of of fabric or leather (Gilyak torknbas; see Pl. XXII,[4] Figs. 4, 5). The hand coverings (Gilyak wom(a)ch) are tied to the ends of the sleeves. As a rule, they are mittens lined with fox fur (Plate XX,[5] Figs. 3, 4) and distinguished in cut by the fact that at the wrist, close to the thumb, there is a slit protected by a

1 2 3 4 5 [See Category 116, pp. 1009, 998, 999, 1002 and 1000 respectively -- Analyst]

/398 cont./

292 237 is given the character of an imitation of the whole animal. The inner lining of the lynx cap again consists of fox fur. Although with respect to elegance and distinction the lynx cap of the women is, so to speak, a counterpart of the lynx coat of the men, it is not just stored away, but is actually worn, thanks to feminine vanity and love of finery. On the occasion of a bear festival in Tebach I saw them on two women, and the above illustration [554] was made from one of these specimens (1). The lynx cap,

[126] 1. And, to be sure, like the other two women's caps on the same plate, by my colleague, Maximowicz, during our stay of several days in this village.

however, always marks the wife of a rich Gilyak, who either already has a lynx coat or has a good chance of getting one.

171 291 237 A similar use of the head fur of an especially esteemed animal as headgear and to a certain degree also the imitation of the whole animal may occur among many primitive peoples. 825 I cannot refrain from pointing out a few instances of this kind among other Paleo-Asiatic peoples. The nomadic Koryak on Penshinsker /Penzhina/ Bay, for instance, for whom the wolf is the most dangerous enemy of their reindeer herds, in winter wear caps of wolf fur, on which the ears of this animal stand in an erect position (2). According to Sagoskin, something similar

[113] 2. G. Kennan, Tent Life in Siberia and adventures among the Koraks and other tribes in Kamtschatka and Northern Asia, London, 1871, p. 117.

also takes place among many Eskimo tribes of northwestern America. The men of the Kan-julit people, from the northernmost Maleig-müt down to the Ugaschenzen, wear caps made out of the head-skin of the wolf and, in back on the belt, the tail of a wolf or wolverine, to which the tip of the snout of this latter animal is attached. The wives of the Kuskokwim Eskimo

/398 cont./

let a wolf or wolverine tail hang down at the neck from their elegant reindeer-fur caps, trimmed with otter or wolverine skin, to their backs (3). One would not err, I believe, if he assumed

3. Lagoskin", Peshekhodnaia opis' chasti russk. vladienii v" Amerikie /Description of a Journey on Foot through Part of the Russian Possessions in America/, St. Petersburg, 1847 and 1848, Pt. II, pp. 21, 22.

that such articles of clothing based on the imitation of animals are of ancient national origins among those people for whom they are customary and in whose lives the animals in question are of special importance, bringing harm or advantages. It certainly seemed obvious to primitive man to pursue and carry out in detail the similarity with a given animal that he acquired by clothing himself in its fur. Here and there superstitious beliefs of the kind, say, that by imitating an animal in one's clothing, he might gain its good will or render it harmless, might also have given rise to garments copying animals. It is, therefore, not surprising that the idea of special elegance and high distinction becomes attached to such ancient national garments. This also explains why the tschlyghi-hak of the Gilyak /399/ women, though made out of purely native materials, is regarded as more elegant than the tscharp-hak made out of expensive Chinese silk with dragon designs.

I cannot leave this subject without permitting myself yet another pertinent and general remark. Since the customary practice among all primitive peoples clothing themselves in animal skins is to wear the skin with the hair on the outside, might not the thought of using the skin for protection against the inclemencies of the climate in the same way as it is given to the animal as natural clothing have arisen out of the imitation of animals, until experience taught that this is in fact the way of using animal skins for clothing that gives the most protection? Without any other covering as nearly air- and water-tight as possible, which primitive people were not familiar with, animal

/410 cont./

1. I later saw something similar among the Daur in the village of Chormoldin: the hair was shaved off the boys and a tuft of hair was left standing only here and there, quite unsymmetrically, either on the crown or on one side, which gave them a very comical appearance. The Chinese presumably also do this.

Adults, however never have their head or beard hair cut; indeed, among the Gilyak there prevails the belief that if an adult among them had his braid cut and his hair shorn, it would bring him sickness and death. After death, however, the braid may be cut off and preserved by the relatives of the deceased. For instance, the Gilyak Kimrkan in Kalm showed me the braids that he had removed from his first wife and his daughter after their deaths, and which he carefully stored, wrapped in birch bark, in the small hut erected for the manes of the deceased, the so-called rakk,* which

*/HRAF note: According to the list of errata on p. 777 of the foreign text, rakk should be raff. An asterisk on the latter word refers to a footnote which reads "Noted later"; see note * on p.1236./

will be discussed later. In caring for their hair, the Gilyak are just as untidy as in their clothing. Hence one often sees them hit their heads with the palms of their hands in order to check the annoying vermin, or scratch their heads, which characteristically is always done with the thumb while the other /411/ fingers rest on the head. Indeed, the Gilyak even regard the presence of vermin in the head hair as a sign of good health. Thus, during my stay at the Nikolayev post, it happened that a Gilyak boy was taken by a Russian for rearing in his house, but when the father visited the boy after a time and missed the vermin in his hair, he explained that he was worried about his health and took him back again. In connection with this, the bad habit of cracking vermin from the head or clothing in the mouth prevails among the Gilyak, as among so many primitive peoples. My disgust at this, occasionally expressed to them, seemed ridiculous to them, and to my question as to why they did it, since it could be neither for food nor for a delicacy, I was given the answer that they were paying back the little animals for what the latter were doing to them.

/426 cont./

*262 While the men land enormous quantities of these salmon, espe-
251 cially the latter species, in nets and boats, the women occupy
252 themselves with skinning them and cutting them up: a longitudi-
[462] nal cut is made from the head to the tail near the spine on either
412 side and on the belly side with the tschomauwa, a knife with a
[226] long and narrow blade (Pl. XXXI, Fig. 6, and Pl. XXXII, Fig. 1), and then a transverse cut from top to bottom just behind the head; then the skin is pulled off from the side with one jerk each, the meat is removed from each of them in one piece, and each of them is cut into two long strips, each of which has a cut made in its upper end, whereupon the strips of flesh are strung on a cord and hung on
[192] the above-mentioned drying racks near the summer yurts. This is the jukola (2), chiefly intended for the people and only in small

2. As is well known, jukola is the term, probably originally stemming from Kamchatka, customary among the Russians throughout Siberia for cut-up and dried fish.

part for the dogs, the ma of the Gilyak, the makoré of the Olcha and Goldi. The head with the backbone and the flesh remaining on it, which is provided with transverse cuts along the latter for drying it more readily, furnishes the jukola used exclusively as food for the dogs, the chark of the Gilyak, the dalong of the Olcha and
[258] Goldi. Oil is boiled out of the especially fatty belly pieces, which provides a most important foodstuff and is stored in seal bladders and stomachs. The entrails and the milt, rejected with horror by the Gilyak on principle, are given to the dogs, but the roe is eaten and is used with various foods, though it is not especially
*262 prized. Apart from the two kinds of salmon mentioned, jukola
252 is also made out of other fish, for example, Salmo lycaodon Pall.
● 825 (Gilyak well), which comes up the Amur somewhat before the
[226] keta salmon), Salmo callaris Pall. (Gilyak longr[sch]), Salmo leucomaenis Pall. (Gilyak ssawong), etc. The jukola made out

6. And, to be sure, by first watching to see whether birds and beasts of prey eat any meat from it, etc. (Dawydof, op. cit., p. 200. Golovnin", "Zamiechaniia o Kamchatkie i Russkoi Amerikie v" 1809-1811 gg. /Observations on Kamchatka and Russian America, 1809-1811/." -- Mater. dlia istorii russk. zasel. po bereg. Vost. Okeana /Material for a History of the Russian Settlers on the Shore of the Eastern Ocean/, Issue 2, supplement to Morsk. Sborn., No. 2, 1861, p. 105).

often a hasty consumption of the meat or blubber of such animals is said to have brought about devastating sickness among the people concerned and to have resulted in the dying out of whole villages (7). Such cases may very likely have occurred among the

[225] [411]

7. Krascheninnikof (op. cit., p. 529) witnessed such deaths in Alaun on the east coast of Kamchatka and sought the cause in the fact that many whales are killed by means of poisoned arrows.

Gilyak and their adjacent neighbors along the coast (8) and,

[164]

8. For instance, in Vladivostok a newspaper of the same name reported several cases of severe epizootic diseases on Sakhalin, and among them one in 1882 in the Murawjof post, which came about as the result of using the fat of cast-up whales (S. Peterb. Viedom., 1883, No. 272).

/437 cont./

is consumed by them when its hour of death tolls. The Gilyak
*262 seem not to eat on principle only the crow (Corvus corone L.,
● 825 Gilyak karr), although, or perhaps because, it lives for the most part on the same food as they themselves do, for it happily and in great numbers stays in the vicinity of their villages and huts in order to benefit from the scraps from the catch of fish or the preparation of jukola, and appears at the midday or overnight campsites of traveling Gilyak even before the fire has gone out, in order to eat any possible remains from the meal; in fact, they not infrequently steal a march on them in consuming /438/ a nochla-nga
*262 frozen fast to the sea ice or an animal caught in a trap. Perhaps
825 the Gilyak are also governed in this by some kind of superstitious
171 belief concerning this bird, like, say, the Chukchee (1) and the

[113] 1. Kiber", "Chukchi /The Chukchee/" (Sibirsk. Viestn., 1824, Pt. II, Ethnography, p. 119).

Eskimo (from Kotzebue Sound), who regard the carrion crow as the creator of the world (2). At any rate, I saw them sometimes

[113] 2. Berth. Seemann, Reise um die Welt, Vol. II, pp. 30, 72.

carry with them on trips a crow's head on top of the sleds laden with provisions and trade articles as a means, as they themselves told me, of bringing good luck. Incidentally, ideas quite similar to those concerning the crow prevail among the above-named peoples, the Chukchee, the Eskimo from Kadjak, the Kenai, and the Koljuschen in connection with the raven, and the latter therefore do not eat it (3). In view of the great similarity between the

[113] 3. Lutké, Voyage autour du monde /Voyage around the World/, Paris, 1835, Vol. I, pp. 189, 214. According to Nordenskiöld (Die Umsegelung Asiens und Europas, Vol.

*262 /438 cont./
● 825
171
[113]

3. (cont.)
II, p. 96), on the other hand, the Chukchee of Pitlekai and Jinretlen had no objection to eating a raven that had been shot.

*262 In view of the great similarity between the
825 two birds in externals and in their way of life, it is quite possible that the Gilyak have the same attitude toward both and therefore likewise do not eat the raven.

Among the reptiles and amphibians, there is not a single animal that the Gilyak eat, for with regard to all of them, but especially snakes and toads, they have a fear rooted in superstitious beliefs, which will be discussed in the following (4).

[171] 4. In China, frogs, turtles, and even snakes are eaten. Jakinf, op. cit., p. 262; John Bowring, loc. cit.

226 Finally, among the animal foods of the Gilyak a few
*262 invertebrates must be mentioned, for the coastal Gilyak do not scorn gathering and eating some of the crustaceans and mollusks tossed up by the sea or left behind by the ebb. For example,
[136] on the west coast of Sakhalin they designated for me the Tellina venulosa (Gilyak kär wub) (5), Mactra sachalinensis (Gilyak

5. See Vol. II, pp. 556-558, of this work.

moghomi-wellach) (6), and a third mussel, which they called

[192] 6. Ibid., pp. 575-578. As is said at the place cited, wellach is the term for a snail shell or mussel shell in general, but the animal of the moghomi-wellach is called pubk, according to Glehn.

jotang-wellach and which remains unknown to me, as the species whose animals they eat and at the same time praised them as being "sweet as sugar."

/520 cont./

226 upper corners of the net, or, in the case of the bag net, one of the sections of the bag opening equipped with the rings and cords, is hooked onto the prongs of the odn-tschongr, while the other corner of the net, or the place on the bag opening diametrically opposite the first one, is fastened to a pole placed across the hole, and the rest of the net, weighted with stones at the lower edge, is let down into the water. Now the odn is withdrawn, and the corner of the net coming out with it at the other hole is fastened, like the first one, to a pole. In this fashion the net is set up, like a wall directly under the ice, between the two holes. From these also emerge the cords by which it can be raised, and, finally, to one of them run the signal cords from the wall of the net or bag, so that the presence of fish in the net must be watched for here. From the foregoing it is to be seen that the length of the odn, determined by the size of the net and the distance of the holes in the ice from each other, is very considerable. It may therefore consist of several pieces.

[532] The representation of a face on the odn-tschongr is always necessary, however, according to Gilyak belief, and very essential for success in catching sturgeon or hausen. In this connection another /521/ Gilyak superstition should be considered, one specifically referring to the catching of sturgeon

• [825] and hausen with nets. It is that a cuckoo feather attached to the net will make the fishing successful -- a superstition to which I shall return later with regard to its consequences.

226 171 Another way of catching sturgeon and hausen among the Gilyak, though far less common, is to set out fishhooks. This is the same method of fishing that is known in Siberia as ssamolowy (automatic fishing) and has been described by Pallas in the various modifications with which it is practiced along the lower Obj, on the Irtysch, Jaik, and along the Volga (1).

1. Pallas, Reise durch versch. Prov. des Russ. Reichs, Vol. II, pp. 339, 444; Vol. III, p. 88.

/546/

225 825 789 532 Needless to say, there are a number of superstitions connected with seal-hunting among the Gilyak. Thus, the lych, like

• the above-mentioned odn-tschongr (1), always bears on its

1. See p. 808 above.

Use of the lych for seal-hunting among the Gilyak.

upper side, near the point, a crudely carved face, whose presence is regarded as essential for the successful use of the weapon.

225 825 Furthermore, superstition requires that, first of all, and before any use is made of a slain seal, its eyes be gouged out with a knife, whereupon the eye fluid, caught in the hollow of the hand, is thrown into the water, and, furthermore, the snout, or, to achieve both things at the same time, the whole head, is chopped off and put

[999] into the water. The guiding thought in this is to leave the slain animal in ignorance about its murderer and thus to prevent any possible revenge by its manes causing ill-luck in seal-hunting in the future. The same conception is evidently the basis for the

[171] above-mentioned similar procedure of the Manegir with their slain sturgeon and hausen. The Gilyak, however, prize these fish too much to sacrifice the heads each time and may therefore come to terms with this superstition in another and less costly way. Perhaps they content themselves with gouging out the eyes, though I did not see this myself. Their above-described procedure with the

Ainu ABC
Goldi RX3

/546 cont./

225 825 seals was very inconvenient for me inasmuch as, because of it,

• I was unable to obtain perfectly whole and intact skins of the seals of the Amur region.

A 225 Just as among the Gilyak, seal-hunting also plays an important role among the Ainu living on both coasts of Sakhalin and is practiced by them in quite similar ways. Thus, according to Mizul's information (2), the above-described, long-handled

2. Op. cit., p. 130.

harpoon, the Gilyak lych, is also used among them, and even Mamia Rinsô mentions /547/ that they put in the water small wooden floats onto which the seals crawl and are then killed with javelins (1).

1. Mamia Rinsô, "To-tats kiko" (Siebold, Nippon, VII, p. 185).

G1 225 Among the Tungusic peoples of the Amur region it is possible for only a few, because of the location of their habitation area, to turn to seal-hunting among other sources of sub-

G1 [439] sistence, or to practice it at all. The former is the case in particular among the Orochi of the coast, who do not practice seal-hunting merely to satisfy their own needs for seal furs, skins, and oil, but also get from it important articles to barter in trade with their western neighbors, the Goldi. Nevertheless, even among the Orochi seal-hunting falls far behind the preferred

G1 [361] hunting of forest animals. The Olcha, too, though to a lesser extent, have an opportunity to devote themselves to seal-hunting within their own borders, thanks, on the one hand, to their dwelling sites on de Castries Bay and, on the other hand, to the

G1 [191] ascent of the seals in the Amur River far into their territory. [197] There can be no doubt but that they practice it in exactly the same manner as the Gilyak, who here again are their teachers.

G1 225 221 361 Finally, the Negda, though living at a distance from the sea, annually travel in some number from the Amgunj, and especially from their northeastern dwelling sites on Lake Orell and

/548 cont./

225 171 In view of this distribution of the white whale in the Amur region, the Gilyak are practically the only one of its peoples that occupies itself with catching it. To be sure, the Ainu along the east coast of Sakhalin would have the opportunity for it, but there is no mention of such an occupation by any of the travelers who became acquainted with them. Little inclined toward bolder hunting ventures, they presumably are satisfied, so far as the white whale is concerned, to capture the individuals stranded on the shore, just as they do in the case of the larger

225 true whales. With regard to the latter the Gilyak do no differently, but they pursue the white whale with weapons, and, to be sure, for this they use a harpoon intended specifically for this purpose, their so-called parr (Pl. XLII /see p.1022/, Figs. 3 and 4). This consists of a thick and short bone tube into which a dagger-shaped, double-edged and pointed iron lamella provided with a barb on either side in the back is inserted. This piece is mounted on a wooden shaft (Gilyak werl) for hurling it and, in addition, is equipped with a long, stout strap by which the wounded animal is pulled in, either to the boat or directly on land, depending on where the hunter may be, in order finally

• [825] to be beaten to death. Here, too, as in seal-hunting, superstition, and presumably as the result of a similar idea, demands that, first of all, the head of the slain animal be cut off; it is not thrown into the water, however, but hung on a tree standing on the bank, after all the muscle meat and the like have first been removed from it. At various places along the right bank of the Amur I saw such trees with many skulls of white whales hanging in them, which at the same time showed the success

[171] of the Gilyak in hunting /549/ the white whale. I cannot say whether the Olcha, in whose territory the white whale is much rarer, likewise hunt them, but, if this should be the case, only the Gilyak could have been their teachers. Thus, the hunting of the white whale is a characteristic feature in the way of life of the Gilyak in contrast to the other Amur peoples and brings them closer, in view of the arctic nature of this animal, to the

ooo polar peoples. And, strangely enough, the custom of sticking

/549 cont./ And, strangely enough, the custom of stic

225 171 the skulls of slain white-whales on a tree or, lacking one of on vertical piles driven into the ground prevails among some

• 825 of them, as Pallas (1), for instance, reports for the Samoyed

ooo

Hunting the Animals of the Forest. Hunting Equipment. Iron Hunting-weapons and Other Iron Weapo and their Manufacture. Protective Armor and Arms of Honor.

224 171 As we now turn to the second main source of subsiste of the Amur peoples, hunting the animals of the fores I m first point out, recapitulating briefly and summarily the rem frequently made above, that it, in direct contrast to fishing increases the more in immediate importance and significanc the farther upstream one goes from the mouth of the Amur a into its tributaries, and, finally, in the upper Amur region, just like fishing in the lower one, becomes the primary and most essential condition for the existence of its peoples.

224 The Gilyak, with whom we again begin our observa tions, are accordingly, as the most sedentary, the most ichthyophagous, and in general the most pronounced fishing people of the Amur region, the least devoted of all its peop

[439] to hunting the animals of the forest. Whereas for them cato ing fish, seals, and white whales serves for the immediate satisfaction of their needs in clothing and in food for them-selves and their dogs, hunting by and large serves these end

/556 cont./
224 Middendorff and others (1). Thus, larger animals are usually
191

1. Sibir. Reise, Vol. IV, pp. 1382 ff., and the woodcut.

only killed by chance with the weapons to be described later.
224 Some of the animals mentioned above, such as the lynx, the
825 wolf, and the alpine wolf, conventionally offer such highly prized skins that one would expect regular pursuit of them by the Gilyak, and yet, as far as I know, they do not set up any self-firers for them. Undoubtedly superstitious beliefs are in part the reason for this. With regard to the lynx (Gilyak tschlyghi), it has already been pointed out above (2) that the

2. See p. 583 ff. above.

Gilyak see in it an image, as it were, of the tiger, of which they have such a panicky fear that they hardly dare name it or talk about it aloud (3). This awe alone may prevent them from

3. See Vol. I, p. 94, of this work.

hunting it in a premeditated fashion and with the same devices as other animals, and only permits them to go after the carcass adorned with precious fur in case of an accidental meeting and, so to speak, in self-defense. The situation is similar with regard to the alpine wolf (Canis alpinus, Gilyak tschoramlatsch, or Sakhalin-tschchodamlatsch), which the Gilyak do not hunt at all out of superstitious fear, and which, in addition, only stays in remote mountain wilderneses, into which, with their slight
224 inclination for hunting, they may come but rarely. Finally, with regard to the ordinary wolf (Gilyak lugi, along the east coast and in the interior of Sakhalin atrk), it is pursued by the Gilyak regularly, although not with the self-firer, but rather by means of a device which I shall discuss in a moment. Thus, the self-
191 firer, which, in more or less differing forms is used in Siberia both

/561 cont./ such specimens, however,
411 are not used as a rule, but rather, carefully wrapped in birch
566 bark, are stored away by their owner as symbols of great wealth.
Bear pikes and lances are the weapons most commonly
224 used by the Gilyak against elk, reindeer, bears, and the like. During the first period of my stay at the Nikolayev post, when it consisted of only a few log houses erected at the edge of the still completely uncleared forest, it happened almost in front of my eyes that an elk came running out of the forest toward the river, and, when it came upon a group of Gilyak camping there, tried to keep on going by swimming; but the Gilyak immediately pursued it in their boat and stabbed it in the water with their lances, whereupon I received the skin of the animal. In winter when the all too deep snow greatly impedes movement for the elk and reindeer, the Gilyak pursue them on ski in order to kill them eventually with their pikes and lances. They get at the reindeer, which is especially common on the unforested plains of northern Sakhalin and sets out in small herds on the ice of the Liman, in still other ways. When in early spring, under the influence of the midday sun and the nightly frosts, a thin crust of ice has formed on the snow and is strong enough to support the dogs, but breaks under the reinderer, they pursue it on a light sled harnessed to dogs until they can attack it with their pikes and lances.

Most frequently, however, they use these weapons against the bear. Aside from the tiger, almost only mythical because
825 of its great rarity, and the no /562/ less unfamiliar leopard, which, out of superstitious fear, the Gilyak scarcely dare mention by name (1), the bear is the largest and most powerful beast of

1. I have already discussed this at great length in the first volume of this work (pp. 90-96) in speaking of the occurrence and distribution of these animals in the Amur region. I shall return in the following to the tiger and leopard idols alluded to there.

825 /562 cont./
224 as a rule when an old she-bear with its one or two-year-old cubs
184 is found in the lair. In this case, the all too dangerous battle to capture the old animal is usually not even undertaken, but rather it is enough to stab it at once, and only the cubs are
[262] fettered and led into captivity. The bears killed in the wilderness in this or some other way are, to be sure, likewise eaten by the Gilyak, /563/ but, as far as I know, without special festivities, and this is not merely because the processions, so very essential in this connection, which are conducted with the imprisoned bears, must naturally be omitted, but rather perhaps also because the slajn bear does not by far have the tastiness for a Gilyak palate and does not have the thick layer of fat of the animal kept imprisoned for some length of time and fattened on
224 a fish diet. Along the coast of the Sea of Okhotsk Middendorff (1)
184

1. Reise, etc., Vol. IV, p. 1381.

learned of another method of the Gilyak for capturing bears alive, which, however, could scarcely occur in the Amur region and on Sakhalin, with different natural conditions. It consists in putting, at places where deeply cut game-trails lead down from the heights of the steep coast to the sea and between two trees standing close to each other, on the latter large strap-nooses, in which the bear, since it does not find another path either to the right or left, must inevitably be caught. I do not know of any such localities in the Amur region, and, accordingly, I have never heard of such a method of catching bears there.

Many superstitious beliefs and customs are certainly asso-
224 ciated with the hunting of bears among the Gilyak, and their ob-
78 servance is considered necessary in order to undergo the dangers
825 of the fight with it successfully and to master the mighty animal unharmed, but to be able to escape the revenge of its manes in
224 case of its death. But I cannot agree at all with the statement by
114 Nordmann that "lovely songs" are first delivered by a few shamans
256 to the bear tracked down in its lair, which are supposed to induce
533
825

825 /563 cont./
114 it to come out from its hiding place (2). For the shamans among
256
224

[113]

2. Arth. Nordmann, "Ueber den Fischfang und die Jagd der am Amur wohnenden Giljaken /On the Fishing and Hunting of the Gilyak Living on the Amur/ (Bull. de la Soc. Imp. des Natur. de Moscou, 1861, Vol. XXXIV, Sec. Part, p. 251).

the Gilyak, quite apart from the character ascribed here to their songs, which in reality never at any time belonged to them, have nothing whatever to do with hunting, either for bears or for other animals. They never interfere with the pursuits of the practical life, fishing, hunting, trading, of this superstitious, to be sure, but vigorous and enterprising people, and, on the contrary, as we shall see in the following, practice their arts
224 on entirely different occasions. The Gilyak, by the way, do
825 not regard the capture of a bear as an offense perpetrated against it, because through this it is introduced to a life with abundant food, a good home, and many marks of respect.
[796] The spirits of revenge can be aroused only by its death and being eaten, and therefore the bear festivals, leading to this outcome, are surrounded by a number of rules of behavior dictated by superstition, whose observance is supposed to ward
[199] off misfortune. The other animals are given less consideration, but even with regard to them there are many rules that are not to be neglected without causing future mishaps in connection with the hunting concerned, and, along with this, depending on the kind of animal involved, more or less grievous injury to the
224 profits. /564/ For example, I by accident came across the fol-
825 lowing superstition concerning the hunting of sables. When I
123 entered the yurt of Miwwach on the lower Tymy on Sakhalin, I
199 saw a sable hanging from the wall beam, which was still completely intact and evidently had just been brought in from a trap. As I was looking at the animal, the wife of the absent owner entered; obviously distressed because I had seen the

/564 cont./
224 animal, she reached for a fur cap and hung it over it and then,
825 after a while, she took it from the wall, wrapped it in birch
123 bark, and put it with the other possessions of the house. My
199 efforts to buy it were entirely in vain, despite the high price that I offered; I was told categorically that it was already "unlsch" (unlucky) that I, a stranger, had seen the animal unskinned, but the consequences for sable-hunting in the future would be even worse if the were to sell it to me in an intact
224 state (1). The Gilyak in all probability behave in the same
825

191
[113]

1. This superstition, which I also found among the Goldi, is no less prevalent among the Siberian Tungus and was transmitted by them to the Russian hunters in Siberia. Gmelin (Reise durch Sibirien /Journey through Siberia/, Göttingen, 1752, Vol. II, p. 278) for example, wrote of the Russian hunters from Kirenskoi Ostrog setting out in troops to hunt sable: "as soon as a sable is caught, it must be put away properly without anyone's having seen it, for they believe that if anything good or bad is said about the captured sable the rest of the catch will be spoiled."

way toward the other precious fur-bearing animals, in connection with which they are evidently governed by the same superstitious belief which I have already discussed above (p. 851) in speaking about seal-hunting. The utilitarian standpoint with regard to this superstition is also evident in the fact that it does not extend to worthless animals whose capture means nothing to the Gilyak, for fresh specimens of squirrels and Mustela sibirica just taken from the trap were relinquished to me by the Gilyak without further ado. If, on the whole, the traveler comes across far fewer Gilyak superstitions concerning hunting and the individual animals hunted than is the case with regard

/564 cont./
224 to fishing or seal-hunting, a natural explanation is found in the
825 circumstance already pointed out in the beginning, that among them hunting does not by far stand in the foreground of life to the degree that fishing and seal-catching do.
223 In discussing the various kinds of arrows used by the Gilyak, the hunting of wild fowl was also considered above in passing. A few pertinent remarks might in addition follow here. By far the greatest number of ducks, geese, and other waterfowl are not killed by the aforementioned knob-shaped arrows, which on the whole are used very little, but are caught in nets during the molting season and simply beaten to death. Only incidentally, but not infrequently, they capture birds that get their food by diving into the water and become entangled in the nets. Among these they pay special attention to the divers. Colymbus septentrionalis L. and C. arcticus L. (Gilyak ugn), which however, is done, not for practical, utilitarian reasons, but out of superstition, about which I shall speak later when discussing their methods of burial. The hazel grouse (Gilyak hauz) and white grouse (Gilyak parrä, along the Tymy on Sakhalin tschleola-nga), with which the Gilyak /565/ amply supplied the Nikolayev post during the winters of 1855-1857, are caught by them in snares (Gilyak kusi). With regard to the white grouse,
[532] which one also finds represented on amulets among the Gilyak,
[825] although in a completely unrecognizable, only symbolic fashion, I likewise noted among them the above-mentioned superstition relating to the head of the animal, in that in selling this bird they greatly desired to remove the head first.

For the Gilyak the most important of all the birds are the fishing eagles. Haliaëtos pelagicus Pall. (Gilyak tscharngai-tscham) and H. albicilla Briss. (Gilyak myght-tscham, in the interior of Sakhalin ach-tscham). The former, however, occurs only rarely in their territory and chiefly along the seacoast, but the latter, on the other hand, is common and occurs throughout the region, and it is therefore always meant when merely the
[439] tscham (eagle) is mentioned. The benefit that the Gilyak derive from it consists in the fact that the rectrices are an important

/598 cont./

435 439 undoubtedly can be explained by their great quantity, by the as yet still undiminished wealth of animals in the lower Amur region. Only two types of fur considerably surpass all the others with their high prices: the black fox and the lynx. The former owes its high price, not only to the absolute beauty of its fur, also recognized and highly appreciated by the Chinese, but certainly also to its far greater rarity. The lynx fur, on the other hand, as was pointed out above, has too high an imaginary value in the eyes of the Gilyak themselves to be marketed in great quantities.

435 2) Like the lynx fur, several other articles are distinguished in the above table by their very high price, in no way corresponding to their real value. Among these in particular are the old Manchurian iron armor and helmets discussed above at great length and the Japanese kettles with three handles, which, unfortunately, I did not see, but these could hardly so greatly surpass in quality the kettles from there with two handles, or otherwise somewhat different from them in form, as to justify [550] the great difference between them in price. The necessity for special marks of wealth and distinction, present even among the otherwise practical Gilyak, is expressed in these things.

825 556 3) The same motive, vanity, also explains the high value of a live bear among the Gilyak. It brings its owner not only no material /599/ advantage, but, on the contrary, even disadvantages, for the killing and consumption of it can take place only in a festive fashion which entails expense for the owner and host, in return, however, it brings him the flattering reputation of a rich and renowned man.

435 439 291 4) Among the various clothing materials which represent the principal barter item of the Chinese in dealing with the Gilyak, the latter most prize the colorful silk materials with dragons and other Chinese patterns and often gold and silver interwoven through them, but not because they themselves take special pleasure in them and live in luxury with them -- instead, one sees them used among them almost exclusively in small

/641 cont./

593 845 595 586 the help that they give in the household, a fine bride price. A sterile wife, then, is commonly exposed to the risk that the husband will cast her out or take a second wife, who, if blessed with children, would soon push her completely into the background. Needless to say, the wife shares the husband's desire and scorns no means that might serve to fulfill it, and the prevailing superstition gives her many such means. For instance, I saw many a [825] [789] woman wear the tooth of a bitch around the neck in the belief that this would make her fertile. Presumably other amulets specially carved for the purpose are worn by the women, though I am unable to name a particular object of this sort.

844 After all this, it is all the more surprising that there exists among the Gilyak an inhuman, cruel custom in connection with the birth of a child, the custom, that is, that a woman may never give birth in the house, but must always leave it, regardless of the weather and of the time of day or year. I did not want to 844 114 believe this, but I myself witnessed it. When I visited the village of Kufk on April 24 (May 6), 1855, and entered one of the houses, I saw a woman going out extremely heavily and laboriously and sinking down nearby on a prepared bed of straw, where she was immediately seized with labor pains. The husband stood in front of the door, calmly looked on for a while, and then went back into the house, whereupon I, too, left. A few hours later I heard from a Gilyak of the same village that the birth had been successful, but the child died soon afterward. The mother was still alive. [132] The mean temperature on this day was 2.8° R. in nearby Nikolayevsk. At 7 o'clock in the morning the thermometer registered only 1.1°, at 2 o'clock in the afternoon it rose to 6.3°, and dropped again to 2° at 9 o'clock in the evening. The river had not yet thrown off its cover of decaying ice, and, with the sky slightly cloudy, for the most part, a moderate east wind was blowing from the Liman (1).

1. Cf. Vol. IV., p. 30, of this work.

844 343 During the colder seasons, in the late fall and winter, delivery does not take place in the open, but rather in a birch-bark tent

/677 cont./

805 184 825 Tymy Gilyak shift the designations current on the Amur for January, February, and March one month ahead -- a shift for which I could not find an explanation. According to the sound 805 184 of the word, tscham-long (January or February) means eagle-month, karr-long (February or March) crow-month, since the 825 former seems to be named after the white-tailed eagle (Haliaëtos albicilla), and the latter after the raven-crow (Corvus corone). Both birds play a not unimportant role in the superstitious ideas [439] of the Gilyak, and the former, moreover, also in their trade with the Japanese (1), but it is a mystery to me why these particular

1. See pp. 668, 669, and 883 above.

months are named after them. During the winter the white-tailed eagle even leaves the mainland and northernmost part of the Gilyak territory because of the lack of fish for its special diet, and at this time of year it holds out only on the northern coasts of the Sea of Japan, where the ice is often broken up by storms, and in the interior of Sakhalin along the upper Tymy River which does not freeze in winter (2). There the white-tailed eagle is

2. See pp. 226 and 227 of Vol. I of this work.

indeed an impressive sight in the midst of the snowy landscape at a temperature falling below the freezing point of mercury. But in this respect January and February are alike, and the shift of the designation current on the Amur for the former month to the latter one by the Tymy Gilyak is not explained at all by this. Could it be that the name "eagle month" is foreign, perhaps of Chinese origin (3)? In the Tymy Valley I heard January called klu-long --

805 825 191 113 3. Among the Chulyma Tatars and the Baraba inhabitants March is called "eagle month" (kutschugen-ai and kutschigar-ai, resp.) Falk, Beytr. zur topograph. Kenntn.

/677 cont./

805 825 191 113 3. (cont.) des Russ. Reiches /Contribution to the Topographical Knowledge of the Russian Empire/, Vol. III, St. Petersburg, 1786, pp. 557 and 539), just as among the Samoyed of the great tundra (lembi-jirij; see A. G. Schrenck, Reise nach dem Nordosten des europ. Russlands /Journey to the Northeast of European Russia/, Dorpat, 1848, Vol. I, p. 537, where the eagle arrives as the earliest migratory bird, January among the Ostjak (Falk, op. cit., p. 466).

805 184 114 In the Tymy Valley I heard January called klu-long -- a designation which Glehn, obviously erroneously, like the one for December (anj-long), ascribes to November. According to my information, on the other hand, the name customary on the mainland and along the west coast of Sakhalin for the last-named month, tlo-long, is transferred to December by the Tymy and Tro Gilyak, with which Glehn, who calls it tschlo-long, seems to agree, and which would be quite analogous to the aforementioned shifting of names. The name anj-long, i.e., "year month," or perhaps "year-closing month," which I heard the Amur Gilyak use for December, may be easily explained by the observation, which presumably did not escape them either, that in this month the sun reaches its lowest position above the horizon and from then on begins to climb again. Finally the most fluctuating and uncertain name is arkail, which remains unintelligible to me and which, according to my information is supposed to designate April on the mainland and on the west coast of Sakhalin, June in the interior and along the east coast of the island, but, according to Glehn's inquiries, May. The last two assertions, however, are evidently based on an error, for they contradict the events of Nature which the Gilyak themselves mentioned to me as characteristic for the 805 individual months. Thus, they said /678/ that arkail-long (April) is the month when the ice breaks up on the Amur, May -- the one

Section 13 (1)

000 1. The table of contents for this chapter is missing in the manuscript.

(The bear festival). Their cultural character and social significance. -- The bear festivals among the Amur Gilyak. Ceremonies and entertainments before and during the killing of the bears, as well as during the consumption of them. Burial of the bones and skulls of the bears. Modifications among the Olcha, as well as among the Gilyak on Sakhalin and the Ainu.

825 The bear plays an outstanding role in the life of all the peoples of the Amur region and Siberia up to Kamchatka. But among none of them is this the case to the extent that it is among the Gilyak. The huge size that it attains in the Amur region (2),

2. See my measurements of bear skulls in Vol. I, pp. 8 ff., of this work.

its vicious nature, which, perhaps because there it does not find anywhere near the abundance of food that it does in Kamchatka, makes it not hesitate to attack even human beings, and its frequent occurrence at all times make it the most feared beast of prey of the region. It is therefore not surprising that the imagination of the Gilyak is much occupied with it and surrounds it, in life as well as after death, with fearful superstitious ideas. For instance, there prevails among them the belief that [1175] [1766] the soul of a Gilyak who was killed in a fight with a bear moves into the body of this beast of prey, which may have chiefly arisen from the fact that the bear in its mode of life and its bearing reveals many a similarity with them, in that it, like them, feeds largely on the salmon ascending the river in masses, on berries, plant tubers, and the like, like them it prepares a place for itself for the winter in caves under snow-covered twigs, like them it stands upright in combat, etc.

/696 cont./

825 like them it stands upright in combat, etc. In spite of all this,
[262] however, the Gilyak is not willing to forgo the great enjoyment which bear meat and fat provides for his palate, and he longs for it especially if the bear first lived in captivity for a time and was fed on fish, for this food adds a fishy flavor to its meat and fat, which is especially agreeable to the Gilyak. Moreover, a person may /697/ then indulge in the enjoyment of these savory morsels quite without danger and without punishment, for, in order to achieve this, according to Gilyak belief, a long series of preliminary act is necessary, all of them aimed at outwitting the bear during its lifetime by attestations of esteem and to deceive it, as it were, about everything that is done with it, but, after its death, to pacify the angered spirits of revenge of the mighty beast by paying homage even to the manes of the slain animal.

231 The attestations of esteem begin immediately with the leading of the bear into captivity. If the bear has been discovered in its lair and safely shackled following a successful battle, it is taken, as has been said (1), on two sleds put side by side and tied

1. See p. 878-880 above.

together, in a triumphal procession to the place from which the hunters set out, and it is received there with loud shouts of jubilation from young and old. The same thing happens when a Gilyak returns from a trading trip to Sakhalin and in the central space of his boat brings with him one or a couple of young bears bought on the island (2). In the Gilyak villages there is usually

2. See p. 960 above.

never a lack of lodging for putting up the bear, but if need be a new one is erected for it. This consists of a square box made of beams, open at the top, with a small, heavily barricaded door and an even smaller, always open window. The bear is forced to climb into it and, after it has been unfettered, is prevented from escaping its prison by a layer of boards spread over it, fastened with poles, and weighted with stones. From now on

/702 cont./

*796 Thus the procession sways along, sometimes forward, some-
354 times backward, but always closer and closer to the house door,
231 amid the loud roars of rage of the bear being tugged back and forth, in which the other two animals join, and amid the wild, intermittent shouts of jubilation of the bear leaders as well as the bystanders. The few oil-lamps do not sufficiently illuminate the large space of the yurt with its dark sooty beams so that all those who are busy with the bear can clearly see its movements, and yet this is absolutely essential for the prompt intervention of one or the other man in front. Hence a number of boys leap onto the sleeping benches and from there illuminate the turbulent proceedings, following the procession back and forth with improvised torches, which consist of rolled-up birch-bark and sometimes flare up brightly and then again spread only dark smoke. Truly a strange picture (see Plate XLVII /p.1247/).

*796 The two other bears were then /703/ led out of the house in
231 the same manner as the small bear. The first one was decidedly the most enraged and intractable of all, which the Gilyak ascribed to the fact that it had broken a leg while being captured and consequently was still limping. It was remarkable how differently the three bears expressed their rage and defended themselves: whereas the small bear and the large one straightened themselves up and tried to claw the man goading them, the third bear behaved quite differently; it did not try to get up at all, but attempted to ward off the thrusts of the stick by holding its paw in front of its face and reaching out for the legs of the one goading it, or it would lie down on its back and defend itself with its paws. It was also the only one of the three which in its fury, tried to scratch up the stamped-earth floor of the yurt, which, however, the Gilyak stopped it from doing each time.

The purpose of the procession with the bears was to lead them
[825] through all the houses in the village, of which there were seven in Tebach; the procession with the three bears turned into each of them, and everywhere they were arranged in the same order, the large bear in the middle, the two others at the sides, and treated with mossj from nichyr spoons as a sign that they are held in esteem and are welcome guests in each house.

/707 cont./

*796 bear did not leave or enter Judin's house until after it had been
231 led back and forth through the door four times. Again the bears had to be led through all the houses in the village and treated everywhere with mossj and crushed ice. Twice they came into Judin's house and received the same treatment. The Gilyak espe-
*796 cially like to see their boys, even if they are very small, partici-
857 pate in the feeding of the bears: they bravely step up to the ani-
231 mal and offer it the spoon filled with mossj, which is sometimes held and supported by several small hands; many a little fellow who can hardly stand on his legs, not to speak of holding a nichyr, must be helped by the father or older brother, who lifts up the
[825] little one. Perhaps this is done for pedagogical reasons, but more probably for superstitious reasons, namely, in the belief that through this the children will continue to have the good will of the mighty animal even after they are grown. As soon as the bears have again been taken out of the house, however, the children use the free space to romp about in and to perform an exact duplicate of what they have seen during the leading of the bears, during the changing of the bands on them, etc., most faithfully imitating all the movements, positions, and demeanors of the adults, as has been described above (pp. 1136 ff.). Thus they learn how to deal with the bears long before they can lend a helping hand.

In the evening, in bright moonlight, the bears were led
*796 beyond the village and all the way around Cape Tebach on the
231 river ice. It was a long procession that started moving down toward the river, for, in addition to the three bears, who were led in the same order as /708/ always, a great number of idle boys followed them. Since the bank is high and slopes rather steeply down to the river, it was interesting to see how the procession moved down the slippery hill without falling into disorder even for a moment: while those standing at the front rope ran down at top speed, the ones busy on the rear rope had to hold back with all their might in order to prevent the bear from running down just as quickly and causing damage below; by their combined efforts, however, they succeeded in letting all three bears slide down the hill slowly and evenly. It was much easier going back, for those

*796 /715 cont./ At this window,
532 after the bear's head has been carried through, a representation
825 of a toad (Gilyak mipitsch), cut out of birch bark, is pasted from the outside onto the thin fish-skin pane that replaces the glass (see the woodcut, p. 1157), while in the interior of the house, on the adjacent bench of honor, there sits a figure which is supposed to represent a bear in Gilyak clothing (Plate LVIII /p. 1258 /, Fig. 3) (2). The significance of this symbolic act seems to me to be

2. In order to be seated, the figure concerned is movable in the hip and knee joints; the clothing, of course, is only very crudely and rudimentarily realized.

somewhat as follows. The toad, an animal that has the worst reputation among the Gilyak and is often represented independently as well as in connection with the bear and the bear festival (3),

3. See, among others, Plates LI /p. 1251 /, LIX /p. 1259/, LX /p.1260 /, LXI /p.1261 /, which will be discussed in detail later.

is regarded as an evil spirit and the actual instigator of all the misfortune that happens to the bear through its capture, death, and finally, consumption. It is the scapegoat upon which the Gilyak heap all guilt and responsibility for their actions against the bear, and it is therefore not admitted into the festively decorated house, but remains /716/ outside of it stuck to the window, where it may witness its misdeeds. The bear, on the other hand, is greeted as a welcome guest by the participants at the festival and, as an equal (hence the clothing) is given a place on the bench of honor. Further proof of the correctness of this interpretation, which I can express only as a conjecture, will be given in the following. /Illustration appears here./

*796 Immediately after the feeding of the dogs, which even on this
252 day takes place in the house in spite of the festive decorations, the work of the day begins -- the cooking of the bear meat in the
[888 hearth concerned. This work is given to only the oldest men, the
887]

/716 cont./

Toad made out of birch bark.

716 graybeards, as a high post of honor; the women and girls, the boys
252 and youths are excluded, and it therefore proceeds very slowly,
888 deliberately, and, so to speak, solemnly. First the kettle in the
887 fireplace was surrounded with a thick wreath of wood shavings, and a
784 similar half-wreath was spread in front of the vent hole. Then the kettle was filled with snow for it is uftsch to use water for cooking bear meat, and the fire under the kettle was kindled with shavings and fir branches, with the latter also used for incense from time to time. Simultaneously a large wooden trough was hung on straps directly under the bears' snouts so that it hung about three feet above the floor.
532 The trough was richly decorated with all sorts of arabesques and figures and in particular on one side showed a bear carved in relief and on the other side a toad likewise executed.

887 The work of the old men proceeded so slowly that it was not until toward evening that they began to cut up the meat of the legs and feet. Each leg was first placed upon the fir branches in front of the bears, as though to ask first for their permission to prepare it; only then was it cut up and put in the kettle. The cooked pieces were fished out of the kettle with an iron hook and transferred to the trough

/718 cont./

*796 sturgeon lying in front of the bears, and a little to one side, in
252 an unworthy place, so to speak, where they could not be seen by the bears, the women began to prepare various dishes, such as mossj, several kinds of groats, beans with fish oil or seal oil, and the like -- work which, undertaken quite differently and in the ordinary way, proceeded rapidly and vigorously.

*796 /719/ The morning of the following day (January 30) began with putting on the bear rack the two belves of the bears, three carp (Cypr. carpio, Gilyak pilengat) and a portion of all the dishes prepared the day before and put in various bowls of birch bark, whereupon an old man seated himself in front of the bears and immediately began to eat some of the freshly prepared mossj out of two bear-bowls.

There followed the customary feeding of the dogs inside the house and, as on the previous days, a race of decorated dogs along with drumming by the women. Next, strips of bear fat were again hung on the étagère and then, amid the heavy incense of fir branches, the internal organs of the bear were cut up and placed in
[252] small bear-bowls. It seems that these parts are not cooked, but eaten raw, like the fat.

At the same time, the women congregated in one corner of the house around a little old woman and, out of motley rags, began to sew together a band about ten inches long and three inches wide -- the so-called tschudbas of the Gilyak. At sunset
*796 this band is wound around the snouts of the bears just below their
325 eyes in order to dry the tears welling out of them. Fastened in the
532 middle of it, however, on the ridge of the snouts, there is a
324 representation of a toad, cut out of birch bark (1). I can give no
824

1. Like the one pasted on the window, see p. 1157.

interpretation for this symbolic act in connection with what has been said above other than the following. With the cutting up of its internal organs, heart, liver, and the like, the bear knows that its fate is sealed and sheds tears over the evil spirit, the toad,

/719 cont./

*796 that led him to it and was the cause of it all. It itself thus recog-
825 nizes the toad as the culprit. The Gilyak, on the other hand, have shown it only kindness: they have received it as a guest in their houses, put it in the seat of honor, offered it some of all the foods, in general did everything only with its knowledge and permission, and their women show it a final act of kindness by consolingly drying the tears in its eyes. Therefore no guilt for its fate or responsibility for it falls on them. At the same time a second symbolic
*796 act is carried out on the bears, the explanation for which, it seems to me, must be sought somewhat further afield. In addition to the tschudbas[2] a second head-band is put on them: a strap tied crosswise, on which are found one or two agate balls about one and a half inches large, which rest on the forehead and a little to one side (2). The small bear was given a band with one agate

2. See the woodcut, p. 1163.

ball which lay above its eyes in the middle of its forehead; the large bear was given two such balls, that is, in addition to that one, a second one which rested over the right parietal bone, and, finally, a band with two agate balls in the middle of the forehead, one directly over the other, was put on the medium-sized bear displayed in another house (that of its owner). On this point it seems that if more balls than bears are available, there is room for choice and only the ball in the middle of the forehead is obligatory.
*796 These agate balls are of Chinese ("Manchurian") /720/ workman-
177 ship and are highly prized and never sold by the Gilyak. Their
174 exotic origin seems to me to suggest an explanation for the entire procedure. /Illustration appears here./ During the many years of frequent intercourse between the Gilyak and the Chinese on the Sungari, it could certainly not have escaped them that the Buddhist divinities of the latter as a rule had a bump or swelling on the forehead above the eyes, indeed, it is possible and probable that they viewed this as a sign of the special holiness of the divinities
[824] concerned in the eyes of the Chinese. If one now considers the
[796] striving of the Gilyak to imitate Chinese ways, it is quite

CONTINUED ON NEXT FICHE

/720 cont./

CONTINUED FROM PRECEDING FICHE

bears' head-bands with figure of toad and agate balls.

conceivable that they are trying to imitate this Buddhist forehead swelling likewise on the head of the bear venerated by them in superstitious fear and likewise regarded to some extent as divine, and that they do this with the agate balls which are newly added to them for this purpose by the Chinese themselves. Thus, according to my idea, the bear is regarded as a divine animal among the divinities and therefore a formal bear-cult is practiced.

With the putting on of the toad and bead bands, or the toad and agate-ball bands, all the honor shown to the bear and now, in the awareness of their complete innocence, the Gilyak may, with a clear conscience, give themselves up to the pleasures of the table. A great number of wooden bowls were immediately brought into requisition on a sled and arranged on the floor around the bear, while the participants in the feast took their places, sitting cross-legged, on the bench of honor. First, a tub, which, judging by the use of the word omsin since in /721/ had been propped up against the fireplace the whole time, was used to present pieces of Russian sturgeon to the guests. While they were still eating it, simple circular

/721 cont./

upon the rack in the central section of the yurt, decorated with fir branches, numerous wood shavings (ŋamnmun), and the bear-skin hanging down from the roof, while the other lamps shed a gloomy light upon the long row of totally tattered fellow-diners sitting along its walls and with large consumed appetites, the bear. There was /722/ something orderly and yet savage and uncivilized about this strange picture. Now one of the servers stepped up to the bear and had received the two head-pieces of the bear, which he put on them as well as from the portions of those sitting next to them, a small piece of meat was distributed to each person with a knife. Only now did the two guests in the middle draw up their portions and begin to eat, and all the others followed their example forthwith. Immediately smaller and larger lumps of the bear were put themselves here and there, and a few young men passed along the whole row of diners and collected from them contributions in small bowls for those who did not participate in the meal, and a few bites were also given to the women and girls.

By now it was 7:30 in the evening; the feast had therefore lasted about and a half hours and, judging by the size of the still-remaining portions, would last about two hours. Unfortunately I was obliged to depart, since the night had to be utilized for traveling on account of the great amount of ballast water that had to be pumped out of the second compartment of the river at this time of year.

Let us now compare the second act of the bear festival as it proceeds, on the one hand, among the Gilyak and, on the other, among the Olča. In spite of the great similarity in the principal and secondary features of this festive performance, a very different spirit in the way it is carried out among the Gilyak and among the Olča is apparent to us. Among the former the character of the festival is altogether cheerful, as is shown by the fact that it has been transmitted. While the object of the whole is exactly the same, namely utilitarian, in both cases -- the ultimate consumption of the bear -- very different ways are used by the one and by the other to try to attain it. Among the Gilyak the bear festival proceeds from the idea of the bear cult, or at least is tied up with it; in a

/730 cont./

preserved in part by veneration for the mighty beast, in part by superstitious fear of it and its spirits of revenge. It is given the place of honor in the house. The people appear to act only with its handle and the way the blade is attached to it, and, finally, all guilt and responsibility are shifted from them. On the other hand, scarcely anything of the art is noted among the Olčan: the only superstition conceptions referring to the bear and the bear festival which I found among them consisted in the fact that they did not want to sell me any bear meat and that they regarded it as ohach (an idea which they have borrowed from the Gilyak) or pu omtak (with the taboo from the bears during the bear festival which, they said, was by no means forbidden at any other time. In contrast to the fearful, superstitious, and, as it were, religious-cultic conception of the Gilyak, the second and most important part of the bear festival has degenerated into mere amusement among the Olča, a series of pedantically observed formalities, such as one might expect from the conservative old Chinese, but not from a primitive people. Perhaps this degenerate of a custom originally foreign to the Olča, which does not have its roots in the people, has indeed come about under Manchu-Chinese influence. Among them, too, all the foods served at the festival are almost the sole exception from their usual fare and are of Manchu-Chinese /722/ origin, whereas among the Gilyak, in accordance with ancient tradition, sturgeon and bear meat and millet prepared from species of salmon play a prominent role at the festivals. It can be observed, incidentally, that the eating of foreign Manchu-Chinese foods is always done with greater formality even among the Gilyak, which can be explained by the fact that it immediately lifts primitive man out of his everyday routine and puts him in an elevated festive mood. The greater number of Manchu-Chinese foods at the bear festival of the Olča in comparison with the Gilyak is undoubtedly due to the fact that their sources for these products are closer and more numerous as a result of both the permanent residence of the Chinese in the administrative areas of the Olča and Golči and the more frequent and active intercourse between these peoples and the Chinese on the Sungari.

/730 cont./

ohach, which is illustrated on Plate LI /p. 1251 /, Fig. 5, Pots a specimen that lay on the bear rack in Judin's house during the festive period. Judging by its general shape, but especially by its handle and the way the blade is attached to it, it perhaps is unmistakably a specimen from ancient times and certainly is a bronze copy of a Chinese bronze, which was later replaced with an iron one (1). Finally, when the heads of the bear has been eaten,

1. To this day the club pictured on the same plate, Fig. 4, and used to kill mugwon and hamsa (see above, p. 1240 and Plate LI /p. 808). The caption on Plate LI should be corrected accordingly.

the skull and the rest of the gnawed and assembled bones of the bear, together with the bear skin, are carried out of the house to a place not far from it in the forest -- an act which, according to the Gilyak, is likewise carried out with a certain solemnity by the oldest people of the village. All the bones, with the exception of the skull, are buried in the ground there or simply covered with earth. The skull is left, however, in several different places in a manner about which I had no accurate knowledge until after I had some experiences with the neighboring peoples. The Gilyak, in accordance with ancient tradition, place the bear skull used for a similar purpose by the Golči, to judge from traces of blood, on the top of a tree, however, quite the skull of the bear, but conceal themselves, forgoing eating the bear, with beating a hole through the crown and hang it by one of the zygomatic arches on a specially selected tree. Near Bar, in the vicinity of the mouth of the Dmuri, I saw such a tree with numerous bear skulls hanging on it. When I climbed in its aster to bring down the best preserved specimens (2), I noticed that each of them had a large hole piercing

2. Among them was the largest (450 mm. long) of all the skulls of Ursus arctos known up to now, which has been discussed in detail in the first volume of this work (pp. 6-15).

/730 cont./

sometimes the right, sometimes the left parietal bone. In the habitation area of the Gilyak I saw trees hung with dolphin skulls, to be sure, but I never came across any with bear skulls, though the number of bears killed and captured and eaten there annually is probably much larger than among the Golči. This definitely indicates that, unlike the Golči, the Gilyak, aside from bearing in open or splitting the bear skull, do something else to in which is scarcely less notable than the covering of the bones for removing it from the right of human beings. In short at various places in the forest near Gilyak dwellings I have came across spon which, upon close inspection, proved to be small, roofless huts made of young trees were cut off several inches above the ground, the remaining piece of trunk was split into two prongs, and the bear skull, spin the two prongs projected out of the sygomatic arches and held it clamped between them so that the prongs, in addition, as either side a short wooden peg was driven from above through the zygomatic arches and into the frontal bone. /731/ If grass grew over the spot, nothing is recognizable to the casual glance. This method of dealing with the bear skulls was transmitted from the Gilyak to the Olča, who, in accordance with the idea that the bear skulls are sacred, had bone experiences with the neighboring peoples. The Olča, in accordance with ancient tradition, place the bear skull used for a similar purpose by the Gilyak, to judge from traces of blood, on the top of a tree, however, quite the skull of the bear, but conceal themselves, forgoing eating the bear, with beating a hole through the crown and hang it by one of the zygomatic arches on a specially selected tree. Near Bar, in the vicinity of the mouth of the Dmuri, I saw such a tree with numerous bear skulls hanging on it. When I climbed in its aster to bring down the best preserved specimens (2), I noticed that each of them had a large hole piercing

/731 cont./

which were strung in a row by means of the Poramina vertebralis on the branches of the brush, and beside them hung Golči birch-bark boxes and baskets, and I found also on the grave sites of deceased human beings and which apparently were offered as a sacrifice to the manes of the slain bear.

It is not to be assumed that the Gilyak of Sakhalin differ essentially from their fellow-tribesmen on the mainland in their basic ideas about the bear and the festival dedicated to it, especially since we must think of how the Gilyak spread, that, having moved to Sakhalin from the mainland, they found a home there for a long period, and only then, oppressed by the Ainu, migrated back to the mainland for the greater part (1). In individual

1. See pp. 214 /untranslated/, 247 /untranslated/, 889, and 892 of this work.

ual phases of the festival, on the other hand, there are very considerable differences between the mainland and Sakhalin. In a different method of construction and the spaciousness of the dwellings of the mainland and Sakhalin Gilyak.

As plain as the exterior of an earth-yurt of the latter is -- a low, conical, sow-covered mound somewhat blackened at the top, which, in contrast, is not visible from a distance, the bear festival is just as shabby. As a rule, only one or two young Ainu, stripped of their bear-skin trousers, are stuck in the snow at the entrance to the yurt, with a few ragiet-shaped, coled wooden-shavings (ŋamnmun) hanging down from their crown and from their shoulders and backs. Only when a bear has been eaten in the same dwelling a few weeks or a month previously or even in the course of the year is its skin used for the exterior decorating of the yurt, being spread over a long and sturdy branch stuck obliquely into the snow and sometimes supported by a small railing, and the bear skull hanging on the same, or on wooden carts (ŋaŋŋ) (2).

2. See the woodcut, p. 1180.

I saw this, for example, in Tyk. Dul. Juin. Pad-wo, and elsewhere along the /732/ west coast and in the Tymy Valley of Sakhalin. If

/746 cont./ /p. 1946/ Golči which serve most well in favor of the religious conceptions of the Tungusic Amur peoples, wherever they are, in comparison with the Gilyak, is that the former are not nearly as apprehensively superstitious as the latter (1 W. R. II, pp. 85, 86).

Animal Idols

10. Gilyak. The bear plays the primary role among the animals that are represented in wood as idols by the Gilyak. The idea that the bear is the dwelling place in which they are expected to live with this beast of prey, for they are particularly fond of putting the bear (ki) was mentioned in connection with the bear festivals. The bear kiŋ or behaŋki serve to prevent the injuries and fatalities which can be expected on these occasions. I have mentioned above the superstition beliefs associated with the death of a man killed by a bear among the Gilyak (1). Hence one rarely enters a village

1. See p. 1127.

near which, upon closer inspection, one does not come across a few bear idols. And this is unusually true of both the Gilyak and the Tungusic Amur peoples.

The bear idols are usually very crudely fashioned. The animal ordinarily appears to be sitting, sometimes standing. The idol pictured on Plate LVII /p. 1258 /, Figs. 1 and 2, from the village of Kuŋ, is one of the best that I have seen. It is further distinguished by the fact that a raised hand runs around its body, upon which other animals served to the Gilyak, or, more accurately, uncanny and portentous, are represented (these are most of the reptiles produced in Gilyak country; the toad -- mujimch (2) on

2. Besides this representation I obtained two individual toad-idols of the Gilyak, carved in wood, which are illustrated on Plate LIX /p.1259 /, Figs. 7, 8.

/746 cont./

the front side of the bear-idol, the lizard mikrŋŋaŋ on the back side of it, and the snake kilanga, whose image is found on either side between the first two. I often witnessed the use and fear of the Gilyak before reptiles (1).

1. See Appendix 20, paragraph 2 /p. 1204/.

Among the Gilyak, besides the bear, one finds idols of the ati or mikrŋŋ, with downright superstition fear connected with it among them. But since the tiger and leopard, which are united under the same name ati or mikrŋŋ, are rarely seen in the northern homeland and casualties caused by them are rare, the idols of the ati are less common than those of the bear. The slight anatomical of the Gilyak with those predatory animals causes them to make the idols of them poorly and superficially (3).

3. See Vol. I, pp. 82-84, of this work.

See Plate LVIII /p. 1258 /, Figs. 4, 5, 6. Fig. 4 represents an idol with a tiger's head, which I obtained in Tymovsk. The marks which characterize the tiger and leopard and are present on the representations of these animals among the Golči. Only the general shape of the animal is indicated, and the tiger's head figure is in fact supposed to represent an ati in certain, since I obtained the idols from a Gilyak expert in this. (Ibid. I, pp. 82, 83.)

11. Gilyak. A fish carved out of wood, which came from the Gilyak village of Tetkin, seems to serve less as an idol or talismanic than as a piece of carving, as a representation, textual in general. It is supposed to represent the fish ŋaŋ-nuŋo, which is unknown to me. Even earlier I acquired from Tebarch the figure of another small fish, the pilengat, Cyprinus carpio, which carvings wire had no significance other than that of ŋaŋ (see p. 1090). Both are illustrated on Plate LIX /p. 1259 /, Fig. 9. In an idol, I obtained another carved fish from Tebarch, which was supposed to represent the ŋaŋ(?)-nuŋo, i. e., a large pilengat-nuŋo. (Ibid. II, p. 32.)

/749 cont./

Idols and Amulets Combining Human and Animal Figures and Others

19. Gilyak. The belief in the transmigration of souls with reference to the bear may be the basis of a number of pictorial representations among the Gilyak -- amulets or small idols -- images that are worn around the neck in a manner of talismans. Among them one finds double figures of a human being and bear. This is ordinarily a small piece of wood which at one end bears the head of a human being, and, on the other end, the head of a bear. The bear's head. I acquired specimens of this type from Kalm and Alfed. Sometimes, in place of the two representations mentioned, also has a human face on the single end (Plate LVII /p. 1257 /, Fig. 8) while the latter ends there without any carving. On both, however the shoulder of the bear's head with human and bear heads are at times for a while in the form of a groove which gradually tapers off at the single end. The Gilyak explained to me that this groove continues to separate the human half from the bear half until they merge. (Bin. II, p. 38.)

20. Gilyak. In the bear cult near the village of Chaire, not far from the place where corpses are buried, several idols of the dead were found which are of a special character and, in the standing upright close to the foot of a tree and hidden with mich and other pieces of wood, are reminiscent of idols. For instance, there was the double figure of a tiger (ati) and /750/ a human being, with the nose of the latter being represented by a bear (Plate LXVI /p. 1262 /, Fig. 1). Fig. 2 is a human idol bore on a human body provided with movable arms and legs and a head with a four-toothed comb on it (Plate LVII /p. 1257 /, Fig. 7).

Finally I found here the representation of an animal with remarkable traces of a crocodile or alligator. It was evidently an amphibian, and the wide mouth was densely studded with teeth. This illustration, which is shown on Plate LXVI /p. 1262 /, Fig. 3, contained another carved fish from Tebarch, which was supposed to represent the ŋaŋ(?)-nuŋo, i. e., a large pilengat-nuŋo. (Bin. II, p. 32.)

/750 cont./

figure was made in case of bachelors, in order to rid oneself of the ashamed (Plate LIX fp 1209/, fig. 8; (2.5.8.1, p. 15.)

21. Gilyak. In the village of Ilde I was able to buy many idols, all different and some of them very interesting, for example, one idol of bear's head (Plate LVI fp 1208/ Gilyak /fp 1207 / fig. 8). It was named for me as *oech*, a designation that other idols in purely human shape also had. Another had the head of an owl /*kiu* on a human body (Plate LVI /p 1207 / fig. 8); in the case of a third one the owl was the head of the human being (Plate LVI /p 1206 / fig. 8). several human figures had carvings on the body and head.

One idol consisted of a block of wood with a human face and a row of pegs on top of the head, each of which was provided with a human face.

I also bought here the bowl in which food served to the Yakuts in past and which is called *ulbi* or *ulbe* or *ulbe-ulbe*.

Then there were idols of the white whale (*pem-mchen*) with a human being on it (Plate LVI /p 1204 / fig. 9). It well as of the wolf, amulets with two heads, that is, of the bear and *kiu*n, etc., here.

In the village of Tchelbunak many idols with *oech* wound around them and carried clothes in buraldak form on a shelf in the corner of a yurt. I acquired a small tiger-idol with a human figure on top of it (Plate LVI /p 1211 / fig. 1), and furthermore an amulet with three idols, one of which represented a human being, the second a wolf, and the third another animal that could not be named for me. Next to the idols there were a great many bear heads, all of bear carvings made with representations of various kinds, sometimes with a human face, sometimes with a head, a tiger, and the like on them. These were all self-made. Only one idol-bowl was completely different and consisted of two cups made out of a piece of birch bark and placed side by side in the form of an *ulbe* (Plate LIX /p 1210 / fig. 1). This vessel was called *tuhdaul* and was used for the same purpose. So amount of *yukagirom*, however, helped in getting the women who owned them to sell them to me and offer me other idol-bowls. She said that it is a sin and would cause her death.

/750 cont./

Several nearly carved and iron-ring idols were also sold to me in the village of Pati. On one the back of the head had the shape of a bear; on another you could see the head of a bear, which represented two bears (Plate LV /p 1205 / fig. 5). /751/ The bear could, by the way, be taken apart, and on each carvings (see 13 fp. /1202/ above).

Among the idols here there was one with the head of a *tong* or we bear /*ha seal*/. The sea dog /*hurbo seal*/ is also represented in idol form, but I did not obtain any (2.5.8.1, pp. 6-9).

22. Gilyak. A figure carved in wood which was found not far from Tschyhtesach at the mouth of the Amur roughly represents a flying fish-man. The head is carved so that the head of a fish, with eyes teeth in the upper and lower jaws. The eyes are represented by blue glass beads. The hair and rear extremities are attached into the back of the fish-man. The former are evidently arms with hands on them, the latter legs with feet, similar to those of a human being. The former are stretched out toward the front, the latter toward the rear, approximately as a horizontal plane with the body, so that the figure seems to be represented in flight (Plate LXVI /p 1208/, fig. 1). C. v. Dittmar (who was in part interested in my obtaining the figure) told me that among the Gilyak of Patcha there is a legend which he was not disinclined to accept as true, since this village and the cape mentioned were not far apart.

"Once upon a time," the story goes, "the Gilyak of Patcha ventured from fishing on two boats ladies with fish. They were caught in a storm and the fish arose and prepared the sea until the next morning. The boats were merely pulled out and the fish covered with birch bark on the idea. The men meaning, when they wanted to set to work, they found the boats empty. All around, however, lay many scraps from the fish which clearly proved that someone had been at work during the night. There therefore set out again to fish and again returned with a full load. But again they postponed the unloading, and the same thing happened to them as on the day before. They went fishing for the

/750 cont./

was taken, for above Nikolayevsk on the Amur River. Another, two bronze one, Tschihach, fresh in the village of Kalk, above Nikolayevsk. In case of an emergency, such as sickness, death, and the like, they are called to village where there are no shamans (1). There are shamans implements, however, such as

1. That among the Gilyak the shamans have been a religious significance than a practical one, mixed with superstition, so he-bear, also folkore from the fact that they never denigrate as shamans, or at least, they are considered by their shamans, clergymen, but rather physicians and spokesmen. Bear worship is well known (The shaman may be present at a bear festival, to be sure, but not "in shamanistic" see pp. 1153. 1165. of abo. p. 880.)

drums and the like, among other Gilyak, for example, the heathen fragin and bogin in Kalk, further swords of them was a shaman. Also, the art of dancing, of beating the drum, and the like, as is customary in the shaman performance, is known to many other Gilyak and is exercised upon request or as desired without it being regarded as sinful or the practitioners being shamans. For example, a boy in the village of Wati was said to be able to do the shaman's work very well, without being a shaman himself. A part of the cognitions of the shaman, it seems to me, rather than skill in dancing, singing, and the like, is the ability to do certain tricks, such as apparently plunging a knife into the body and the like, fears for which they particularly praise their great shamans. (Bm. I, pp. 24. 28.)

23. Gilyak. The shamans performance. I learned that makes are especially feared from information given to me by an eyewitness to the conjuring of spirits by a shaman among the Gilyak of Petrovskoye. After singing and beating had been performed by the onlookers, the shaman turned in the good ruling heaven, sun, moon, and stars (above whom, incidentally, he could say nothing more than

/750 cont./

that he had been thus informed by the client of his people, and he pronounced the conjuring spirits to be the sun and the moon and the two animals most feared by the Gilyak and Russian. During the conjuring spirits, the shaman, who had put on an animal-like stretched over a ring, using a little stick with a snake decorated at one end and a bear at the other. The bottom bowed and danced, and then the shaman beneath the bowl the god for good, and the bear for evil. The snake was considered to be favorable and safe for Gilyak and Russian. (Bm. I, p. 8.)

24. Gilyak. Shamanistic acts in case of sickness (2). The

2. Ineffective in cases of sickness, for which and epidemics, because of being a tying the skin of the snake around the wound.

toad (which brings bad luck) is of two kinds, that is, sometimes a single one, simply called *mgrunch*, and sometimes a double one, *wap-mgrunch*, with a doubled body and extremities. The former lives on land, for the latter in the water. Some the former is also designated as *mrf-mgrunch*, the latter as *tail-mgrunch*, in which case the former is called *ka-mgrunch*. (especially

3. Most of these accounts come from Perhak and her son, Dshamas, from Kalk. Jonhsin Gnaghi of Kalk has informed me that he himself is a very capitulation of the rebels, which these souls go to one of the stars, was also another, I was told that they also were beyond there, *kiu*, i.e., "inland" from the stars (↑↑). (Bm. II, pp. 62, 63.)

↑↑ Therefore beyond them, the sun-star-Ovetdorr, p. 1155.

25. Gilyak. From Chontsamho I learned the following about the claws of the Gilyak with regard to the fate of the dying and the metempsychosis into aquatic animals and bears:

/750 cont./

tick and dies, if he does not see the proper means to free himself of the spirit, the only means that he has help him, however, is a shaman. He conjures up a *bhgu* (a good god), who removes the spirit from the sick man, and then the same *bhgu* is represented carved by the shaman himself or by someone else at the order of the shaman in long wooden sticks, which, when not used must be with the sick person from then on to protect himself in the future.

A sick man want wears a single amulet, a woman a double one. The *mgrunch* are always carved out of wood, especially the *wap-mgrunch*, which is only on the nose-band of the dead bear (Bm. pp. 116, 118) that a single *mgrunch* of birch bark may be found. This is made by the women. The amulets made of bear claws are always made by the men, since wood carving of all kinds is an occupation for only the men, carved out of wooden sticks. A number of amulets and figures out of cloth and therefore also out of birch bark.

The ideas of the Gilyak concerning the lizard (*mkrgrgn*) are similar to those concerning the toad and snake, except that much more attention is paid to lizard. The former are taken into the head of the sleeping person and is removed in a way similar to the above by a shaman with the help of an amulet-dog (*ka*) (1)

1. See Appendix 15 fp. /1156/, 16 fp. /1204/.

It is difficult to say how the Gilyak conceive of heaven (*ulb*, where the souls of the mentioned are said to go. As an answer to my question as to whether those souls go to one of the stars, which was also another, I was told that they also were beyond there, *kiu*, i.e., "inland" from the stars (↑↑). (Bm. II, pp. 62, 63.)

↑↑ Therefore beyond them, the sun-star-Ovetdorr, p. 1155.

26. Gilyak. From Chontsamho I learned the following about the claws of the Gilyak with regard to the fate of the dying and the metempsychosis into aquatic animals and bears:

/771 cont./

on the earth, while the soul of a murdered person has flown to heaven and therefore is longer needs earthly food. Furthermore, the idea may in part also go too to the reverence, devotion, and often very anthropomorphic treatment of the bear by the Gilyak. (Bm. I, pp. 64-66.)

44. Gilyak. Among the Gilyak, as among the Olcha (***), the

*** See Appendix 45, below.

the soul of a person drowned in the sea, or who has fallen into the (or into) a river, or who has gone up to heaven or to hilly, we, but goes into a seal-dog, *nad*, to be sure, into a *kighmch* or *pyglitlingg*. i.e., the seal-dog *kighmch* is represent a number of antelopes and figures out of cloth and therefore also out of birch bark.

The ideas of the Gilyak concerning the lizard (*mkrgrgn*) are similar to those concerning the toad and snake, except that much more attention is paid to lizard. The former are taken into the head of the sleeping person and is removed in a way similar to the above by a shaman with the help of an amulet-dog (*ka*) (1)

1. See Appendix 15 fp. /1156/, 16 fp. /1204/.

It is difficult to say how the Gilyak conceive of heaven (*ulb*, where the souls of the mentioned are said to go. As an answer to my question as to whether those souls go to one of the stars, which was also another, I was told that they also were beyond there, *kiu*, i.e., "inland" from the stars (↑↑). (Bm. ↑↑ Therefore beyond them, the sun-star-Ovetdorr, p. 1155.

45. Olcha. From Chontsamho I learned the following about the claws of the Gilyak with regard to the fate of the dying and the metempsychosis into aquatic animals and bears:

/773 cont./

yaran (↑↑). The tomb is chopped off several feet above the roots,

↑↑ On the specimen given in the Academic Museum the tomb is chopped off and the representations was supplied by a piece of wood specially made for the purpose. (Bm. II, pp. 161 (of) See Plate LXVI /p. 1208 /, Fig. 3).

painted (the top of the stump, /773/ end, with the painted end, which rises the ground at the place where the ashes of the murdered person lie, so that the roots, representing the wagmch, are in the ground. The wagmch are also represented among Gilyak, there are wags in many villages on the Amur, for instance, in Wawi, Kaki, Wati, Kaigdo, Tebech, and elsewhere.

According to Sieger's information, a wag is set up only for a murdered person who was killed by the hand of a Gilyak from another village. On the other hand, the Gilyak Olcha somehow in the same village, the latter does not get a wag. Similiarly no wag is set up for a man who died in the same village, and vice versa, or a brother, or in general if one relative kills another. In the case of a murdered person, the wag remained. The same if done with the corpse of a suicide; it is cremated, and no wag is set up.

The bird's head of the wag is said to be patterned after the bird-shaped amulet, which, in the Gilyak, is said to accord by the Gilyak and is kept, stuffed, in the same flying position as it has on the wag. Such stuffed skins of Gilyak's sections and segments are sometimes seen hanging on high frameworks in Gilyak villages. In the representation for the wags, the Gilyak give the head of the *gill*-tech of *ioe*, which are supposed to serve for him to take revenge on the murderer (1).

1. Perhaps the wags, by its threatening aspect, are explicitly said to be intended to frighten off the blood revenge, and this is the reason that no wags are set up in cases where the murdered person is administer --

/773 cont./

1. (cont.)

the burial place of a village -- or -- as in the case of a suicide -- it is automatically omitted.

Since the soul of a murdered person flies to heaven, it does not need any more earthly food, as stated in the *ulb* of the windening soul of a person who died a natural death. (Bm. I, pp. 64-66.)

62. Gilyak. As the Gilyak (on the west coast of Sakhalin) tell me, they bear their corpses and erect wags over the ashes of murdered persons. (G. W. E., p. 8.)

63. Gilyak. The Gilyak living in Ilde (situated in Ilpschi-wo (on the left bank of the Tymy on Sakhalin) said that they likewise erect wags for murdered persons. It is done along the Amur, in the Lunzan, and on the west coast of Sakhalin up to Arlak (excl.).

A *wag* is erected over only the ashes of the cremated corpse and, as along the Amur, has a tank, *pch* or *tonz*, and *pch-ngri* or *tonz-ngri* as a *ngri*. The *pch* is painted red and is among the Tymy Gilyak been the symbol of *mrf-mgrn*, that is, of a burial home manager chamber, which obviously corresponds to its significance. Only the *tchri-ngri* is painted red. (G. W. E., p. 8.)

See Appendix 15 fp. /1156/, 16 fp. /1204/.

64. Gilyak. From Arlaci on, along the west coast of Sakhalin, south to Pilja-wo, the last Gilyak village, the Gilyak are said not to cremate their corpses which is regarded as unclean but to deposit them in wooden coffins in small houses, just as among the neighbouring Ainu on Sakhalin and Saikalin and the Amg (G. W. E. I, pp. 8-9.)

/774/ According to another report, the corpses are interred south of Arlaci (G. W. E. p. 22).

65. Gilyak. The Gilyak are said far from the Russian village of Bogoroditsyn in the village of Tchi-ngri Gilyak of Pulij (Pulo on the map, on the right bank of the Amur), there were two very gracefully worked Olcha tombs ornamented with various decorations

Gilyak idols made out of carved human and animal figures.

"It is useless to ask the Gilyaks of to-day the raison d'être of the custom, [LSS: The bear fête] for they do not know; and, in any case, they would not reveal to a stranger the hidden meaning of their rites. The following is how a Russian fared when he tried to find out the signification of the ceremony, and I met with no more success.

Gilyak. It means the offering to Pal ni vookh.

Russian. Why do you not recite about it during the killing of the bear?

Gilyak. I don't know.

Russian. Do the Gilyaks punish the bear for his crimes?

Gilyak. No.

Russian. Why does the cham recite these charges in the bear's ear?

Gilyak. The Gilyaks have done this from ancient times. Ask the old men, perhaps they know something about it.

The old men, however, on being asked, knew no more."

25 For some time after the seal-hunt at the air-holes, when
32 the broken ice recedes from the shore, the Gilyaks get out in
52 boats and "feed the sea" out of muurs ('scoops for scooping water of the boat'), pieces of jelly called [79] mos, (1) porridge

1. Jelly is prepared by grinding a mixture of boiled skins of Siberian salmon, seal fat and water. As soon as the grinding is done, a lot of berries are added to the jelly and it is then left on the outside to cool.

and a dried plant ays, called puchka by the local Russians. Sometimes the feeding is followed by a seal-hunt on nearby floes.

After the first "feeding", pilgur tol-fənd ('major feeding of the sea,' literally, 'major throwing into the water') is arranged. Only after this "feeding" do the hunters put out to sea on a hunt.

5 For the "major feeding" women prepare two kinds of jelly-
2 mos and muvi --cook rice or millet porridge, prepare dried
6 sarana, peas, berries, tobacco, and dried stalks of puchka
5 (aγs). The Gilyaks believe that if the food for the dogs is not cooked--and they must be fed before daybreak-- the dogs will eat the sea offering and the latter will not reach its place of destination. To prevent this from happening, the Gilyaks specially feed the dogs of the sea spirits (according to the beliefs of the Gilyaks, spirits are human beings like themselves and have their own dogs.) For this purpose they wind puchka on fish-tail bones (mamγe) which they then throw into the sea before offering to the spirits. The Gilyaks believe that the dogs of the spirits will eat the fish bones and, having had their fill, will not touch the refreshments meant for their masters.

When all gifts are ready, a hunter carries them to the sea. Women are not present at sea offerings. On reaching the shore the Gilyak sticks two small twigs in one place, at the very edge of the water; one twig is a keγla-ʒəks twig and the other is a qosk əks ('rowen twig'). A small distance away from these he sticks another pair of small twigs at the edge of the water. These peculiar gates are called tayr. The offering is thrown into the sea through the tayr. First to be emptied are the uiγ-ŋir, (2) that is, troughs from which drowned men are

2. Uiγ-ŋir is made in memory of a man drowned in the sea. The first uiγ-ŋir "should be lost" quickly as the Gilyaks put it. Then they make a second one which

qan 'dog' they say aim.
to 'fish' they tomr 'leaf.'
loq 'flounder' they say pna-domr.
lo r 'trout' they say manm.
nemla 'linek' they say naχ-tomr.
va s 'lake-salmon' they say vǝtik.
al o 'kunzha' they say doχti. (2)

177 2. The Gilyaks say that they borrowed the words manm and doχti from Tungus.

198 ti r 'fire wood' they say ops; tuin ops-ket tuγr-arguda
225 'having taken fire wood here, we will feed the fire.'
la r 'seal' they say vaad; mor-vaad 'two seals,' tor vaad 'three seals.'
la r pud 'the seal came to the surface' they say ŧǝrŋ.
i d 'to kill' they say ŋazd.
pǝt 'tomorrow' they say mandǝa.
e r vida 'let us return' they say pǝχtkuda.
saru-mu 'full boat' they say ulvǝta-mu.
kǝr-ŋoqod 'hungry,' 'I want to eat' they say tava-ŋod 'tava hurts.'
krǝzd '(I, you, etc.) have had my fill' they say mat-toqŋ-taŋgad 'the little finger sticks out (?)' or tot-ŋod 'the hand hurts.'

198 urla-ḍus 'good meat' they say amra-elvla-ḍus 'amra bad
225 meat.'

əkila-ḍus 'bad meat' they say amra-urla-ḍus 'amra good meat.'

etc.

225 Apart from taboos pertaining to names the hunters must
784 also observe other taboos during the hunt. Thus, for instance one must not pour water out of the boat onto floe where seals had been killed. Xitkun, who told me about it, said that he all but lost his sight as a result of pouring water out of the boat onto floe with killed seals on it.

It is forbidden to stick a knife in the ground during the hunt.

It is forbidden to spit in the blood of a seal, etc.

[85] Not only the hunters are supposed to observe a number of taboos; the same holds for those who remain home and, especially for women.

Thus, those who remain home must not do any laundrying in the house of the owner of the boat. They must not pass any objects to one another across the fire, for, in that case, the seal at the seine would swim through it.

They must not cut leather for shoes (kiγid), otherwise the tola-ke might tear.

They must not cook hearts of seals until after the hunt.

A pregnant woman must not approach the sea shore, otherwise all ice might be carried off to sea and the hunters would not be able to hunt seals.

15 In this connection I quote from my Sakhalin diary one of my conversations with the Gilyaks. This conversation took place in the village Khoi on the western shore of Sakhalin (50 versts from the town of Aleksandrovsk on June fifth, 1928. I was sitting in Gilyak Roygin's yurt. Present were, besides Roygin and myself, the Gilyaks Kavzgun, Chulkin, Furaga and the late old man Pletunka, as well as one of my friends and the interpreter L. LA. Shternberg.

25 Roygin said: "When you go seal hunting in the spring you
25 know all that is going on at home. The seal will tell all. The
87 seal will not tell the good things, but he will invariably tell the
26 bad things that are going on at home. If, say, the woman at
84 home starts scratching her head, the seal on the floe will scratch his head with his paw. If they are fighting at home, the seals will start fighting. If the woman wash something at home and hang it out, the hunter is bound to miss the seal even it if were not more than five steps away from him. We say that all the hunter can do is hit the linen. Obviously, the 'god' kəs

225 has hung something in front of the seal. The seals will also
825 tell of a theft in the village. If the wife at home has sexual
787 relations with another man while her husband is away on a
626 hunt, the seals on the floe will likewise engage in sexual inter-
784 course. When they witness some such thing at sea, some of our Gilyaks will, after returning home, beat up their wives and later on find out from neighbors in the village what had really happened. Now, suppose you cook seal meat, eat it and pick your teeth with a little stick, then the seal in the sea will show how you picked your teeth with the little stick.

During the spring seal-hunt on floes, when the Gilyaks jump from floe to floe close to shore and kill seals with harpoons, those at home must not break any objects - say, plates or bowls, for otherwise the floe will break and the hunter, say, the father, brother or son, may drown. Therefore those at home must be very careful.

On the day when something goes wrong at home, the hunter will not get his seal. Then he returns home angry and tries to find out what deprived him and his friends of their quarry.

776 Roygin told me all this in order to prove to me the existence
825 of kes, 'god'; a point on which I did not want to agree with him.
225 "How can a seal, 20 versts from home, know what is going on at home? " he told me. "Surely kes must be telling him about it. That is why we say that kes exists."

225 Incidentally, after my conversation with Roygin, Pletunka
784 told me that the mrolv-nivevŋ 'ancient Gilyaks' observed the
67 following ui and "taboo," "sin" during a seal hunt: the guest must not touch the handle of a kettle or teapot. Only the master of the house (in the past as well as at the present time) could pour out tea or any other liquid food for the guest. If, even by mistake, the guest touched the handle of a kettle or teapot, he was obliged to tear a strip of material off his sleeve and put it in the (hearth). (1)

1. This word in my diary is illegible. As far as I can remember, Pletunka spoke of a hearth.

225 [86] During the spring hunt the Gilyaks of the village Kul
552 hunt different types of seals. They also catch an occasional
825 dolphin. They distinguish the following varieties and ages of seals: Pila-laŋr 'Sivuch'

1. Nav-ŋa 'present-time animal', i.e. a sivuch born in the given year.

2. Tje-ŋa literally: 'last year's animal', i.e. a two year old sivuch or one born in the previous year.

25 3. Pila-laŋr 'sivuch', literally: 'a big seal.'
52
25

Pəγi

Among the seals of this kind the Gilyaks distinguish a few age groups: a seal belonging to a particular age group is named accordingly. For instance:

1. Qrŋər is the youngest of all pəγi.
2. Mat-ŋəski-kəld is the next to the youngest pəγi. For the time being this name is conditional. Its etymology can be given as follows: mat-ŋəski-kəld; mat - 'smal,' ŋəski 'back,' kəld 'long,' little long-back.
3. Tje-ŋəsχəl last year's ŋəsχəl.
4. Qat next in age to tje-ŋəsχəl.
5. Siusui-ŋa next in age to qat, i.e. the oldest pəγi.

Qoma.

1. Heqr-motk - the youngest qoma.
2. Taŋarŋa - next in age to heqrmotk.
3. Arəfk - next in age to taŋarŋa, i.e. the oldest qoma.

Alχ.

Here the Gilyaks distinguish the olvarak - multicolored al and dalr - grey Alχ.

25 The sivuch is considered by the Gilyaks to be the most
37 valuable of all seals listed above. The toughest straps, dog harness and shoes (vamps and soles; tops are made out of the skin of other varieties of seals) are made out of sivuch skin.

If the quarry is big, the hunters prefer to take with them the extra hides with the fat and the heads of the seals, leaving the meat on the ice. They separate the head together with two jugular vertebrae (maχt) and two upper ribs.

25 When the Gilyaks kill a seal or a dolphin at sea, they first
82 "feed" it the root of the plant piskər. (1) If not enough of this

1. In villages further South they feed the root of the plant "orŋoχt."

plant has grown, they feed the grass muzŋi. When setting out on a hunt, the Gilyaks take along with them a sufficient supply of these plants. Having killed a seal, they open its mouth and through it they put the root of this plant in the nasal cavity. Gilyaks put the stalk of the plant next to the seal on the ice and leave the seal there. They also leave pər 'gall' of the seal on the ice and next to it they put piskər.

"Among the Gilyaks the Ch'uff, as they call the bear on Sakhalin, plays the greatest rôle in the animal world. He is regarded with peculiar sentiments, and the beliefs and ceremonies which cluster around his sacrifice are unique and interesting. The natives are fully aware of the Ch'uff's cunning, and regard him almost as a Gilyak, certainly as a competitor, and love to tell stories of his knowing ways. They describe how he will go a-fishing, by preference at night, but if by day, he will stand with his right paw held close to his breast lest the sun should cast a shadow on the water and frighten the fish; how he will get up on his hind-legs to fight, and parry a spear-thrust, or shield his heart from a shot, with his paw."

9: Hawes--255 T-3 (1901) 1903 Gilyak-1-2
116, 136, 225, 825

"In autumn a few seals ascend the river, and these are shot by the natives. They follow in the wake of the Salmo lagocephalus, or are driven before the attack of the dreaded grampus, or black killer (Orca atra). This terrible enemy, the largest of the dolphin family, is armed with a formidable dorsal fin, which in the case of the rectipinnia species attains to the enormous length of six feet. Not content with smaller fry, these terrible wolves of the ocean will even attack a large whale, gathering round it and gashing its throat and lips, and finally hauling it to the bottom of the sea to rise thence with great pieces of its flesh in their maws. Even the fierce walrus will crawl upon the rocks with its young to be out of the way of these voracious creatures; and when larger prey, such as the smaller dolphins or seals are not to be had, salmon and smaller fish furnish a meal for this hungry animal.

Hence, before it are driven ashore and up the rivers the seals, salmon, smelt, trout, etc., upon which the Gilyak lives. It is, therefore, not unnatural that he should look upon the 'sword dolphin,' as the Germans call it, as a friend to whom he owes many a successful catch. The grampus never meets with a hostile reception from the natives, and if his lifeless carcase be cast up on shore, rightful honours are paid it.

It is otherwise with the white fish or white whale Delphinapterus leucas) which haunts the mouths of rivers; for his flesh provides a feast for the Gilyaks. From the skin, [L SS: of the white whale.] I believe, and certainly from that of the rarer seal

116, 539, 766, 775, 825

"Wild swans occasionally flew across high overhead, and a woodpecker could be heard tap-tapping the trees. Our natives eagerly asked us to shoot the eagles which soared aloft or settled on the top of a high tree, only to fly away as we approached within gun-shot. These were the white-tailed eagles (Haliëtus albicillus), prized by the natives for their tail-feathers, for which they declared the Chinese gave them three dollars (about 6s.). The Japanese (in Yezo) are said to use them to indicate the residence of a person of importance by placing them over his door; in any case, the Gilyaks themselves value the feathers, which they use for arrow-heads. The wings are also prized by them, being placed at the grave of a Gilyak who has been murdered or has committed suicide, to aid his soul in its flight to heaven."

116, 527, 825

"[LSS: During the bear fête] The bear was then paraded down an avenue of tzakhs stuck in the ground, to the place of execution. On the mainland there is much more merciless teasing of the animal than on Sakhalin. On the banks of the Amur the poor brute is dragged round for three days, and visits each hut in turn, where he is tied up and poked and teased, not always without danger to his tormentors. The smallness of the Sakhalin dwellings prevent such exhibitions on the part of the bear. While the poor animal was left tied up to ruminate over his position, the natives went off to feast; but first they took of their luxuries, rice, whortleberries, etc., and fed their victim until he could eat no more. This is a characteristic trait of their attitude towards Bruin. They were about to kill him, yet they fêted him. It was an attitude of apology. They realized that their conduct must appear ambiguous to him, and therefore, though he had to die at their hands, yet they would do all that they could to retain his good-will. Therefore they feast him loyally with all manner of dainties before he meets his fate at their hands."

"THE BRAVE GILYAK AND THE GRATEFUL TIGER

[LSS: For the text of this tale, see category 539, pp. 121-124.]

The story of Androclès and the Lion will occur to the reader. It is observable that in the East transmutation is into the larger animal forms, thus here is a tiger-man and, in a Kalmuck tale, a demon appears as a buffalo, as opposed to the transmutation into a wolf of a Russian tale and into a yellow dog of a Mordvin tale. But the man has not been transformed into a tiger by a curse, as in Western werewolf stories; on the contrary, the general Gilyak belief that there are special beings in the mountains and forest who, having the appearance of Gilyaks, can assume the shape of wild beasts, seems here shadowed forth. The absence of ceremony is noticeable when the Gilyak marries the tiger-man's sister."

"As the flames lick up the pyre, the soul takes refuge in the raff [LSS: a funeral hut] through the hole or opened door, thence to emerge later and begin its long journey to that other world village of Mligh-vo, which the Amur Gilyaks say is in the centre of the earth, but the Sakhalin Tro and Tim Gilyaks say is 'There'—pointing to the east—'where the sun rises.'

Since it is necessary that the spirit of the deceased shall travel as he was accustomed on earth, the spirits of the dogs, the sledge, etc., must all be released. The dogs, in number according to the wealth of the departed, are all killed, being strangled or beaten to death. The sledge is broken, and so are also his spear (kakh), his bow (punch), and his arrows (ku), and quiver (kh'm), or if the deceased [246] be a woman, then her ear-rings (mestch) [LSS: Erratum; it should read meskh] rings (koi-ba), and her fish-knife (ungu-dzhakho). All these articles will be needed by the deceased in the future life; but they must be broken in order to finish their earthly existence, and to give release to their spirits. Every object has its soul, which resembles it. This is set free in the case of inanimate objects only on being broken, and is then used by the soul of the deceased. To burn them is not to be thought of, because they cannot have that honour done them.

Camping out on the banks of the river Tim in the forest, we were casting around one night for fuel, when Mr. X. came upon a bit of shaped board which he was about to throw on the fire, when Vanka stopped him, crying out, 'No, no'. Uich, uich'. It is a piece

20: Bush--102 T-2 (1865) 1871 Gilyak
116, 764, 775, 825

"Their funeral rites are sometimes quite impressive. The remains are first burned, and afterward a small wooden house or tomb is erected over the ashes. At death the soul is supposed to take up its abode in the favorite dog of the deceased, where it remains until released from its confinement by the death of the animal. To facilitate its escape, it has become customary to sacrifice the dog at the tomb of its master, the creature being first fattened for the occasion."

24 even this hunt is not as easy as one might think. First of
78 all, the preparation of the bait requires great caution;
39 furthermore, the hunting ground where the bait is left lying about must be frequently visited on snow shoes, for countless crows are usually on the look-out and as soon as the fox succumbs, they pounce on him and his pelt can soon become eaten away.

24 Sometimes cross-bows are set up to catch the fox, but these are not as effective for this animal as for the sable.

Up to now the sable has been one of the most important sources of income for the Gilyak, although the Amur sable is less valuable than that which comes from the Okhotsk and Kamchatka. The sable is hunted in fall and winter. In fall numerous snares are laid; for instance, horse hair among willow shrubs along the rivers. Or a snare is set up in a certain calculated manner. For, the sable, when it wants to cross a small stream never fails to use a log that has fallen across it, if he can find one. Now, such logs are purposely prepared for him, and snares as well.

With the first snow fall he is pursued by dogs and killed with buck shot; the pelt is thus little damaged, for two or three grains of shot suffice to kill the animal.

A method commonly used and one that can be applied all winter long, consists of setting up cross-bows, the mechanism of which is cunningly devised. The shaft stands on a stake; behind the arrow there is a sort of cock made of a knee-shaped piece of wood; on the latter is a trigger from which a long thread leads diagonally forward and down and is fastened somewhere on the ground. As soon as the sable in passing touches the thread, the shot is fired.

36 The tiger is known to the Gilyak and they have a word for
24 it in their language, but it is not hunted, because it occurs
25 only rarely in the Gilyak country, and not at all on Sakhalin, and because they regard it as something more than a wild animal. This fear has probably [123] been passed on to them by the Manchurians and the Goldi. The tiger of the Amur-Ussuri country is of the mightiest and most powerful of its kind, as well as extremely cunning; but for humans, especially for Europeans, it is not nearly as dangerous as it is in India, because it finds more food. (1) Only when man

n a division of labor between men and women.
, does carpentry, makes weapons, sleds, etc.,

527 Sometimes the dogs also draw sleds in these races.
541 Dog racing, besides being an amusement also has a pra
437 tical significance, for the good runners find immediate
buyers. In fact, the bear festival is a sort of fair, where
various things are bartered.
527 The chief figure of the festival, namely the bear, is wel
825 fed throughout the whole period and is repeatedly led throu
the village, at which time he pays a call at each house and
this is done in such a way that he has to go from one house
to another at an angle, by way of the adjacent section of th
river. This symbolic procedure assures the house of "an
abundance of fish". He is always led by several men who
put up the necessary number of chains and ropes on all
sides. In the houses he is treated to fish, millet, and cra
berries, and sometimes he is also teased. Some Gilyak al
prostrate themselves before him. This is by no means wo
ship, however, as some have assumed. Some do it for fu
some in earnest, calling on the spirit of the bear not to s
revenge on them after he is dead. Sometimes the bear is
not given such expressions of veneration.
527 When the bear's immolation nears, he is tied to a stick
782 which has been driven in the ice, and then he is shot with
766 arrows. In this procedure the archers seek to outdo them
selves. At last the unfortunate bruin is given a merciful
blow with a lance. He usually dies in peace and majesty,
with his fore-paws resting on his wounded chest. When th
happens the woman who has had charge of him is often hea
to weep loudly. Finally, funeral pyres are lit and the Gily
seat themselves around them. Pieces of bear meat are
passed around and before they are eaten they are lightly [2
roasted. Eating and tea-drinking are the main activity at
bear festival. The stick music which is here offered as en
tertainment has been described. Special music is produce
527 in the village of Kola. This village is the northern outpost
361 of the Gilyak settlement, on the coast of the Sea of Okhotsk
534 about 200 versts from Nikolayevsk-na-Amure. (1) Here a

predominantly of a practical disposition and are not fond of rumination. Moreover, they do not yet have firm beliefs and their prophets, the shamans, often misuse their imagination so boldly that their assertions contradict those of other shamans or of everyday experience. From conversations, from customs and actions, we may conclude that the Gilyak believe in a supreme being, in many lesser spirits, both good and bad, and in immortality, but they have not emerged from fetishism.

God (kush or kur) made everything, he lives in heaven and never appears. He is held to be good, but otherwise nothing is said of his characteristics. In one village, however, I heard that God is very angry if a shaman is put to death. In this we may already see something like priestly self-glorification. Kush is not worshipped, in fact, one does not bother much about him, only now and then something is sacrificed to him, but it is questionable whether this is meant for him or for his subordinate spirits. For instance, when a Gilyak crosses a dangerous passage on his journey, he pours a bowl of spirits on the earth or in the waters: this is the sacrifice to God. Sometimes one of the best dogs is sacrificed to him, whereupon it is eaten. Near a village a stake is sometimes rammed into the earth and beneath it millet or fish are buried, or tobacco and such things [240] are tied on top, - all this is meant to be for the supreme being. Such a stake remains standing until it rots.

The bear usually appears as the executor of divine ordinances, and he punishes the bad people during their lifetime. As a matter of fact, there are a number of superstitious ideas connected with the bear, and thus he may be regarded as a "sacred" animal, but nobody regards him as a god or demigod.

The Gilyak do not bother much about the tiger, for they seldom encounter him. But the Goldi and Manchurians regard him as much more than a wild animal. He is regarded as having some mysterious power, he is spoken of with a certain caution and referred to as "the honorable colored one". (1) It is also said of him that he only attacks bad

1. Barabach, Journey on the Sungari. 1874. (Published in Russian).

people. However, if the tiger creates too much havoc and kills the cattle of the Manchurians, they set traps for him

825 and if he gets caught, he is killed. But even after that he is
789 handled with respect, that is, his corpse is laid before the
278 house of the idols and left there until it begins to decay. Besides the skin, the bones and the gall are immediately sold, for the former are held by the Gilyak to make a man brave, and the latter is used for all kinds of medicaments.

776 Of the numerous spirits whom the Gilyak are supposed to
782 know about, some are good and protect man, but the majority are more or less evil, and must therefore be propitiated with gifts. The chief of the evil ones is called Kins (on the island of Sakhalin: Kinsh) and to a certain extent corres-
778 ponds to the devil, Ahriman, etc. of other peoples. "Spirit"
782 and "idol" are both called kegn, for the idols are not only
532 symbols, but at times also the dwellings of the spirits or kobolds. Usually they are kept in the storage huts and only hauled out on special occasions. If an idol is "heavy" it means that its inhabitant, the kobold, is at home, but when it gets "lighter" than usual, the spirit is roaming about somewhere. The offerings here also consist of millet, tobacco, etc.; very often the face of the idol is smeared with cranberry juice, which seems to have a powerful effect. Wood chips are also hung around its neck. The idols have different appearances. A guardian spirit, for example, [24] lives in a wooden cone that is placed somewhere in the vicinity of the yurt when it is built. If the yurt must be taken down, the idol remains, and at the new dwelling a new one is made. Some idols are crude imitations of humans, others have the shape of a bear and are sewed into bear skin, still others have the shape of a bird, etc. Some human-like idols represent children, others old people. Some have hands and feet, others only a head which sits on a body showing a navel. Small idols are sometimes worn as talismans. These also usually have human forms, but some look very
789 different. Thus the talisman against a difficult birth is a
844 figure carved of wood, representing a double acorn.

Besides the idols, there are some more or less strange-
778 looking objects not made by the Gilyak themselves, which
782 have a mysterious significance for them. Such an object
177 stands on the so-called Tyr (1) about 80 versts from

1. From the Gilyak village Tyr.

Nikolayevsk-na-Amure. On a high, precipitous river bank a Bhuddist temple formerly stood; of this only a few stone pillars remain, bearing Chinese and Mongolian inscriptions.

171 among the Goldi, are in use throughout the Gilyak people
751 and are essentially the same as those discussed earlier
301 (Number XIII, p. 207) [see Goldi source 18: Genest--
Analyst]. The Gilyak on Sakhalin Island whose houses
372 Jakobsen entered were likewise highly indignant whenever
462 he left the house with a lighted pipe or when his companions
776 extinguished the fire burning in a hut by pouring water on it.
For in their opinion such things tended to conjure up destruction not only over the inhabitants of the one hut but over the whole tribe. The inhabitants of one house in the village of Varki below Nikolayevsk predicted the same result when Jakobsen was about to light a fire for making the tea, and they forced him to wait till the house-wife saw to this task, since, in their opinion, this was a job only to be performed by her. Plainly this conduct has its basis in the sacred position of fire. [380] Though this no longer leads to a personification of a fire god among the Goldi and the Gilyak, it no doubt existed among them at one time as it still does today among the Buryat.

776 The system of gods of the Gilyak is in no way behind that
171 of the Goldi in variety. Human and animal figures in color-
825 ful diversity serve as representations of celestial beings.
796 Here, too, there is a great similarity to the religious conceptions of the Goldi; the most important difference seems to me the one that was touched upon earlier (XIV, p. 223), [see Goldi source 18: Genest--Analyst] the fact that the Goldi pay zealous homage to the tiger while the Gilyak do honor to
796 the bear. It is true, though, that this homage is disastrous
415 to the bears since it means keeping a number of these
531 animals imprisoned in the cages in every village and killing
231 them at a bear festival. Before the festival the bears are fed plentifully for an extended time by means of large wooden spoons prepared especially for the purpose and decorated
796 with ingenious carvings. These bear festivals are usually held late in autumn and in winter and they are affairs of the greatest importance to their celebrators. I will now give the description of the festival that Jakobsen had the opportunity of observing in person.

796 On the 7th of February, 1885, the traveller arrived in
622 the early morning at the Gilyak village Vaida about 30 versts
574 above Nikolayevsk, where, as he had been informed, a festival was to take place on that day. From several other villages, some of which were considerable distances away large numbers of guests had come in already, and the whole place was astir in anticipation of the festival at hand. The opening of the bear festival is in the hands of the village

796 on a bed of fir twigs as on a bed of state and the participants in the festival visit it for the last time. After two or three days they pull off its hide and the meat is distributed among
796 the guests who eat it with relish. There is a strange con-
825 tradiction in these bear festivals. On the one hand, they honor
531 the bear as a celestial being, as is proved not only by its pictures serving as idols and amulets but also by the tender attentions that they show the animal during its imprisonment. For this speaks also the solemn way of killing it, as well as the ceremonious procedure used in treating the corpse; also, the circumstance not mentioned above, that the traveller was not allowed to take with him one of the willow sticks of the fence which was later used for the bed of the dead bear. He would all the sooner have done so since the stick was distin-
796 guished by tasteful carving. On the other hand, they are not
825 afraid to kill this animal that they honor as a divine being,
756 and by a death, even, that is only the conclusion of a rather barbaric torture. Furthermore it is a curious circumstance that during the whole course of the festival, as far as Jakobsen was able to observe it, the shaman was not even visible, even though the latter plays such an outstanding role at all the
796 religious ceremonies of the Amur peoples. What, besides, is
782 the purpose of leading the bear out on the ice of the river?
776 [in the bear festival; see p. 381--Analyst] Should it suggest the idea that the animal is to be offered as a sacrifice to the river honored as a god? And if this is really the case, what a strange idea it is to sacrifice one god to another and to eat him up in the end. And why don't they kill the bear on the river bank and let at least its blood flow into the water, just as the fish gods are entrusted to its waves? What, furthermore, is this sacrifice meant to effect? and what is its nature? Are we to imagine it as a sacrifice of thanks offered up to the river dispensing blessing and nourishment, or as a sacrifice of expiation by which the river is supposed to be made favorable to the dwellers near it, because the latter are well aware of their dependence on the river and its power to bring them destruction? In the former case one would think that the celebration would take place as soon as possible after the time fishing ended, that is, about September or beginning October, while these festivals actually are not till later. The second assumption does not agree, again, with the circumstance that the nature of the festival is a thoroughly joyful one, as is proved, at least to my mind, by the description of it given above. This is not contradicted, either, by the solemn silence which reigns during the lethal shot and the
796 preparation for it. For it is by no means necessary to see

dent showed me several articles made by the pupils, including wooden spoons, forks, bowls, and cups, and he gave me for a souvenir a seal cut in pewter, bearing the word, 'Fulyhnin' in Russian letters, and having a neatly turned handle.

The school is in operation ten months of each year. The superintendent said the children of the Russian peasants could attend if they wished, but very few did so. The teacher was a subordinate priest of the Eastern church. The expense of the establishment was paid by Government, with the design of making the boys useful in educating the Gilyaks.

The Gilyaks of the lower Amoor are pagans, and the attempts to Christianize them have not been very successful thus far. Their religion consists in the worship of idols and animals, and their priests or *shamans* correspond to the 'medicine man' of the American Indians. Among animals they revere the tiger, and I was told no instance was known of their killing one. The remains of a man killed by a tiger are buried without ceremony, but in the funerals of other per-

BEAR IN FRONCEBHOP.

sons the Gilyaks follow very nearly the Chinese custom. The bear is also sacred, but his sanctity does not preserve him from being killed.

In hunting this beast they endeavor to capture him alive; once taken and securely bound he is placed in a cage in the

825 middle of a village, and there fattened upon fish. On feto-
826 days he is led, or rather dragged, in procession, and of course
796 is thoroughly muzzled and bound. Finally a great day arrives on which Bruin takes a prominent part in the festival by being killed. There are many superstitious ceremonies carefully observed on such occasions. The ears, jawbones, and skull of the bear are hung upon trees to ward off evil spirits, and the flesh is eaten, as it is supposed to make all who partake of it both fortunate and courageous.

I did not have the pleasure of witnessing any of these ursine festivals, but I saw several bear cages and looked upon a bear while he lunched on cold salmon. If the bear were more gentle in his manners he might become a household pet among the Gilyaks; but at present he is not in favor, especially where there are small children.

231 Ermines were formerly domesticated for catching rats, the
325 high price of cats confining their possession to the wealthy.
326 Cats have a half-religious character and are treated with
439 great respect. Since the advent of the Russians the supply is very good. Before they came the Manjour merchants used to bring only male cats that could not trouble themselves about posterity. The price was sometimes a hundred roubles for a single mouser, and by curtailing the supply the Manjours kept the market good.

796 The Gilyaks, like nearly all the natives of Northern Asia,
152 are addicted to Shamanism. The shaman combines the functions of priest and doctor, ministering to the physical and spiritual being at the same time. When a man is taken sick he is supposed to be attacked by an evil spirit and the shaman is called to practice exorcism. There is a distinct spirit for every disease and he must be propitiated in a particular manner. While practicing his profession the shaman contorts his body and dances like one insane, and howls worse than a dozen Kamchadale dogs. He is dressed in a fantastic manner and beats a tambourine during his performance. To accommodate himself to the different spirits he modulates his voice, changes the character of his dance, and alters his co-

/254 cont./

832 It is noteworthy that they do not evaluate beauty only
574 from their racial viewpoint. Men and women both
826 609 liked /255/ Russian women. Of male Europeans, the Gilyak women even liked types unfamiliar to them, such as redheads or blonds. Thus, for example, my friend Bronislaw Piłsudski, redhair-blond, enjoyed great admiration among the Gilyak, not only because of his sympathetic attitude toward them, but in particular on account of his attractive appearance. They referred to him only as poch urakhrh -- "handsome man," literally -- "beautiful in face," and when he left Sakhalin, the Gilyak women as a farewell present dictated to him songs of declarations of love.

In their love songs they sing not only about beauty, but also about "white skin, like the bark of a birch tree," lush heart like a bird reaching to the waist, hair made sleek), gracefulness of gait ("with her head inclined to the side,
[198] smiling she walks," "with a six-foot stride he walks"), physical strength or size ("her trunk is as firm-spread, "his legs go into the ground up to the shin").

832 Of course, elegance in clothing also plays no minor
241 role in the aesthetic appreciation of one's sweetheart. In
211 their love songs they sing about women's clothing embroidered
533 with finery, about a great number of copper rattles sewn on, and so forth; they sing about men's black dog-skin fur coats, shirts made out of variegated seal-skins, rich headbands of fine squirrel skins, etc. Women's summer clothing that is black in color is considered the most beautiful; men play the dandy in shirts that are sewed half of red and half of white or dark blue material. But along with outward beauty, moral qualities are also valued.

832 Women like in men the traits of manliness and reliability
574 ("thy voice is like the voice of an urdla n'ivukhr, i.e., re-
[467] spected man"), or the talents of a conversationalist -- jester, singer. Aside from outer beauty, men admire in women the traits of femininity, which Gilyak women possess to a great degree both by nature and also due to early training; from

832 childhood a little girl is taught to speak with a soft melodic
574 quality and to give her face a dreamy coquettish appearance.
867

A woman not infrequently succeeds through her talent for
832 singing. In their songs the women are capable, not only of
843 expressing their love with great delicacy, but also of ridiculing
826 unwanted suitors most maliciously. In her sarcasm the woman does not stop at any hyperbole. In one song the nose of the undesired one is compared to open patches of water in a frozen surface, to an open door, and his clothing, his dogs, his harness, etc. are described in similar tones.

839 /256/ Sexual Abnormalities and Perversions. I asked the
Gilyak many times if such sexual perversions as pederasty
and bestiality were practiced among them. No one, ap-
parently, had ever heard of any cases of pederasty. As for
[198] bestiality, only in one village on the Tyms was I told, and then with disgust, of one psychically sick Gilyak who had
832 copulated with a dog. The attitude of the Gilyak to these
839 perversions is made clear by the following legend, which I
wrote down on the Amur. The tiger, the panther, and even
the lion (?) were once men. Once, by chance, the god Kur
saw that they were copulating through the rear orifice. Then
in indignation he said: "Well, since you copulate like
beasts, henceforth be ye beasts forever." Thus, in the view
of the Gilyak, the above-mentioned perversions are acts which make a man like a beast.

143 The Gilyak have an extremely simple attitude toward
826 hermaphrodites (mukaud in the eastern dialect, miskiy --
in the western dialect), in whose peculiarities they apparently see a plain anomaly, but feel no abhorrence for them and are glad to have sexual intercourse with them. Marriages of
[588] hermaphrodites are a common event.

1; Shternberg--374 E-5 (1890-1897, 1910)1933 RX2 Gilyak RX2

/256 cont./

143 In view of the fact that in ethnographic literature sexual
826 intercourse and marriages of hermaphrodites are often con-
fused with homosexuality, I shall cite very characteristic
instances of hermaphroditism from the life of the Gilyak known
to me. On Sakhalin I knew of two cases. In the settlement
of Yama, near Aleksandrovsk, there lived an old Gilyak,
Chubuk, who was known as a hermaphrodite, since up to a
certain age he considered himself a woman (the membrum
virile was underdeveloped) and wore women's clothing.
Later the membrum virile attained the proper development,
and he began to wear men's clothing and finally married.
143 I learned of another instance in the settlement of Myy Gyrk
826 on the western shore in the far north of Sakhalin. Here I once
met two young people sitting on the shore, a man and a
woman, who appeared to be spouses. I immediately noticed that the latter was dressed in a man's fashion. My companions explained that only a year ago she had been wearing men's clothing, considered herself a man, and was very friendly with her present husband. Once they went fishing together. They had to spend the night together, and then the hermaphrodite revealed her secret to her friend. From that time on they began to live together and ended up by getting married, although people strongly urged the young man against
[538] /257/ taking this step. Similar cases may easily have given
[594] rise to the legends about transformed persons (about werewolves).

On the Amur the Gilyak Putuk told me the curious details concerning his hermaphrodite friend. The latter had been a girl up to a certain age. Suddenly he began to notice that he was developing a membrum virile, which would sometimes grow larger, sometimes diminish, and sometimes disappear completely. He communicated this to his lover, who came to him at night and was convinced of the truth of his words and on the next day told everyone about it. In the course of several years a beard grew and the male organ was definitely developed, although his vagina was also fully developed, and he could have intercourse with men. After

1; Shternberg--375 E-5 (1890-1897, 1910)1933 RX2 Gilyak RX2

/257 cont./

143 that he began to wear men's clothing, got married, and now
826 is the foremost hunter of the vicinity. Normally he lives
588 with his wife, but sometimes copulates with men. He considers the latter more pleasurable and speaks of himself with pleasure: "I have two chancer, two joys." All treat him as an urdla n'ivukh. In all I was able to count five such cases among the Gilyak, the number that Bogoras found among the Chukchee.

881 The Gilyak have no special rites at the time of attain-
[302] ing sexual maturity. The only outward sign for a maiden who has attained sexual maturity is that she begins to plait her hair in two braids. The moment of the onset of sexual maturity for a maiden is considered the menstrual period, which ordinarily begins in the thirteenth or fourteenth year. This moment is considered the beginning of marriageable
881 age, although the proper term for a woman who has attained
302 sexual maturity is the expression -- "a woman who has seen
117 her body," i.e., whose breasts have grown to the point where the can see them. A similar term exists for men -- "a man who
[302] has seen his body," but in this case the word "body" refers to the mustache.

881 Some time before the onset of menstruation the mother
867 prepares her daughter for the approaching change in her life and instructs her in all the necessary rites and taboos connected with blood. The Gilyak, both men and women, fully recognize the significance of menstruation as the mark of sexual maturity and do not have sexual intercourse before its onset. Adult Gilyak frequently marry little girls and from the first day sleep with them under one covering, but do not begin sexual intercourse until the wife informs her husband of the onset of the first menstruation.

Gelji Ri
Gilyak
Sakhalin Island

/409 cont./

At is seen from the above description, the clothing of the Amur peoples, to be sure, offers much that is significant and original, but in no way such pervasive peculiarities and differences for the individual tribes that on the basis of it one could consider the latter more pleasurable and speaks of himself with to this or to that people. The Gilyak, for instance, fundamentally different in origin and language from all the other Amur peoples, cannot be distinguished by their dress from their neighbors, the Olcha, and the latter in turn imperceptibly lead over to the Goldi, etc. Like climatic situations, like conditions with respect to food and subsistence, like ways of life, like cultural influences, and constant reciprocal intercourse have also in the course of time had a leveling effect on the clothing of these peoples and in part reduced and in part wiped out completely the differences that presumably were formerly present.

This is not the case with regard to another aspect of their appearance, the hair style. In this respect, quite the contrary, out of the uniformity that most probably formerly prevailed there developed in the course of time, as a consequence of certain political events, differences which today to a certain extent separate even closely related peoples of the Amur region and make it possible to recognize immediately the affiliation of single individuals to one or another of them.

The Gilyak wear long hair parted in the middle and
302 plaited in one braid for the men or two for the women, which hang down over the back. If it is too short or too sparse to be plaited, it hangs down loosely from the head, which gives the individuals concerned an untidy appearance, and old women a witchlike appearance. A luxuriant growth of hair and a long braid are regarded as adornment, but I did not see the Gilyak artificially lengthen the braid, as the Chinese do, by plaiting
[192] in black silk. Baldness, on the other hand, is subject to ridi-
826 cule. In order to promote the growth of hair, children are shorn
[356] from time to time, and occasionally, especially in the case of
301 boys, a tuft of hair is left standing somewhere on the front of the head, tied or plaited, and at the tip provided with a beaded rosette hanging down over the forehead (1). Adults, however,

/211 cont./

*796 visibly amused, permitted them to do. The choice of the archer
231 who is to dispatch the fatal arrow toward the bear, however, is
[354] made by the owner himself and is regarded as an honorary token
of his favor. For the two animals belonging to him Iudin had
chosen two young people, one of them an Olcha from Tschlwi
whose father was a friend of his and from whom he had bought
one of the bears. Both animals, hit in the right lung at a dis-
tance of about five paces, fell dead after the first shot; the third
animal died slowly after it had been hit by two arrows. The blood
[184] which they lost in dying was immediately covered with snow, for
●826 otherwise someone might step in it, which would definitely be
unlucky.

As soon as the bears were dead, they were dragged into
the kadlra by their chain and an auxiliary strap tied around the
snout, and put down at the places where they had stood in life,
on a bed prepared for them out of peeled sticks. Here all three
carcasses lay in the same order and the same position: the snout
and the front legs to the front pointing toward the entrance into
the kadlra, the hind legs to the rear, pointing toward the lisng.
The neck /712/ and body bands were taken off of them and the
snow beaten off their fur with sticks. Next the carcasses were
skinned and cut up. For this purpose a /illustration appears here/
strap was next slung around the neck of the animal and attached
[184] to the stake in front. Again it is unlucky to step over this strap --
one may only walk around it, either in front or in back. The
bear was now rolled over on its back, and a cut was made down
the middle of the entire belly side, beginning at the throat, and
from this middle cut four others went out to the legs. Then the
fur was stripped off and cut around the paws in such a manner
that a ring of fur remained above the claws on each one. After
the belly side had been skinned, the animal was turned over and
the fur stripped off the back side up to the head. Then the man
standing at the tail end once more waved the fur up and down
over the carcass and threw it over the head of the bear to his
companion at the head end, who threw it back again. This

262 Of farinaceous food, they eat only huda (millet). It is
439 bought from itinerant Russian or Chinese merchants and
eaten as a porridge or in soup. They love potatoes and
bread, but both are more expensive than millet and therefore
they seldom have either.

Cedar nuts and berries are their favorite dainties. Cran-
berries, raspberries and black alder berries are gathered
for the winter. In bad years, when the salmon catch was poor,
they gather and consume great numbers of berries and espe-
cially cedar nuts, as a substitute for more substantial nour-
ishment.

272 Tea the Gilyak love almost as much as spirits. They use,
of course, only the commonest variety, that is, brick tea
which is sold in the form of compactly pressed bricks but
has nothing added. They do not, however, drink it regularly,
because they often do not have the money or the opportunity to
buy it. If they also have sugar for their tea, these people are
utterly happy.

263 As a condiment and spice they use practically only the leek
● 827 of the cherenesha. On the island of Sakhalin, according to
Schrenk, the semicia pseudoarnica is also put into the soup.
Salt is now regularly used. Some Gilyak maintain that since
they have been eating salt, their sense of smell is no longer
so acute. And that formerly they could tell what animals had
passed through the bush (?).

273 Like all savages, they love spirits above all; it is also the
439 bait by which all kinds of itinerant merchants entice them.

Liquor which is smuggled in from China (suli or chanshina)
is very high in raw alcohol and the drunken state which it
induces [112] often has elements of near-insanity. The Gilyak
do not know any other intoxicating beverage.

276 Tobacco is the best-loved indulgence of young and old of
439 both sexes. It comes from neighboring Manchuria and is not
very strong. Children of six to eight years already smoke,
although not all adults permit this.

They do not smoke opium, probably because it is very
expensive. After this general account of the various articles
of nourishment and intoxication, I should like to add something
about the methods of preparation of the food.

252 During the day the food is mostly eaten cold; cooking is done
264 toward evening. The cold food is at the same time usually raw.
415 Roasting is almost unknown, and the number of cooked dishes
is small. They consist mostly of millet porridge and soup.
One kind of soup is worth describing because of its odd manner
of preparation. The assembled company put dried fish into

828

*835 The right to sexual intercourse with the wives of brothers
●828 has grown to be such an ordinary idea among the Gilyak that
829 they are not able to imagine an order of things whereby a
woman could be the private property of one man. The Gilyak
youths were extremely perplexed by my asking them so often
and so persistently about these relations; they considered
them so commonplace that they should not, according to their
way of thinking, have caused any doubts at all, and they asked
me in surprise: "Is it possible that it is different among you?
Is it bad for you to sleep with your brother's wife?" i.e., not
permitted, finding that their law is better than ours. It goes
152 without saying that human nature remains true to itself. The
*835 Gilyak, too, is jealous, and in other cases where the matter
578 does not concern his tuvn he can react with the unbridled passion
684 of primitive man. It means nothing to a Gilyak to kill a rival
or have a bloody duel with him. But when the affair concerns
/179/ his brothers, then, thanks to the notions that have been
a part of him since childhood and to a whole set of prohibitions
that we shall discuss below, the brutal instinct loses its power
over the Gilyak; he either does not react at all to the flirta-
[182] tions of his wife, or quite weakly. To avoid friction between
brothers, however, some preventive measures are practical.
[602] Thus, for example, custom dictates that the older brothers
[584] not only yield primogeniture in marriage to the younger
brothers, but even that they help them with "valuables" for
the purchase of wives.

*835 At first glance such a custom seems all the more strange
182 in that the older persons often do not have sexual rights to the
578 wives of the younger. But, on the other hand, another ad-
vantage is gained; having married off their younger brothers,
the older brothers are freed in the future to a certain extent
from the encroachment of the younger brothers on their own
wives. Though such a preventive gives security, albeit weak,
with regard to own brothers, the younger class-brothers are
too numerous to be all married off in turn and secured
against. By way of an exception, I observed several cases

116, 732, 828

"Yungkin announced Gilyaks. A party were returning to Chaivo, and seeing our fire ha
stopped for a warm, a pipe, and some tea. They joined us around the cheerful blaze,
talking volubly, and taking some pleasure in pointing out to us one of their number, wh
they said, had a devil in him. He was an idiot, one glance at his face was sufficient to
determine that, and without showing any violence continued to make the strangest con-
tortions. His presence completed the weirdness of the scene, this group of uncouth
figures of a primitive people crouched round a fire on a desolate island on a wild night
The madman, who was known as 'Oto,' lived in one of two huts which are on the opposi
side of the Strait of Chaivo. He was not [251] allowed to work, but his comrades suppli
all his wants, for they regarded him as a kind of sacred person singled out or set apar
by the unseen powers. He was not, however, permitted to have a wife."

ng the Gilyak's, many persons are liable to convulsive attacks, which are
ed by a fainting period, during which the sick person reveals to those around him
ulars of devils, heavenly beings or sea creatures. The patient believes firmly in
has seen.(1)

1. L. Y. Sternberg, Tale I, Note. 29."

/18 cont./

173 hurricane breaks up the joined ice-floes and carries separate floes
174 together with the hunters caught on them, into the /19/ open sea.
183 often throwing them on the shore far from their place of residence.
One can also not infrequently see tremendous pieces of turf, on
which dozens of people could be placed, being carried on the
waves of the sea, having been torn from the coastal tundra by storms.
During the civil wars among the Ainu, when someone urgently
needed to escape from persecution, there existed a practice accord-
ing to which the persecuted one fearlessly transferred his family and
his boat to a "hovykh" which happened to be passing by fixed on it
the sacred pole with the sharpened wooden tongues, and entrusted
his fate to the caprice of the wind and the current.

Now, if we consider that the currents pass from the north
along both shores of Sakhalin Island and the continental coast,
currents which carry ice floes almost until the month of July, one
can allow with more or less probability that the legendary hovykh
served as that natural means by which individual seekers of ad-
venture or exiles moved from the north to the south, and further-
more it is not difficult to imagine how, step by step, such migra-
tions reached the extreme southern limits of the present-day Gilyak
area of settlement. Almost before our eyes, since the time of
Middendorf, the northern boundary of the permanent area of
settlement of the Gilyak has descended from the mouth of the
Tugur to the mouth of the Kol' River.

174 We should not imagine, however, that the migration of the
Gilyak into their present territory is a matter of a historical epoch
very close to us. We have positive evidence about the permanence
of the boundaries of the Gilyak territory for the last two and a half
centuries, and the legends of the Gilyak about the island and the
continental coast depict this tribe as fully acclimated to its present
homeland, and among primitive peoples such acclimation comes
about through a long process of many, many centuries, maybe
millenniums.

●829 At this point, I cannot fail to mention one characteristic
fact, which is in a way characteristic of the ways of thinking of the
Gilyak themselves, on the question of their kinship with other tribes.

/19 cont./

174 In 1893 during my stay in the settlement of Langr on a
124 small island lying opposite the continental coast, I talked to an
●829 old Gilyak, a contemporary of Nevelskoi and Orlov, who were
the first men active in the lower reaches of the Amur. I was not
a little astonished when during our conversation, while reminiscing
about the workers of the Russian-American Company, to whom my
interlocutor had in his time been of service, he suddenly said: "I
think, however, that the Gilyak and the Aleut are of the same
race. It turned out that the well-known seaman, Orlov, who served
in the Russian-American Company, /20/ was accompanied by an
Aleut, with whom my Gilyak informant had a chance to talk at
great length, and as a result, after an exchange of stories about
the customs and the way of life of their fellow tribesmen, by the
way, about the bear festival, they both came to the conclusion
that the Gilyak and the Aleut are kal'nyakhr (one people). Taken
by themselves, such primitive conclusions, cannot, of course,
have any great significance for the solution of the question, but in
connection with other considerations about the arctic origin of the
Gilyak, this naïve testimony of a Gilyak is, at any rate, charac-
teristic.

144 Thus, the language, the archaeological data, the remnants
[194] of peculiarities of their way of life, and the legends make it possi-
ble for us to lift somewhat the veil of the distant past of the Gilyak
tribe. On the other hand, purely anthropological data can play no
role in the question that interests us. Anthropologically, the
Gilyak least of all represent anything original. There is no such
thing as a specific Gilyak type. The average type of Gilyak is at
the present time a complex of ordinary, though somewhat softened
Mongoloid features with a deviation on the one hand to the Tungus,
and on the other to the Ainu type. In the Ainu type, as Schrenck
has already noted, the face is more or less oval, the forehead
straight, the cheek bones moderately pronounced, the squint of the
eye very insignificant or completely absent, the nose more or less
long, the spine of the nose with a curve, and the growth of hair
on the face abundant. In the Tungus type, on the other hand, the
Mongoloid features are expressed in full sharpness. In the feminine
type the Tungus features predominate. This is everything that

/34 cont./

835 The Gilyak youths were often perplexed about why I so
●829 earnestly asked about these relations between wives and the
brothers of their husbands, strange to us and perfectly natural to
them, and asked in amazement: "Could it be that among you,
among the Russians, it is no so? You mean one could not live
with the wife of one's brother?" And upon receiving a negative
answer, they would dolefully shake their heads, saying: "Well,
that is a very bad law!" And they would look with disbelief at
one another.

835 Human nature, of course, is the same everywhere; even
-152 the Gilyak has attacks of jealousy, but, with regard to persons of
permitted categories, jealousy never expresses itself in any kind
of acute measure of repression -- in extreme cases a jealous brother
will insist that his rival move to another house or to another village.

83 Legitimate sexual intercourse naturally gave rise to a gen-
eral light-minded attitude toward questions of chastity; it is, of
course, very difficult to find a man or a married woman not vio-
lating his reciprocal fidelity. Even the maidens do not especially
value chastity, and only considerations of an external nature force
parents to look askance at the frivolous behavior of their daughters.
[849] Playing a role here is the fear that the daughter will become in-
[849] volved with a man who is unsuitable with regard to his property
status, and, besides, that the child born to her will be outside the
given clan and so will have to be killed.

83 Apart from these considerations, however, there is no moral
5717 prohibition against the violation of chastity. And yet it is the
greatest injustice to say that among the Gilyak sexual looseness
prevails and sexual morality is absent. If by morality /35/ we
understand an obedience to certain rules generally accepted in a
given society, the Gilyak are distinguished by an ideal sexual
morality, for, with regard to persons who are outside of the group
sexual relationship, their chaste steadfastness is simply amazing.
The most frivolous Gilyak woman will never allow herself to have
intercourse with a clansman of her husband if he is not of the
category of her pu, even though the seducer is younger than her
husband and she likes him.

/35 cont./

83 The views of the Gilyak in this regard are so strict that he
572 transfers them into the animal world; dogs caught in an incestuous
825 act are killed, being considered werewolves.

602 The Gilyak speak of the Russian women who sell themselves
●829 for money with the greatest contempt. This strict loyalty with
regard to persons of prohibited categories created a system of
prohibitions against conversation and joking with whole classes of
people. It is even difficult for us Europeans to imagine that the
Gilyak man or the Gilyak woman does not have the right, not only
to joke, but even to talk with his own brothers and sisters, or even
with brothers and sisters of the most distant degrees of kinship, i.e.,
with the whole class of nuvn, because, on the one hand, familiar
relations may lead to sexual intercourse in forbidden degrees and,
on the other hand, to light quarrels out of jealousy in cases of per-
mitted intercourse. On the same grounds, among the Sakhalin
Gilyak, one is allowed to talk to, but not to joke with, wives of the
younger brothers, because sexual intercourse with them is forbidden,
and, conversely, one can both talk to and joke with wives of elder
brothers, and generally with the group of an'gej (wives).

[576] Because of the prohibition against conversation with cate-
gories of close kinsmen among the Gilyak, the custom of saying
hello and good-by upon arrival and departure is absent.

174 So far, I have cited only facts. But where did these strange
601 facts come from? How can we explain these complex and con-
825 fusing norms of sexual cohabitation, and the no less strange kinship
nomenclature? Even if we can to some extent explain the mutual
rights of brothers to their wives, the right of a person to the married
sisters of his own wife or the married sisters of the wives of his
brothers is completely incomprehensible. Why is it that a woman
calls not only her own sister, but also her husband's brothers' wives
sister? Why does a man /36/ call the sister of his father-in-law
174 his mother? Why, for instance, is it enough that a person from
825 clan A, let us say, takes a wife from a completely alien clan for
835 all the women of clan A to become forbidden to the representatives
614 of the latter. The complex and confusing chain of these facts
must doubtless be the result of the single, very simple basic fact
of an original type of family and clan organization, a type which.

/127 cont./
609 reception, and nonetheless only in the rarest cases will the
594 Gilyak refuse to tender his hospitality to the Russian who has
609 wandered his way. Where the Gilyak have dealt cruelly with
● 829 such fugitives (1), it was only in pursuance of clan vengeance
* 614

1. The Gilyak regard Russian fugitives as one clan, the representatives of which answer for one another.

for slain clansmen -- just what they consider their duty to do with respect to /128/ their own tribesman-murderer. But isolated acts of this sort do not at all change their general
186 relations with members of other tribes. There are, of course,
609 among the Gilyak, as among civilized peoples, national
829 prejudices, but they are to be attributed entirely to ignorance, to lack of acquaintance with strange, unknown elements, giving a wide play to fantastic notions and fears. These prejudices exist among them even toward their own tribesmen who live in more remote regions. Thus the Gilyak of the western shore of Sakhalin are wont to represent their tribesmen of the Okhotsk shore as little short of cannibals, at any rate as extremely evil and inclined to theft, although this is the purest prejudice, the result of ignorance or generalizations from single cases. In the very same way after the first expeditions of our Cossacks in the seventeenth century the Gilyak called the Russians nothing other than kinr (devil), but then the Cossacks gave abundant cause for it, not only by their strange outer appearance, their novel garments and arms, but by a whole string of senseless cruelties and brigands' greediness for "the forties of forties" of valuable fur pelts. But now that the Gilyak have met peaceful Russian people, they recall their ancient "prejudice" as a funny anecdote and can conduct themselves with true humanity toward their neighbors.

But we have strayed somewhat from our main theme. We
* 174 614 615 can now resume it.

/178 cont./
* 835 The right to sexual intercourse with the wives of brothers
828 has grown to be such an ordinary idea among the Gilyak that
● 829 they are not able to imagine an order of things whereby a woman could be the private property of one man. The Gilyak youths were extremely perplexed by my asking them so often and so persistently about these relations; they considered them so commonplace that they should not, according to their way of thinking, have caused any doubts at all, and they asked me in surprise: "Is it possible that it is different among you? Is it bad for you to sleep with your brother's wife?" i.e., not permitted, finding that their law is better than ours. It goes
152 without saying that human nature remains true to itself. The
* 835 Gilyak, too, is jealous, and in other cases where the matter
578 does not concern his tuvn he can react with the unbridled passion
684 of primitive man. It means nothing to a Gilyak to kill a rival or have a bloody duel with him. But when the affair concerns /179/ his brothers, then, thanks to the notions that have been a part of him since childhood and to a whole set of prohibitions that we shall discuss below, the brutal instinct loses its power over the Gilyak; he either does not react at all to the flirtations of his wife, or quite weakly. To avoid friction between
[182] brothers, however, some preventive measures are practical.
[602] Thus, for example, custom dictates that the older brothers
[584] not only yield primogeniture in marriage to the younger brothers, but even that they help them with "valuables" for the purchase of wives.

* 835 At first glance such a custom seems all the more strange
182 in that the older persons often do not have sexual rights to the
578 wives of the younger. But, on the other hand, another advantage is gained; having married off their younger brothers, the older brothers are freed in the future to a certain extent from the encroachment of the younger brothers on their own wives. Though such a preventive gives security, albeit weak, with regard to own brothers, the younger class-brothers are too numerous to be all married off in turn and secured against. By way of an exception, I observed several cases

/347 cont./
101 spring up even between primitive peoples is curious and yet characteristic: the Tungus with indignation and proud contemptuousness deny their kinship, not only with the Gilyak, but even with the Orochon, saying: "We are the Tsar's people and baptized, while the Gilyak and the Orochon eat dogs!"

101 The Gilyak themselves include themselves in the Mongol-
● 829 Manchu tribe, asserting that the Gilyak and the Manchu are "khal-nyakhr" ("khal" -- clan, people, tribe; "nyakhr" -- one). The Gilyak also consider the Chinese and the Japanese kindred peoples, saying that a Manchu was "yrk-utgu" (father, ancestor, man), and a Japanese was "yrk-umgu" (ancestress, woman), an assertion which will be clear from the material below. The Sakhalin Gilyak speak a language in common with the
197 language of the Gilyak /348/ living at the mouth of the Amur and on the continental coast of the Tatar Strait, but quite distinct from the language of the lower Amur Gilyak and the Tungus.

103 As to the question of the appearance of the Gilyak on
127 Sakhalin, there is no doubt that they are arrivals from the conti-
174 nent. The materials of the 1891 census and observations and interviews with the Gilyak equally confirm in this case a conclusion which could have been made a priori. The census first of all proved that the settling of the island by the Gilyak went from the north to the south. The ancestors of the Gilyak of the settlement of Tyka, for instance, came from the settlement of Nyur, which is the northernmost settlement on the western shore of Sakhalin. Of the two foremost clans in the settlement of Arkyyvo,
[614] one comes from the settlement of Nyanivo (in the north of Sakhalin), the other from the settlement of Tanga, whose inhabitants in turn belong to the ancient clan of the settlement of Choma (on the continent), etc. The census further proved that each clan of the Sakhalin Gilyak is only a branch of a clan which lives along the continental coast. Finally, the language,
[184] religious beliefs, customs, and morals and manners of the Sakhalin Gilyak are identical with those of the Gilyak of the continental coast,

/354 cont./
614 2. Marriage within the clan is absolutely forbidden. This is a basic and inviolable principle of the clan. However broad the marital rights of the Gilyak are with regard to women of the categories mentioned, however broad the views of the Gilyak are on the relationship of men and women in general ("love forgives everything"), within the clan neither marriage nor adultery is encountered, even as an exception.

614 3. The wife of a deceased Gilyak is transferred, following
580 the decision of the clan, to one of the ruvn of the deceased, generally to a younger one; even though she be assigned to a ruvn who is older than the deceased, he is obliged to support her, although he cannot live with her as with a wife. But under no circumstances can the wife of the deceased pass to the persons in the ascending or descending line of kinship from the deceased, i.e., to his khal'-yrk, atk, ola. Generally speaking, as a rule, a woman living as a wife (de facto), with someone may under no circumstances belong to anyone in the ascending or descending line of kinship with her first husband. This rule is observed as strictly as the prohibition against internal marriage. Therefore,
614 it is easy to understand why a Gilyak looks on many marriages
● [824] concluded among us between near relatives as incest. From this it follows that it is of the utmost necessity for a Gilyak to know all his clansmen, who are often very numerous and, in addition, scattered over the most distant parts of Gilyak territory. This knowledge of his own clan constitutes one of the elements of the
[860] mental upbringing of a Gilyak. This knowledge passes from
[623] father to son, it is renewed with life, and is the possession of the whole clan. In doubtful cases of kinship, the questions are decided by the elders in the clan.

614 4. The khal' supports all the old people, the sick, the in-
173 capacitated, and other helpless persons. Generally this is done by the nearest kinsmen, but, in the absence of such, the person is supported by that yurt of the khal' where he wants to live. "We do not have any beggars," one Gilyak told me, "if someone is poor, he is fed by the khal'."

/367 cont./
597 In any case, it is characteristic. The Gilyak therefore have a
783 clear conception of sin ("umgyah"). It goes without saying /368/
673 that such things as stealing and murder are a sin but, to be sure,
688 there are a great number of acts, indifferent from our point of view, that are considered sins by the Gilyak, for instance: to heat seal fat on a fire and not in the sun is a sin, and, in general, to deviate from the old ways is a sin. It is curious that in many cases a sin, even when it consists in insulting a deity, is atoned for by a fine paid to one or another person; for example, for the slightest harm to the fence of the hearth, the one who caused it must pay a dog, a cup and saucer, and a few other small things to the master of the yurt; otherwise, one of the two will become ill. Even this small episode illustrates the idea of the necessity to
[682] atone for a sin. The damages paid for a murder are provided by the clan of the murderer not by necessity (such necessity does not always exist), but as an atonement for the sin before an angered deity. On the other hand, the gods do not allow an evil deed (sin) of people to go unpunished. They send storms and rains, a scarcity of fish and fowl, send down diseases and various other
[821] misfortunes. The Gilyak think that thunderstorms and lightning
● [829] have become more frequent since the arrival of the Russians; this is because the god has been angered by the sins of the Russians.

771 Imagining his gods as mortal, the Gilyak merely expresses
775 his extremely anthropomorphic view of them. In fact, human existence, according to his belief, does not end with this life. There, beyond the flame of the fire, is another world, another land where a Gilyak lives again, with the same needs and the same ideas; only there the poor man will be rich and the rich man poor. After death a Gilyak receives a different name, and it is a sin to call a deceased person by his old name. They also believe in the transmigration of souls, or, more exactly, in many rebirths. Thus, there is a legend which tells that after the death of a Gilyak who had on his face distinctive scars from wounds received in a fight
766 with a bear, a boy was born to another Gilyak with the very scars
[764] on his face as the deceased had. It is well-known that the Sakhalin Gilyak burn their dead. There is, however, one case when this

Tungus RUS
Daur

/173 cont./
175 discussed above, and undoubtedly it was a duty of the officials
648 of Algun and the advanced Manchurian outposts along the Amur
361 beyond the mouth of the Komar to see to it, among other things, that this measure was strictly observed. Only along the upper course of the Komar does one again come across sedentry, agricultural Daur, evidently because the Chinese government thought that they were sufficiently far from the Amur there to not preju-
[169] dice its detoltion to any extent. Perhaps, /174/ thanks to this circumstance, they did not have to move from there in the seventeenth century, or they were Daur who at that time withdrew from the Amur and the lower Komar, or, finally, later settlers who came here from the Nonni.

175 The Chinese government acted quite differently with regard
648 to the more or less itinerant traders than it did in the case of the
434 sedentary agriculturalists. They had free access to the entire
443 upper and central Amur region belonging to the administrative district of Tsitsikar, and only having intercourse with the Russians beyond the last guardposts on the upper Amur was forbidden to them. Thanks to this permission and to the inclination and aptitude of the Daur for trade, especially with the related Tungusic hunting peoples in the north of the Amur region with whom they had been familiar from ancient times, we see that they soon reached that wide distribution as traders along the Dseja /Zeya/, the Stilimdsha /Selemdzha/, the Bureja /Bureya/, and their tributaries which has already been discussed in detail above (1).

1. See pp. 79, 107.

Here I only wish to draw special attention to one circumstance which is significant for both the scope of this distribution of the Daur and the role which they have played in relation to the more primitive Amur peoples. Though the Daur are not permitted to
G enter the lower Amur region, and, on the other hand, the people
● [829] from there are forbidden by the Chinese to go beyond the Sungari mouth on the Amur and the city of Ssan-ssin on the Sungari, the Daur traders are nevertheless known even to the most distant Gilyak,

83

/34 cont./

835 The Gilyak youths were often perplexed about why I so
829 earnestly asked about these relations between wives and the brothers of their husbands, strange to us and perfectly natural to them, and asked in amazement: "Could it be that among you, among the Russians, it is no so? You mean one could not live with the wife of one's brother?" And upon receiving a negative answer, they would dolefully shake their heads, saying: "Well, that is a very bad law!" And they would look with disbelief at one another.

835 Human nature, of course, is the same everywhere; even
152 the Gilyak has attacks of jealousy, but, with regard to persons of permitted categories, jealousy never expresses itself in any kind of acute measure of repression -- in extreme cases a jealous brother will insist that his rival move to another house or to another village.

●83 Legitimate sexual intercourse naturally gave rise to a general light-minded attitude toward questions of chastity; it is, of course, very difficult to find a man or a married woman not violating his reciprocal fidelity. Even the maidens do not expecially value chastity, and only considerations of an external nature force parents to look askance at the frivolous behavior of their daughters.
[848] Playing a role here is the fear that the daughter will become in-
[847] volved with a man who is unsuitable with regard to his property status, and, besides, that the child born to her will be outside the given clan and so will have to be killed.

83 Apart from these considerations, however, there is no moral
577 prohibition against the violation of chastity. And yet it is the greatest injustice to say that among the Gilyak sexual looseness prevails and sexual morality is absent. If by morality /35/ we understand an obedience to certain rules generally accepted in a given society, the Gilyak are distinguished by an ideal sexual morality, for, with regard to persons who are outside of the group sexual relationship, their chaste steadfastness is simply amazing. The most frivolous Gilyak woman will never allow herself to have intercourse with a clansman of her husband if he is not of the category of her pu, even though the seducer is younger than her husband and she likes him.

/35 cont./

● 83 The views of the Gilyak in this regard are so strict that he
577 transfers them into the animal world; dogs caught in an incestuous
825 act are killed, being considered werewolves.

602 The Gilyak speak of the Russian women who sell themselves
[829] for money with the greatest contempt. This strict loyalty with regard to persons of prohibited categories created a system of prohibitions against conversation and joking with whole classes of people. It is even difficult for us Europeans to imagine that the Gilyak man or the Gilyak woman does not have the right, not only to joke, but even to talk with his own brothers and sisters, or even with brothers and sisters of the most distant degrees of kinship, i.e., with the whole class of tuvn, because, on the one hand, familiar relations may lead to sexual intercourse in forbidden degrees and, on the other hand, to light quarrels out of jealousy in cases of permitted intercourse. On the same grounds, among the Sakhalin Gilyak, one is allowed to talk to, but not to joke with, wives of the younger brothers, because sexual intercourse with them is forbidden, and, conversely, one can both talk to and joke with wives of elder brothers, and generally with the group of an'gej (wives).

[576] Because of the prohibition against conversation with categories of close kinsmen among the Gilyak, the custom of saying hello and good-by upon arrival and departure is absent.

174 So far, I have cited only facts. But where did these strange
601 facts come from? How can we explain these complex and con-
835 fusing norms of sexual cohabitation, and the no less strange kinship nomenclature? Even if we can to some extent explain the mutual rights of brothers to their wives, the right of a person to the married sisters of his own wife or the married sisters of the wives of his brothers is completely incomprehensible. Why is it that a woman calls not only her own sister, but also her husband's brothers' wives sister? Why does a man /36/ call the sister of his father-in-law
174 his mother? Why, for instance, is it enough that a person from
601 clan A, let us say, takes a wife from a completely alien clan for
835 all the women of clan A to become forbidden to the representatives
614 of the latter. The complex and confusing chain of these facts must doubtless be the result of the single, very simple basic fact of an original type of family and clan organization, a type which,

/107 cont./

*614 Finally, if one keeps in mind that the term "sin" embraces
771 not only prohibitions in the formal sense, but also the obli-
783 gation to carry out positive norms, then the formula "common sin"
784 acquires a broad general sense, becomes the expression of the
182 principle of unity of the circle of clan obligations in general. The significance of this principle is all the greater by virtue of the fact that in the eyes of the Gilyak obligations and prohibitions are by no means formal juridical norms, observed through fear of punishment, but religious imperatives, rigorously performed out of the feeling for self-preservation. For the Gilyak there is no difference between religious, sexual, and social prohibitions; all are equally religious, and to satisfy the dictates of religion means to be concerned about the benevolence of the gods, about the elimination of the machinations of the enemies of life, etc., that is to say, to feel concern for one's self-preservation. Not to fulfill them, keeping in mind the whole clan background of the cult, means not only to destroy oneself, but the whole clan as well. Hence the great importance of this principle as a cementing agent of the clan union. Hence,
*614 on /108/ the other hand, it becomes comprehensible as to
182 why norms frequently contradicting human nature, requiring
602 immense self-control, are carried out, not through compulsion,
● 83 but as the natural dictates of instinct. Consider, for example, with what strength the sexual norms act. In general, in matters of the sexual instinct the Gilyak, both men and women, follow their natural inclinations with complete freedom; there is no chastity either before or after marriage. Their only concern is not to become victims of jealousy. There is no question of any feeling of self-restraint. Nevertheless, despite the complete sexual license from our point of view, the Gilyak observes complete chastity with respect to persons of the prohibited categories. Adultery is unknown to him; the adulterer is a monstrosity, an exception that is
*614 almost never encountered. The same is true of the prohibi-
602 tions of speech. Brothers and sisters, left face to face, will
182 go for whole days enduring the torments of silence, in the most urgent necessity exchanging rare businesslike phrases in

/149 cont./

III.

The Classificatory System of Kinship and the Norms of Sexual Intercourse and Marriage

● 83 Now we shall see to what degree the aforementioned kin-
[121] ship system corresponds to the contemporary norms of sexual intercourse and marriage.

Among the Gilyak, at least at the present time, we cannot speak of any kind of general prohibitions against extramarital sexual relations.

Sexual relations with a woman in the eyes of a Gilyak is a completely nonchalant and natural act, like any other natural act, satisfying a certain natural need of man. Prohibitions and restrictions apply only to definite circles bound by agnate or cognate kinship. Outside of these circles there is no regulation or censure of sexual behavior, either on the part of public opinion or on the part of religion. Outside of the prohibited circles, sexual relations out of wedlock have only one restriction: the reaction of the one or the other party concerned. Young men of a given clan, having rights to the women of a certain /150/ locality, may be aggrieved at an alien usurper and soundly teach the stranger not to sneak into a territory not his own, which, by the way, happens very rarely. It is a much more serious affair if a married woman is
684 involved. A stranger caught in flagrante delicto with a
[108] married woman is slain at the scene of the crime; such was the custom at least until the most recent times; only the fear of penal repression has begun to restrain some from impulsive slayings, which are beginning to be replaced by duels and
684 ransom. The woman suffers less in such cases. They beat her
562 thoroughly, but the affair never goes so far as killing her:
[581] in the first place, because, as we shall see further on, a woman is always considered the cognate of her husband, and, in the second place, because she is an article of value, having cost her husband dearly, and furthermore she is a necessary worker.
684 In any case, the matter is not settled without repression, bloody

/168 cont./ Under
582 such circumstances,[1] it would be necessary for a considerably large number of the population who are not well-to-do to re-
[182] main unmarried. And it is right here that the institution of the right to marriage with persons of the class of an'g:ej about which we spoke above appears as a corrective. In the first rank of those available to the Gilyak are the daughters of his mother's brother, next their collateral sisters, and, finally, any daughter in general of that broad class of persons whom the Gilyak calls akhmalk (fathers-in-law).

We already know the nature of the relations of these latter with their sons-in-law /zyat'ya/, and it is clear, therefore, that obtaining an individual wife among the an'g:ej, among the daughters of one's born akhmalk, is surrounded by the most favorable conditions. In an extreme case, a man stands a sure chance of getting the widows of his brothers.
[178] But in view of the generally small number of women in comparison with the men, and considering the fierce competition within each class of pu for their an'g:ej and under the conditions of an extreme avidity for the bride price, which has developed under the influence of commercial relations and has greatly weakened the traditional matrimonial relations, even this privilege can often be a nudum jus. But at this point there appears on the scene another powerful corrective for the individual marriage -- the group marriage, an absolutely unlimited right to sexual intercourse between classes of pu and an'g:ej. We turn next to this right.

* 835 Group marriage. Though the right and obligation of individual marriage in the classes pu and an'g:ej have been considerably shaken by the inevitable influence of both historical conditions and the conditions of life, the right to group marriage, the right to sexual intercourse between persons of these classes, continues to be preserved in full strength. This right, it is true, does not carry with it a definitely compulsory character: a woman cannot be coerced into sexual intercourse
● 83 either by her kin or by her pu. It is not even allowed that the father, brother, or husband of a woman propose to the daughter

[1] [i.e., a limited choice of women plus unequal sex ratio in favor of the men.--Analyst]

/168 cont./
● 83 or wife that she share her bed with a guest who is her pu, as happens among peoples who practice hospitable hetaerism. Likewise a public display of sexual intimacy is not allowed. No one permits himself to lie down under one covering with his group an'g:ej in the common yurt, even with a preliminary agreement. Moreover, even between individual spouses /169/
833 openness of sexual relations is not allowed (1). Intercourse
* 835

[171] 1. The avoidance of public caresses between individual spouses is not an exclusive peculiarity of the Gilyak. According to the testimony of Radlov /Radloff/, the Altaian in public does not allow himself even a joke with his wife in the presence of strangers, while at the same time the broadest freedom in relations between the sexes prevails among these peoples. -- Radloff, Aus Sibirien /From Siberia/, I, 314.

may not take place publicly or before the eyes of the individual spouse concerned (2). If the act takes place at night in

the yurt where there are also strangers sleeping, then each one lies down separately, and only when all have gone to sleep does the man or woman (both sides alike take the initiative, but women more rarely) move over to the bed of his group spouse, who may accept or reject the attentions if there has not been any preliminary agreement. In summer the affair most frequently takes place in the open air: in the

171 way, by one and the same term, andri waka, the piruari designate their father, their mother's sister, and their father's brother's wife (ibid., Table IV). All the children of each noa are one another's brothers and sisters and they are all considered children of the piruari group to which this noa belongs (ibid., 19).

IV.

831 Moral and Psychic Consequences of the Sexual Norms

The peculiar norms of sexual relations described by us, broadly permissive on the one hand, strictly prohibitive on the other, are reflected in the morals and psychics of the Gilyak in two diametrically opposed trends.

The permissive norms, which give both men and women such an extensive legitimate freedom in sexual relations, naturally must have given rise to general sexual laxity. In fact, the virtues of chastity, sexual moderation, and conjugal
[837] fidelity are unknown to the Gilyak. Among married women, and then as a rare exception, one still finds individuals who are more or less faithful to their husbands; among men, by the admission of the Gilyak themselves, even such *exceptions*
831 are not encountered. In the society of the most respected
521 individuals, tales of the most piquant romantic /183/ adventures are recounted with relish. An extensive amorous experience does not stain the reputation of a gentleman (urdla n'ig:yvyn) at all. In my presence, and that of a gathering of the most honored elders, a young Gilyak, Laruk, to the accompaniment of general noisy approval and merry laughter, related his numerous romantic exploits, about how, by the way, in one settlement he had engendered no less than 20
831 children... Such an attitude of respected people toward the sexual laxity of youngsters is only possible in a society where

/183 cont./

● 831 group sexual cohabitation is legitimately practiced on a large
831 scale. When reproaches were sometimes directed by older
861 persons at younger ones for sexual excesses, it was only on account of economic considerations, since sexual diversions
831 frequently distract youths from work at home. Reproaches were
* 835 also directed at pregnant maidens, but here the considerations
848 were of a special nature, about which we spoke above: 1) the danger of a connection with persons of the forbidden categories, and principally, 2) the anonymity of the father of the
831 child. But ordinarily the adventures of the youth are no
574 secret and do not give rise to reproach. It is a perfectly
883 ordinary phenomenon for young men to set out for a visit of several months' duration to the settlements of their "fathers-in-law," where there are so many an'g:ej maidens at their disposal, and the older generation not only does not oppose this, but is very happy about it. As we have already said, an unmarried ymg:i (son-in-law /zyat'/) is a most desirable guest in the house. "One is obliged to feed an "ymg:i" (son-in-
831 law)" (see p. 249). Women and even maidens yield little to
562 the men in laxness of attitude toward what we call sexual
834 morals. It is only necessary for them to be more careful
* [835] (especially when the matter concerns persons who are not of the class pu), and for this reason they always affect an appearance of the sternest inaccessibility, but in reality they are
831 just as loose as the men. And yet, in view of all this, to say
834 that the Gilyak is devoid of a feeling of sexual morals would be the greatest injustice. Actually the Gilyak give free rein to their instincts only within socially permitted limits. And, on the other hand, what the norms do not allow, for example, reactions of jealousy with respect to one's tuvn, and especially sexual intercourse with persons of forbidden categories, is observed with a very great rigorousness completely unknown to us, and this notwithstanding the fact that the prohibitions on sexual intercourse often have in their favor neither physiological, nor psychic, nor any other kind of reasonable basis, such as, for example, the prohibitions between the most distant agnate male and female cousins. During

d among the Central Eskimo by Ross. We shall not, ver, deal with America, a country having the Ganowanian m, which is so close to the Turanian system. Our aim o fill the hiatus which separates the native land of the nian system from the Ganowanian. After the survey we made, we have the right to say that this hiatus has been .

XI.

Sexual Life

The norms of group marriage, presenting the Gilyak with wide freedom of sexual intercourse, are in themselves pitious factor for the inordinate development of sexual alism. The ordinary mode of life of the Gilyak, in turn, only aid in the extraordinary development of this factor. principal Gilyak occupation -- fishing -- leaves him too leisure. On the other hand, the only pursuit which provide a significant outlet for the emotional vital y, namely, hunting, plays a comparatively insignificant n the life of the Gilyak. The Gilyak does not undertake t hunting expeditions. The seasonal hunting for sables, els, foxes, and deer, and even the sporadic excursions the local, rather /247/ timid bear, do not present any al dangers; the sport of hunting, therefore, is very ly developed.

/247 cont./

000 weakly developed. Among the Gilyak there are very few
152 such outstanding, passionately devoted hunters as are to be
224 found among the Tungus. Nor do the Gilyak, especially
152 during the past half-century, possess the heroic emotions of
72 war. Indeed, what the Gilyak called wars in ancient times
[614] were in fact nothing more than sporadic clan skirmishes
[578] motivated by vengeance or, even more frequently, were over
[463] women. The Gilyak have never known war as a profession,
as the favorite occupation of youth. It is natural that their
831 emotional energy should be principally directed toward
[152] sexuality. The Gilyak begin their sexual life with the onset of puberty and devote all their leisure, all their thoughts, to women, the more so since by far not every Gilyak, as we
836 shall see, finds it possible to marry. The bachelor youth is not content with the women to whom they have rights in their own settlement; they do not stop with the circle of women to whom they have rights by law. The only category of women before which the Gilyak halts is the class of women prohibited
481 to him. Neither length of time nor immensity of distance will
836 deter the Gilyak from his romantic adventures, if he can but find his fill of feminine society. The young man sets off most eagerly of all, of course, for the village of his "fathers-in-law" --akhmalk'i but he is not averse to undertaking a journey even to completely alien villages. During the time of my
[122] travels, young men frequently voluntarily joined me, offering me their assistance without compensation for many weeks, and this was done in the hope of finding occasion for romantic adventures, since this was not so very difficult. Owing to
836 the Gilyak's traditional hospitality and eagerness for any news,
574 the doors of every home are wide open to each new arrival. Thus, the Gilyak feels at home everywhere. A few hours
[203] after his arrival in some settlement, he has already managed to spend some time in every home, everywhere relate his news, to which the men and women listen with equal avidity, and has already managed to let his glance fall on some woman who has caught his fancy. The rest is a matter of his amatory experience and art.

/248 cont./

836 advice as to whether he should not "buy" a pretty woman who
837 had taken his fancy, although he had been married for a
159 long time and could not praise his wife enough. He did not, it is true, take part in the nightly adventures of his young companions, but only because the competition was already too great without that, since it very nearly went as far as revolvers among the young men.

839 By reason of the comparative accessibility of women, the use of force upon them is rare. I have, however, heard of instances where a group of youths, at the season when the women go for several days to places very distant from the villages after berries and sarana, made genuine raids upon the defenseless women, and, when the women have not yielded voluntarily, they have had no scruples about using force. Violence, however, principally amounts to /249/ tearing the cloth trousers which, as among the Chukchee and the Koryak, are made closed, without any openings. Such adventures, like all romantic pursuits in general outside one's own kinship circle of women, bear the characteristic designation s'ankh nan'gynd --
[196] "to hunt after women." This term, however, is also applied to searching for a bride, since it has two meanings: "to hunt" and "to seek something, somebody in general."

484 Special distant expeditions to alien settlements in search
83 of women, of course, are exclusively the affair of real
836 amateurs, so to speak, since in a distant village the new arrivals ordinarily encounter the fierce competition of the local youth, and the women already have their local admirers, not to speak of husbands, and special qualities are required to win an easy success on alien soil. I managed to meet such fortunate individuals: they are ordinarily good and worldly tellers of tales, jesters, and singers. There are, however, very few such outstanding lovers, even among the Gilyak, and there is a special term for them. Ordinarily the unmarried youth is either content with the women of his own village or pays visits to the settlements of his akhmalk'i, where, as we have seen, a most joyous reception always awaits him.

/249 cont./

It is difficult to depict in general terms the picture of the
831 sexual morals among the Gilyak. First of all, one must
832 differentiate between the married ones and the bachelors.
597 The former, when at home in their own settlements, are
more concerned with guarding their wives from alien intruders
than with undertaking extramarital flirtations. Only when
journeying or when visiting in other settlements do they
avidly give free play to their sexual instincts. On the other
hand, the married women are surrounded with so many
temptations from their group husbands and strangers that they
violate conjugal fidelity at every convenient opportunity,
the more so since far from all many for love or persons of
their own age, and they eagerly make up for this with ex-
tramarital flirtations. From the Gilyak point of view on
decorum, however, these flirtations do not represent anything
abnormal, since for the most part they take place between
group husbands and wives. One way or another, the palm
of primacy, as concerns excesses among grand-people,
must go to the women. "Among men," say the Gilyak,
"you will find a good person 'one-one,' among the women
you will not find a single one."

Genuine excesses of licentiousness take place among
836 the /250/ unmarried youth. Here are possible such extrava-
535 gances as the instance I recounted above of the Gilyak woman,
Pigumkun, who before her marriage was intimate with
14 lovers at one time, including her future husband. Or
another example, which I borrow from the Gilyak epos. The
hero comes to the home of a certain oldster to seek his
daughter in marriage. His future father-in-law says to
him: "Thy wife lives over there in a little yurt. People
used to come to see her, they all copulated with her, after
that she lost her legs." And the bridegroom does not become
upset at all. "All right," he says, "I'll go ahead and carry
her off," apparently seeing nothing remarkable in this.

/250 cont./

Such instances must not be regarded as a general
831 phenomenon, however. Along with the factor of heightened
192 sexuality and sexual freedom, other, restraining factors
are also acting. Among the married women, such factors
are maternity, economic cares, and, finally, among both
married and unmarried women, such feelings as love and
bashfulness. In general, however, sexual dissolutenes plays
no small role in the life of the Gilyak, not only in an eco-
nomic, but in a psychological sense as well. Ordinarily
the Lovelaces either do not maintain households at all or,
if they do, maintain their economies very carelessly. Both
[826] in life and in poetry one constantly comes across sharp
reproaches and the reviling of the youth by the older people for
laziness at work in connection with licentiousness. And
[842] furthermore the Gilyak themselves attribute childless marriages
831 to dissolutenes. But the saddest of all is the influence of
158 dissolutenes on the psychics. A whole series of nervous
disorders specific for the Gilyak, such as myrechnik among
both men and women, and diseases connected with the full
[584] loss of psychic composure (self-control /given in-English/)
are the result of dissolutenes, which furthermore, among
women, is accompanied by serious transgressions in the realm
of the sexual sphere, and the latter, in turn, lead to the
appearance of hysteria.

Side by side with the wide sexuality and sexual freedom
831 described above, the feeling of love still plays a great role
192 in the life of the Gilyak. The most extensively used term
for love, /of-ŋmud/, denotes both love and love in
general, for children, friends, etc. There is a special term
for reciprocal love -- /ofmud/, for marriage for love,
/ofmudkly, vayvul/. There are also some other terms for
love, for example, /ŋyad and ohlem/, but there are no special
terms for "beloved" /male/, "beloved" /female/, although
[533] /251/ one can say /ofmula ŋgyvyn/, i.e., "man whom they
love," but in the language of lovers the beloved designate
each other either by the terms "husband" and "wife," or by

/251 cont./

words signifying "my man, my woman," - /ŋ'ax'mych,
831 ŋ'ax'sh/. The Gilyak themselves consider love a normal stage
[192] of life which everyone must experience in his youth. This
view is very well conveyed in a song which I noted down
on the Amur, in which a girl, complaining of her mother's
nagging about her passion, sings:

[539] Mother, mother, dear mother,
Has thou forgotten thine own youth?

(Literally: "Thou hast forgotten thine own past time,
let me be!")

Parents, however, never reproach their children for their
831 amorous passions. When the youth do hear the grumbling of
582 their elders, it is most often due to purely economic considera-
575 tions, since during the period of passion the young people
neglect their work and become careless and inaccurate. In
general it is not even permissible to react in any way to the
sexual passion of the children, maidens included. If the
[584] father or brother finds out about the fornication of his daughter
or sister, he not only may not use force against the seducer,
but is even forbidden to summon the girl to a duel, and he
may not even be angry with the daughter. They treat the
amorous passions of the children as a perfectly natural
phenomenon. The mother in particular is often even the
confidante of the amorous women of her children. In many
[533] songs which I noted down on the Amur, sons constantly
address their mother, sharing with her their amorous suffer-
ings, seeking advice as to where and how to find their beloved.
Serious remonstrances by the parents, active remonstrances
835 going to the point of pitilessness, are encountered only in
762 the case of love for a person of a forbidden category. In
such cases, the parents themselves urge their daughter to
584 commit suicide. Often the pitilessness of the parents, mainly
575 of the father, becomes manifest when love frustrates an
advantageous marriage, one which has been agreed on since

/251 cont./

childhood, and they forcibly give the girl in marriage to an
831 unloved man. Such cases are encountered often.
584

In its content, love among the Gilyak does not differ in
831 any way from love in civilized society. Coarse sexuality is
completely lacking in it. In the love of this primitive peo-
ple we find the whole scale of universal feeling, from the
tenderest tones of poetic sentimentality and tranquil love's
sorrow to the stormiest outbursts of heroic passion, which
neither halts before any obstacle /252/ nor shrinks before a
manly resolution to part with one's life.

These psychics of the Gilyak are very well reflected in
831 love songs, especially in the songs of women.
523

Nature endowed the Gilyak woman with a depth and
delicacy of feeling which she is able to express in touching
images and forms. "Night and day do I think of thee...
As on my own mother do I gaze... I'd thou leavest me, only
of thee shall I think, where thou didst walk, there shall I
walk. From the well whence we both did drink, thy dark
shadow shall I drink. As of many trees the tallest one doth
most greatly please, so of all men art thou most beautiful
and best. O, take me with thee, I would be the wallet and
flint that hang from thy belt. I shall be the bottom of thy
boat, with thee would I be. My left tear flows and falls like
a tin, like calf of my right leg falls my, it has become im-
movable, wholly dry have I become, my legs do not move" --
with such expressions, taken at random from various Gilyak
songs, a woman expresses her love. But it is noteworthy
that the same sentiments and notes sound in the songs of the
men, and the references to left and right tears pattering
like rain, to the knee, the same grief over separation, the
same sweet dreams of reunion, are just as frequent. One
finds such emotional expressions as "I have loved thee wholly,
all of thee"... Only rarely does clumsy vulgar (from our
point of view) crudity creep in, for example, "Of a fat
thigh the joint (the galven) spinŋ(wichen), that is how I
like it." But never any cynicism.

/252 cont./

The importance of the role of love in the life of the
831 Gilyak may be judged by the wealth of song material. Not
835 every Gilyak can relate a story or poem, but everyone
knows love songs. Songs play a quite exceptional role in
Gilyak love. The song is the language of lovers. At their
assignations lovers sing improvised songs to each other, at
place of conversation, and, if they find it impossible to
meet, they send each other songs, composed at her, through
a third person. Special terms have even been made up for
such songs.

An idea of the intensity of love among the Gilyak may
831 be gained from the reaction of lovers in cases where their
835 love encounters insuperable obstacles. In such cases the
762 solution is suicide. Obstacles in the Gilyak environment
842 are of a twofold nature. Most frequently the obstacle is
presented by the parents, who, either from mercenary
motives or from an unwillingness to violate /253/ the child-
hood agreement of betrothal, force a marriage, or when a
831 woman is violently carried away. In such case suicides
835 frequently take place quite a long time after the involuntary
762 marriage. In such cases the woman first of all seeks to save
584 herself from the unloved husband, but, in the event
of failure, ends with suicide. I remember one such chara-
teristic instance. A girl from the village of Nyanivo was
given in marriage against her will. Soon she ran away from
her husband, her father, who demanded her return by force,
tempted by the idea of getting a second bride price from him.
Her first husband would not reconcile himself to this and
utilized a favorable moment to take her back by force.
Within half a year the unfortunate woman hanged herself.
[847] There have been instances where a woman, fleeing from
her unloved husband, has slain the children that she had
831 by him. Men prefer to defend their rights to love by action.
835 Ordinarily they seek to carry the woman away by force with
584 the aid of clansmen, but they will not stop at slaying the
[582] husband of their beloved. I noted one very outstanding

/253 cont./

instance of such amorous heroism in the village of Nyanivo.
831 The most respected and wealthiest man of the local clan at
835 this time was a Gilyak by the name of Nyugun. At one time
his beloved was forcibly given in marriage to another man.
He slew his competitor, which he was arrested and
taken to Nikolaevsk. In the meantime the brother of the
widow again gave her in marriage against her will to another
man. Breaking out of prison, Nyugun immediately set off
for the village of his beloved. The young man, on his part, he
stripped everything off himself, except the short pants of
modesty, and naked, despite the winter season, he rushed
in this state into the yurt, which was overflowing with peo-
ple, and by his appearance struck such fear into those present
that he was able without hindrance to take his beloved by
the hand and take her to his home, after which he lived with
her tranquilly for many years (his late wife had time to sew
for him four fox-fur coats and four fur coats out of sable tails).

The most tragic obstacle in love is the position of lovers
835 in the forbidden degrees of kinship. Here there is no solu-
762 tion. The parents themselves insist on suicide. Ordinarily
584 in such cases the lovers go to the forest and hang them-
selves side by side on two trees. Before taking their lives,
they sing songs to each other, singing of their journey to the
world beyond the grave, and they shed tender tears over their love.
Some of these songs have come down to us in the following
way. It has happened that one of the parties, namely, the
man, breaks loose after this vows the desire to repeat
the attempt. It is he who seeks for potentry /254/ his
835 dying song. One of these tragic cases of illicit love has
762 become a popular legend. The time was a hundred years ago.
584 A certain maiden became attached to a younger brother of
her father. Shortly after this, her sweetheart set out on a
long trading trip to Manchuria. At the same time, she
535 began to show signs of pregnancy; it was no longer possible
to conceal the fact, and she took her own life by hanging.
When her sweetheart returned, he burned on her grave

/254 cont./

835 the goods that he had brought back, released his bear, which
762 he was fattening up for a feast, from its cage, and hanged
584 himself. The song which the unhappy girl sang at the mo-
535 ment of parting has been preserved. We present it in its
entirety in the section on lyrics. Here we quote only the first
[537] lines: "Take me with thee, the board of the bottom of thy
bark will I become... Now one must think only about Mlyvo (1).

1. The world beyond the grave.

That you may remember me, keep the earringe hung up on
the wall."

832 The Gilyak employ magic means against unequited love.
[825] One of these means is the dried-up brain of the cuckoo, which
they mix with tobacco and offer to the girl to smoke. Or
they surreptitiously sew the feather of a cuckoo to her dress.
But there are also other means that are not so harmless and
lead to tragic consequences.

As they relate, one who has tasted these potions, these
drugs, falls into a deep melancholy and, after a few days,
dies. I knew two persons, somewhat familiar, who used to
sell such drugs for a high price, and several women died of
them.

Among the Gilyak, as in our country, there are timid in-
831 dividuals who cannot bring themselves to make a declaration
582 of love in person. In such cases the intermediaries are old-
women, who, for this, must be given "tea" -- a present.
Sometimes they send some present through these intermediaries,
ordinarily cloth, in which they tie several knots, correspond-
ing to the number of days until the admirer will pay his visit.
832 There remain to be discussed only what the stimuli of love
are for the Gilyak, what individual traits comprise the at-
traction of the beloved. First of all, of course, there is the
aesthetic side -- beauty, especially facial beauty. The
word "beautiful" in the Gilyak language is expressed by the
[537] term poch utland, literally -- "of a good face."

/374 cont./

562 loaded down with work as she is, sometimes profoundly unfortu-
nate, with an aged and blind husband, purchased and sold, she is
[247] nevertheless not a slave. She is not shut up, as in the East; she
[584] lives in the house of her husband and children, she participa-
tes in the conversation, and she is treated with respect as a wife
and mother. The children treat her with respect. They are ready
[745] to show exact vengeance for her. When she dies, they will cremate
her with the same solemnity as her husband; as a sign of mourn-
ing they will undo their braids, not infrequently for life, and an
occasional inconsolable husband will lay violent hands on himself
out of grief for his wife. Although married, she does not sever her
[578] bonds with her former family and clan. She, along with her
husband and children, visits them frequently, and in a year of
misfortune she and her husband and children will find assistance
and a hearty welcome there. If her husband should offend her
without cause, she will find protection in the family of her father,
and true protection; they will return the bride price and take her
back.

595 Polygamy is found to a limited extent. The causes of
[584] polygamy lie in part in the above-mentioned conjugal rights of
brothers. It is not by chance that there are so many bachelors
among the Gilyak /275/ frequently without special reason, such
as poverty, etc. Then, again, barren wives, as well as the de-
sire to have a young healthy worker in his old age, impel the
Gilyak to provoke himself with two or three wives, whom he gradu-
ally acquires. It is noteworthy that in the settlement closest to
the Aleksandrovsk post, even in such a large settlement as
Arkyvyo, I did not encounter a single case of polygamy.
This is explained, of course, by the influence of the Rus-
[577] sians. Polygamy often produces quarrels between wives, and the
husband, of course, most frequently takes the side of the favorite
wife, yet that division into lawful wives and concubines, as in
the Eastern harems, does not exist among the Gilyak.

831 Two words concerning sexual morality. In their talk the
Gilyak are not very irreproachable. Young maidens allow them-
selves to use words and expressions that are not tolerated by the

831 code of civilization. In their actions the Gilyak are no less
hivolous, from our point of view. Despite the vengeful jealousy
of husbands, the sins of love do not evoke any censure or scorn on
the part of public opinion, and still less is it considered abnormal
to cohabit (tme, not openly) with individuals of those categories
of which I spoke above. But within the clan, as I have already
stated, adultery is not to be met with, even as an exception. I
shall add that the Gilyak youth has certain chivalrous-romantic
propensities which not only impel young people to make long
journeys for a rendezvous with their beloved, but further drive
them into unreasonable enterprises, such as the abduction of a
woman by force of arms.

594 The structure of the Gilyak family. One often encounters large
complex families in which the aged father lives in a common
household with all his children and their children. The master's
brothers who are either incapacitated for work or do not possess
equipment of their own frequently enter into the composition of
the family. Not infrequently the family accepts the orphans of
their clansmen, especially orphans left without a mother at an
early age. It sometimes happens that the mother-in-law lives with
her son-in-law and son-in-law with their mothers-in-law, espe-
594 cially when the latter have no sons. We shall note special peculi-
ties in the make-up of the family farther on; for the present we
shall say that the normal composition of the family, its frame-
work, is the parents, the sons and the unmarried daughters (married
593 ones pass into the clan of the husband). In the relations of the
549 members of the family among themselves there is nothing resem-
bling the patriarchal relations of, for example, the old Roman
family. /376/ the sons show respect for the father, but the latter
does not wield over them that power which is known under the
appellation of patria potestas. Adult sons can freely depart from
the family of the father and live in separate households. Living
with the father, the son can acquire for himself his own property.
[428] The elder son does not enjoy any advantages over his brothers; and,
on the contrary, the youngest sons, as those who live with the
father until his death, enjoy special advantages in the matter of
inheritance.

833 daytime the favorite place for "catching" one's anĝej is lo-
*835 cated between the sleeping-bunks; in the living-room -- somewhere
outside of the settlement, near the well. In the winter, in
the yurt; in the daytime, in the absence of strangers; at
night, after all have gone to sleep. Finally, there are periods
*835 when the group spouses are free from any restrictions. The
821 married men go for several weeks into the taiga to their
hunting territories, while in the summer and winter they con-
tinually travel about on visits or to festivals. At these times
*835 there is complete freedom for the group spouses. Only one
[521] thing is most strictly demanded: neither the participants them-
selves nor any strangers who have chanced to be witnesses to the
relations of group spouses have the right, under the penalty
of sinning, and, moreover, no matter who, and especially
the persons concerned, about such relations publicly. But
the demands of non-publicity, established in the interests
of peace between group spouses, with the aim of preventing
possible fits of jealousy, have in no way diminished the
publicity of the institution of group marriage itself, the
publicity of the conjugal rights themselves. These rights
have been unanimously formulated in legal theory, which have
come to be common property (the formulas themselves are
given below in the chapter on the relations of brothers to their
wives) -- theses which each father and each mother consider
their obligation to impart to their children with unusual
solicitude from very earliest childhood. Publicly, the group
spouses not only behave with unconstrained familiarity, but
address each other with nothe other than the tender words "my
dear little husband," "my dear little wife." But the publicity
[614] of group relations /170/ is manifested best of all in the case of
the death of a man who is not joined in an individual marriage.
In such cases, before the burning of the body, one of the
group wives (not the wife of an older brother) steps out
on the funeral platform and in the hearing of all mourns for
*835 him as for her beloved, as for her husband. It is curious to
832 noteathat during the negotiations between the pu and the
584

*835 anĝej with regard to an anticipated seance, they go through
the same symbolic actions that people go through during the
betrothal and wedding ceremonies, namely, they smoke or eat
[195] together. To say to a woman of the anĝej category, "Let us
have a smoke together," is equivalent to an offer to her to
exercise her marital right.

832 The legal essence of this specific right, as we have said,
*835 is in the fact that its realization, even when it becomes known
6 836 to all, does not provoke a reaction either of the persons con-
cerned or of social censure, and likewise it does not constitute
a violation of religious morals, a privilege of an extremely
important character, for sexual intercourse with women outside
of this category incurs grave consequences. If this be a com-
pletely alien woman -- although at the present time this does
not constitute a religious transgression -- then it provokes,
as we have already mentioned, bloody punishment if the
forniators are caught in flagrante delicto, or at least a cruel
duel with sticks and a fine. There are many reasons for be-
lieving that intercourse with female strangers was even once
under a religious prohibition. The following curious custom,
by the way, testifies in favor of this notion. If a woman who
is not bound to a man by clan relationship tries to seduce
him, catches him by the leg in some isolated place (a
symbolic offering of herself to the man), then he (if, it goes
without saying, he does not succumb to the temptation) is
obliged, under penalty of punishment of the gods, to demand
publicly an expiatory ransom from the woman (1).

[714] 1. I personally happened to be a
[629] witness to such a ceremony of
ransom. It was in the settlement
of Tamlevo. One of my traveling
companions, a Gilyak already
middle-aged, once woke me early
in the morning and with anxiety
asked me to go with him to "court"
in the neighboring yurt. There I
found a large assembly of the
masters of the settlement. My

complaint against a local woman,
who the evening before had seized
him by the leg, on the grounds
of which he was demanding
"ransom." They summoned the
culprit. She confessed and by the
decision of the assembly she was
obliged to hand over publicly to
her accuser an adjudged ransom,
namely, a puppy and a birch-
bark dish. Why the fine was limited
to such insignificant objects (it
they were not merely symbols of
especially female labor) I explain
only by the fact that the guilty
woman was entirely alone and did
not possess anything more valuable.

834 /171/ One must keep in mind the fact that the Gilyak
*835 are very passionate and by no means like to let felicitous
[194] opportunities for sexual intercourse, even with women, pass
[159] by, so it is necessary to regard the aforementioned custom
as a survival from that epoch when intercourse with alien women
was under a religious prohibition. Still more strictly regarded
is an affair between persons of prohibited categories; this
meets with the censure of society, the reproaches of kinsmen,
punishment of the gods, the gnawing of conscience, and in-
evitable banishment. There can hardly be even any question
of a causal passion, and a more serious feeling is regarded as
the result of one's being inhabited by an evil spirit, and the
persons prefer to kill themselves. Restraint toward persons
of forbidden categories has become converted into that same
instinct which is felt among us with regard to one's mother or
*835 own sister. All the more powerfully is the right to sexual
intercourse between the categories of pu and anĝej realized.
In this respect, one can express oneself about the Gilyak in the

amatory experience and art. The Gilyak woman, it is true,
*835 is not a person having an extremely inaccessible manner. Upon
834 the appearance of a stranger man, she lowers her eyes, sits all
[834] the time with her brows knit, and hardly answers the questions
of the stranger. But this is only external inaccessibility,
concealing an inner lasciviousness. Unnoticed by those about
her, she /248/ casts oblique, curious glances at the new man
at a time when he can catch them. And if the guest has
made a proper impression, the matter is consummated very
quickly: The man follows her to the well, or to the berry
patch, or simply catches her in the entrance hall, and then,
after a short symbolic dialogue, such as, "Let's smoke to-
gether a little (i.e., drawing in turn at the same pipe)."
or "Let's have tea, dear," the matter is settled very simply.
Sometimes the guest simply remains in the yurt of his beloved
and at night moves over to her couch, or vice versa. Some-
times the business is consummated without words, limiting
itself to a mute symbolism, touching the breasts, seizing
the leg, and if this symbolism does not encounter any rebuff,
the consent of the woman is secured. It is curious that the
symbolism of amatory proposals recalls the rites of the
wedding ceremonies. The proposal to smoke together is a
joking imitation of the rite of conferratio /conferareatio/.
[585] The snatching of the leg or the breast, although it does not
[171] figure at the present time in the wedding ceremonies of the
Gilyak, is still to be found among certain peoples of North
America, for example among the Lilloost Indians, according
to the testimony of Boas and Teit.

836 Such issues in alien villages is practiced not only by
839 the unmarried youth, but by the married, middle-aged
159 Gilyak as well. On one of my first trips there was among my
companions an old respectable Gilyak, Gilbel'ka, who en-
joyed great fame throughout all of Sakhalin by reason of
his wealth and outstanding intellect. When we stopped in
the settlements, he spoke breathlessly on a par with his
young companions about the pretty women of the settlement,
and once he became so carried away that he began to ask my

835 the goods that he had brought back, released his bear, and
834 he was fattening up for a feast, from its cage, and hanged
[427] himself. The song which the unhappy girl sang at the mo-
[532] ment of parting has been preserved. We present it in its
[535] entirety in the section on lyrics. Here we quote only the
[531] lines: "Take me with thee, the board of the bottom of thy
bark will I become... Now one must think only about Mlyt

1. The world beyond the grave.

That you may remember me, keep the earrings hung up on
the wall."

*832 The Gilyak employ magic means against unrequited lo
[825] One of these means is the dried-up brain of the cuckoo, wh
they mix with tobacco and offer to the girl to smoke. Or
they surreptitiously sew the feather of a cuckoo to her dress.
But there are also other means that are not so harmless and
lead to tragic consequences.

As they relate, one who has tasted these potions, these
drugs, falls into a deep melancholy and, after a few days,
dies. I knew two persons, somewhat Russified, who used to
sell such drugs for a high price, and several women died of
them.

832 Among the Gilyaks, as in our country, there are timid in
[582] dividuals who cannot bring themselves to make a declaration
of love in person. In such cases the intermediaries are old
women, who, for this, must be given "tea" -- a present.

ordinarily cloth, in which they tie several knots, corresp
ing to the number of days until the admirer will pay his vi
832 There remains to be discussed only what the stimuli
are for the Gilyak, what individual traits comprise the at-
traction of the beloved. First of all, of course, there is the
aesthetic side -- beauty, especially facial beauty. The
word "beautiful" in the Gilyak language is expressed by the
term pochi urland, literally -- "of a good face."

/254 cont./

832 826 609 It is noteworthy that they do not evaluate beauty only from their own racial viewpoint. Men and women both liked /255/ Russian women. Of male Europeans, the Gilyak women even liked types unfamiliar to them, such as redheads or blonds. Thus, for example, my friend Bronislaw Pilsudski, reddish-blond, enjoyed great admiration among the Gilyak, not only because of his sympathetic attitude toward them, but in particular on account of his attractice appearance. They referred to him only as poch urakhrà -- "handsome man," literally -- "beautiful in face," and when he left Sakhalin, the Gilyak women as a farewell present dictated to him songs of declarations of love.

832 826 533 In their love songs they sing not only about beauty, but also about "white skin, like the bark of a birch tree," luxuriant hair (a braid reaching to the waist, hair made sleek), gracefulness of gait ("with her head inclined to the side, smiling she walks," "with a six-foot stride he walks"), physical strength or size (his trunk is an arm-spread, "his legs go into the ground up to the shin").

832 291 533 Of course, elegance in clothing also plays no minor role in the aesthetic appreciation of one's sweetheart. In their love songs they sing about women's clothing embroidered with finery, about a great number of copper rattles sewn on, and so forth; they sing about men's black dog-skin fur coats, shirts made out of variegated sealskins, rich headbands of fine squirrel skins, etc. Women's summer clothing that is black in color is considered the most beautiful; men play the dandy in shirts that are sewed half of red and half of white or dark blue material. But along with outward beauty, moral qualities are also valued.

832 577 Women like in men the traits of manliness and reliability ("thy voice is like the voice of an urdla n'ivukh'a, i.e., respected man"), or the talents of a conversationalist -- jester, singer, Aside from outer beauty, men admire in women the [867] traits of femininity, which Gilyak women possess to a great degree both by nature and also due to early training; from

/255 cont./

832 childhood a little girl is taught to speak with a soft melodic
517 quality and to give her face a dreamy coquettish appearance.
867 A woman not infrequently succeeds through her talent for
832 singing. In their songs the women are capable, not only of
533 expressing their love with great delicacy, but also of ridiculing
626 unwanted suitors most maliciously. In her sarcasm the woman does not stop at any hyperbole. In one song the nose of the undesired one is compared to open patches of water in a frozen surface, to an open door, and his clothing, his dogs, his harness, etc. are described in similar tones.

839 /256/ Sexual Abnormalities and Perversions. I asked the Gilyak many times if such sexual perversions as pederasty and bestiality were practiced among them. No one, apparently, had ever heard of any cases of pederasty. As for
[158] bestiality, only in one village on the Tym' was I told, and then with disgust, of one psychically sick Gilyak who had
839 copulated with a dog. The attitude of the Gilyak to these
539 perversions is made clear by the following legend, which I wrote down on the Amur. The tiger, the panther, and even the lion (?) were once men. Once, by chance, the god Kur saw that they were copulating through the rear orifice. Then in indignation he said: "Well, since you copulate like beasts, henceforth be ye beasts forever." Thus, in the view of the Gilyak, the above-mentioned perversions are acts which make a man like a beast.

143 The Gilyak have an extremely simple attitude toward
826 hermaphrodites (miskund in the eastern dialect, miskij -- in the western dialect), in whose peculiarities they apparently see a plain anomaly, but feel no abhorrence for them and
[588] are glad to have sexual intercourse with them. Marriages of hermaphrodites are a common event.

/335 cont./

372 782 of the fire, the tugurmam, lives there). Then they feed the four inau. Furthermore, a hole is dug at the left front corner of the hearth, and they put sacrifices there, saying, "Urgur n'ira, nekhlang kun k:kholaf khavryr hunivaguja" -- "after eating well, make your children live without sickness," and after these words the hole is filled up. Finally, they feed the kel'nung ankh --" the bitch looking into a behind." At night, when everybody has gone to bed, it is necessary to burn a fir and say a prayer.

When the hearth is renewed in the winter quarters, small inau are set with sacrifices. In the evening they place three firs, tie them up with saranka and puchka, and then, when everyone has gone to sleep, they throw sacrifices up through the pipe: one is thrown by the women, another by the men. Before the beginning of the festival, the hearth is cleaned, covered with fresh earth, and lighted with the clan steel.

776 342 The spirits living in the house. Tav yzin -- the master of the house -- four chkhnaj, two male, two female, all pila hejmar -- old men. Tavyzing tugur yzing. This yzing was a tribesman in the past. His soul lives in the yurt in the tugur (flint box).

When the yurt breaks, the tugur must not be touched.

[688] If one breaks the tugur (box), he pays a fine.

Lymyz'n-mam -- mistress of the threshold. She is in fish skin, hunchbacked, gray, lulls crying children. When the ceremony of stamping the threshold is held, when a woman leaves for another clan, she sits in the corner at the entrance, near the cups which are placed on both sides of the threshold.

IV.

Women, Childbirth, and Children

832 Means for love. There is medicine to make another person [825] fall in love with one. The brain of a cuckoo is mixed into tobacco (then a man soon dies), or a cuckoo feather is sewed in a dress. The girl then goes around like a mad person.

/335 cont./

832 In Tenga a girl firmly refused to marry her bridegroom who had been engaged to her in her childhood, but when okht was made, she married him.

684 If one sleeps with another's wife by force, he is beaten for it and his dogs are taken away.

843 /336/ When a woman is pregnant, firewood must not be
846 cut on her footprints; she must not be struck in the face, even
[782] in jest. Chukh-chugynd (a sacrifice) must not be made in the langraf (a shed for childbirth), and as soon as the child is born, the woman returns to yer yurt. From the seventh month of pregnancy, the husband of a pregnant woman is not allowed to go hunting or to travel far to set up nooses, but he can go into the
846 langraf. Broth may not be brought from the yurt to the female parent, and when she returns from the langraf, she cannot eat food prepared on the common fire until the umbilical cord (kyr) of the baby falls away, and they make her a fire in the corner.
[782] When (the umbilical cord) falls away, then they feed the fire, chukhchugn-tugur, and have a feast. After that she stops being unclean -- akilaf pach:kyt -- and becomes sik urland pornyng -- clean, and her husband can cut firewood on her footprints. From the day of the birth of the child until the falling away of the umbilical cord -- kyr vakhind -- none of the people living in the yurt or even the guests spending the night may leave the house.

843 For a month before childbirth one must not bind anything
845 tightly or mend anything for another. With difficult births, one
789 must open up boxes, rip open patches, and unscrew the rifle.

A woman must not shriek during childbirth; otherwise she
844 will not deliver for a long time. If the stomach is pointed, pro-
843 truding, a boy will be born, if flat -- a girl. After four girls, a boy will unfailingly be born (1).

[846]
[171]

1. Among the Orok a woman is in the balagan only during childbirth; then for ten days they cook for her on a separate fire; men do not eat (with her), fearing to lose their strength.

562 really a sort of purchase. Moreover, the widow is in a
587 manner of speaking inherited by the brother or other close relative of the deceased. But this inheritance is more a matter of habit; if the widow wishes to marry another, she may do so, but he must pay back the kalym. The woman also does not take part in the more important councils. On the other hand, she may occupy an independent and respected position; she can, for instance, become a shaman. She may have her own money and inherit, although usually less than her brothers. If a widow does not wish to marry at all any more, she is not only permitted to do as she wishes, but even wins respect thereby.

584 In the case of a girl given in marriage by her parents,
557 their wishes are usually the determining factor, and the wealthy
562 man is favored. But even though the girl's taste is not particularly considered, there are usually no unfavorable consequences, because, as we said, if a woman is ill-treated she lets herself be abducted by an admirer. In ordinary affairs, the woman shows subservience to the man; in her sphere she is entirely independent and in the family council her opinion counts for no less than that of her husband.

832 The forms of greeting and manifestations of affection be-
576 tween man and [128] woman are very primitive and austere, as is
593 the case in general among the Gilyak. Kissing and handshaking are done only on special occasions, of which we shall speak later. Men and women very seldom kiss; even when the man takes leave or returns from a journey there is no embrace, no kiss, and no handshake, only good wishes are exchanged and even these are rather cool. However, there are other forms of caresses, which will hardly find approval. In tender moments, the woman looks for lice in the man's hair and cracks the game thus hunted between her teeth. Sometimes, the reverse occurs, and the man does it to his lady. Another expression of tenderness consists in washing each other's face with saliva.

578 The abduction of a woman always occurs with her full con-
586 sent. During the absence of the husband, the admirer suddenly appears with some companions, the lady is set in the sled or in the boat, and the party disappears. However, some men do not so easily submit to their fate, they pursue the abducted woman and attempt to win possession of her once more by means of cunning or even force. Some men seek revenge, and the result is a struggle and even death, but this is unusual. Quarrels among the Gilyak usually stem from some such causes. If the run-away couple succeed in hiding

833

833 SEXUAL INTERCOURSE--sexual initiation (e.g., age and circumstances of first intercourse for each sex, preferred partner); defloration; times and places considered appropriate for coitus; degree of interest and enjoyment ascribed to and manifested by each sex; initiative in copulation; degree of elaboration of preliminary sex play; preferred, variant, and tabooed postures; accompanying behavior (e.g., biting, urination); frequency and duration of coitus; occurrence of female orgasm; artificial means of augmenting sensation; behavior after coitus (e.g., sexual hygiene); psychic difficulties in coitus; impotence and frigidity (e.g., prevalence, explanation, prevention, treatment); etc. See also:

[191]

1. The avoidance of public caresses between individual spouses is not an exclusive peculiarity of the Gilyak. According to the testimony of Radlov /Radloff/, the Altatan in public does not allow himself even a joke with his wife in the presence of strangers, while at the same time the broadest freedom in relations between the sexes prevails among these peoples. -- Radloff, Aus Sibirien /From Siberia/, 1, 314.

may not take place publicly or before the eyes of the individual spouse concerned (2). If the act takes place at night in

[191]

2. Compare the similar phenomenon among the Tibetans. -- Westermarck, The Origin of Marriage, p. 141.

the yurt where there are also strangers sleeping, then each one lies down separately, and only when all have gone to sleep does the man or woman (both sides alike take the initiative, but women more rarely) move over to the bed of his group spouse, who may accept or reject the attention if there has not been any preliminary agreement. In summer the affair most frequently takes place in the open air; in the

/169 cont./
● 832 daytime the favorite place for "catching" one's an'g:ej is lo-
* 835 cations where berries are gathered; in the evening -- anywhere
outside of the settlement, near the well. In the winter, in
the yurt: in the daytime, in the absence of strangers; at
* 835 night, after all have gone to sleep. Finally, there are periods
822 when the group spouses are free from any restrictions. The
married men go for several weeks into the taiga to their
hunting territories, while in the summer and winter they con-
tinually travel about on visits or to festivals. At these times
* 835 there is complete freedom for the group spouses. Only one
[321] thing is most strictly demanded: neither the participants them-
selves nor any strangers who have chanced to be witnesses to the
relations of group spouses have the right, under the penalty
of sinning, to tell anyone, no matter who, and especially
the persons concerned, about such relations publicly. But
these demands of non-publicity, established in the interests
of peace between group spouses, with the aim of preventing
possible fits of jealousy, have in no way diminished the
publicity of the institution of group marriage itself, the
publicity of the conjugal rights themselves. These rights
[671] have been nationally formulated in legal theses which have
[847] come to be common property (the formulas themselves are
given below in the chapter on the relations of brothers to their
wives) -- theses which each father and each mother consider
their obligation to impart to their children with religious
solicitude from very earliest childhood. Publicly, the group
spouses not only behave with unconstrained familiarity, but
address each other with none other than the tender words "my
[964] dear little husband," "my dear little wife." But the publicity
of group relations /170/ is manifested best of all in the case of
the death of a man who is not joined in an individual marriage.
In such cases, before the burning of the body, one of the
group wives (usually the wife of an older brother) steps out
on the funeral platform and in the hearing of all mourns for
* 835 him as for her beloved, as for her husband. It is curious to
835 note that during the negotiations between the pu and the
584

/257 cont./
147 that he began to wear men's clothing, got married, and now
824 is the foremost hunter of the vicinity. Normally he lives
588 with his wife, but sometimes copulates with men. He con-
siders the latter more pleasurable and speaks of himself with
pleasure: "I have two chances, two joys." All treat him as
an urdla n'ivukh. In all I was able to count five such cases
among the Gilyak, the number that Bogoraz found among the
Chukchee.

881 The Gilyak have no special rites at the time of attain-
[302] ing sexual maturity. The only outward sign for a maiden
who has attained sexual maturity is that she begins to plait
her hair in two braids. The moment of the onset of sexual
maturity for a maiden is considered the menstrual period,
which ordinarily begins in the thirteenth or fourteenth year.
881 This moment is considered the beginning of marriageable
826 age, although the proper term for a woman who has attained
sexual maturity is the expression -- "a woman who has seen
her body," i.e., whose breasts have grown to the point where
the can see them. A similar term exists for men -- "a man who
[302] has seen his body," but in this case the word "body" refers to
the mustache.

Some time before the onset of menstruation the mother
prepares her daughter for the approaching change in her life
and instructs her in all the necessary rites and taboos con-
881 nected with blood. The Gilyak, both men and women,
847 fully recognize the significance of menstruation as the mark
585 of sexual maturity and do not have sexual intercourse before
● 833 its onset. Adult Gilyak frequently marry little girls from
the first day sleep with them under one covering, but do not
begin sexual intercourse until the wife informs her husband of
the onset of the first menstruation.

/322 cont./
756 When shamans fight, the one who has more souls wins. The
704 killing of one shaman by another is accompanied by the acquisition
704 of the kekhn of the opponent. During his supposed death, the soul
578 of the shaman travels over islands of the sea (tol). On these
islands, which are of various colors, the houses are of stone
tol-kekhn. Sometimes his soul goes into the mountains to the
abode of pal-kekhn. The shaman kekhn fears only Pal milk and
Tol milk, but not the milk of sables, foxes, otters, and rats (1).

1. Concerning the rat, see Chapter VII, "Miscellanea." S. Sh.

Among the kekhn there are variously colored eared seals, iron
fleut, and tigers.

756 How the shaman Chomkx resurrected a woman (the settlement of
559 Aykovikoye). A husband and a wife were fishing. The wife fell
sick and died before morning. The husband said: "All you shamans
are deceiving me. Now my wife is dead. Well, make her live!"
The shaman became angry and said: "I shall shamanize all night;
if before morning she moves her left little finger, she will live."
That is what happened.
756 A shaman stabbed himself and shot himself in the mouth,
and "nothing."

756 A female shaman has more spirits than a male shaman.
584 She kills her shaman competitor, sending her kekhn to rub her
253 competitor's eyes with the menstrual blood of shankh-cholch. A
253 feature of this blood is that a drop in food makes a person waste
253 away. Copulation during the menstrual flow also leads to local
● 833 attacks.

756 The kamlanie of a female shaman, who, according to her
756 own words, was milkternd (mad) after the birth of her first daughter.
558 She first made inau and then rubbed her face, breast, and so forth
with marsh tea, lighted it on the hearth, and warmed her
tambourine... Then she bound her legs and arms with shavings
and girdled herself with shavings. She yawned. Moderate blows...
The sound grew stronger. She sighed loudly and whispered. She

* 835 /179 cont./ By way of an exception, I observed several cases
822 where jealous men moved to an isolated place immediately
822 after the wedding, in order to avoid the competition of their
[361] brothers. Among the settlement of Ai-Tokotan, the southern-
most Gilyak settlement on the western shore, was founded by
such a jealous man; when I visited it in 1897, I found there
only its founder with his numerous descendants, and my Gilyak
companions maue not a few jokes about him, but he was in-
vulnerable -- his wife was of an age when women are well
* 835 beyond suspicion. But such cases are exceptional, and all the
578 more exceptional are cases of sharp clashes between brothers
● 834 on account of jealousy. In order to avoid them, only an ob-
servance of tact is demanded. Such cases are possible when
an individual wife and a bachelor tuvn go beyond the bounds
of decency and tact: when a woman begins to run after her
sweetheart publicly, disappears from the home, and com-
pletely disregards her obligations to her individual husband.
In such cases it is sometimes necessary for the sweetheart to
move out of the house of his brother or even out of his village,
[160] and the woman sometimes gets a scolding. I met such exiles
* 835 a couple of times in northern Sakhalin. Usually, however, the
578 relations between tuvn are quite peaceful. If the older brother
gets a little angry, it is in silence and without any consequences.
Any active reaction is considered a sin. It is considered a
great sin to challenge one's brother to a duel out of jealousy.
I personally never happened even to hear of such cases. I
happened to find out about one such case from B. Pilsudski,
but this was a completely /180/ exceptional instance. A
certain Lokhmatka, a young Gilyak also very well known to
me personally, a very poor lad, but one who enjoyed unusual
success with the Gilyak women, allowed himself to live too
openly with the wife of one of his tuvn. According to the
[662] Gilyak custom, as I have already said, publicity in such cases
[556] is not allowed. It is allowed in exceptional cases, when the
[556] hero is an outstanding and rich man, esteemed by all.
Lokhmatka, however, was a thriftless Gilyak, everlastingly in
debt to everybody, lighthearded, and undistinguished by any

831 /183 cont./
group sexual cohabitation is legitimately practiced on a large
831 scale. When reproaches were sometimes directed by older
861 persons at younger ones for sexual excesses, it was only on
account of economic considerations, since sexual diversions
831 frequently distract youths from work at home. Reproaches were
* 835 also directed at pregnant maidens, but here the considerations
848 were of a special nature, about which we spoke above: 1)
the danger of a connection with persons of the forbidden cate-
gories, and principally, 2) the anonymity of the father of the
831 child. But ordinarily the adventures of the youth are no
574 secret and do not give rise to reproach. It is a perfectly
883 ordinary phenomenon for young men to set out for a visit of
several months' duration to the settlements of their "fathers-
in-law," where there are so many an'g:ej maidens at their
disposal, and the older generation not only does not oppose
this, but is very happy about it. As we have already said, an
unmarried vmg:i (son-in-law /syat'/) is a most desirable guest
in the house. "One is obliged to feed an "vmg:i" (son-in-
831 law)" (see p. 249). Women and even maidens yield little to
832 the men in laxness of attitude toward what we call sexual
● 834 morals. It is only necessary for them to be more careful
* [835] (especially when the matter concerns persons who are not of
the class pu), and for this reason they always affect an ap-
pearance of the sternest inaccessibility, but in reality they are
831 just as loose as the men. And yet, in view of all this, to say
834 that the Gilyak is devoid of a feeling of sexual morals would be
the greatest injustice. Actually the Gilyak give free rein to
their instincts only within socially permitted limits. And,
on the other hand, what the norms do not allow, for example,
reactions of jealousy with respect to one's tuvn, and especially
sexual intercourse with persons of forbidden categories, is
observed with a very great rigorousness completely unknown
to us, and this notwithstanding the fact that the prohibitions
on sexual intercourse often have in their favor neither
physiological, nor psychic, nor any other kind of reasonable
basis, such as, for example, the prohibitions between the
[illegible] closest agnate male and female cousins. During

/247 cont./
amatory experience and art. The Gilyak woman, it is true,
836 conducts herself in an extremely inaccessible manner. Upon
837 the appearance of a strange man, she lowers her eyes, sits all
[834] the time with her brown knit, and hardly answers the questions
of the man. But this is only extent a inaccessibility,
concealing an inner lasciviousness. Unnoticed by those about
her, she /248/ casts oblique, curious glances at the new man
at a time when he can catch them. And if the guest has
made a proper impression, the matter is consummated very
quickly. The man follows her to the well, or to the berry
patch, or simply catches her in the entrance hall, and then,
after a short symbolic dialogue, such as, "Let's smoke to-
gether (i.e., drawing in turn at the same pipe)."
or "let's hear the news," the matter is settled very simply.
Sometimes the guest simply remains in the yurt of his beloved
and at night moves over to her couch, or vice versa. Some-
times the business is consummated without words, limiting
itself to a mute symbolism, touching the breast, seizing
the leg, and if this symbolism does not encounter any rebuff,
the consent of the woman is secured. It is curious that the
symbolism of amatory proposals recalls the rites of the
wedding ceremonies. The proposal to smoke together is a
joking imitation of the rite of conferratio /confarreatio/.
[585] The snatching of the leg or the breast, although it does not
[171] figure at the present time in the wedding ceremonies of
the Gilyak, is still to be found among certain peoples of North
America, for example among the Lillooet Indians, according
to the testimony of Boas and Teit.

836 Such license in alien villages is practiced not only by
837 the unmarried youth, but by the married, middle-aged
159 Gilyak as well. On one of my first trips there was among my
companions an old respectable Gilyak, Gibel'ka, who en-
joyed great fame throughout all of Sakhalin by reason of
his wealth and outstanding intellect. When we stopped in
the settlements, he spoke breathlessly on a par with his
young companions about the pretty women of the settlement,
and once he became so carried away that he began to ask my

are being set, i.e., during the narkhund, and also during a bear
festival and when a man has died.

III.

342 The Building of a House and Rites and Ideas Connected
with the House

[787] A flint and some sweetbrier are placed under the post. The
sweetbrier guards against the milk, while the flint is there so that
there will be no hole in the wood, and then the milk (evil spirit)
cannot come through. The door is toward the east.

When a new yurt is finished, a festival is held. They make
an inin chihnaj (chihnaj ef (?) ekhling; Ady-Tymi) in the
shape of a human face on each of four posts (nas'ki khar) of the
house, and, for the sturdiness of the house, inau are tied to the
cross rafters (nas'ki). Then they kill a dog, tie it to the nas'ki
khar closest to the door, and rub the chhknaj with the blood of its
[782] heart. The meat of the dog is boiled. Mos' is made, and the
chhknajinau, the holgelnar'kh, or (in Arkyvo) the lymymmam,
and the nich are fed. Three small fats are then placed in the
hearth and tied up with two saranka -- bound with puchka (akhz);
for some reason these bindings are called "little bear." After
this, mos' wrapped in inau is put in three places under the ground.
At night when everybody has gone to bed, it is necessary to burn
the fats and say a prayer.

370 In the fire nearest the exit is the tugur-mam, and beyond
787 the fire the old man tugur-vchih. The tugur, the master of the
fire, is fed with all sorts of viands; they throw them into the fire
and say: "Urgur inj, urlantaf mujši" (i.e., "eat well, be a good
house!"). Next they feed each /335/ corner, repeating: "Urlan
tugur mujšiik urlaf parkjš, hiulan taf mujš ta chos'khejš" -- "be
a good fire, do everything well, be a house that brings luck in
the hunt, do not get broken!" (it is understood that the old woman

/638 cont./
834 The moral austerity of the Gilyak also appears in the
570 altogether decent behavior of the two sexes toward each other
and in the modesty of their women and girls. One living with
them in their houses never sees indecent physical exposure,
such as occurs so frequently among the Ainu (2), or any other

[18] 2. N. Buse, Otr. Sakhalin" I Eksped.

pedition of 1853-54/, St. Peterb., 1872,
pp. 55, 56, 70.

[37] shocking scenes. Violations of chastity, particularly among
[33] unmarried persons, are, of course, not impossible, but are
[348] most severely censured by the parents of the girl who has
[347] been seduced and has given birth to a child. According to
the Gilyak, in such a case the girl's mother incites out
corporal punishment on her daughter, while the father tries
to eliminate the scandal by killing the newborn child and
[562] secretly doing away with it. This is always done if the child
is a girl, whereas a boy is shown mercy in certain circum-
stances, and the girl's chances suffer less in this case.

832 Although contracted by purchase, and in part because
542 of this, as is clear from what has been said, the marriages
[58] of the Gilyak usually take a happy or at least a satisfactory
course. Marital fidelity is strictly observed. The husband
jealously guards the fidelity of his wife, especially while
she is young, and the latter is on her guard against giving
her husband cause for mistrust and suspicion and arousing his
586 anger. One very salutary influence checking and curbing
the passions on both sides is the circumstance that the husband,
if he casts out his wife for any reason and returns her to her
parents does not by any means thereby gain any right to a re-
fund of the articles paid for her, and that, on the other hand,
he may claim such a refund if the wife leaves him on her
own accord. In this case she may by no means count on a
friendly reception by her parents. Therefore, simply for

548 On Sakhalin it happened that the Gilyak meant to kill such
837 a Helen who lived with a Russian soldier and bore him
684 a child.

Sodomy, onanism and similar perversions seem to be un-
839 known among the Gilyak. Those whom I questioned about
them regarded me with astonishment and did not know what
I was talking about.

514 As for modesty, it varies according to the type referred
834 to. In sexual matters it is not very pronounced, as we have
already pointed out. First of all, the crowded way in which
people live together does not permit such delicacy; however
the Gilyaks try to hide their love-making from strangers.
Their natural functions they do not exactly perform in the
open, but they are not particularly ashamed in front of mem-
bers of the opposite sex. Men as well as women squat in
urinating. Women, at any rate younger women, guard
against exposing their bodies before strange men. I had
some difficulty in persuading them to do this when I was
taking body measurements.

177 It is impossible to study the more subtle expressions of
437 modesty in all their forms, but it seems that the Gilyak are
183 most of all ashamed of being taken for thieves and cowards.
576 Their entire character and cycle of habits is such that fawn-
ing and self-degradation are foreign to them. They do not
make much genuflection, but do it largely when they are
forced to. Thus those Gilyak who decide to travel up the
Sungari to the Chinese with their fur must, as a matter of
course, bow before the Chinese officials. And probably the
Chinese are responsible for teaching them such humiliating
expressions of veneration. [227]

735 Begging is practically non-existent among the Gilyak. The
273 only specimen one can see begging is the so-called Vasrda-
Gilyak, a degenerated half-idiot who goes begging along the
streets of Nikolayevsk-na-Amure and who long since has
deserted his countrymen. He is also the only one who can
be seen in a drunken state, swaying and noisily roaming about.
In general drunkenness has not taken root to such an extent
that there are professional alcoholics, and this is probably
partly because Gilyak cannot have spirits whenever they
want, for it necessitates a trip to the Russians. But they
love liquor very much, and unfortunately it is to be foreseen
that this habit will become wide-spread.

623 XII. Councils, Jurisdiction, Duels, Prosecution
681 of Criminals

Meetings and councils are seldom held. If they are, they

846 given birth to a child does not leave her place, the
hut; only during the most severe spells of frosty
weather is she allowed to go to the dwelling place, in
case she herself is the housewife. If she is not the
housewife she cannot expect to be taken into the house
846 by another woman. Mishaps occurring to weak women
776 in confinement who were left to themselves in the hut
are attributed to evil spirits. In order to keep these
spirits out of the "house of birth", in which one of the
most important and mysterious natural events takes
place, a large axe is placed at the entrance of the
hut designed to banish the evil spirits. But this
convenient and easy way of protection is not always
sufficient. I recall a Gilyak called Kan coming
hurriedly to me for help [760] because his wife, who
was compelled to do all the work in the narrow and
disgusting hut, even to sewing and chopping wood,
had, inadvertently, hurt his newly born son's head.
On another occasion, the hut in which the wife of a
Gilyak friend of mine was in confinement caught fire
when she had started a fire in order to warm her
chilled limbs. The fact that such mishaps do not occur
as frequently as one should expect is due to the
admirable strength of character and fortitude of the
Gilyak woman who, even worn out and sick, never
loses her presence of mind and her ability to work.
It is the might of her powerful love which, in such
moments, increases her will power and her fortitude
to a degree unknown and incomprehensible to men.

847 Unmarried Gilyak women, fearing the disgrace
163 which they would have to suffer, sometimes effect
artificial miscarriages; they use the same means
which are said to cause natural miscarriages. But
their skill in committing abortion is not great, for
there are many cases of infanticide.

Once in a while it happens that a Gilyak woman
gives birth to a dead child; but that happens so
infrequently that it could not be shown a single woman
to whom that had happened.

834 The Gilyak very much dislike talking about sexual
864 matters and about facts connected with them. That
is probably the reason why the appearance of a new
member of the family is explained to children in such

834 a way that every discussion of the fact is precluded.
864 If the baby was born in the summer, the children are
told that it was taken from under the roots of a tree
or trunk; if a baby was born in winter, one pretends to
have found it in the snow.

845 Twin births.

163 No tribe on Sakhalin island has reported the birth
of triplets to any woman at any time. That is why
there are no legends about such an event either.

Not infrequently twin births take place among the
natives. They contend that in each one of these cases
both children are of the same sex. I personally came
to know two living twins of the Gilyak tribe who were
between forty and forty-five years old. In regions
rather well known to me there occurred three twin
births in a population of more than 300 persons
within a decade, but all three twins died immediately
after birth. When I left in 1905 there were five month
old twins living in the family of a Gilyak friend of
845 mine. Only in a single old Gilyak song which I wrote
539 down are twins of different sex mentioned. The
776 brother is in love with his sister and, in this song,
asks her to take his heart into her hands, or else he
will die.

The Gilyak are convinced that one of the twins is
the son of the god of the woods and mountains, pal-
ni-rookh (mountain man), a mighty deity now
benevolent, now malevolent towards the poor, weak
Gilyak. [761] (1) That is why the child of the pal-ni-

1. I was, however, given another
explanation by a Gilyak: one of the
twins is said to be an offspring of
the mountains, the other one an
offspring of the sea.

rookh, should be given back to his father right away.
But, not being certain which of the children is not an
offspring of human beings one prefers to treat them
both equally.

845 It is a custom among the Gilyak of the Gilyak to
766 cremate dead bodies (2), but twins are not allowed to

2. In general, only those Gilyak tribes

exual intercourse between members
275, and 329-345./

/31 cont. /

periods in the evolution of marriage, and, although they could have influenced one another, they basically belong, speaking in the language of geology, to different formations. It sufficient to say that among the Tungus tribes sexual intercourse with wives of individuals of ascending generations is allowed, for example, with the wife of the father's younger brother, while among the Gilyak this is regarded as incest.

At first sight the Gilyak institution of marriage does not seem to be anything special. A Gilyak will generally buy one or rarely two or three wives, who come over into his clan and are regarded before the world as his personal wives and the mothers of his children. The children belong exclusively to the father and succeed him after his death. When a Gilyak becomes a father, he is no longer called by his former name, but is called the father of the born child. The exclusive possession of his wives expresses itself in the stern custom of blood vengeance against the disturber of marital harmony. The clan is based on the principle of agnation, and marriage is exogamous.

One can travel over the entire territory of the Gilyak, live in their yurts, and observe their family life for a long time, and not notice anything peculiar in the structure of their family. In large winter yurts the inhabitants occupy their plank beds by families, each living in relation to its own particular interests. Complete harmony and tender relations prevail among husband, wife, and their children. That is not all. One may frequently encounter instances of striking loyalty and love between spouses. When one of them dies, the other frequently lays hands on himself or dies from grief. In a word, to all appearances we are dealing with the type of family which is generally called patriarchal. Actually, however, it is not. First of all, one is struck by the strange kinship nomenclature. A whole group of women call a whole group of men their husbands (pu, ivn), and the latter call them their wives (an'gej). Likewise, a whole group of men call a group of women their mothers (ymk) and a group of men their fathers (ytk), and these call the former their children.

/32 cont. /

601 In particular, among many primitive tribes, the Gilyak calls not only his own wife, but also the wives of his elder brothers of all degrees of kinship, as well as all the sisters of his wife of all degrees of kinship, his wife (an'gej), while they, in turn, call him their husband (pu, ivn). Their children call one another brothers and sisters (tym, ngl). In addition the Gilyak calls all his female cousins on his mother's side /32/(the daughters of the brothers of his own mother and of the brothers of all the women born he calls ymk -- mother) his wives from the time of their birth. The Gilyak calls not only his own mother, but also all the wives of the brothers of his father, own and agnate, as well as the sisters of these women, mother (ymk), while they call him their son. Consistent with this, he calls not only his own father, but also the brothers of his father, his father (ytk), while in certain clans the term father is applied to all elder and younger brothers (own and agnate) of the father, and in others (among most of the Sakhalin Gilyak) -- only to the brothers younger than the father. The children of brothers in relationship to the latter are considered sons and daughters. Seemingly even stranger is the rule by which women call their husband's brothers' wives sister, while men call their father-in-law's sisters mother. A European bears with astonishment a small Gilyak boy call the wife of his elder brother an'gej (wife), while she calls him -- little husband (ychikh, pu, ivn), or as the Gilyak very often says "I shall go to see my fathers and mothers," i.e., the brothers of his father or the sisters of his mother, but after long observation one becomes so accustomed to this strange phenomenon that he begins to consider it completely natural. In spite of the view expressed in recent times that a classificatory system of kinship represents only the nomenclature of ages, I can testify after long years of observation that among the Gilyak this nomenclature, based on a strict calculation of degrees of kinship, fully corresponds to their norms of sexual intercourse. Age plays no role: frequently very old men and young adolescents are included in one and the same category. All persons bound together by the names an'gej and pu (husband and wife) actually have conjugal rights to one another, i.e., they not only have the right to enter into regular marriages with each other or to have sexual intercourse before entering into a

/32 cont. /

601 regular marriage, but preserve the rights to sexual intercourse
835 even when the individuals of these categories are joined in an individual marriage, being joined in a legitimate, as it were, individual marriage, the wife at the same time enjoys the right privately, i.e., in the absence of her husband, to have intercourse with persons of the group of men whom she calls pu, ivn (husband). Most often, of course, this right is exercised by the brothers of her husband, his own or of further degrees of kinship, living with him in the same village, but even men who have newly arrived, without any strange strangers passing through the settlement by chance, if they regard themselves, even by the most distant kinship, as "pu" of the given woman, freely /33/ exercise this right, with, of course, the consent of the woman. During my travels over Sakhalin, my companions from the western shore, appearing with me in a distant settlement on the eastern shore of the island, in which neither they nor their fathers had ever been, but in which, according to their geological information, there lived a woman of the an'gej category, freely exercised their rights, when the husband was not in the yurt, of course. This phenomenon is completely identical with what is said about the Eurasian koski and kumiti, who will find a martial bed everywhere, even at the farthest points of their territory, on the condition that the husands are kumi and the beautiful strangers are koski.

171 835 In character, these norms of sexual intercourse most closely resemble the same such norms in the Australian Dieri tribe, among whom the two kinds of sexual intercourse mentioned are clearly registered by the terms nou and pirauri (1). Among them each

[113] 1. "Australian Group Relations." by Howitt (Papers relating to Anthropology contrib. to the Smithsonian Institute. 1885). pp. 12 f.

woman is joined in individual, legitimate marriage to a single man, and the spouses call each other nou; but at the same time she is joined in a group marriage with a whole category of men.

/33 cont. /

835 who are affirmed to have the right to this by the great council of
171 the tribe. With regard to this group, the laws of the tribe were vague. Thus we find identical institutions of marriage in tribes which are so different from one another! The famous punulua family of the Hawaiian Islands finds full rapprochement with the institution of Gilyak marriage.

The legitimacy of group sexual intercourse is clearly expressed in the fact that, while the violation of marital fidelity with a person not included in the group "pu" leads to blood vengeance against the seducer who has been caught in flagrante delicto, or, at best, to a cruel duel and ransom, for the persons of the permitted categories it leads to no retribution whatsoever, causing only some irritation and to some degree shaming the seducer to another yurt. On the other hand, sexual intercourse between persons of forbidden categories is encountered as an extremely rare exception.

835 In my travels I observed seven cases of the regular cohabitation of brothers with a common wife, and full harmony prevailed between the brothers. My first teacher of the Gilyak language, a Gilyak from the village of Tangivu, Gibel'ka, the richest and most respected /34/ Gilyak on all Sakhalin, always lived in the same yurt with his younger brother, Pleun, and the relations between the latter and the wife of his elder brother were no secret to anybody. Her children regarded both fathers with identical tenderness and enjoyed equal tendernes from the latter, and, when Pleun died, all his property went to these children, publicly regarded as Gibel'ka's children. Pleun was very rich and could buy himself more than one wife, but he loved the wife of his elder brother, who in no way protested against the reciprocity on the part of his wife, who had cost him a good deal. When anyone hinted about these relations to Gibel'ka, a momentary cloud of melancholy would pass across his intelligent, handsome face, but I never saw even a trace of bad feelings between the brothers.

/34 cont. /

835 The Gilyak youths were often perplexed about why I so
839 earnestly asked about these relations between wives and the brothers of their husbands, strange to us and perfectly natural to them, and asked in almazement: "Could it be that among you, among the Russians, it is not so? You mean one could live with the wife of one's brother?" And upon receiving a negative answer, they would dolefully shake their heads, saying: "Well, that is a very bad law!" And they would look with disbelief at me.

Human nature, of course, is the same everywhere; even
835 the Gilyak has attacks of jealousy, but, with regard to persons of
152 permitted categories, jealousy never expresses itself in any kind of active form, and, if it does, it is only in the form of a light irritation, and in some cases a jeering remark to the husband, because, on the other hand, familiar relations may lead to sexual intercourse in forbidden degrees. And, on the other hand, to light quarrels out of jealousy in cases of permitted intercourse. On the same grounds, among the Sakhalin Gilyak, one is allowed to talk to, but not to joke with, wives of the younger brothers, because sexual intercourse with them is forbidden, and, conversely, one can both talk to and joke with wives of elder brothers, and generally with the group of an'gej (wives).

[836] Because of the prohibition against conversation with categories of close kinsmen among the Gilyak, the custom of saying hello and good-by upon arrival and departure is absent.

So far, I have cited only facts. But where did these strange facts come from? How can we explain these complex and confusing norms of sexual cohabitation, and the no less strange kinship nomenclature? If we ask the Gilyak about the reasons for the marital rights of brothers to their wives, the right of a person to the married sisters of his own wife or the married sisters of the wives of his brothers is completely incomprehensible. Why is it that a woman calls not only her own sister, but also her husband's brothers' wives sister? Why does a man /36/ call the sister of his father-in-law his mother? Why, for instance, is it enough that a person from
835 the clan A, let us say, takes a wife from a completely alien clan for
835 all the women of clan A to become forbidden to the representatives
of the latter. The complex and confusing chain of these facts must doubtless be the result of the single, very simple basic fact of an original type of family and clan organization: a type which

/35 cont. /

because of the vicissitudes of the clan life of the Gilyak, their migrations, depopulations, immigrations, and other such reasons, naturally in the course of time had to become complicated and lose its former simplicity.

A key to the discovery of this original type is the same kinship nomenclature, which, without doubt, is a living reflection
835 of the sexual norms which were discarded or are being discarded.

First of all, it is clear that the kinship nomenclature according to which 1. a man, call the sisters of my father-in-law mother (ymk), while the wives of his brothers, at the same time that my wife and the wives of my brothers, both own and agnate, call one another sister, can develop only under circumstances in which all my clansmen take their wives exclusively from one community, and furthermore in such a way that each generation of brothers of all degrees of kinship takes for wives a corresponding generation of women-sisters of all degrees of kinship. Then, in fact, the sisters of my father-in-law will be the wives of my father and of his brothers, and, consequently, my mother, while my wife and the wives of my brothers will be sisters to one another. Under such a system, marriages between persons of ascending and descending generations (uncles and nieces) are impossible.

But which clan is the one from which all my clansmen must necessarily take their wives? This is eloquently answered by that detail of the kinship nomenclature by which I and my clansmen of my generation, i.e., my brothers and cousins in the male line, call from birth our mothers' brothers' daughters our wives, and conversely, they call us their husbands. It is clear from this that the clan from which my mother came, i.e., the clan of her father and of her brothers, is that clan from which I and my clansmen (the mothers of the clansmen of my generation are the sisters of my mother) must necessarily and exclusively take our wives, and furthermore, as I have already said, from corresponding generations. If my father and his brothers took for their wives a group of sisters from a certain clan, then I and my brothers must marry the daughters of the brothers of this group of sisters from the same clan, but to exchange women, i.e., giving women to that clan from which my /37/ clan takes wives, is prohibited: all the women of

/37 cont. /

my clan must, in turn, go to a third clan, whose ancestresses were the wives of the ancestors of the clan of my father. In the kinship terminology this limitation is clearly expressed in the fact that I do not call the daughter of the sister of my father (an'gej), but simply nayikh, and she calls me, not husband (pu, ivn), but ytk, akhmal'n. Such was the type of the primitive structure of the family and clan, reconstructed a priori from the kinship nomenclature. I did not, however, arrive at my conclusions a priori.

In spite of all the unfavorable conditions indicated by me
532 which relaxed the exclusiveness of marriage within a particular clan, the old principle continues to be dominant up to the present day. Upon first acquaintance with the way of life of the Gilyak, not yet known to European literature in detail, I was impressed by the persistent tendency of each clan to take wives predominantly from one particular clan, namely, from the clan of one's mother. P'fand'ukh unge genedzh urdzhra -- "You must take your wives from the clan of your mother." P'fand'ukh the clan of your mother" (1); thus the Gilyak taught me their matrimonial

[1] 1. The etymology of the word p'fand'ukh
is interesting: it is composed of pi (ones
own, yours), pandf (kinsmen of the mother),
and ukh (from). The word pandf is from
pandynd -- "to be born."

[835] wisdom. Although now it is permitted to take wives not from the clan of one's mother, the terminology has imprinted an old prohibition on the marriage of women: brides not from the clan of the mother bear the name yokh, i.e., a woman with whom sexual intercourse is prohibited (thus, for example, elder brothers, for whom sexual intercourse with the wives of the younger ones is prohibited, call the latter yokh), while a bride from one's mother's clan is called an'gej (wife, any woman with whom sexual intercourse is permitted). Indeed, the favorite form of marriage among the Gilyak has never been the exchange of a brother's own (preferably) or agnate, of the mother, but in any case a kinsman -- "brother" of the father. On the other hand, marriage with a

/146/

171 2) The norms of Gilyak marriage explain to us further the
582 strange institution among the Dieri tribe in Australia. where a
835 great council of the tribe, at appointed periods solemnly de-
clares which men and women of the tribe have the right to
group cohabitation.

From what we have said above about the intricacy and difficulty of determining the genealogical rights in matrimonial questions among the Gilyak, questions which for primitive man have an extremely serious religious significance, it is clear that there would gradually have to develop a rule whereby the decisions on these questions ceased to be a matter for the individual person and became the function of a competent institution of elders and specialists on genealogy and marriage law.

3) The Gilyak system of marriage explains to us why among many Australian tribes the women in each clan belong to a single totem. In fact, as among the Gilyak, all the women coming
614 in must be taken from a single clan, i.e., they are of a single totem.

4) This same system explains to us why, mutatis mutandis, every kumi and kroki among the Australians finds his wife throughout the territory of the distribution of his tribe; in reality he finds her only in that clan from which his clan must take its wives and in which every woman of the corresponding generation is his wife.

5) It explains to us the strange class system among many Australian peoples, for example, among the Kamilaroi, where ascending and descending generations belong to different classes, and only in the third, among some -- in the fourth, or even in the fifth -- sixth generation, do they return to the class of the fathers.

The Gilyak norms, in spite of all the difference in details from those among the Australians, satisfactorily explain this strange phenomenon.

615 Let us recall again the tri-clan phratry and for clarity call
614 clan A -- Andreev, clan V -- Vasil'ev, and clan S -- Stepanov.
582 Consistent with the Gilyak norms, Varvara's daughter from clan A is from birth considered the wife of one of the Stepanovs (of clan S), and, consequently, her sobriquet will be not Andreeva

/106 cont./

* 614 7. One sin. Although the norms and customs of religion and
● 835 conduct are almost the same for the whole tribe, nevertheless
602 each clan has its own complex of obligations and prohibitions,
obligatory only for its own members. The first extensive
category of prohibitions relates to sexual norms. For the
members of each clan certain categories of women are prohibited for marriage and sexual relations, for example, all the women, without exception, born in the given clan, further, the wives of one's younger brothers, all women who are called ymk and ranr, all women who come from the clan of the "sons-in-law" /syat'ya/, etc., /107/ so that to know what women are prohibited for one or another person is enough for infallibly saying to which clan he belongs. In this category the prohibitions of speech may also apply. For the members of each clan there are certain classes of persons with whom it is prohibited to speak; such classes are the tuvn (brothers and sisters of all degrees of kinship), the achik
* 614 (mother and aunts of the wife), and others. A third category
688 of prohibitions deals with religious norms in the narrow sense. Each clan, as we have seen, has its own clan gods and sacrifices, its own sacred objects, its beliefs, and, consequently, its own ritual of the clan cult, common to all the clanmen but having no religious significance whatever for members of other clans. These numerous rites and objects of the cult demand the greatest respect. The whole clan, on whom is vented the wrath of the offended deities, answers and therefore each member of the clan is not only obliged himself to avoid infractions of his taboos, but to defend them against infraction by outsiders. For each such infraction it is necessary to exact tkhusind. Hence the customary difficulties with members of other clans over an accidental defiling of the enclosure of the hearth, over the taking of fire from the yurt, a bear bone dropped during the festival banquet, the infraction of the inviolability of all the appurtenances of the bear festival -- the posts to which the bears are tied, the poles with their heads, the storehouses for festival utensils and bear bones, etc.

/150 cont./

684 for the man, and more or less bloody for the woman. But all
this concerns only cases involving a married woman. Sexual
836 relations with an unmarried woman or with a widow, if it is with
583 the permission of the woman, do not provoke any reaction,
even on the part of the father or brothers of the wife, notwithstanding their extreme interest in the bride price which is received when a woman gets married; I, at least, did not happen
684 to hear of repressions in such cases. A reaction on the part
of the kinsmen of the woman occurs only in a case of coercion;
582 then there is an impossibility of duels and suits for ransom. Also,
at the present time there are no prohibitions against marrying
a person of this category, i.e., persons not bound by kinship.
● 835 It is another matter with individuals who are bound by the classificatory terms of kinship. Here there appears on the scene a complete system of limitations and prohibitions. Here, against the violators of the prohibitions, there appears on the scene both a social reaction and the categorical imperative of religion, under the influence of which there have developed suitable instincts which have turned artificially created norms into natural human feelings. We shall dwell on this aspect of Gilyak psychics in more detail later, when we speak of sexual morals. Now we shall turn to the norms of prohibitions and limitations themselves.

These prohibitions and limitations, it turns out, fully correspond with the kinship nomenclature. Only those persons who, according to the established class terminology, are mutually reckoned in the classes "pu" and "anŋrej," that is, /151/ who from birth call each other "husband" and "wife," have the right to sexual relations with one another and to enter into matrimony. All the remaining classes are placed under unconditional prohibition.

835 What are these prohibited classes? First of all there is the
614 extensive class of kakhal, i.e., the persons born into one
common agnatic clan. The Gilyak clan is absolutely
exogamous; among the agnates, as we have seen, there are
no aliases that call each other "pu" and "anŋrej"; neither
marriage nor sexual intercourse is possible among them.

/151 cont./

● 835 And therefore we must come out in the most categorical
614 manner against the assertion of Schrenck that the Gilyak clan
114 is endogamous. "Affiliation to the clan," says Schrenck,
"does not play any role whatever in the most important
phenomenon of their life, namely, in marriage... the Gilyak
freely permit marriages between Gilyak of one and the same
kal'a (clan)" (1). Elsewhere he states even more definitely:

1. Schrenck, II, pp. 23, 24.

"only own brothers and sisters and the children of two own brothers cannot marry" (2). This absolutely false assertion

2. Ibid., p. 6.

would be completely incomprehensible coming from an investigator who had spent about two years in contact with the Gilyak, if it were not for the fact that Schrenck did not command the Gilyak language and had to make himself understood through a guide. On the basis of many years of association with the Gilyak, in their own language, and of an especially thorough study of marriage law, I can categorically refute this absolutely groundless and antiscientific assertion of Schrenck's; both marriage and sexual relations between persons born in one clan are absolutely forbidden.

835 We turn now to the particular classes, within as well as
outside of the clan, which are excluded from the right of
sexual relations and marriage.

Class of the ascending and descending lines. Classes whose members call each other atk, achik, ytk, ymk, nankh, and, conversely, ŋhie, i.e., the classes of grandfathers and grandmothers, fathers and mothers, agnates and cognates, uncles and aunts -- on one hand, on the other -- their descendants. Thus, intercourse between ascending and descending lines is excluded not only in the direct, but also in the most distant collateral lines as well; sexual intercourse

/151 cont./

● 835 is not permitted either between uncles and nieces or between
aunts and nephews (and correspondingly in the classes of
their tuvn, both in the agnate and cognate line). But the
prohibition in these lines is not limited only to persons of
different sexes within these groups; it extends also to the
persons who are married /152/ to these individuals, and not
only to those actually married to them, but in general to all
those who reckon themselves the pu or anŋrej of one of these
persons according to the kinship nomenclature. Thus, for
example, if "I" am a man -- my uncle on my father's side
(ytk, pilang) not only cannot have sexual intercourse with my
wife, but not even with the most distant sister of my wife,
even if she is married to a man of an alien clan, because I
call her anŋrej -- wife, just as I am forbidden to have sexual
intercourse not only with the wife of my uncle on my father's
side, but also with the sister of his wife on the father's side,
even if she is married to a man of an alien clan, because
she is ymk -- mother to me.

But the prohibitions in these groups go still further. From the kinship terminology we know that in the ascending line of a man are reckoned, in addition to the aforementioned categories, the sisters of the father of the wife and their husbands (they are my "mothers" and "fathers"), the father of my wife himself and his wife, and their brothers and sisters (tuvn) and all their ascending line (they are my "uncles" and "aunts"). All these persons are also prohibited, according to their sex, to their "son-in-law" /syat'/ and his "wife" and to the classes of their brothers and sisters (tuvn), as are actual grandfathers and fathers, grandmothers and mothers, and uncles and aunts to their direct or collateral descendants.

But one must not think that the above-mentioned prohibitions between ascending and descending individuals constitute prohibitions between factually different generations. Not at all. The distinction in generations is purely a nominal one; under the classificatory system, when the same terms, ytk, ymk, atk -- father, mother, grandfather, are equally

/152 cont./

● 835 applied both to individuals of an actually ascending generation (to own father, mother) and to their brothers and sisters,
the significance not only of generations, but of ages completely disappears. The brother or sister of the father may be
younger than the speaker, although they consider themselves
mother and father in relation to the latter, and nevertheless
the prohibitions are equally effective by virtue of the kinship
classification alone.

Class of tuvn. It consists of two groups -- of 1) the group of the descendants of agnate brothers and male cousins, and 2) the group of the descendants of agnate sisters and female cousins.

Within each separate group in all generations, neither sexual intercourse nor marriage are permissible, which is in complete accord with the kinship nomenclature, since in neither of these groups are there individuals designating each other as pu and anŋrej; they are all tuvn.

I noted only one deviation with respect to the descendants of sisters, /153/ and that only among certain clans, namely, if sisters are married to individuals alien to each other, the prohibitions are in effect only in the first two generations. But this is a purely local deviation, induced by the extreme inconvenience of the prohibition under conditions of an extreme lack of women. In general the prohibition is strictly observed both among the descendants of brothers and among the descendants of sisters. This prohibition, which is reinforced by a taboo and which seems to us unnatural, has become among the Gilyak an instinctive feeling -- namely, one of prohibition against mutually looking at each other and of conversing (see below). To what degree the prohibitions
● 825 within this group have gone into flesh and blood, even in
the most remote degrees of kinship, even in relation to persons
whom they call "tylgund-tuvn" (agnate male cousin), transformed by tradition in their thinking into natural phenomena
of nature, we may see by their attitude toward the infraction
of this prohibition among their sole domestic animal -- the

CONTINUED
ON
NEXT FICHE

CONTINUED FROM PRECEDING FICHE

/153 cont./

835 825 dog. Among dogs, according to the belief of the Gilyak, brother and sister do not copulate. Exceptions are very rare, and they are attributed to the evil doing of a milk'a (evil spirit). Therefore, when a Gilyak notes such a case of incest, he is obliged to kill the dog; otherwise the sin falls on him.

[782] It is true that the slaying takes place as a religious ritual, by means of a ceremony of strangling, and blood is sprinkled to all four quarters of the compass in sacrifice, but for the dogs this is a punishment for incest. It is curious, however, that incest between ascending and descending lines (son and mother, and so forth) among dogs is tolerated by the Gilyak, and they do not kill the criminals (is it not due to utilitarian considerations, since begetters are valued very highly by them?).

835 Cognate male and female cousins. Here, of course, only cognate male and female cousins, i.e., the children of a brother and sister, can be in question, inasmuch as the children of brothers, on the one hand, and the children of sisters, on the other, are considered tuvn, and we have already discussed the complete prohibition within each of these groups. From the kinship nomenclature we know that the terms used in reference to each other by cousins depend on whether the male or female cousin whom they are addressing or of whom they are speaking is the son or daughter of the brother of the mother, or of the sister of the father, namely: if "I" am a man, then I call the daughter of the brother of my mother an'g:ej (wife), and, conversely, she calls me pu (husband), but my sister calls the son of the brother of my mother akhmalk, navkh (father-in-law, husband of the wife's sister), and, conversely, he calls her n'ern -- wife's sister, i.e., terms which have nothing in common with matrimonial terms; and these terms correspond perfectly /154/ to reality. Sexual relations and marriage between the daughter of a sister and the son of her brother (and correspondingly between their tuvn) are not permitted; on the other hand, marriage between the son of a sister and the daughter of her brother is not only permissible, but is considered a regular phenomenon. And in this case, as in all others, the terms brother and sister are

/154 cont./

835 class terms, i.e., the norms in force between the children of a brother and sister extend to the children of brothers and sisters in the most distant degrees of kinship and relationship by marriage. Thus, an exchange marriage between the children of brothers and sisters, as is practiced, for example, among the Tungus peoples, is not permitted; sons have rights to the daughters of the brother, but the sons of the brother are prohibited for the daughters of the sister, and this is true for all classes of tuvn. This norm, which seems of specialized im-

[614] portance and affects only brothers and sisters, plays an enormous role in the norms regulating the sexual relations between entire clans, as we shall see in the next section.

835 614 It is especially surprising that the aforementioned prohibitions which regulate the relations between the children of brother and sister are extended not only to the class of their children -- cousins, but also to both clans in their entirety. The rights and prohibitions which bind together the children of a brother and of his sister and their cousins extend to all the generations of both clans; namely, in each generation, as we have seen in the foregoing section, all the men of the class of tuvn in the clan of the sister and all the women -- tuvn in the clan of the brother call each other reciprocally from birth pu and an'g:ej, and they, in fact, have the right to sexual intercourse and marriage. But the men from the clan of the brother and the women from the clan of the sister are absolutely prohibited for each other in all generations and call each other nanakh (elder sister) if she is in an ascending generation, and n'ern if in the same generation, while the women call these men akhmalk. Thus, the women from the clan of the married sister are prohibited for the entire clan of her brother. It is still more surprising that these norms extend to the clans of the son-in-law /zyat'/ and father-in-law in general, even though the fathers of the spouses are completely alien; it is enough for one member from clan A, let us say, to marry a woman from clan B, even though this woman and the members of her clan are completely alien to

/154 cont./

835 614 clan A, and the relations established between these two clans are the same as if the father-in-law of the given man were the brother of his mother: the whole class of "sisters" (tuvn) in each generation of the clan of the father-in-law are the wives of the "brothers" (tuvn) of the clan of the son-in-law /zyat'/, and, conversely, the wives of the latter are prohibited for the former.

/155/ The kinship nomenclature corresponds completely to these norms; atk, akhmalk -- designate the mother's brother and the father-in-law in general, ymg:i designates the son-in-law /zyat'/ in general and the sister's son or even any male of the sister's clan. This norm leads to very complicated consequences. It very often happens that separate members of one or another clan, A, we shall say, have taken wives from several different clans and in turn have given their women to several different clans, and at once in relation to all these clans those same prohibitions that we had in the first case when there were only two clans concerned, become valid for clan A, i.e., the women of clan A are forbidden to all the clans from which its members have taken their wives, and, conversely, the women of all clans whose members have taken wives from A are forbidden to clan A. This inconvenient regulation is aggravated still more by the following limitation. Clan B, let us suppose, from which my clan, A, takes women, in turn takes wives from clan C, and at once this clan C, having become the akhmalk of clan B becomes also the akhmalk of my clan, A, and therefore wives from my clan are forbidden not only to clan B, my immediate akhmalk, but also to clan C, which, as we have seen, is called, in contradistinction to the first, "tujma akhmalk" -- (distant father-in-law), and on the Amur -- tun'g:i akhmalk. But this phenomenon also has its converse side. If the quantity of prohibited clans for this or that clan increases proportionately as the number of clans which take women from it increases, nevertheless, on the other hand, as its members begin to take wives from various clans, the number of permitted

/155 cont./

835 614 women increases correspondingly in these clans of father-in-law, because in each of these clans there is a whole new class of wives -- an'g:ej. Nevertheless, the extension of [178] [61] prohibitions to clans of akhmalk'i of the most remote degree has naturally brought about within a small-sized tribe, with a population of scarcely four and a half thousand, entirely understandable constraints, leading to some limitations of the strict principle, namely, that the prohibitions at the present time do not go back further than the clans of akhmalk of the third degree, and, if one clan or another takes wives from many clans, then the prohibitions are limited to the second generation, and, if an acquired woman dies childless, then even in the second generation the limitations fall away.

835 The class of jokh. Finally, one more class prohibited to men, called jokh, remains. From the kinship nomenclature we know that a man gives this name to two completely different classes of women, namely, on the one hand, to the class of wives of his og:la (descending line), and, on the other hand, to the class of wives /156/ of his as'kh, i.e., of his younger brothers (tuvn), and sisters of these wives. As concerns the first class, we have already noted its prohibited character in examining the prohibition between persons of the ascending generations and the wives of those of descending ones. The prohibited character of the second category is not so absolute. From the kinship terminology we know that with respect to the wife of the elder tuvn various forms of designation are practiced [184] in various places. In several places on the Amur, on the coast of the mainland, and on the northwestern coast of Sakhalin (if "I" am a male) one and the same appellation (an'g:ej -- wife) is used for wives of the younger as well as of the older brother, and in such places sexual intercourse is permitted with all wives of brothers. But this arrangement is not the dominant one; the dominant arrangement must be considered that of designating the wife of the elder tuvn as an'g:ej, i.e., the same name that one gives to one's own wife,

/156 cont./

835 and of designating the wife of the younger tuvn by the prohibitory term jokh; and, correspondingly, sexual relations between a man and the wife of his younger brother are not permitted. Notwithstanding the dominance of this norm at the present time, originally both the terminology and the norms of intercourse were apparently identical with respect to all the wives of brothers without distinction. Evidence of this is not only the fact that in certain places, as we have seen, this arrangement still prevails, but also certain features of the terminology which have been retained even in those places where the new order is dominant. Thus, for example, children everywhere without distinction call the wives of all the brothers of their father ymk, i.e., by the same term that they apply to their own mother, and (in many places) kill the brothers of the father yrk (father), from which we must conclude that formerly the sexual rights of men extended to the wives of all brothers without distinction.

The norms of lawful sexual intercourse. From the kinship nomenclature we know that whole groups of men call whole groups of women their wives, and vice versa, i.e., the latter call them their husbands. This strange nomenclature fully corresponds to actuality; in the language of our own European nomenclature, such groups of men and women are joined in marriage.

121 58 But before entering into a detailed examination of these relationships, strange from a contemporary point of view, it is necessary, in order to avoid misunderstanding, to analyze precisely the meaning of the term "marriage."

In the institution of marriage there are three main features: 1) sexual intercourse, 2) begetting offspring, and 3) common /157/ domestic activity. It is completely clear that the intrinsically indispensable element in marriage is only the first, namely, sexual intercourse; the other two features, although they, too, play an enormous role in the marital union, may be completely absent. There are marriages which, on account of natural or artificial causes, are

/161 cont./

581 587 721 intercourse; he must support her and her children, who usually are also considered the children of all the members of the group.

835 Now the Gilyak marriage classes "pu" and "an'g:ej" become understandable to us, and we shall proceed to a detailed examination of them.

The classes "pu" and "an'g:ej." We have already said that for the Gilyak, at least at the present time, it is not prohibited either by religion or by the opinion of society to have sexual relations with or to marry any woman of his own tribe or a neighboring one, except for those women who are bound to him by one or another prohibitive term of kinship. But in relation to such alien women he has no rights whatever; illicit sexual intercourse is accompanied by the risk of bloody reaction on the part of a certain group of males, and individual marriage is a simple civil agreement accompanied by strict conditions of payment for the bride. The Gilyak most naturally therefore seeks sexual intercourse or a legal wife among the women with whom he has the right to do so. These are, namely, those women whom by the kinship [601] nomenclature, either from birth or from another specifically defined moment, he calls an'g:ej (wife), and he calls all their agnates akhmalk'i (fathers-in-law). We already know [602] who these women are. They are, first of all: 1) the daughters of all the "brothers" of the mother; 2) all the "sisters" of the wife; 3) "sisters" of the wives of brothers; 4) "sisters" of the father-in-law of the son; 5) individual wives of all aki, i.e., of brothers who are older than the person speaking (among the majority of Gilyak); 6) individual wives of all "brothers" of the person speaking, without distinctions of age (in certain places).

[601] Each woman, in turn, as we know, gives the name of husband, in addition to her own official husband, to: 1) all the sons of the sisters of her father; 2) all the husbands of her "sisters" and the "brothers" of these husbands; 3) all the younger "brothers" of her husband (if she is married to one of them), and among some -- all the brothers of her husband.

/161 cont./

835 [601] All these categories of "wives" and "husbands" are far from nominal /162/ categories. Behind these class terms (pu and an'g:ej) there are hidden two important real rights: 1) the right to individual marriage; 2) the right to sexual intercourse (group marriage).

Let us examine each of these rights in particular.

The right to individual marriage. Above all, the categories pu and an'g:ej are bound by the right to marry, in other words, out of the whole circle of persons bound together by kinship terms, only these alone have the right to join in individual marriage with each other; all the other categories of kinship groups are prohibited from marrying each other. But this right is not exhausted by the merely negative feature -- the absence of a prohibition on matrimonial ties. Certainly in the eyes of the Gilyak the mnemonic significance of these terms is of great importance in itself, for in view of the extreme complexity of kinship relations a firm knowledge of the marriageable classes is the only guarantee against violations of the very strict taboos on marriage in the prohibited degrees of kinship. Nevertheless the mnemonic-permissive significance of these terms does not at all exhaust their legal content. Prohibitions against marriage, as we have seen, are absent also among persons who are complete strangers to each other in the kinship relation, and nevertheless, for persons of these categories to call each other pu and an'g:ej before marriage is not tolerated. The right to individual marriage between persons in the pu and an'g:ej categories is not a naked nudum jus; this right, which is simultaneously an obligation, is a debt for both parties concerned. This obligation is seen first of all in the category of "brothers" and their individual wives, who are, as we know, joined mutually in the relationship of pu and an'g:ej. By the general rule the [587] [614] widows of "brothers" (own and collateral) cannot leave the clan, and they become, according to the disposition of the clansmen, the wives of the brothers who have survived their husbands, completely independently of the wishes of these brothers; none of them can decline the widow assigned to him.

/162 cont./

587 835 [614] In those clans where the "older brothers" are excluded from the class "pu" with respect to the wives of "younger brothers," the widows are ordinarily assigned to one of the "younger brothers" of the deceased, but here also, in the absence of "younger brothers," one of the "older brothers" is obliged to accept the widow, without the right, however, to sexual intercourse with her.

But the typical aspect of the marriage-rights relations between the pu and an'g:ej is not concealed in this extremely common institution of the levirate, about which /163/ we must speak in detail. The levirate marriage is a more or less exceptional phenomenon and embraces only one insignificant class of this category. The most characteristic aspect 835 of the rights-obligations of marriage between pu and an'g:ej lies in the other classes of this category, which are well-known to us from the kinship terminology, in other words, in the conditions of the normal marriage. This right-obligation character of marriage between pu and an'g:ej has, it is true, been considerably shaken under the influence of causes about which we shall speak further on -- the Gilyak do take wives outside of the aforementioned categories, but these marriage unions do not represent the favored, characteristic form of even the contemporary marriage. On the contrary, both the contemporary customs and the ancient epos equally indicate that precisely between these classes of pu and an'g:ej marriage was obligatory and the most satisfactory of all from the 835 specific point of view of the Gilyak. In order to show how 538 imperative this consciousness of the obligation of marriage between persons of the classes pu and an'g:ej is, it will be sufficient to introduce one example from a story I recorded. In this story, they tell about a battle between a young Gilyak and a mysterious werewolf-shaman. The fight ends with the werewolf's receiving a mortal wound and returning to his yurt. On his deathbed he remembers that he is a distant akhmalk of his slayer, that is, a member of that clan from which the clan of the killer has the right to take wives, and of the very category of persons of that clan whose daughters

/163 cont./
835 are the an'g:ej of the slayer. Then he immediately orders the
538 killer to be summoned to his house, that is, the man against whom blood vengeance is obligatory, although the killing was unpremeditated, the man whom it was the greatest sin to allow into his house; and in the presence of the assembled members of the clan he solemnly declares: "Although this man has killed me, give him my daughter. Do not fail to carry out my wish for any reason." Such is the force of the ancient categorical imperative of marriages between the categories of pu and an'g:ej. This imperative is also active nowadays.

Let us return for a moment to the kinship terminology.
601 We shall make a full analysis of this terminology in connec-
582 tion with the laws of marriage later on. For our purposes
614 now it is necessary to remember the following facts: 1) the wives of clansmen, according to their generations, call each other either older or younger "sisters" or "aunts" and "nieces"; 2) all the agnate kin of the wife are considered, according to generation, the "fathers-in-law" of all the clansmen of this /164/ man; 3) the man calls the sister of his "father-in-law" his "mother," and he calls the daughter of his mother's brother wife (an'g:ej). Judging from this, 1) the wives of all the members of each given clan must be taken from one clan, and, consequently, in each generation they are sisters (own and collateral); 2) the clan of these women, for each individual man, is the clan of his mother, and the wife of each individual man, must be the daughter of his mother's brother. This we see in actuality, notwithstanding all the deviations of modern times, the causes of which will be made clear later.
614 The ideal of the clansmen is to have women from one clan,
582 from one clan of common akhmalk'i; if this turns out to be impossible and it is necessary to turn to still another clan, then once again it is preferably to that clan which is already the akhmalk of the given clan, that is, that clan from which the individual clansmen, fathers and grandfathers, at an earlier date took their wives for some reason or other. Under these conditions, for each individual person the most favored

114
● 835

1. This fact radically refutes the assertion of Westermarck, Crawley, and others that the prohibition of marriage between brothers and sisters arises from an instinctive sexual aversion created by living intimately together. Crawley cites in this respect the categorical assertion of Ellis (see "Exogamy and the Mating of Cousins," Anthropological Essays, Oxford, 1907, p. 52).

[13]

* 194 2) The above-mentioned principle created in the persons
582 of the daughters of the brother a permanent pool of women
581 for each man, but this measure was inadequate for the satisfaction of the objective for which it was created; corresponding norms of distribution were necessary in order to guarantee peace between the possessors of the group of women. It is first of all clear that the norms of distribution could not be exclusively individual or exclusively communal. Communal possession, as a general rule, would have evoked endless discord; a purely individual arrangement was not always possible because of the inevitable fortuitousness in the distribution of men and women, especially within the limited sphere of a few families. The norms to be worked out, therefore, had to be of such a nature that they could give satisfaction in the face of any combination.

The individual mode of distribution, of course, would be the most satisfactory, but it requires an equal distribution of the sexes, which is not always possible, especially within the limited sphere of a few families. The norms of distribution under such conditions had to be a compromise between the communal and the individual mode, in order to satisfy any combination of the distribution of the sexes.

/195 cont./
191 Gilyak this is not required in cases of communal possession;
* 194 the wife first sleeps with one brother (the oldest), then moves
581 over to another. As for the children, either they are not dis-
582 tinguished at all according to fathers, or, as in the case of
595 the Toda tribe, the first child is regarded as the offspring of the oldest brother, the second of the next brother, etc.

* 194 3. The same situation in a new variant: the first
581 brother has reached marriageable age before the second.
582 The elder brother takes the only daughter of the sister of his
● 835 father /sic/ as his individual wife, but then the younger brother comes of marriageable age. The elder brother remains the individual spouse, but the second brother enjoys conjugal rights, by the rights of a group spouse. Then another daughter of the brother grows up to be of marriageable age. She naturally becomes the individual spouse of the second brother, but the elder brother obtains the same group rights to the wife /196/ of the younger brother as the latter once enjoyed with respect to the wife of the elder brother.

191 4. At a given moment a brother has several adult
* 194 daughters, while the sister as yet has only one adult son.
581 The latter becomes the husband of all the daughters of the
582 sister of the brother /sic/. Thus it is at the present time
595 among the majority of American Indian tribes, where a man who has married the oldest daughter is for that reason obliged to take as wives all of her sisters. But now another brother grows up. One of the wives is yielded up to him as his individual wife, the rest remaining with the elder brother as the most well-to-do, who is better able to support several wives than the brother who is just beginning to earn his livelihood. The latter, naturally, is rightfully the group husband of all the wives of the elder brother; the converse right of the elder brother is not so indisputable.

* 194 An analogous development takes place if the elder brother-
581 polygamist has several brothers who gradually grow up; then
582 each one of them will obtain his own individual wife, but
835 at the same time each of the younger brothers will have

/196 cont./
* 194 group rights to the wives of his elder brothers, who in their
581 time enjoyed his wives. In the majority of cases, therefore,
582 we see that only younger brothers enjoy group rights to the
● 835 wives of the elder brothers.

5. Thus far, we have taken the simplest combinations -- one brother and one sister. Where there are several brothers and several sisters, the consequences will be similar, but will assume a more complex form. If there were always the same number of sisters and brothers, and if each brother and sister had a corresponding number of female and male offspring, then each pair of brothers and sisters could form a closed marriage group, but actually such cases can only be rare exceptions. Ordinarily, on the contrary, the number of brothers and sisters is not equal, and an even distribution of the sexes in their offspring is even less possible. Let us take several examples. Several brothers have one sister; the brothers have several daughters, the sister several sons. This time it is not only own sisters, but also first cousins who are the group wives of the brothers. Or: there are several brothers and several sisters, but the distribution of the sexes is such that there are not enough own sisters for the own brothers, whereupon the group union will be composed not only of own brothers and sisters, but of male and female first cousins as well.

Finally, women did not always have brothers, and the latter did not always have daughters, and then, naturally, it was necessary /197/ to resort to the daughters of first and second cousins. In a word, into a marriage group of the offspring of a brother and sister are inevitably drawn, on the one hand, all the collateral brothers up to the most distant degrees, and, on the other -- the collateral sisters, and thus there is established group marriage between own and collateral brothers, on the one hand, and own and collateral sisters on the other -- the typical punalua family in its purest form.

Gi /237 cont./
114 I shall proceed to the Tungus nationalities who are pre-
835 dominant on the Amur and spread out to the north up to the shores of the Bering Strait. The marriage norms of these nationalities have been studied by me principally among the most isolated tribe, namely, among the northern Orochi, and I had an opportunity to compare and supplement this information with the data collected among other peoples of the Amur region.

G. Gi 601 In spite of the fact that in their original mode of life
835 as nomadic hunters and reindeer-breeders these nationalities
171 differ considerably from the Gilyak, settled fishermen and
433 dog-breeders, nevertheless we find a great deal essentially similar in their classificatory system and norms of marriage.

G. Gi 614 As among the Gilyak, the clan is based on paternity /pa-
601 terniteta/. In each generation of a given clan, the men and
835 women are elder and younger brothers and sisters. The children of these classes are common sons and daughters and brothers and sisters to one another. The clansmen-"brothers," own and collateral, live in a group marriage with their wives, just as among the Gilyak of the eastern dialect, i.e., the younger with the wives of the elder. Here, as among the Gilyak, they prefer to take wives from a single clan, from which one may conclude that again, as among the Gilyak, that marriage from a single clan was once obligatory.

Group marriage also exists with the wife's sisters who are
Gi 601 married to members of another clan, but, by analogy with
835 the brothers' wives, among some tribes this marriage includes only the younger sisters of the wife. In two respects group
G. [601 marriage among the Tungus tribes is much broader than
835] among the Gilyak. First of all, each man has a right not only to the wives of his elder brothers, but also to the wives of the younger brothers of his father, whom he therefore calls by the same class term as his elder brothers, namely,
Gi [582 aki, a'ga. On the other hand, marriage to the daughters of
the younger sisters is allowed and thus that category of nieces is drawn into the circle of the class of group wives. It is

Gi /237 cont./ It is
601 easy to see that the first norm is a simple consequence of the
835 second, since a daughter of a sister of one's father is one's
582 cousin. In this last norm, the Tungus system resembles the
174 Koryak one, where, according to the testimony of Iokhel'son
[171] /Jochelson/, marriage with a niece -- a daughter of one's sister -- is also permitted. In still another peculiarity the Tungus marriage brings to mind the Koryak one: both do not
Gi [587 permit a person to marry /238/ his wife's sister while the wife
171] is still alive. One peculiarity of the Tungus marriage is especially characteristic and testifies to the origin of this system from the earliest stage of cousin marriage. This peculiarity consists in the fact that the favorite form of marriage up to the present is the exchange of sisters with the wife's brother. Since, at the same time, the most preferred marriages are the marriages with clansmen, and, consequently, of fathers and children -- from one common clan, as a result the majority of marriages are typical cross-cousin marriages. Taking into account the fact that at the present time the Tungus marriage system is in a stage of the decay of its primitive forms, we have the right to conclude that in the past cross-cousin marriage was the only form of marriage, which gave birth to the classificatory system and to the features of group marriage.

Gi In conclusion, it is interesting to note concerning the
171 Tungus peoples that among some of them, for example, the
608 southern Orochi, there is the institution of ceremonial brother-
835 hood, as among the Chukchee, and that the "brothers" --
G [835 anda -- mutually enjoy the right to sexual intercourse with each other's wives. As among the Gilyak, marriages between the children of brothers, just as between the children of sisters, are prohibited.

Y We proceed to the Paleo-Asiatic tribe of the Yukagir,
601 which has been studied by Iokhel'son. Iokhel'son himself
835 refrains from passing judgment on the place occupied by
121 Yukagir marriage in the general evolution of this institution, but the data cited by him provide us with sufficient material to put the Yukagir system within the scope of the Morgan

not indicate either the kinship relations between the common husbands or their relationship in the case of the marriage of the second participant. But this in no way allows us to conclude that marriage among the Aleut is confined
G to the details related above. As we have already stated
835 earlier, Mamio Rinso /Rinzô Mamiya/ described Gilyak mar-
[595 riage in the same terms as Veniaminov used to describe
171] that of the Aleut, whereas we have seen that the Gilyak have the typical group marriage. The description of group marriage as given by Veniaminov and Rinso is quite natural for non-specialist observers, for with group marriage one is most easily struck by that case in which the second husband is not individually married himself, as it is described in Gilyak fairy tales: "two brothers maintained one wife." A non-specialist, however, generally leaves unnoticed group marriages which include several married men. One can therefore say with a great degree of assurance -- especially if one takes into consideration data about the preferred marriage to cousins -- that the polyandry of the Aleut that Veniaminov tells us about was in reality a form of group marriage. In confirmation of my hypothesis I shall permit myself to cite the following example from the life of the Toda, a tribe that lives in the Nilgiri Hills.

The old writer Marshall describes marriage among the Toda in the following way (4):

4. W. E. Marshall, A phrenologist among the Todas, London, 1873, p. 213.

"If a husband has brothers or very close kinsmen who all live together, each one of them may, with the consent

/251 cont./
831 words signifying "my man, my woman," -- n'az'mych,
[192] n'an'kh. The Gilyak themselves consider love a normal stage of life which everyone must experience in his youth. This view is very well conveyed in a song which I noted down on the Amur, in which a girl, complaining of her mother's nagging about her passion, sings:

[539] Mother, mother, dear mother,
Has thou forgotten thine own youth?

(Literally: "Thou hast forgotten thine own past time, let me be!")

831 Parents, however, never reproach their children for their
882 amorous passions. When the youth do hear the grumbling of
593 their elders, it is most often due to purely economic considerations, since during the period of passion the young people neglect their work and become careless and inaccurate. In general it is not even permissible to react in any way to the sexual passion of the children, maidens included. If the
[584 father or brother finds out about the fornication of his daughter or sister, he not only may not use force against the seducer, but it is even forbidden to summon him to a duel, and he may not even be angry with the daughter. They treat the amorous passions of the children as a perfectly natural phenomenon. The mother in particular is often even the confidante of the amorous secrets of her children. In many
[533] songs which I noted down on the Amur, sons constantly address their mother, sharing with her their amorous sufferings, seeking advice as to where and how to find their beloved. Serious remonstrances by the parents, active remonstrances
[835 going to the point of pitilessness, are encountered only in
762] the case of love for a person of a forbidden category. In such cases, the parents themselves urge their daughter to
584 commit suicide. Often the pitilessness of the parents, mainly
593 of the father, becomes manifest when love frustrates an advantageous marriage, one which has been agreed on since

/253 cont./

831 instance of such amorous heroism in the village of Nyanivo.
58 The most respected and wealthiest man of the local clan at
159 this time was a Gilyak by the name of Nyugun. At one time his beloved was forcibly given in marriage to another man. He slew his competitor, after which he was arrested and taken to Nikolaevsk. In the meantime the brother of the widow again gave her in marriage against her will to another man. Breaking out of prison, Nyugun immediately set off for the settlement of his beloved. Going up to her yurt, he stripped everything off himself, except the short pants of modesty, and naked, despite the winter season, he rushed in this state into the yurt, which was overflowing with people, and by his appearance struck such fear into those present that he was able without hindrance to take his beloved by the hand and take her to his home, after which he lived with her tranquilly for many years (his late wife had time to sew for him four fox-fur coats and four fur coats out of sable tails).

835 The most tragic obstacle in love is the position of lovers
762 in the forbidden degrees of kinship. Here there is no solu-
831 tion. The parents themselves insist on suicide. Ordinarily
533 in such cases the lovers go to the forest and hang themselves side by side on two trees. Before taking their lives, they sing songs to each other, singing of their journey to the world beyond the grave, where no one shall hinder their love. Some of these songs have come down to us in the following way. It has happened that one of the parties, namely, the man, breaks loose and after this loses the desire to repeat the attempt. It is he who preserves for posterity /254/ his dying song. One of these tragic cases of illicit love has
835 become a popular legend. The time was a hundred years ago.
762 A certain maiden became attached to a younger brother of
831 her father. Shortly after this, her sweetheart set out on a
533 long trading trip to Manchuria. At the same time, she
538 began to show signs of pregnancy; it was no longer possible to conceal the fact, and she took her own life by hanging. When her sweetheart returned, he burned on her grave all

601 [171] but among them it has long since ceased to correspond to reality among the Gilyak, however, although the terminology does not fully correspond to reality, it does so all but fully. Even now, 601 835 every Gilyak has marital rights (it is not considered a sin) to the wives of his brothers of all degrees of kinship and to all the siste of his wife. Only the elder brother is deprived of this right with regard to the wives of his younger brothers. This limitation is o recent origin, and its very existence seems to emphasize the legality of the collective marital rights of the younger brothers to the wives of their elder brothers and to all the sisters of their wives. Even at the present time these rights are not always exercised by the Gilyak, and in many cases it is not without displeasure and even forcible protests that the interested parties look upon the realization of these rights, as we shall eventually see; but legally, so to speak, they exist, the realization of thes rights is not considered adultery, is not punishable, and often is even carried on openly with the consent of the brothers and of th 601 husbands of the wife's sisters. Thus, the contemporary individua 835 form of marriage is a new phenomenon among the Gilyak, and t 171 powerful remnants of the old /353/ order of clan marriage pre- [198] served up to the present make it similar to the famous so-called "Punalua family," which still existed in the first half of our century on the Sandwich Islands (Hawaii) where, as among the Gilyak, such mutual rights to the wives of brothers and to the wife's sisters existed without limitations. And, what is still mor remarkable, just as the husbands of sisters and the wives of brothers in the Punalua family called one another punalua (companion, one's half, comrade, friend) -- the word which gave the name to the institution itself, so among the Gilyak these categories of people call one another "navkh" (the word signifyin literally what punalua means among the inhabitants of the Sandw Islands). Such, down to the smallest detail, is the astounding similarity of primitive institutions of peoples living in different parts of the world and separated by oceans.

"The Gilyaks are not an incontinent race, and compare very favourably with the ssian population of Sakhalin. Of course there are individual exceptions, especially w [263] that the pressing poverty prevents larger numbers of adult males having ir own establishments. Yungkin, our 'captain,' had told us the very evening of our rival at Nivo that he was going ashore to steal a wife for the night. We asked him if husband would not object. 'Oh, perhaps. Yes; he may slap her, but I shall give him me tobacco.' It is said that in earlier times cousins (ru-er) had the juridic right of lective use of cousins, and even of the sisters of cousins, and possibly some faint nembrance of this, sanctions the more indiscriminate connexion of later days."

844 When the woman in labor goes to the place made
291 ready for her, she is clad in old soiled clothes. If the weather is cool she takes more clothes along. The only distinction in clothing worn during labor is that the woman in labor takes off the trousers, a garment that Gilyak women wear in summer and winter.

844 Usually an older woman who herself has gone
● 835 through several childbirths helps the woman in labor. If [757] such a midwife, called lanaven szauk, is not at hand the husband of the woman in labor can take her place; but under no circumstances may another male member of the family take this place, not even the younger brother of the husband, although, according to the customs of the Gilyak he has a right to the wife of his older brother and considers himself in a way her husband and certainly the second father of the child.

844 The Birth.

753 During the delivery the woman in labor sits and does not stretch her legs. The seat is erected at the same height as the bed in the yurt, that is about half a yard above the floor. During the whole period of delivery the woman in labor is supposed to keep quiet, not to strike out in pain, not to try to get up, not to lean over to one side or the other. If, during a hard delivery, the woman is not able to stay in the prescribed attitude by herself and starts writhing in pain, it is the duty of the midwife or husband to hold her up at her shoulders in order to prevent her from making the forbidden movements. The Gilyak believe that women who try to get up during the delivery contract a disease which causes a deformation of the spine. Once I was even shown a young woman who had become a cripple because she had not stayed quiet while in labor. Her spine was really deformed or, as the Gilyak say, broken (naski is' onkrynd). She was not able to walk and died a few years later.

845 If the labor pains last too long and the woman suffers too badly, a piece of clothing is moved back and forth in front of her face and somebody blows down from above on the part in her hair.

836

836 PREMARITAL SEX RELATIONS--presence or absence of a standard of chastity for the unmarried; variations in the standard (e.g., by sex, by class status); basis of the standard (e.g., material or ethical considerations); prevalence of premarital liaisons; degree of social approval or disapproval; seduction; assignations; permanency and exclusiveness of premarital unions; reciprocal behavior of lovers; incidence of rivalry and jealousy; termination of liaisons; evidence as to infertility of premarital unions; etc. See also:

Adolescent activities 883

/150 cont./

684 for the man, and more or less bloody for the woman. But all
● 836 this concerns only cases involving a married woman. Sexual
583 relations with an unmarried woman or with a widow, if it is with the permission of the woman, do not provoke any reaction, even on the part of the father or brothers of the wife, notwithstanding their extreme interest in the bride price which is received when a woman gets married; I, at least, did not happen
584 to hear of repressions in such cases. A reaction on the part
of the kinsmen of the woman occurs only in a case of coercion;
582 then there is the possibility of duels and suits for ransom. Also, at the present time there are no prohibitions against marrying a person of this category, i.e., persons not bound by kinship.
835 It is another matter with individuals who are bound by the classificatory terms of kinship. Here there appears on the scene a complete system of limitations and prohibitions. Here, against the violators of the prohibitions, there appears on the scene both a social reaction and the categorical imperative of religion, under the influence of which there have developed suitable instincts which have turned artificially created norms into natural human feelings. We shall dwell on this aspect of Gilyak psychics in more detail later, when we speak of sexual morals. Now we shall turn to the norms of prohibitions and limitations themselves.

These prohibitions and limitations, it turns out, fully correspond with the kinship nomenclature. Only those persons who, according to the established class terminology, are mutually reckoned in the classes "pu" and "an̄g:ej," that is, /151/ who from birth call each other "husband" and "wife," have the right to sexual relations with one another and to enter into matrimony. All the remaining classes are placed under unconditional prohibition.

835 What are these prohibited classes? First of all there is the
614 extensive class of k:khal, i.e., the persons born into one common agnatic clan. The Gilyak clan is absolutely exogamous; among the agnates, as we have seen, there are no classes that call each other "pu" and "an̄g:ej"; neither marriage nor sexual intercourse is possible among them.

/171 cont./

* 835 same words with which authors describe the relations between "kumi" and "kroki" in Australia; throughout the whole extent of his territory, wherever the Gilyak finds his an̄g:ej, there he also finds a conjugal bed. For this, it is only necessary that the Gilyak remember the kinship terms. I had many chances to convince myself of this during the time of my travels on Sakhalin. Again and again I appeared with my Gilyak companions in settlements where neither they nor their fathers had ever been before. Nevertheless, after the exchange of a few sentences the bonds of kinship were revealed, and from their first encounter pu and an̄g:ej who were formerly unknown to each other engaged in mimic negotiations about a fleeting conjugality.

* 835 Among the categories of women with whom the Gilyak
● 836 has a legitimate opportunity for sexual intercourse, it is neces-
848 sary to distinguish the unmarried from the married. Maidens, even among the Gilyak, are more restricted in their sexual relations than the married women. The prospect of pregnancy
614 and bearing children does not appeal to the Gilyak maiden;
851 the birth of a child by an unknown father, according to the clan views of the Gilyak, is a dangerous business solely from the fact that the sexual, marital, and clan rights, and even more the religious rights, determined by the father are completely uncertain, and this can lead to violations of taboos, which the Gilyak fears most of all. Therefore, a pregnant maiden is subjected to severe reproaches on the part of her father, who demands either that she name the seducer, or the destruction of the fetus, or the killing of the newborn infant. However hard the moral position of individual women is in such cases, in practice the business /172/ is much simpler. In the first place, many women, as we have seen, are married from childhood on, and the others never sit for very long; there are so few women that every girl is already married by the
* 835 time seductions become dangerous for them. Finally, those
836 who are not married and freely indulge in sexual intercourse with men extremely rarely have an affair with just their

/172 cont./
835 sweetheart, and, thanks to this polyandrous practice, they
836 hardly ever run the risk of pregnancy. As to what proportions
these polyandrous habits of intercourse among maidens reach,
it will be sufficient to offer an example intimately known to
me. The wife of my friend Pigunayka from the settlement of
Arkyvo, a likable woman and a splendid housekeeper and
mother of children, before her marriage had in her home vil-
lage alone 14 sweethearts at one time, who called each other,
and she likewise called them, navkh, akhmalk -- comrade,
fellow participator (it is curious that navkh literally means the
very same thing as punalua in Hawaiian and well-known punalua
family). Furthermore, Pigunayka's wife's sexual intercourse
with her sweethearts quite often took place at one time. Her
"husbands" told me quite good-naturedly how all 15 of them
used to get together in a little clearing not far from the
settlement, and one after the other they would exercise their
rights. The most curious thing of all is that in this merry band
was Pigunayka himself, who is now the happy husband of the
602 heroine. Under such circumstances, it is natural that the Gilyak
835 youth in many respects feels much more at home and at ease
836 among his maiden an'gej than he does among his married
an'gej, access to whom is surrounded with great difficulties
in view of the preferential rights to them of their individual
husbands. And, naturally, he is attracted thither most of all.
But he does not find these maidens in his own clan, even
among the most distant of his tuvn. With them he not only does
not have a right to have sexual intercourse, but he does not
even dare to converse with them. In his own clan, he has
only the married women for sexual intercourse. In fact, maiden
(617) an'gej very rarely live in the same settlement as their pu.
The daughters of his mother's brother, the sisters of his brothers'
wives, the daughters of his akhmalk, in other words, the clan
of his "fathers-in-law" -- there is where all his sympathies
602 draw the Gilyak youth. In the yurts of his akhmalk'i nothing
is hidden to him; here he is met with open arms, for, as we

/172 cont./
602 know, an ymgıl is the closest person to an akhmalk and to his
wife. An ymgıl is a preferred hunting companion summer
and winter. He is the dearest guest; they serve the most
delicate dishes to him. He makes them still happier for a
special reason. With their classmen-brothers the akhmalk'i
/173/ and their sons can neither converse nor joke, but the
ymgıl is a legitimate interlocutor, with whom they may make
merry to their hearts' content. And in such surroundings there
836 are dozens of maidens -- his an'gej, with whom he may
openly converse, joke, and, when the opportunity presents
itself, have sexual intercourse.
835 Now we shall turn to the relations of the pu with their
602 married an'gej.
(184) From the kinship terminology we know that a man's
married an'gej include, first of all, the individual wives of
his "brothers" (tuvn), which, among the Gilyak speaking the
western dialect, refers to all tuvn, while among the Gilyak
speaking the eastern dialect -- only to the elder; further --
all the married "sisters" of his own wife; finally, the
married sisters of the wives of his tuvn -- a huge category,
including many dozens of persons distributed throughout the
835 territory of Gilyak settlement. Concerning the last two
groups -- the wife's sisters and the sisters of the brothers'
wives -- one must make the following reservation: usually,
in agreement with the general norms of Gilyak marriage,
the sisters marry persons of the class tuvn alone, so that with
regard to the sisters of the wife and the sisters of the brothers'
wives a general rule concerning the wives of "brothers"
operates. But, aside from the traditional tribal norms,
it may turn out that the sister of one's brother's wife or the
sister of one's own wife is married to a completely alien
man, or even to someone who is an accidental akhmalk (1).

(582) 1. An accidental akhmalk is what I
(214) call a man from a clan from which
one of the kinsmen of the speaker has

/247 cont./
602 weakly developed. Among the Gilyak there are very few
157 such outstanding, passionately devoted hunters as are to be
227 found among the Tungus. Nor do the Gilyak, especially
152 during the past half-century, possess the heroic emotions of
(618) war. Indeed, what the Gilyak called wars in ancient times
578 were in fact nothing more than sporadic clan skirmishes
(463) motivated by vengeance or, even more frequently, were over
women. The Gilyak have never known war as a profession,
as the favorite occupation of youth. It is natural that their
831 emotional energy should be principally directed toward
154 sexuality. The Gilyak begin their sexual life with the onset
of puberty and devote all their leisure, all their thoughts, to
women, the more so since by far not every Gilyak, as we
836 shall see, finds it possible to get married. The bachelor youth is
not content with the women to whom they have rights in their
own settlement; they do not stop with the circle of women to
whom they have rights by law. The only category of women
before which the Gilyak halts is the class of women prohibited
454 to him. Neither length of time nor immensity of distance will
831 deter the Gilyak from his romantic adventures, if he can but
find his fill of feminine society. The young man sets off most
eagerly of all, of course, for the village of his "fathers-in-
law" -- akhmalk'i but he is not averse to undertaking a journey
(192) even to completely alien villages. During the time of my
travels, young men frequently voluntarily joined me, offering
me their assistance without compensation for many weeks,
and this was done in the hope of finding occasion for romantic
adventures, since this was no easy matter. Owing to
836 the Gilyak's traditional hospitality and eagerness for all news,
834 the doors of every home are wide open to each new arrival.
574 Thus, the Gilyak feels at home everywhere. A few hours
(203) after his arrival in some settlement, he has already managed
to spend some time in every home, everywhere relate his
news, to which the men and women listen with equal avidity,
and has already managed to let his glance fall on some
woman who has caught his fancy. The rest is a matter of his
amatory experience and art.

/247 cont./
amatory experience and art. The Gilyak woman, it is true,
836 conducts herself in an extremely inaccessible manner. Upon
832 the appearance of a strange man, she lowers her eyes, sits all
(834) the time with her brows knit, and hardly answers the questions
of the stranger. But this is only external inaccessibility,
concealing an inner lasciviousness. Unnoticed by those about
her, she /248/ casts oblique, curious glances at the new man
at a time when he can catch them. And if the guest has
made a proper impression, the matter is consummated very
quickly. The man follows her to the well, or to the berry
patch, or simply catches her in the entrance hall, and then,
after a short symbolic dialogue, such as, "Let's smoke to-
gether a little (i.e., drawing in turn at the same pipe),"
or "Let's hear the news," the matter is settled very simply.
Sometimes the guest simply remains in the yurt of his beloved
and at night creeps over to her couch, or vice versa. Some-
times the business is consummated without words, limiting
itself to a mute symbolism, touching the breasts, seizing
the leg, and if this symbolism does not encounter any rebuff,
the consent of the woman is secured. It is curious that the
symbolism of amatory proposals recalls the rites of the
wedding ceremonies. The proposal to smoke together is a
(196) kind of imitation of the rite of a conferratio /conferreatio/.
(585) The snatching of the leg or the breast, although it does not
171 figure at the present time in the wedding ceremonies of the
Gilyak, is still to be found among certain peoples of North
America, for example among the Lillooet Indians, according
to the testimony of Boas and Teit.
836 Such license in alien villages is practiced not only by
839 the unmarried youth, but also the mature, middle-aged
574 Gilyak as well. On one of my first trips there was among my
companions an old respectable Gilyak, Gibel'ka, who en-
joyed great fame throughout all of Sakhalin by reason of
his wealth and outstanding intellect. When we stopped in
the settlements, he spoke breathlessly on a par with his
young companions about the pretty women of the settlement,
and once he became so carried away that he began to ask my

/248 cont./
836 advice as to whether he should not "buy" a pretty woman who
839 had taken his fancy, although he had been married for a
159 long time and could not praise his wife enough. He did not,
it is true, take part in the nightly adventures of his young
companions, but only because the competition was already
too great without that, since it very nearly went as far as
revolvers among the young men.
839 By reason of the comparative accessibility of women, the
use of force upon them is rare. I have, however, heard of
instances where a group of youths, at the season when the women
go for several days to places very distant from the villages after
berries and sarana, made genuine raids upon the defenseless
women, and, when the women have not yielded voluntarily,
have been quite ready to resort to using force. Violence, how-
ever, principally amounts to /249/ tearing the cloth trousers
which, as among the Chukchee and the Koryak, are made
closed, without any openings. Such adventures, like all
romantic pursuits in general outside one's own kinship circle
of women, bear the characteristic designation s'ankh nan'gymd --
(196) "to hunt after women." This term, however, is also ap-
plied to searching for a bride, since it has two meanings:
"to hunt" and "to seek something, somebody in general."
484 Special distant expeditions to alien settlements in search
831 of women, of course, are exclusively the affair of real
836 amateurs, so to speak, since in a distant village the new
arrivals ordinarily encounter the fierce competition of the
local youth, and the women already have their local ad-
mirers, not to speak of husbands, and special qualities are
required to win, in any success on alien soil. I managed
to meet such fortunate individuals: they are ordinarily good
and worldly tellers of tales, jesters, and singers. There
are, however, very few such outstanding lovers, even
among the Gilyak, and there is a special term for them.
Ordinarily the unmarried youth is either content with the
women of his own village or pays visits to the settlements
of his akhmalk'i, where, as we have seen, a most joyous
reception always awaits him.

/249 cont./
It is difficult to depict in general terms the picture of the
836 sexual morals among the Gilyak. First of all, one must
831 differentiate between the married ones and the bachelors.
597 The former, when at home in their own settlements, are
more concerned with guarding their wives from alien intruders
than with undertaking extramarital flirtations. Only when
journeying or when visiting in other settlements do they
avidly give free play to their sexual instincts. On the other
hand, the married women are surrounded with so many
temptations from their group husbands and strangers that they
836 violate conjugal fidelity at every convenient opportunity,
839 the more so since far from all marry for love or persons of
847 their own age, and they eagerly make up for this with ex-
847 tramarital flirtations. From the Gilyak point of view on
decorum, however, these flirtations do not represent anything
abnormal, since for the most part they take place between
group husbands and wives. One way or another, the palm
of primacy, as concerns excesses among married people,
must go to the women. "Among men," say the Gilyak,
"you will find a good person 'one-one,' among the women
you will not find a single one."
Genuine excesses of licentiousness take place among
836 the /250/ unmarried youth. Here are possible such extrava-
831 gances as the instance I recounted above of the Gilyak woman,
538 Pigunajka, who before her marriage was having affairs with
14 lovers at one time, including her future husband. Or
another example, which I borrow from the Gilyak epos. The
hero comes to the home of a certain oldster to seek his
586 daughter in marriage. His future father-in-law says to
him: "Thy wife lives over there in a little yurt. People
used to come to see her, they all copulated with her, after
that she lost her legs." And the bridegroom does not become
upset at all. "All right," he says, "I'll go ahead and carry
her off," apparently seeing nothing remarkable in this.

/638 cont./
834 The moral austerity of the Gilyak also appears in the
574 relatively decent behavior of the two sexes toward each other
and in the modesty of their women and girls. One living with
them in their houses never sees indecent physical exposure,
such as occurs so frequently among the Ainu (2), or any other
(115)
2. N. Buse, Ostr. Sakhalin" i Eksped.
1853-55 gg. /Sakhalin Island and the Ex-
pedition of 1853-54/, St. Peterb., 1872,
pp. 55, 56, 70.

836 shocking scenes. Violations of chastity, particularly among
839 unmarried persons, are, of course, not impossible, but are
847 most severely censured by the parents of the girl who has
847 been seduced and has given birth to a child. According to
the Gilyak, i. such a case the girl's mother metes out
corporal punishment to her daughter, while the father tries
to eliminate the scandal by killing the newborn child and
(562) secretly doing away with it. This is always done if the child
is a girl, whereas a boy is shown mercy in certain circum-
stances, and the girl's chances suffer less in this case.
Although contracted by purchase, and in part because
839 of this, as is clear from what has been said, the marriages
847 of the Gilyak usually take a happy or at least a satisfactory
(581) course. Marital fidelity is strictly observed. The husband
jealously guards the fidelity of his wife, especially while
she is young, and the latter is on her guard against giving
her husband cause for mistrust and suspicion and arousing his
586 anger. One very salutary influence checking and curbing
the passions on both sides is the circumstance that the husband,
if he casts out his wife for any reason and returns her to her
parents does not by any means thereby gain any right to a re-
fund of the articles paid for her, and that, on the other hand,
he may claim such a refund if the wife leaves him on her
own accord. In this case she may by no means count on a
friendly reception by her parents. Therefore, simply for

/648 cont./

567 this is another reason why their possession seems so enviable to the Gilyak, and their purchase price is so high among them. A
567 Gilyak, by the way, when asked how many wives (umgu) he has,
595 will never fail to count in his female slave, and all the more
192 because he has paid more for her than for his wife or any of his wives and she also contributes more to his prestige. This can easily lead to mistaken ideas about the extent of polygamy among them, and therefore the further questions, how many of the women are his wanch (wives) or dshangi-mutsch-umgu (lawful women or wives) and how many are merely kryghryss-umgu (female slaves), are always necessary in order to obtain a proper understanding of his marital situation.

567 As severely as the practice of sexual intercourse with a
•[836] female slave is condemned by the Gilyak, nevertheless this is not always observed, especially by the younger and unmarried men. If a female slave gives birth to a child, a Gilyak will
[851] never under any circumstances admit that he is the father, and nobody, of course, will believe the words of the slave. The child, then, is regarded as belonging to the tribe of the mother and likewise, as kryghryss, becomes the property of her owner, who lets it grow up with the mother and, when it has grown up,
[848] sells it as kryghryss. If, on the other hand, the much rarer case
[847] happens, that a Gilyak girl has intercourse with a slave and brings a child into the world, the father is ignored, but the mother is punished, and the child, as illegitimate, is killed and done away with. On the other hand, the Gilyak not unhappily permits a marriage between his male and female kryghryss; in fact, if he has a female slave, he will probably also buy a male slave and have them marry, since any children they might have will be his kryghryss and, as such, can be
[563] turned to good account. Thus, the Gilyak has nothing against assimilation with the neighboring peoples through mixed marriages, but his national pride decidedly objects to such mixing with slaves coming from these peoples and the creation of such from his own ranks, and, on the other hand, strongly supported by covetousness, enjoys the possession and exploitation of slaves from the neighboring tribes.

837

837 EXTRAMARITAL SEX RELATIONS--presence or absence of an ideal of marital fidelity; cultural definition of adultery (e.g., applying to both spouses, to wife only); allegations of promiscuity; incidence of adultery for both sexes; prevention (e.g., cloistering of women, chastity belts); initiation and conduct of adulterous liaisons; cicisbeism; keeping of mistresses; culturally sanctioned extramarital relations (e.g., wife lending, sexual hospitality); etc. See also:

*601 /147/ The terms of kinship in a figurative sense. It is curious
602 how the kinship terms are reflected in the terms used between persons who are not married to each other -- sweethearts. It seems that terms are often transferred into this area from the
[197] matrimonial terminology. Thus a woman calls her sweetheart
[184] o'kono (husband, in the western dialect), az'mych (man, husband, in the eastern dialect), ivn (groom), navkh (from the terminology of the group of father-in-law and son-in-law
•[837] /zyat'/). It is very interesting that the unrelated wives of "brothers," and, jokingly, men who have an extramarital relationship with the same women, sometimes call each other by this last term, as well as by the term akhmalk, while the terms navkh and akhmalk in practical life have taken on the meaning of "comrade" or "participant in a common affair." Thus, the term "navkh" by its meaning in these cases entirely corresponds with the famous Hawaiian term punalua in the family group which takes its name from this term.

*601 As a result of our survey of the kinship termonology, we find among the Gilyak a typical classificatory system of kinship.

Summing up the terms for agnate and cognate kinship, we get the following scheme. (See following page.)

1; Shternberg--261 E-5 (1890-1897, 1910)1933 RX2 Gilyak RX2

/174 cont./

*835 In clans where a distinction is made between the wives of
614 younger and of older "brothers," this right was formulated for me still more boldly: "among clansmen, in one and the same clan everything is permitted ('good'), the wife of an older (brother) is my wife all the same." This undoubted and primordial right of a man to the "wives" of his tuvn is invariably exercised throughout all the Gilyak territory up to the present time, with the sole limitation that we mentioned above, i.e., sexual intercourse should not take place before the eyes of the individual husband of the woman and, as far
*835 as possible, not publicly. The right of the individual spouse,
593 of course, is peremptory -- he can demand from his wife fulfillment of her marital and economic obligations and that she
[597] follow him through /175/ any change of dwelling. He has a formally exclusive right to the children that she bears, but quite often a Gilyak, if he has several children, considers it his duty to give away one of his infants to a childless tuvn of his, if the latter lives in another settlement. But also the subsidiary right of a wife and her group husbands in the person of his "brothers" to sexual intercourse is just as indisputable. It is true, the group spouses must look for a suitable opportunity in order, in the absence of the individual spouse (during his sleep or outside the home), to enjoy their rights, but there are more than enough such opportunities. A man passes the greater part of his time away from home: either he is at the
[184] river catching fish, or he is away hunting for whole weeks at
[512] a time, or he is traveling, visiting. On the other hand, the
[222] women also absent themselves for whole days, going into the
*835 taiga for berries, roots, etc. Finally, intercourse is possible at night in the presence of the sleeping husband. In a word, the exercise of the right of group marriage does not present any particular difficulties. The bachelor tuvn most of all
•[837] fully enjoy this right. Married men resort to it in their own settlement usually only in case of some sort of particular passion for this or that group ang:ei, but outside of their settlement, when they happen to be away from their individual

/175 cont./

*835 wives for a time, the married men enjoy their group rights
●837 just as broadly as do the bachelors. And it must be said in general that the character of the relations between pu and an'g:ej is largely determined by the conditions of cohabitation.
*835 Under the conditions of living in different villages, the rela-
832 tions between them can naturally be only sporadic. Very often in such cases the group spouses know each other only by hearsay, but, upon meeting each other, they usually come quickly to an agreement and form fleeting attachments, for which they are quite eager, both the men and the women, not laying claim upon each other to any particular sympathy, love, or such. There is nothing easier than to come to an agreement with such a pu or an'g:ej whom one meets by chance; one need merely touch the breast of a woman in the passageway or out of doors, or make the stereotyped proposal, "Let's smoke a little together," in order to convince oneself of the strength of one's chances for lovemaking. Sometimes the matter is simply settled by means of winks alone.

*835 In a place where the individual bachelor pu and their
[593] wives, an'g:ej, are in permanent residence, firm attachments are often established, accompanied not only by regular sexual relations, but often also by deep sympathies and /176/ affection, which nevertheless do not hinder the woman from properly fulfilling her conjugal obligations with regard to her individual husband at the same time, even feeling a real affection toward him. Such relations quite often create extremely interesting situations. Two, or more rarely three, brothers, notwithstanding their complete economic independence, giving each of them the opportunity to acquire his own individual wife, nevertheless live together, having one common wife. The official
[595] spouse of this woman is considered to be only the oldest brother, who has actually acquired her with the rights of an individual spouse, but, with the tacit consent of the wife, she is in reality a common wife; this is well-known, not only to outsiders, but
[184] also to the children of the brothers-spouses. One encounters
[556] Such situations also in the richest and most respected families.

/182 cont./

*835 their mother and their father's brother; in exactly the same
171 way, by one and the same term, andri waka, the piruari designate their father, their mother's sister, and their father's brother's wife (ibid., Table IV). All the children of each noa are one another's brothers and sisters and they are all considered children of the piruari group to which this noa belongs (ibid., 19).

IV.

831 Moral and Psychic Consequences of the Sexual Norms

The peculiar norms of sexual relations described by us, broadly permissive on the one hand, strictly prohibitive on the other, are reflected in the morals and psychics of the Gilyak in two diametrically opposed trends.

The permissive norms, which give both men and women such an extensive legitimate freedom in sexual relations, naturally must have given rise to general sexual laxity. In fact, the virtues of chastity, sexual moderation, and conjugal
● [839] fidelity are unknown to the Gilyak. Among married women, and then as a rare exception, one still finds individuals who are more or less faithful to their husbands; among men, by the admission of the Gilyak themselves, even such exceptions
831 are not encountered. In the society of the most respected
521 individuals, tales of the most piquant romantic /183/ adventures are recounted with relish. An extensive amorous experience does not stain the reputation of a gentleman (urdla n'ig:yvyn) at all. In my presence, and that of a gathering of the most honored elders, a young Gilyak, Laruk, to the accompaniment of general noisy approval and merry laughter, related his numerous romantic exploits, about how, by the way, in one settlement he had engendered no less than 20
831 children... Such an attitude of respected people toward the sexual laxity of youngsters is only possible in a society where

/247 cont./

000 amatory experience and art. The Gilyak woman, it is true,
836 conducts herself in an extremely inaccessible manner. Upon
832 the appearance of a strange man, she lowers her eyes, sits all
[834] the time with her brows knit, and hardly answers the questions of the stranger. But this is only external inaccessibility, concealing an inner lasciviousness. Unnoticed by those about her, she /248/ casts oblique, curious glances at the new man at a time when he can catch them. And if the guest has made a proper impression, the matter is consummated very quickly. The man follows her to the well, or to the berry patch, or simply catches her in the entrance hall, and then, after a short symbolic dialogue, such as, "Let's smoke together a little (i.e., drawing in turn at the same pipe)," or "let's hear the news," the matter is settled very simply. Sometimes the guest simply remains in the yurt of his beloved and at night moves over to her couch, or vice versa. Sometimes the business is consummated without words, limiting itself to a mute symbolism, touching the breasts, seizing the leg, and if this symbolism does not encounter any rebuff, the consent of the woman is secured. It is curious that the symbolism of amatory proposals recalls the rites of the wedding ceremonies. The proposal to smoke together is a joking imitation of the rite of conferratio /confarreatio/.
[585] The snatching of the leg or the breast, although it does not
[171] figure at the present time in the wedding ceremonies of the Gilyak, is still to be found among certain peoples of North America, for example among the Lillooet Indians, according to the testimony of Boas and Teit.

836 Such license in alien villages is practiced not only by
● 837 the unmarried youth, but by the married, middle-aged
159 Gilyak as well. On one of my first trips there was among my companions an old respectable Gilyak, Gibel'ka, who enjoyed great fame throughout all of Sakhalin by reason of his wealth and outstanding intellect. When we stopped in the settlements, he spoke breathlessly on a par with his young companions about the pretty women of the settlement, and once he became so carried away that he began to ask my

/248 cont./

836 advice as to whether he should not "buy" a pretty woman wh
●837 had taken his fancy, although he had been married for a
159 long time and could not praise his wife enough. He did not, it is true, take part in the nightly adventures of his young companions, but only because the competition was already too great without that, since it very nearly went as far as revolvers among the young men.

839 By reason of the comparative accessibility of women, th use of force upon them is rare. I have, however, heard of instances where a group of youths, at the season when the wo go for several days to places very distant from the villages a berries and sarana, made genuine raids upon the defenseless women, and, when the women have not yielded voluntarily, they have had no scruples about using force. Violence, how ever, principally amounts to /249/ tearing the cloth trousers which, as among the Chukchee and the Koryak, are made closed, without any openings. Such adventures, like all romantic pursuits in general outside one's own kinship circle of women, bear the characteristic designation s'ankh nan'gyn
[196] "to hunt after women." This term, however, is also applied to searching for a bride, since it has two meanings: "to hunt" and "to seek something, somebody in general."

484 Special distant expeditions to alien settlements in searc
831 of women, of course, are exclusively the affair of real
836 amateurs, so to speak, since in a distant village the new arrivals ordinarily encounter the fierce competition of the local youth, and the women already have their local admirers, not to speak of husbands, and special qualities are required to win an easy success on alien soil. I managed to meet such fortunate individuals: they are ordinarily goo and worldly tellers of tales, jesters, and singers. There are, however, very few such outstanding lovers, even among the Gilyak, and there is a special term for them. Ordinarily the unmarried youth is either content with the women of his own village or pays visits to the settlements of his akhmalk'i, where, as we have seen, a most joyous reception always awaits him.

/249 cont./

831 It is difficult to depict in general terms the picture of the
839 sexual morals among the Gilyak. First of all, one must
577 differentiate between the married ones and the bachelors. The former, when at home in their own settlements, are more concerned with guarding their wives from alien intruders than with undertaking extramarital flirtations. Only when journeying or when visiting in other settlements do they avidly give free play to their sexual instincts. On the other hand, the married women are surrounded with so many temptations from their group husbands and strangers that they violate conjugal fidelity at every convenient opportunity, the more so since far from all marry for love or persons of their own age, and they eagerly make up for this with extramarital flirtations. From the Gilyak point of view on decorum, however, these flirtations do not represent anything abnormal, since for the most part they take place between group husbands and wives. One way or another, the palm of primacy, as concerns excesses among married people, must go to the women. "Among men," say the Gilyak, "you will find a good person 'one-one,' among the women you will not find a single one."

836 Genuine excesses of licentiousness take place among
831 the /250/ unmarried youth. Here are possible such extrava-
838 gances as the instance I recounted above of the Gilyak woman, Pigunajka, who before her marriage was having affairs with 14 lovers at one time, including her future husband. Or another example, which I borrow from the Gilyak epos. The hero comes to the home of a certain oldster to seek his daughter in marriage. His future father-in-law says to him: "Thy wife lives over there in a little yurt. People used to come to see her, they all copulated with her, after that she lost her legs." And the bridegroom does not become upset at all. "All right," he says, "I'll go ahead and carry her off," apparently seeing nothing remarkable in this.

/283 cont./

585 It is noteworthy that such a ceremony of "stamping the kettle"
788 takes place among the Tungus tribe of the "Negda," who since
171 olden times have concluded marriages with the Gilyak, from
177 whom they have undoubtedly borrowed the custom.

585 A year after the wedding the newlyweds, usually already
574 with a child, come to stay a little while with the wife's family,
788 and when they again depart they once more go through the ceremony of "stamping the kettle," only this time, instead of kettles, they use cups.

593 The vicissitudes of marriage. Just as in our society, marriages
586 are not always happy, Since the consent of the woman to the
[584] marriage is not asked, and rarely does any girl resolve to disobey the will of her parents, and very rarely do the parents yield to the protests of their daughters, not backing down from their decision even in the face of a threat of suicide, life after the
593 wedding is fraught with tragedies. Either a woman runs away
586 with her lover, or she runs away to her parents, especially in
837 the case of ill-treatment by her husband. In such cases the husband often tries to take back the fugitive by force, and otherwise he demands the return of the bride price. Since no
[691] one has a desire to part with something once it has become his own property, litigations to recover the bride price are endless.
[123] During my wanderings among the Gilyak, who at first took me to be one who had power, I had to listen to complaints concerning
593 the return of bride price in every settlement. They preferred,
586 however, to ask for the forcible return of the wife, which was
837 often done by the Sakhalin administrators with the favorable
171 assistance /284/ of the priests. The fact was that persons who
797 had lured away or abducted another man's wife appeared before a missionary with the request to be baptized and married, in order to guarantee themselves against the wife's being forcibly taken back by her former husband. The missionary willingly fulfilled such requests and gave them a marriage certificate, which gave to her owner the right to a police order demanding her return in case she was forcibly taken away. And this led to tragedies. One such case deserves to be immortalized.

/284 cont./

From an Amur Gilyak named Tys', 22 years old and from the settlement of Mkhyl', another Gilyak, Urgayn from Vayda, stole the wife and went with her to the missionary Moskvitin. The husband overtook them and began to beg the missionary not to marry them, but he carried out the request of the abductor for a certain bribe. Then the husband collected his clansmen and took back his wife by force. The original abductor presented his marriage certificate to the police, who, for a bribe, ordered the woman to be returned to her lawful owner. It ended with the husband's shooting his wife and himself. They return the bride price without litigation when the wife dies childless soon after her wedding, or when she runs away because her husband is poor and is not in a position to feed a wife, and, finally, when a wife betrothed in childhood dies.

/285/

Separate Materials on the Ethnography of the Amur Gilyak (Extracts from Notebooks and Diaries)

I.

The Tribal and Clan Composition of the Population of the Lower Amur

A legend. Long, long ago the Gilyak, the Orochi, and the Goldi were one people. They were born on one branch of an alder tree. The brother and sister did not know where to go. The sister said, "down to the earth," and was the first to descend.

Settlement of Bulava. Due (Kugi /Ainu/) -- 35 people; one finds them also in Patu, Tebakh, and Mago. When three men came, they found one house of an Ulcha khal'a. Mongol -- khala -- Djakhsul came down from the Goldi village of Chol'chi (1896).

/302/

A person can take two sisters as wives. Brothers may take widows without distinction. It is best of all to take a wife from the clan of one's mother, and then one can even get her for nothing, and even if a payment is required, it is less in any case. In the past one did not pay for a woman if she was from the clan of one's mother. It is not permitted to exchange women between clans. Here, too, one's daughter is given for sale to the wife's brother, but the latter cannot demand this.

There is a prohibition against the descendants of one's sister down to the fourth generation.

In Vaydy (see above) there are Gilyak of the Hirulung clan who have entered into a union k:khal n'akh:r: with the Khydzyr' in Chil'bi. Formerly, they lived together in the same locality and belonged to the clan of the tiger. There is a Gilyak clan which has become related to a snake (there are snakes on the Amgun; they were seen on the Amgun by Putyun) (1). There are also Goldi who are kin to snakes.

1. In the text, "boa," but, judging by note 6 on page 222 in Materialy po izucheniiu giliatskogo iazyka i fol'klora /Materials on the Study of the Gilyak Language and Folklore/, this is a mistake in the notes on the journey.

A young man from Vaydy fell in love with the wife of a Korean, a Gilyak woman, and enjoyed reciprocity. She went to the town with a fish; the Korean stayed to guard the potatoes. Then the lover went to the town. They met and spent two weeks in the town. She came home -- her mother also liked the Gilyak.

The Korean demanded that his wife sleep with him, but she resisted. At night the Gilyak woman ran outside and slept with the Gilyak. The husband gave her a beating; her mother and brothers tried to protect her; the Korean complained, why did he take a Gilyak woman. He killed the Korean (settlement of Mago).

/304 cont./

685 for your master!" And thus /305/ they go around the entire vil-
754 lage, meanwhile pulling on the tendon. Then the thief begins to suffocate from fright and confesses. A shout goes up; it happens that the thief dies from it.

627 An oath is taken also in controversial matters. Before the
695 court, in a balagan where the khlaj-nivukh sits, nothing is allowed to be boiled; they eat raw yukola.

A stick (kys') -- about an arshin in length with a human chkhnaj.

If the matter reaches the point of breaking the stick, then they pay more -- double. Both big and little assemble in the balagan of the khlaj-n'ivukh'a (the settlement of Karga, 1896).

881 Women, Childbirth, and Children. A maiden who has reached
30 sexual maturity makes two braids. Women pierce both ears in
178 order to put in earrings (mes'kh); formerly men also pierced their
881 ears. A wife who is a minor can be slept with only after she be-
585 gins to menstruate. During menstruation the woman puts on her
841 oldest clothes and does not sleep with her husband. Women wash
[302] themselves, but not with hot water, for otherwise the tûgurmam (the mistress of the fire) takes offense.

171 Among the Kekhal (Orochi) a man who has two wives ac-
• 837 commodates a guest under one blanket.

843 A pregnant woman must not look at the Amur when it be-
823 gins to break up, in order not to slow up the opening of the river.

844 They give birth in the balagan (midwife -- langyv-mam) In winter the mother spends one and a half days in it, in summer -- three days.

84 One must not cry out during delivery -- a sin. The husband at this time does not go anywhere. If a child has died during birth, the woman must not travel on the river or sea for a whole year -- there would not be any fish. For a month before childbirth, it is not permissible to bind anything tightly or to drive in stakes; it is not permissible to repair anything for an alien.

[789] During difficult deliveries they open up boxes, tear off patches, and unscrew their rifles. The newborn baby is washed with cold water. The midwife is not paid. Until the umbilicus heals, the

/638 cont./

834 The moral austerity of the Gilyak also appears in the
579 altogether decent behavior of the two sexes toward each other and in the modesty of their women and girls. One living with them in their houses never sees indecent physical exposure, such as occurs so frequently among the Ainu (2), or any other

[113] 2. N. Busse, Ostr. Sakhalin" i Eksped. 1853-54 gg. /Sakhalin Island and the Expedition of 1853-54/, St. Petersb., 1872, pp. 55, 56, 70.

579 shocking scenes. Violations of chastity, particularly among
836 unmarried persons, are, of course, not impossible, but are
848 most severely censured by the parents of the girl who has
847 been seduced and has given birth to a child. According to the Gilyak, in such a case the girl's mother metes out corporal punishment to her daughter, while the father tries to eliminate the scandal by killing the newborn child and
[562] secretly doing away with it. This is always done if the child is a girl, whereas a boy is shown mercy in certain circumstances, and the girl's chances suffer less in this case.

• 837 Although contracted by purchase, and in part because
593 of this, as is clear from what has been said, the marriages
[581] of the Gilyak usually take a happy or at least a satisfactory course. Marital fidelity is strictly observed. The husband jealously guards the fidelity of his wife, especially while she is young, and the latter is on her guard against giving her husband cause for mistrust and suspicion and arousing his
586 anger. One very salutary influence checking and curbing the passions on both sides is the circumstance that the husband, if he casts out his wife for any reason and returns her to her parents does not by any means thereby gain any right to a refund of the articles paid for her, and that, on the other hand, he may claim such a refund if the wife leaves him on her own accord. In this case she may by no means count on a friendly reception by her parents. Therefore, simply for

makes the comparison even more valuable. Unfortunately, there have been cases where Gilyak have been wronged by decent people, for example by soldiers who had before that behaved properly. The causes for that may be found in the peculiar manner in which the uncultivated individual regards strange peoples. He is to a certain extent inclined to regard foreigners as outlaws. However, this fact has in recent times been badly misused and misinterpreted by some philosophers. We have pointed out how the Gilyak themselves were able to put themselves in the place of strangers as well as fellow-tribesmen, and to sympathize with them. But one must remember that, where strangers are concerned, moral impulses such as compassion, the sharing of pleasures, the sense of justice, etc., more than ever make room for the egoistic impulses. Everything that tends to repress understanding and sympathy-greed, vindictiveness, etc.-breaks out more easily if one is face to face with strangers. The Gilyak unfortunately put their worst foot forward in their first acquaintance with the civilized world. The French missionary, Le Brunière, who in the year 1848 came from China by way of the Amur and the Ussuri to the Gilyak was robbed and murdered out of pure lust for booty. But this case was and has remained an exception. The village of Vaida (32 versts from the present city of Nikolayevsk-na-Amure) still has about 200 inhabitants; at that time it was larger by a third, and seven or eight men took part in the crime, of which none is living.

Actually murder seldom occurs. Most cases are caused by quarrels over the fair sex. The relatives of the murdered one formerly resorted to revenge; now, however, they usually file complaints with the Russian administration. [226]

Prostitution in its real sense does not exist; however passing amours are not too much forbidden. A Gilyak woman whose husband is away probably lets herself be persuaded by a passer-by, and the husband himself is not too much offended, provided only that there are no consequences. In general, virginity and chastity have a certain value, but minor transgressions are not taken very seriously. However if a woman gives herself completely to a stranger she is persecuted.

548 On Sakhalin it happened that the Gilyak meant to kill such
837 a Helen who lived with a Russian soldier and bore him
684 a child.

Sodomy, onanism and similar perversions seem to be un-
839 known among the Gilyak. Those whom I questioned about them regarded me with astonishment and did not know what I was talking about.

514 As for modesty, it varies according to the type referred
834 to. In sexual matters it is not very pronounced, as we have already pointed out. First of all, the crowded way in which people live together does not permit such delicacy; however the Gilyaks try to hide their love-making from strangers. Their natural functions they do not exactly perform in the open, but they are not particularly ashamed in front of members of the opposite sex. Men as well as women squat in urinating. Women, at any rate younger women, guard against exposing their bodies before strange men. I had some difficulty in persuading them to do this when I was taking body measurements.

177 It is impossible to study the more subtle expressions of
437 modesty in all their forms, but it seems that the Gilyak are
183 most of all ashamed of being taken for thieves and cowards.
576 Their entire character and cycle of habits is such that fawning and self-degradation are foreign to them. They do not make much of genuflection, but do it largely when they are forced to. Thus those Gilyak who decide to travel up the Sungari to the Chinese with their fur must, as a matter of course, bow before the Chinese officials. And probably the Chinese are responsible for teaching them such humiliating expressions of veneration. [227]

735 Begging is practically non-existent among the Gilyak. The
273 only specimen one can see begging is the so-called Vanika-Gilyak, a degenerated half-idiot who goes begging along the streets of Nikolayevsk-na-Amure and who long since has deserted his countrymen. He is also the only one who can be seen in a drunken state, swaying and noisily roaming about. In general drunkenness has not taken root to such an extent that there are professional alcoholics, and this is probably partly because Gilyak cannot have spirits whenever they want, for it necessitates a trip to the Russians. But they love liquor very much, and unfortunately it is to be foreseen that this habit will become wide-spread.

623 XII. Councils, Jurisdiction, Duels, Prosecution
681 of Criminals

Meetings and councils are seldom held. If they are, they

838

838 HOMOSEXUALITY--conceptualization (e.g., as normal, as abnormal); prevalence for each sex; specific behavior patterns; regulation (e.g., by incest taboos and exogamous rules); institutionalization (e.g., in bachelor organizations); reactions of the community (e.g., toleration, disgust); variant attitudes correlated with sex, age, and marital condition; transvestitism; etc. See also:

Legal definitions and sanctions 684

153 etc. If such topics are brought up, however, one may
821 converse with the more intelligent of them for a short time.
177 As an example of a philosophical discussion with a Gilyak, I should like to quote the interview of a Russian priest (1)

1. The deceased V. Kasansky.

with a Sakhalin-Gilyak who maintained he had observed nothing of God's ways. After [247] a religious discussion the Gilyak suddenly asked: "and why do the Russians say that the earth moves around the sun, when what we see is exactly the opposite?" "Do you have lice in your hair?" was the priest's counter-question. The Gilyak became somewhat embarrassed, but admitted that occasionally he had them. "Good", replied the witty priest, "now if such a louse sits in your hair and sees nothing but your hair, and then goes walking about, it begins to think that it alone is moving, but that your head is standing still. And yet your head, meantime, might be gliding along with you in your boat. Even so is it with us lice on earth: the earth may be moving and we may not be aware of it." The Gilyak grinned but did not reply to the extemporaneous astronomical proof of the little father.

147 XVII. Sickness and its Treatment.

838 In general, the Gilyak are healthier than civilized people. Their endurance of cold and hunger is amazing. To go without food for a few days and yet continue the hunt in the taiga, or to standfor hours up to their chests in the coldest water - all this is nothing to them. Moreover, weakness in body structure, congenital defects, paunches, bad teeth, etc. are seldom found among them. Hermaphroditism was the only deformity that was known to me.

164 Constitutional illnesses and later sicknesses did not have many representatives. I did not find cancer, tuberculosis and scrofula. I saw two cases of leprosy in father and son in one village; another son was healthy. Syphilis occurs, but rarely, in isolated cases, and near cities and military posts. In any case this disease does not have the significance among the Gilyak that it has gained among the native Kamchadals. In spite of the fact that they are hardened toward wind and weather, they suffer rather frequently from rheumatism. Toothache is rare.

839

/255 cont./
832 childhood a little girl is taught to speak with a soft melodic
517 quality and to give her face a dreamy coquettish appearance.
867 A woman not infrequently succeeds through her talent for
832 singing. In their songs the women are capable, not only of
533 expressing their love with great delicacy, but also of ridiculing
826 unwanted suitors most maliciously. In her sarcasm the woman does not stop at any hyperbole. In one song the nose of the undesired one is compared to open patches of water in a frozen surface, to an open door, and his clothing, his dogs, his harness, etc. are described in similar tones.

● 839 /256/ Sexual Abnormalities and Perversions. I asked the Gilyak many times if such sexual perversions as pederasty and bestiality were practiced among them. No one, apparently, had ever heard of any cases of pederasty. As for
[158] bestiality, only in one village on the Tym' was I told, and then with disgust, of one psychically sick Gilyak who had
839 copulated with a dog. The attitude of the Gilyak to these
539 perversions is made clear by the following legend, which I wrote down on the Amur. The tiger, the panther, and even the lion (?) were once men. Once, by chance, the god Kur saw that they were copulating through the rear orifice. Then in indignation he said: "Well, since you copulate like beasts, henceforth be ye beasts forever." Thus, in the view of the Gilyak, the above-mentioned perversions are acts which make a man like a beast.

143 The Gilyak have an extremely simple attitude toward
826 hermaphrodites (miskund in the eastern dialect, miskij -- in the western dialect), in whose peculiarities they apparently see a plain anomaly, but feel no abhorrence for them and
[588] are glad to have sexual intercourse with them. Marriages of hermaphrodites are a common event.

/314 cont./

IX.

Ideas about Animals

825 Choramladz; (chkhoramland) -- like a cat or a polecat, even smaller than a cat; black lip. They move in herds; their footprints have been seen. They are considered most dangerous animals. If you come upon them, you must climb a tree; they surround the tree, but cannot climb it. The man ties his hat to a twig and lowers it down, the animals jump up; the man back, they fall, chew the hat, etc. Finally he saves himself: he waves a long pole around, and they run from the noise.

825 The oldest of all the land animals are pal-miv-kmyg:
703 myg:nga igagh syktymu yz'mudz:gu. They are of the human race. Once the lion, the tiger, and the bear were human beings. They "did it through the rear" with their wives. Kur, by accident, saw this. He said to them: "Since you have intercourse like beasts, so remain beasts in the future." Then they became beasts. Therefore they are considered to be of the human race. The bear was also a human being, but he used to walk on all fours. Kur saw this: "Since you walk like a beast, so walk like a beast." But he does not have intercourse through the rear.

● 839 There is no bestiality. -- On Sakhalin there was once
732 born a boy with a tail.

825 The lark makes thunder, and therefore one must not kill it.
821 It is a sin to approach its nest with baby birds -- there will be thunder. The thunder bird -- tet lyj zevrk: -- makes thunder and, opening its mouth -- lightning.

825 /315/ The loon is the principal water bird. The oldest loon, ugn, with a tail, cries in a thin, humanlike voice, "o-o-o!" The second -- k:akhtr, ag:n'i, is smaller, cries "ka, ka, ka," or "vakh, vakh!" The third loon -- arn' is the smallest and cries in an almost human voice "a-a-a!"

"A TALE OF A BEAR

[LSS: For the text of this tale, see category 539, pp.124-125.]

This story of mating with a bear is one of several stories mentioned in the Note to the Kalmuck story, 'The Birdcage [129] Husband.' But in the present tale we have no mere allusion to the subject; on the contrary, as in 'The Gilyak who Mated with a Tigress,' the tale actually deals with a wooing, and the life of the characters concerned.

The majority of stories of men or women mating with animals were probably, even in the first place, amusing fiction and did not arise from abnormality and depravity of savages or barbarous races. Similarly, considerations of totem ancestry, while interesting from the standpoint of man's early evolution, seem too remote to have played an important part in origination of the mass of folk-tales, even of the most ancient, such as the Egyptian, Indian or Kalmuck. This is not to deny the possibility of such causes, but to lay stress on the greater influence of a story-telling faculty which has used striking ideas and situations in order to divert childish persons or to arrest the attention of dull minds. To the primeval hunter it doubtless appeared that the hunted are not very different from himself, for they lived in the same environment, and were influenced by similar considerations. He developed, but an inherited tendency to look on animals as his fellows persisted after notions of totem ancestry had vanished."

On Sakhalin it happened that the Gilyak meant to kill such a Helen who lived with a Russian soldier and bore him a child.

Sodomy, onanism and similar perversions seem to be unknown among the Gilyak. Those whom I questioned about them regarded me with astonishment and did not know what I was talking about.

As for modesty, it varies according to the type referred to. In sexual matters it is not very pronounced, as we have already pointed out. First of all, the crowded way in which people live together does not permit such delicacy; however the Gilyaks try to hide their love-making from strangers. Their natural functions they do not exactly perform in the open, but they are not particularly ashamed in front of members of the opposite sex. Men as well as women squat in urinating. Women, at any rate younger women, guard against exposing their bodies before strange men. I had some difficulty in persuading them to do this when I was taking body measurements.

It is impossible to study the more subtle expressions of modesty in all their forms, but it seems that the Gilyak are most of all ashamed of being taken for thieves and cowards. Their entire character and cycle of habits is such that fawning and self-degradation are foreign to them. They do not make much of genuflection, but do it largely when they are forced to. Thus those Gilyak who decide to travel up the Sungari to the Chinese with their fur must, as a matter of course, bow before the Chinese officials. And probably the Chinese are responsible for teaching them such humiliating expressions of veneration. [227]

Begging is practically non-existent among the Gilyak. The only specimen one can see begging is the so-called Vanika-Gilyak, a degenerated half-idiot who goes begging along the streets of Nikolayevsk-na-Amure and who long since has deserted his countrymen. He is also the only one who can be seen in a drunken state, swaying and noisily roaming about. In general drunkenness has not taken root to such an extent that there are professional alcoholics, and this is probably partly because Gilyak cannot have spirits whenever they want, for it necessitates a trip to the Russians. But they love liquor very much, and unfortunately it is to be foreseen that this habit will become wide-spread.

XII. Councils, Jurisdiction, Duels, Prosecution of Criminals

Meetings and councils are seldom held. If they are, they

Amur

/305 cont./

84 mother has her own fire. After childbirth a woman washes herself for three days and then moves to her yurt, but for seven days she sits apart and eats from a separate kettle. For ten days after childbirth, it is not permissible to drink cold water or to eat raw fish, but if twins were born, then it is permissible. When a child is born, they bring in two sticks, put them into his hands and lift him up. Similarly, sticks will be placed in the infant's hands [155] when he falls ill, and he will be compelled to lift himself up (1).

[177] 1. On another page of the same notebook, we find the following notation: "These sticks kyz' nyngydz' (from kyz' -- risk, luck, and nyngydz: -- to seek)," which probably refers to the above-mentioned sticks.

845 /306/ If two children were born, they make two pairs of prung, two k:ong z'akh, two sticks made of rose-willow, cut as strips (pying z'akh), two small bows (pudz:) and arrows of a special shape (m'erlar), and attachments for the cradle -- pitur'. When they prepare food, these trees -- ola' bituz' -- must be fed (settlement of Kal'ma).

855 While a child is growing up, his umbilical cord -- kylmyr
789 is kept at home, and then he himself must carry it into the forest
846 and hang it on a tree. O'ging chkhnaj is a figure that they make when a child is suddenly frightened during his sleep. The chkhnaj is the figure made when a person himself, without the shaman, does that which he dreams.

514 The child's excrement is poured out near a fir tree (both male and female); after being cut, hair is also thrown here (it is not permissible to cut the hair of twins). One must watch carefully to see that no female blood drops on the urine or the refuse,
824 for then the child is lost. The child will die if the tree growing
761 there is broken. This tree is called pila uigf, and the place is called ki markf -- literally -- "urine pouring out place."

841

841 MENSTRUATION--theory of menstruation and the menstrual cycle (e.g., association with lunation); beliefs about menstrual blood; associated practices (e.g., medicinal and magical uses of menstrual blood, avoidance of contact, methods of stanching and disposal); behavior and treatment of women during menses (e.g., isolation, imposition of food and sex taboos, purificatory rites); adjustments in behavior of spouse and parents; recognized symptoms of menstruation; explanation and treatment of irregular, excessive, or prolonged menses; etc. See also:

756 When shamans fight, the one who has more souls wins. The
794 killing of one shaman by another is accompanied by the acquisition
796 of the kekhn of the opponent. During his supposed death, the soul
[578] of the shaman travels over islands of the sea (tol). On these islands, which are of various colors, the houses are of stone tol-kekhn. Sometimes his soul goes into the mountains to the abode of pal-kekhn. The shaman kekhn fears only Pal milk and Tol milk, but not the milk of sables, foxes, otters, and rats (1).

1. Concerning the rat, see Chapter VII, "Miscellanea." S. Sh.

Among the kekhn there are variously colored eared seals, iron trout, and tigers.

756 How the shaman Chomkx resurrected a woman (the settlement of
529 Rykovskoye). A husband and a wife were fishing. The wife fell sick and died before morning. The husband said: "All you shamans are deceiving me. Now my wife is dead. Well, make her live!" The shaman became angry and said: "I shall shamanize all night; if before morning she moves her left little finger, she will live." That is what happened.

756 A shaman stabbed himself and shot himself in the mouth, and "nothing."

756 A female shaman has more spirits than a male shaman.
84 she kills her shaman competitor, sending her kekhn to rub her
754 competitor's eyes with the menstrual blood of shankh-chokh. A
562 feature of this blood is that a drop in food makes a person waste
578 away. Copulation during the menstrual flow also leads to local
[833] ataxia.

756 The kamlanie of a female shaman, who, according to her
794 own words, was milkternd (mad) after the birth of her first daughter.
796 She first made inau and then rubbed her face, breast, and so forth
[158] with marsh tea, lighted it on the hearth, and warmed her tambourine... Then she bound her legs and arms with shavings and girdled herself with shavings. She yawned. Moderate blows... The sounds grew stronger. She sighed loudly and whispered. She

844 Pregnancy, Childbirth and Miscarriage among the
753 Inhabitants of Sakhalin Island (Gilyak and Ainu).
343 by Bronislaw Pilsudski

I. The Gilyak

The house of birth.

Among the Gilyak the act of birth is considered unclean and therefore is never allowed to take place in the yurt, their home. That is why not only in summer, but even in winter during the worst periods of frost and snowstorms, the woman in labor is led to a hut built especially for her near the home. The choice of the place makes it clear that the Gilyak feel no respect for the act of birth, for the hut mentioned above is built in the bushes which serve as a privy for the
562 women. The location of these bushes is always
841 definitely fixed, and no man would ever walk in that
753 direction. The boys are strictly forbidden to run or to look around there, and they are warned that they will contract a disease called taremynd if they step into a trace of women's blood. The disease begins with a paralysis of the hands and feet, the afflicted person loses the ability to move, loses weight and finally dies, for the disease is incurable.

844 As soon as the labor pains start the woman is
183 brought into the lan-raf or the "house of birth". This "house of birth" is erected hurriedly at the very last moment. Built of wooden boards roughly put together and covered with old bark from fir trees, it looks more like a dog house than like the room destined to welcome a new inhabitant of the world longingly expected by his parents. In the eyes of the Gilyak there is no conflict between the affection and love of the parents for the newly born child and the severe, if not cruel welcome, it is given. The child will go through a hard, more than Spartan education, and its life will be full of worries and hardships in a neither opulent nor gentle nature. This is why no Gilyak even comes to think that the first entrance into the world might be easier and more wholesome for the little guest if it took place in the presence of other people under other and better circumstances.

842

842 CONCEPTION--theory of impregnation and paternity; fertility and sterility (e.g., incidence, conceptualization); desire for children and preferences as to sex; methods of inducing conception and of counteracting barrenness and sterility; treatment of barren women and sterile men; methods of influencing conception (e.g., determining sex, preventing twins, inducing healthy offspring); prevention of conception (e.g., continence, coitus interruptus, contraceptive devices); attitudes toward birth control; etc. See also:

Sex behavior	83	Notions of reincarnation	715

/250 cont./

831 192 Such instances must not be regarded as a general phenomenon, however. Along with the factor of heightened sexuality and sexual freedom, other, restraining factors are also acting. Among the married women, such factors are maternity, economic cares, and, finally, among both married and unmarried women, such feelings as love and bashfulness. In general, however, sexual dissoluteness plays no small role in the life of the Gilyak, not only in an economic, but in a psychological sense as well. Ordinarily the Lovelaces either do not maintain households at all or, if they do, maintain their economies very carelessly. Both [826] in life and in poetry one constantly comes across sharp reproaches and the reviling of the youth by the older people for laziness at work in connection with licentiousness. And ●[842] furthermore the Gilyak themselves attribute childless marriages 831 158 to dissoluteness. But the saddest of all is the influence of dissoluteness on the psychics. A whole series of nervous disorders specific for the Gilyak, such as myarechenie among both men and women, and diseases connected with the full loss of psychic composure (self-control /given in English/) are the result of dissoluteness, which furthermore, among women, is accompanied by serious transgressions in the realm of the sexual sphere, and the latter, in turn, lead to the appearance of hysteria.

831 192 Side by side with the wide sexuality and sexual freedom described above, the feeling of love still plays a great role in the life of the Gilyak. The most extensively used term for love, es'-mund, denotes both sexual love and love in general, for children, friends, etc. There is a special term for reciprocal love -- os'mund; for marriage for love, os'mur:kir, vavynd. There are also some other terms for love, for example, hyvnd and others, but there are no special terms for "beloved" /male/, "beloved" /female/, although /251/ one can say es'mula nig:yvyn, i.e., "man whom they love," but in the language of lovers the beloved designate each other either by the terms "husband" and "wife," or by

/308 cont./

765 775 has cuckooed for a long time, drinks water from a cup. Go well, live well, (observe) the law of your fathers, the law of your mothers, the law of your elder brothers. Go." These words are said at the ordinary funeral repasts.

769 786 After a while they buy a bear, feed it for two years, and then hold a bear festival. If a kinsman of the deceased does not buy a bear, 626 he is treated with contempt and reviled -- "inain khardz;. " "What sort of a person are you? Your mother brought you up, cleaned up your excrement. A good man does not even abandon his pryski like that." One cannot be tried for such a vilification. One's clansmen always help one to hold a bear festival.

587 768 The woman cannot marry until the major funeral repast is over.

766 They inter a baby up to a week old on a tree, up to half a year old -- in the ground. If a child who died before he was ● [842] three days old were cremated, his mother would not have children for a long time.

[184] On the Amur four little firs with roots are placed over the grave.

[931] During pila-dakh (smallpox epidemic) the dead are not cremated, but must be buried in a grave.

Drowned persons. Uiglyf -- the place where a drowned man has been pulled out. When a man has drowned, he is cremated, and on the third day they make a toln'ir, i.e., a cup for sacrifices to the master of the water, a trough, and a kinys -- a cup for the drowned man; mos' is placed in the trough, in the cup -- red currants. They pity the man; they select two or three /309/ brave men, put the deceased in a boat on the bank there by the water, and place a kinys nich, a Chinese kettle, and one rose-willow branch standing to the height of a man. At this point one man says: "Kettle, boil, steam, rise, move upwards, you, rose-willow branch, widen, make a good covering so that the devil does not see the Gilyak."

/336 cont./

854 [847] A newborn baby is washed with his mother's milk for 15 days and then with cold water from the mouth. For the first year the whole body is washed twice a day, and then only the face.

854 789 Protecting the child. A stick on which the cradle is hung -- ekhl-chugir:(?). Sometimes a Japanese saber in birch bark is used instead of a stick for frightening away evil spirits. If a child dies, they preserve everything, along with the amulets, for the next child, whom they again serve; if another child is not born, they preserve them until their old age.

845 784 If a child dies during childbirth, the woman must not ride along a stream or on the sea for a whole year; there would be no fish. Chkhnaj -- weapons, a little ax, a knife, a bow and arrows, 854 755 are hung over the child's bedding on both sides. Over the head of 789 a little girl's bed is hung a piece of fish net. All this is hung up at the first sickness of the child.

●842 /337/ If a woman does not have children, the wife of her husband's brother gives her her belt (chik) and, secretly -- a piece of her husband's belt.

553 Names. Names are given after the grandfather, but if there are too many grandsons, a new name is thought up. One must not take names from an alien khal; otherwise one must give the latter the names from his own.

845 [876] Twins. Twins -- tongch: -- ekhlang (tongch: means "twins" and the god who gives birth to twins). Tongch: may be from Pal-n'igyvyn, i.e., the master of the forest, and Tol-n'igyvyn -- the master of the sea.

845 782 When twins are born, chukh-chugynd must be arranged for Pal-n'ivukh: mos', saranka, puchka, rare fish, etc., in small quantities; they first set them in place and then eat them themselves.

The place where the chukh-chugynd is made is called chauf. If twins die young, then they make chkhnaj -- two or one depending on how many died. A little balagan is made under the chkhnaj. Chukh-chgynd is made here also before setting out on a journey or a hunt, and also upon one's return and when the children are ill.

/640 cont./

462 would think that for the man, too, there could never be any lack 411 of domestic work. But these objects are by no means made everywhere and by everyone, but rather at only a few places by expert [463] [439] Gilyak and used for trade (1), so that one need only make a wooden

1. A large portion of them, as was mentioned above (p. 894), are bought in crude form from the Orok and only given the finishing touches by the Gilyak.

handle or shaft and fasten the iron to it in order to produce the 462 complete weapon. The situation is similar with respect to bows, 321 boats, and other implements that are used specifically or chiefly 322 by the men. The domestic activities of the men among the 517 Gilyak, therefore, are not very numerous and are mostly limited to a few manual tasks with the knife or the drill to produce sleds, ski, animal traps, and other implements of wood or bone, and he still has much time left for idleness, smoking, and sleeping.

593 The domestic tasks and accomplishments of the wife, however, [462] are far from exhausted by what has been presented above, for in addition to all that there are still the maternal duties, the care and tending of the children. The Gilyak, husband as well as wife, find great pleasure in children and not infrequently express it, though they are generally very reserved about expressing their feelings. I never saw a Gilyak give his wife a kiss, not even when he was about to leave on a journey or returned from one. [855] On the other hand, I have often seen a Gilyak man, not to speak 593 of the women, tenderly caress and kiss small children. Every married Gilyak wants as large a swarm of children as possible, ●842 and one who has them prides himself on it. One in Xyi was boasting in front of me about his many children, but to my question as to how many he had, he could only answer: tammla, tammla, that is, many, many. Mixed in with this joy, however, [592] there is also an egoistical, utilitarian viewpoint, for in his growing sons he will soon have helpers in his lucrative hunting, fishing, and trading business, and the daughters promise, /641/ apart from The help that they give in the household, a fine bride p

/641 cont./
593 the help that they give in the household, a fine bride price. A
843 sterile wife, then, is commonly exposed to the risk that the hus-
[595] band will cast her out or take a second wife, who, if blessed with
[586] children, would soon push her completely into the background.
Needless to say, the wife shares the husband's desire and scorns no
means that might serve to fulfill it, and the prevailing superstiti-
[825] tion gives her many such means. For instance, I saw many a
[789] woman wear the tooth of a bitch around the neck in the belief
that this would make her fertile. Presumably other amulets
specially carved for the purpose are worn by the women, though
I am unable to name a particular object of this sort.

844 After all this, it is all the more surprising that there exists
among the Gilyak an inhuman, cruel custom in connection with
the birth of a child, the custom, that is, that a woman may never
give birth in the house, but must always leave it, regardless of
the weather and of the time of day or year. I did not want to
844 believe this, but I myself witnessed it. When I visited the village
114 of Kulk on April 24 (May 6), 1855, and entered one of the houses,
I saw a woman going out extremely heavily and laboriously and
sinking down nearby on a prepared bed of straw, where she was
immediately seized with labor pains. The husband stood in front
of the door, calmly looked on for a while, and then went back
into the house, whereupon I, too, left. A few hours later I heard
from a Gilyak of the same village that the birth had been success-
ful, but the child died soon afterward. The mother was still alive.
[132] The mean temperature on this day was 2.8° R. in nearby Nikolayevsk.
At 7 o'clock in the morning the thermometer registered only 1.1°,
at 2 o'clock in the afternoon it rose to 6.3°, and dropped again to
2° at 9 o'clock in the evening. The river had not yet thrown off
its cover of decaying ice, and, with the sky slightly cloudy, for
the most part, a moderate east wind was blowing from the Liman (1).

1. Cf. Vol. IV., p. 30, of this work.

844 During the colder seasons, in the late fall and winter, delivery
343 does not take place in the open, but rather in a birch-bark tent

845 dwelling to the top of a near-by mountain; there, for
766 the last time, choice food is offered to the figure.
782 Next to the sacrificial objects a one to two meter long
775 stick carved in curly design is dug into the ground;
they call it langa. From this moment on the whole tribe
is safe [762] from being haunted by the dead child,
tonhr ehlian, without further prayers or sacrifices.
753 If the relatives neglect to follow these rules, which
845 are designed to appease the awe-inspiring spirits of
776 the mountains and to win their favor, they evoke their
anger. Several diseases which attack the parents and
relatives of the twins are considered to be symptoms
of their revenge (tohr ehlian). These usually are
certain diseases like deformation of the jaw-bone,
squint-eyes, stiffening of the neck or any kind of
convulsions. The appearance of such diseases is
considered to be a consequence of the mountain
spirit's dissatisfaction; in such cases one says
"tonhr ehlian singrund", that is "the twin child is
tormenting".
784 The Gilyak are so afraid of these dangers that
845 young women and girls are strictly forbidden to listen
777 to reports about such happenings; by these precautions,
they believe, they will be able to prevent the birth of
twins. Women are neither allowed to borrow house-
hold articles nor to accept gifts from friends who had
given birth to twins. In this case old soft objects are
considered to be the most dangerous ones. Hard
objects, however, especially tools made of metal, do
not transfer the bad luck of the former owner to the
new one.
●842 It is altogether a trait characteristic of this northern
777 tribe that they believe in the possibility of the
transference of physical peculiarities from one man
to another man by way of his tools. This gives us an
explanation for the superstitious remedies they use
for overcoming a woman's sterility. The woman who
cannot bear children must ask another very fertile
woman to lend her the waistband of her trousers and
she has to wear it up to the moment of the desired
success. A Gilyak told me that fertility can be
transferred from one person to another like a
contagious disease, for example by way of a vessel
which had been used by the sick person.

843

843 PREGNANCY--theory of pregnancy; determination of pregnancy (e.g., from cessation of menses, darkening of areola, abdominal prubberance, fetal movements); forecasting time of delivery; predicting sex, etc.; treatment and behavior of the pregnant woman (e.g., relief from work, dealing with nausea and giddiness, gratification of food cravings, observation of food and sex taboos, regimen, isolation); associated rites and ceremonies; sympathetic behavior of husband; ideas about embryonic development; practices intended to facilitate delivery and insure healthy offspring; differences in treatment of first and subsequent pregnancies; miscarriages (e.g., disposal of fetus, associated beliefs and practices); etc. See also:
Maternity benefits . . . . . 745 Abortion 847

685 for your master!" And thus /305/ they go around the entire vil-
754 lage, meanwhile pulling on the tendon. Then the thief begins
to suffocate from fright and confesses. A shout goes up; it
happens that the thief dies from it.
687 An oath is taken also in controversial matters. Before the
695 court, in a balagan where the khlaj-nivukh sits, nothing is allowed
to be boiled; they eat raw yukola.
A stick (kyr) -- about an arshin in length with a human
chkhnaj.
If the matter reaches the point of breaking the stick, then
they pay more -- double. Both big and little assemble in the
balagan of the khlaj-n'vukh'a (the settlement of Karga, 1896).
88 Women, Childbirth, and Children. A maiden who has reached
30 sexual maturity makes two braids. Women pierce both ears in
178 order to put in earrings (mes'kh); formerly men also pierced their
ears. A wife who is a minor can be slept with only after she be-
581 gins to menstruate. During menstruation the woman puts on her
585 oldest clothes and does not sleep with her husband. Women wash
841 themselves, but not with hot water, for otherwise the tŭgurmam
[304] (the mistress of the fire) takes offense.
171 Among the Kekhal (Orochi) a man who has two wives ac-
834 commodates a guest under one blanket.
● 843 A pregnant woman must not look at the Amur when it be-
823 gins to break up, in order not to slow up the opening of the river.
844 They give birth in the balagan (midwife -- langyv-mam)
In winter the mother spends one and a half days in it, in summer --
three days.
84 One must not cry out during delivery -- a sin. The husband
at this time does not go anywhere. If a child has died during
birth, the woman must not travel on the river or sea for a whole
year -- there would not be any fish. For a month before child-
birth, it is not permissible to bind anything tightly or to drive in
stakes; it is not permissible to repair anything for an alien.
[789] During difficult deliveries they open up boxes, tear off patches,
and unscrew their rifles. The newborn baby is washed with cold
water. The midwife is not paid. Until the umbilicus heals, the

/335 cont./
832 In Tenga a girl firmly refused to marry her bridegroom
who had been engaged to her in her childhood, but when okht
was made, she married him.
684 If one sleeps with another's wife by force, he is beaten for
it and his dogs are taken away.
● 843 /336/ When a woman is pregnant, firewood must not be
841 cut on her footprints; she must not be struck in the face, even
[782] in jest. Chukh-chugynd (a sacrifice) must not be made in the
langraf (a shed for childbirth), and as soon as the child is born,
the woman returns to yer yurt. From the seventh month of
pregnancy, the husband of a pregnant woman is not allowed to go
hunting or to travel far to set up nooses, but he can go into the
846 langraf. Broth may not be brought from the yurt to the female
parent, and when she returns from the langraf, she cannot eat
food prepared on the common fire until the umbilical cord (kyr)
of the baby falls away, and they make her a fire in the corner.
[782] When (the umbilical cord) falls away, then they feed the fire,
chukhchugn-tugur, and have a feast. After that she stops being
unclean -- akilaf pachkyr -- and becomes sik urland pomyng --
clean, and her husband can cut firewood on her footprints. From
the day of the birth of the child until the falling away of the
umbilical cord -- kyr vakhind -- none of the people living in the
yurt or even the guests spending the night may leave the house.
843 For a month before childbirth one must not bind anything
845 tightly or mend anything for another. With difficult births, one
789 must open up boxes, rip open patches, and unscrew the rifle.
A woman must not shriek during childbirth; otherwise she
844 will not deliver for a long time. If the stomach is pointed, pro-
843 truding, a boy will be born, if flat -- a girl. After four girls,
a boy will unfailingly be born (1).

[846] 1. Among the Orok a woman is in the
[171] balagan only during childbirth; then
for ten days they cook for her on a separate
fire; men do not eat (with her), fearing
to lose their strength.

844 The mouth of the newly born child is cleaned of the
853 mucus with the help of a finger, whereupon the child
is given the mother's breast for nursing immediately.
The next day the mother washes the child with cold
water, but she does not pour it directly on the body
of the child, but takes it into her mouth first and only
then applies it to the child, which, of course, raises
the temperature of the "bath". In this way the child
is washed twice a day for two years.
856 If the newly born child has a defective limb nobody
tries to mend the damage. It is also not a custom
among the Gilyak to form the soft head of the baby.
846 It is recommended that young women walk around a
844 great deal after they have given birth to a child, while
262 sitting is recommended for older women. Women of
273 all ages are advised to move around as much as
possible before they give birth to a child.
Women are strictly forbidden to drink cold water
during a period of ten days before and after the
delivery. If there is no tea at hand the sick woman is
given cooled boiled water if she is thirsty. During
that period she is not allowed to eat red-meat-fish
(salmon); salted food is forbidden as well as eating
a black berry that grows in the tundra (empetrum
nigrum). Taking hard liquor before giving birth to a
child is considered harmful, but later on it is
considered to be healthy. In general liquor is
consumed very rarely, and the Gilyak on Sakhalin
consume very little alcohol compared to other
inhabitants of this island.

● 843 Miscarriages.
Natural miscarriages (ryrnnd) occur very frequently
among the Gilyak; they are considered quite harmless
and not even looked at as an illness. I was told that
there was scarcely a woman who had not experienced
one or two miscarriages in the course of her life. But
not a single inhabitant with whom I discussed it knew
of a woman who always miscarried and was not able
to carry the fetus in her abdomen throughout the
normal period of pregnancy. I do not intend to state
the causes of the frequent miscarriages among the
Gilyak for lack of sufficient [759] data. I will,
therefore, leave the answer to this question to the

● 843 medical profession. It is possible that the Gilyak belong to a race which is constitutionally inclined to miscarriages. I believe, however, that in this respect it is of great importance that the woman is worn out from perpetual heavy work and that there is a complete lack of consideration for the pregnant woman. Among the Gilyak the immense burden of domestic work is at no time alleviated for the woman during her pregnancy. No man deems it necessary to protect his wife while she is carrying the baby to be born. The eventual miscarriage he attributes without compunction to insignificant causes. The Gilyak believe, for instance, that a miscarriage takes place if a child hits his pregnant mother's face with a strap or a long wooden object, such as a spoon, an arrow, a toy, a wooden knife or a fishing hook. Hitting a pregnant woman with a twig or a little stick recently cut off a tree or bush is considered harmless. A violent blow or a fall can cause a miscarriage too.

844 Behavior of the husband.

The Gilyak has a strange way of expressing his worries about his wife during her labor pains: he unties everything that can possibly be untied. First on himself: he undoes the braids in which his hair is plaited and he unties his shoelaces and top sleeves. Next, he unties or loosens whatever might, at that time, be tied up in the house or in its neighborhood. In the yard, he takes the axe out of the block; he loosens the boat if it is tied to a tree; he takes the cartridges out of the gun and the arrows out of the cross-bow. An image of pity without a belt, he creeps from one corner to another or he lies around pondering what else he might untie or loosen somewhere, for he is convinced that the labor pains and their duration depend upon whether he has overlooked and missed loosening something.

846 Only after the navel of the child is healed is the man allowed to start working or to go hunting, to leave the house on business and visit his relatives or friends. Neither at this period nor later on is the birth of the child celebrated by a festivity in the house or by a meal.

General remarks.

Throughout this period of time the woman who has

the help that they give in the household, a fine bride price. A sterile wife, then, is commonly exposed to the risk that the husband will cast her out or take a second wife, who, if blessed with children, would soon push her completely into the background. Needless to say, the wife shares the husband's desire and scorns no means that might serve to fulfill it, and the prevailing superstition gives her many such means. For instance, I saw many a woman wear the tooth of a bitch around the neck in the belief that this would make her fertile. Presumably other amulets specially carved for the purpose are worn by the women, though I am unable to name a particular object of this sort.

After all this, it is all the more surprising that there exists among the Gilyak an inhuman, cruel custom in connection with the birth of a child, the custom, that is, that a woman may never give birth in the house, but must always leave it, regardless of the weather and of the time of day or year. I did not want to believe this, but I myself witnessed it. When I visited the village of Kulk on April 24 (May 6), 1855, and entered one of the houses, I saw a woman going out extremely heavily and laboriously and sinking down nearby on a prepared bed of straw, where she was immediately seized with labor pains. The husband stood in front of the door, calmly looked on for a while, and then went back into the house, whereupon I, too, left. A few hours later I heard from a Gilyak of the same village that the birth had been successful, but the child died soon afterward. The mother was still alive. The mean temperature on this day was 2.8° R. in nearby Nikolayevsk. At 7 o'clock in the morning the thermometer registered only 1.1°, at 2 o'clock in the afternoon it rose to 6.3°, and dropped again to 2° at 9 o'clock in the evening. The river had not yet thrown off its cover of decaying ice, and, with the sky slightly cloudy, for the most part, a moderate east wind was blowing from the Liman (1).

1. Cf. Vol. IV., p. 30, of this work.

During the colder seasons, in the late fall and winter, delivery does not take place in the open, but rather in a birch-bark tent

/641 cont./

844 [343] [132] [165] erected for this purpose near the house, where a small fire can also be kept going. Nevertheless, with the low winter temperatures and the severe snowstorms in the Gilyak country, this is still a harsh demand for mother and child, and I do not doubt but that the high mortality among Gilyak children and the generally small population of the Gilyak are caused in large part by this bad custom. I am unable to say what conceptions gave rise to it. It is not likely, however, that it is based upon the superstition [846] that there is something inherently unclean about the woman during delivery, for, as Dr. Seeland (2) and Deniker (3) note, she is

[113] 2. "Die Ghiliaken, eine ethnographische Skizze /The Gilyak, an Ethnographic Sketch/," (Russische Revue, edited by Carl Röttger, Vol. XXI, St. Petersburg, 1882.

[113] 3. Cf. Dr. H. Ploss, das Weib in der Natur- und Völkerkunde /Woman in Natural Science and Ethnology/, 3rd ed., edited and published by Dr. Max Bartels, Leipzig, 1891, Vol. II, p. 43.

subjected to no special purification after it, but, on the contrary, after about 8-12 days may return to the house without further ado. 114 The first-named thinks rather that this /642/ custom may be 844 linked with the Gilyak belief that misfortune will befall a house 768 in which a death has occurred and therefore it has to be torn [963] down; for this reason they also have dying persons carried out of the house and left to lie there until they are dead (1). It is

1. Dr. Seeland, op. cit., p. 223.

possible that they have such a notion, but it still has to be substantiated that they actually tear down or at least abandon a house in which someone has died, which still seems very doubtful, particularly with respect to the large and complex Chinese

/642 cont./

114 844 768 winter-houses (tschadryfs), which are erected jointly by the villagers and are usually occupied by several families. I cannot affirm it from my own experience: during my stay in the Nikolayev post several deaths occurred in the nearby village of Kulk, without any of the houses being abandoned, much less torn down, but the persons concerned may have died outside. On the other hand, I once saw a corpse lying in a house, which will be discussed later in connection with the mode of burial of the Gilyak, but it, too, could have been brought back in after death had occurred outside the house. If the association of ideas suspected by Dr. Seeland is to be found among the Gilyak, this would prove that at every birth they are primarily thinking of the probable death of either the mother or the child, which, of course, fully justifies their own barbaric treatment of the woman in childbirth. Along with this, however, they resort to all sorts of other 844 532 782 superstitious treatments to insure an easy and successful birth. Thus, well before the birth, a figure referring to the act of birth is carved out of wood (see Pl. LIV, Fig. 6 /see p. 1254 /) and provided with small offerings of food, tobacco, and the like in order to pacify and make favorably disposed toward them the evil spirits that might have an influence on the birth.

844 413 [531] No one is permitted to enter the tent where the woman is in confinement, with the exception of the midwife and other women giving assistance. The umbilical cord is cut with a special knife (Gilyak kysmrk- or kyssk-dshakko, Pl. XXXII, Fig. 5 /see p. 1012/), the handle of which is provided with especially rich carving and which may not be used for any other purpose (2). Evidently, the

[126] 2. I obtained the specimen illustrated, which belongs to our museum, from the same village of Kulk.

Gilyak attribute especially great significance to this act. At the place where the child was born it is washed and cared for by the women and is kept there, if it has not died in the meantime, until it moves into the house with the mother, where she alone takes care of it.

578 out somewhere in the taiga for a whole year, the consensus
586 usually favors them and the first husband must abandon his
claims. In recent years many Gilyak have resorted to a
177 special ruse in order to make sure of their wives. Such
586 chaps who are probably not of the best and who may thus be
797 faced with the prospect of eventually being deserted by their
wives, have themselves baptized by a Russian priest, because they know that, according to the Greek religion, marriage must be permanent, and they would consequently, in case of desertion, be entitled to the ispravnik's protection. However, it is doubtful whether this maneuver will help them much in the long run, for such baptized individuals who later have no intention of keeping their Christianity alive, are soon forgotten in official circles. No one knows who or where they are, the wilderness is vast, and looking for them is more than troublesome.

If the abducted woman had had children by her first marriage, these usually remain with the father. [129]

171 Child training. Toward the end of her pregnancy, a
● 844 woman is taken out of the house for 10 (1) days and brought to
183
343

1. The duration of this exile is not the same everywhere. From some Gilyak I learned that eight days sufficed; on the island of Sakhalin, however, 12 days were given.

a hut made of birch bark, in which a small fire is burning. This custom which is known to exist among other primitive peoples, for instance among the Ostyaks, is, up to the present, very strictly observed by the Gilyak even in winter during the most severe cold, as a result of which the newly-born child often freezes to death. Conceivably a child which survives such a test must be strong. The mother also proves by this what rigors these people are capable of enduring. During her entire stay in the hut only women are permitted to come to her, often she must be her own mid-wife. No one could tell me the actual meaning of this custom: most probably it cannot be explained on the basis of "impurity" of the woman, but it is related to another superstition of which we shall speak later, and which was originally perhaps some hygienic regulation. That no mystical idea of "impurity" underlies it may be seen from the fact that when the woman
854 returns to her house she undergoes no "purifying" ritual.
515 The bathing of the newly-born is also done in the impro-
302 vised lying-in establishment, and it is given its other baths there.

825 and if he gets caught, he is killed. But even after that he is
789 handled with respect, that is, his corpse is laid before the
278 house of the idols and left there until it begins to decay. Besides the skin, the bones and the gall are immediately sold, for the former are held by the Gilyak to make a man brave, and the latter is used for all kinds of medicaments.

776 Of the numerous spirits whom the Gilyak are supposed to
782 know about, some are good and protect man, but the majority are more or less evil, and must therefore be propitiated with gifts. The chief of the evil ones is called Kins (on the island of Sakhalin: Kinsh) and to a certain extent corres-
778 ponds to the devil, Ahriman, etc. of other peoples. "Spirit"
782 and "idol" are both called kegn, for the idols are not only
532 symbols, but at times also the dwellings of the spirits or kobolds. Usually they are kept in the storage huts and only hauled out on special occasions. If an idol is "heavy" it means that its inhabitant, the kobold, is at home, but when it gets "lighter" than usual, the spirit is roaming about somewhere. The offerings here also consist of millet, tobacco, etc.; very often the face of the idol is smeared with cranberry juice, which seems to have a powerful effect. Wood chips are also hung around its neck. The idols have different appearances. A guardian spirit, for example, [24] lives in a wooden cone that is placed somewhere in the vicinity of the yurt when it is built. If the yurt must be taken down, the idol remains, and at the new dwelling a new one is made. Some idols are crude imitations of humans, others have the shape of a bear and are sewed into bear skin, still others have the shape of a bird, etc. Some human-like idols represent children, others old people. Some have hands and feet, others only a head which sits on a body showing a navel. Small idols are sometimes worn as talismans. These also usually have human forms, but some look very
789 different. Thus the talisman against a difficult birth is a
● 844 figure carved of wood, representing a double acorn.

Besides the idols, there are some more or less strange-
778 looking objects not made by the Gilyak themselves, which
782 have a mysterious significance for them. Such an object
177 stands on the so-called Tyr (1) about 80 versts from

1. From the Gilyak village Tyr.

Nikolayevsk-na-Amure. On a high, precipitous river bank a Bhuddist temple formerly stood; of this only a few stone pillars remain, bearing Chinese and Mongolian inscriptions.

● 844 Pregnancy, Childbirth and Miscarriage among the
753 Inhabitants of Sakhalin Island (Gilyak and Ainu).
343 by Bronislaw Pilsudski

I. The Gilyak

The house of birth.

Among the Gilyak the act of birth is considered unclean and therefore is never allowed to take place in the yurt, their home. That is why not only in summer, but even in winter during the worst periods of frost and snowstorms, the woman in labor is led to a hut built especially for her near the home. The choice of the place makes it clear that the Gilyak feel no respect for the act of birth, for the hut mentioned above is built in the bushes which serve as a privy for the
562 women. The location of these bushes is always
841 definitely fixed, and no man would ever walk in that
753 direction. The boys are strictly forbidden to run or to look around there, and they are warned that they will contract a disease called taremynd if they step into a trace of women's blood. The disease begins with a paralysis of the hands and feet, the afflicted person loses the ability to move, loses weight and finally dies, for the disease is incurable.

844 As soon as the labor pains start the woman is
183 brought into the lan-raf or the "house of birth". This "house of birth" is erected hurriedly at the very last moment. Built of wooden boards roughly put together and covered with old bark from fir trees, it looks more like a dog house than like the room destined to welcome a new inhabitant of the world longingly expected by his parents. In the eyes of the Gilyak there is no conflict between the affection and love of the parents for the newly born child and the severe, if not cruel welcome, it is given. The child will go through a hard, more than Spartan education, and its life will be full of worries and hardships in a neither opulent nor gentle nature. This is why no Gilyak even comes to think that the first entrance into the world might be easier and more wholesome for the little guest if it took place in the presence of other people under other and better circumstances.

4 When the woman in labor goes to the place made
1 ready for her, she is clad in old soiled clothes. If the weather is cool she takes more clothes along. The only distinction in clothing worn during labor is that the woman in labor takes off the trousers, a garment that Gilyak women wear in summer and winter.

4 Usually an older woman who herself has gone
5 through several childbirths helps the woman in labor. If [757] such a midwife, called lanaven szauk, is not at hand the husband of the woman in labor can take her place; but under no circumstances may another male member of the family take this place, not even the younger brother of the husband, although, according to the customs of the Gilyak he has a right to the wife of his older brother and considers himself in a way her husband and certainly the second father of the child.

4 The Birth.

3 During the delivery the woman in labor sits and does not stretch her legs. The seat is erected at the same height as the bed in the yurt, that is about half a yard above the floor. During the whole period of delivery the woman in labor is supposed to keep quiet, not to strike out in pain, not to try to get up, not to lean over to one side or the other. If, during a hard delivery, the woman is not able to stay in the prescribed attitude by herself and starts writhing in pain, it is the duty of the midwife or husband to hold her up at her shoulders in order to prevent her from making the forbidden movements. The Gilyak believe that women who try to get up during the delivery contract a disease which causes a deformation of the spine. Once I was even shown a young woman who had become a cripple because she had not stayed quiet while in labor. Her spine was really deformed or, as the Gilyak say, broken (naski ts' onkrynd). She was not able to walk and died a few years later.

5 If the labor pains last too long and the woman suffers too badly, a piece of clothing is moved back and forth in front of her face and somebody blows down from above on the part in her hair.

844 The mother delivers the child herself, and only if the mother is entirely too weak does the midwife help at the delivery.

The Gilyak do not know how to give obstetric help to a woman in labor. If a woman is not able to deliver the child she dies, and, in this case, the child will perish too. But that happens very rarely. During a more than ten years' stay in the region of the river Tym I heard only once that a woman died during the delivery.

Among the Gilyak the first childbirth is considered to be the hardest. It is especially hard and painful for very young women who are not fully developed physically.

845 Girls are strictly forbidden to laugh when people
784 talk of delivery or confinement, and they are supposed to stay serious during the act of birth. If they fail to do so, in the future they will go through very hard deliveries and suffer exceedingly great labor pains.

844 In order to speed up the discharge of the placenta chiplings of a certain wood (sambucus racemosa) are put into the mouth of the woman in labor. The bitter disgusting taste of the wood causes vomiting which, according to the belief of the Gilyak, should accelerate the discharge of the placenta (ehlaud cuind, that is: the child's food). But, if the placenta nevertheless is not discharged after a while the woman dies. This [758] happens rarely but does occur once in a while among the Gilyak. The placenta is wrapped in a towel and hung up on a tree in the wood not far from the house.

845 If a child is born with a caul which, however,
777 happens very rarely, the caul is not thrown away but is carefully dried and kept with other household articles. For the Gilyak believe that this caul which in the language of their tribe, is called ehlan ok (the suit of the child) brings luck to the whole family.

844 The newly born child is not simply called a boy or
553 a girl. If a girl was born it is, for the time being, called mukin ehlan, that is: tailless child (mukind usually is the name for a dog with a very short tail). But if a boy was born his relatives say: moi ivend panend, that is: one who has a penis was born.

The mouth of the newly born child is cleaned of the mucus with the help of a finger, whereupon the child is given the mother's breast for nursing immediately. The next day the mother washes the child with cold water, but she does not pour it directly on the body of the child, but takes it into her mouth first and only then applies it to the child, which, of course, raises the temperature of the "bath". In this way the child is washed twice a day for two years.

If the newly born child has a defective limb nobody tries to mend the damage. It is also not a custom among the Gilyak to form the soft head of the baby.

It is recommended that young women walk around a great deal after they have given birth to a child, while sitting is recommended for older women. Women of all ages are advised to move around as much as possible before they give birth to a child.

Women are strictly forbidden to drink cold water during a period of ten days before and after the delivery. If there is no tea at hand the sick woman is given cooled boiled water if she is thirsty. During that period she is not allowed to eat red-meat-fish (salmon); salted food is forbidden as well as eating a black berry that grows in the tundra (empetrum nigrum). Taking hard liquor before giving birth to a child is considered harmful, but later on it is considered to be healthy. In general liquor is consumed very rarely, and the Gilyak on Sakhalin consume very little alcohol compared to other inhabitants of this island.

Miscarriages.

Natural miscarriages (ryrnnd) occur very frequently among the Gilyak; they are considered quite harmless and not even looked at as an illness. I was told that there was scarcely a woman who had not experienced one or two miscarriages in the course of her life. But not a single inhabitant with whom I discussed it knew of a woman who always miscarried and was not able to carry the fetus in her abdomen throughout the normal period of pregnancy. I do not intend to state the causes of the frequent miscarriages among the Gilyak for lack of sufficient [759] data. I will, therefore, leave the answer to this question to the

3 medical profession. It is possible that
belong to a race which is constitutionall
miscarriages. I believe, however, that
it is of great importance that the woma

General remarks.

Throughout this period of time the wo

"During parturition, whether in winter or summer, the unfortunate mother is ejected from her habitation--thrust out of doors, exposed to the inclemency of the weather, there to provide for herself as best she may, solitary and ignored, until a certain period shall have elapsed. During this time every possible assistance is denied her, it being considered almost criminal to lend her the slightest attention, and, as a natural consequence, death often ensues. Their dogs are much more tenderly cared for, they, at least, being allowed shelter."

845 DIFFICULT AND UNUSUAL BIRTHS--explanations of prolonged, difficult, and fatal deliveries; methods of dealing with abnormal presentations; obstetrical surgery (e.g., use of forceps, Caesarian section); beliefs and practices connected with unusual births (e.g., premature births, caul births); stillbirths (e.g., conceptualization, disposal of stillborn infant); delivery and treatment of deformed infants; notions about birthmarks; multiple births (e.g., conception of causation, reaction of the community, treatment of twins); special observances and ceremonial associated with unusual births and persons distinguished by unusual births; etc. See also:

Incidence of stillbirths and multiple births 163
Treatment of defectives 732
Surgery 752

/305 cont./

84 mother has her own fire. After childbirth a woman washes herself for three days and then moves to her yurt, but for seven days she sits apart and eats from a separate kettle. For ten days after childbirth, it is not permissible to drink cold water or to eat raw fish, but if twins were born, then it is permissible. When a child is born, they bring in two sticks, put them into his hands and lift
[755] him up. Similarly, sticks will be placed in the infant's hands when he falls ill, and he will be compelled to lift himself up (1).

[777] 1. On another page of the same notebook, we find the following notation: "These sticks kyz′ nyngydz′ (from kyz′ -- risk, luck, and nynydz: -- to seek)," which probably refers to the above-mentioned sticks.

● 845 /306/ If two children were born, they make two pairs of prung, two k:ong z′akh, two sticks made of rose-willow, cut as strips (pying z′akh), two small bows (pudz:) and arrows of a special shape (m′erlar), and attachments for the cradle -- pitus′. When they prepare food, these trees -- ola′ bituz′ -- must be fed (settlement of Kal'ma).

855 While a child is growing up, his umbilical cord -- kylmyr
789 is kept at home, and then he himself must carry it into the forest
[846] and hang it on a tree. O′ging chkhnaj is a figure that they make when a child is suddenly frightened during his sleep. The chkhnaj is the figure made when a person himself, without the shaman, does that which he dreams.

514 The child's excrement is poured out near a fir tree (both male and female); after being cut, hair is also thrown here (it is not permissible to cut the hair of twins). One must watch carefully to see that no female blood drops on the urine or the refuse,
[824] for then the child is lost. The child will die if the tree growing
[761] there is broken. This tree is called pila uigf, and the place is called ki markf -- literally -- "urine pouring out place."

/335 cont./

832 In Tenga a girl firmly refused to marry her bridegroom who had been engaged to her in her childhood, but when okht was made, she married him.

684 If one sleeps with another's wife by force, he is beaten for it and his dogs are taken away.

843 /336/ When a woman is pregnant, firewood must not be
847 cut on her footprints; she must not be struck in the face, even
[782] in jest. Chukh-chugynd (a sacrifice) must not be made in the langraf (a shed for childbirth), and as soon as the child is born, the woman returns to yer yurt. From the seventh month of pregnancy, the husband of a pregnant woman is not allowed to go hunting or to travel far to set up nooses, but he can go into the
846 langraf. Broth may not be brought from the yurt to the female parent, and when she returns from the langraf, she cannot eat food prepared on the common fire until the umbilical cord (kyr) of the baby falls away, and they make her a fire in the comer.
[782] When (the umbilical cord) falls away, then they feed the fire, chukhchugn-tugur, and have a feast. After that she stops being unclean -- akilaf pach:kyt -- and becomes sik urland pornyng -- clean, and her husband can cut firewood on her footprints. From the day of the birth of the child until the falling away of the umbilical cord -- kyr vakhind -- none of the people living in the yurt or even the guests spending the night may leave the house.

343 For a month before childbirth one must not bind anything
● 345 tightly or mend anything for another. With difficult births, one
789 must open up boxes, rip open patches, and unscrew the rifle.

A woman must not shriek during childbirth; otherwise she
844 will not deliver for a long time. If the stomach is pointed, pro-
843 truding, a boy will be born, if flat -- a girl. After four girls, a boy will unfailingly be born (1).

[846] [971] 1. Among the Orok a woman is in the balagan only during childbirth; then for ten days they cook for her on a separate fire; men do not eat (with her), fearing to lose their strength.

/336 cont./

854 [844] A newborn baby is washed with his mother's milk for 15 days and then with cold water from the mouth. For the first year the whole body is washed twice a day, and then only the face.

854 789 Protecting the child. A stick on which the cradle is hung -- ekhl-chugir:(?). Sometimes a Japanese saber in birch bark is used instead of a stick for frightening away evil spirits. If a child dies, they preserve everything, along with the amulets, for the next child, whom they again serve; if another child is not born, they preserve them until their old age.

845 784 If a child dies during childbirth, the woman must not ride along a stream or on the sea for a whole year; there would be no fish.

854 855 789 Chkhnaj -- weapons, a little ax, a knife, a bow and arrows, are hung over the child's bedding on both sides. Over the head of a little girl's bed is hung a piece of fish net. All this is hung up at the first sickness of the child.

842 /337/ If a woman does not have children, the wife of her husband's brother gives her her belt (chik) and, secretly -- a piece of her husband's belt.

553 Names. Names are given after the grandfather, but if there are too many grandsons, a new name is thought up. One must not take names from an alien khal; otherwise one must give the latter the names from his own.

845 [776] Twins. Twins -- tongch: -- ekhlang (tongch: means "twins" and the god who gives birth to twins). Tongch: may be from Pal-n'igyvyn, i.e., the master of the forest, and Tol-n'igyvyn -- the master of the sea.

845 782 When twins are born, chukh-chugynd must be arranged for Pal-n'ivukh: mos', saranka, puchka, rare fish, etc., in small quantities; they first set them in place and then eat them themselves.

The place where the chukh-chugynd is made is called chauf. If twins die young, then they make chkhnaj -- two or one depending on how many died. A little balagan is made under the chkhnaj. Chukh-chgynd is made here also before setting out on a journey or a hunt, and also upon one's return and when the children are ill.

/337 cont./

845 Gibel'ka's wife gave birth to twins; one of the twins was a bear.

532 [778] [782] A representation of twins -- tongch: -- is placed in a little storehouse. If one of the twins dies, they place one tongch:, while if both die, then two joined together on the sides. Chukh-chugynd is given to them at the full moon and at the new moon. Kinsmen and strangers sacrifice down to the third generation.

[795] [787] When a twin dies, he goes to his father, Pal-n'gyvyn, who gave birth to him, appearing to his mother in a dream.

766 A dead twin is not cremated, but is seated in Turkish fashion in a specially built little house, in which a wedge is driven to support him.

He is dressed in a white shirt and trousers and is surrounded with shavings -- inau. The mother of twins is likewise not cremated after death, but is dressed in white and buried, also with inau placed around. According to B. Pilsudski, the same is done with the father of twins.

778 224 164 782 The tongch: helps catch bears and in hunting in general. The tongch: is fed in case of sickness, especially tuberculosis (Slyavo).

Infanticide. Infanticide is committed sometimes in secret or

847 even upon the order of the father of the underage husband of a woman.

682 A woman who was accused by a shaman of poisoning a boy, the son of another woman, was beaten, and, after they cut off her braids, she was thrown into a funeral pyre.

753 776 Illness. Illness is sent either by Pal-n'igyvyn or by Tol-n'igyvyn, but each of them takes a milk not from his kingdom.

/338/ A milk can be of different shapes and often is red as blood and hard as stone, but when he enters a person, he becomes lively, "as if he were walking."

732 758 A violently insane person is imprisoned in a cage (in summer) and fed; he must not be killed.

753 Kkhmas'ind -- to be sick from not getting what one saw and wanted. Either the one who did the seeing or his family becomes sick. Then it is imperative to get at least a small crumb of what one saw and to touch it, and the person gets well.

844 291 When the woman in labor goes to the place made ready for her, she is clad in old soiled clothes. If the weather is cool she takes more clothes along. The only distinction in clothing worn during labor is that the woman in labor takes off the trousers, a garment that Gilyak women wear in summer and winter.

844 835 Usually an older woman who herself has gone through several childbirths helps the woman in labor. If [757] such a midwife, called lanaven szauk, is not at hand the husband of the woman in labor can take her place: but under no circumstances may another male member of the family take this place, not even the younger brother of the husband, although, according to the customs of the Gilyak he has a right to the wife of his older brother and considers himself in a way her husband and certainly the second father of the child.

844 The Birth.

753 During the delivery the woman in labor sits and does not stretch her legs. The seat is erected at the same height as the bed in the yurt, that is about half a yard above the floor. During the whole period of delivery the woman in labor is supposed to keep quiet, not to strike out in pain, not to try to get up, not to lean over to one side or the other. If, during a hard delivery, the woman is not able to stay in the prescribed attitude by herself and starts writhing in pain, it is the duty of the midwife or husband to hold her up at her shoulders in order to prevent her from making the forbidden movements. The Gilyak believe that women who try to get up during the delivery contract a disease which causes a deformation of the spine. Once I was even shown a young woman who had become a cripple because she had not stayed quiet while in labor. Her spine was really deformed or, as the Gilyak say, broken (naski ts' onkrynd). She was not able to walk and died a few years later.

845 If the labor pains last too long and the woman suffers too badly, a piece of clothing is moved back and forth in front of her face and somebody blows down from above on the part in her hair.

844 The mother delivers the child herself, and only if the mother is entirely too weak does the midwife help at the delivery.

The Gilyak do not know how to give obstetric help to a woman in labor. If a woman is not able to deliver the child she dies, and, in this case, the child will perish too. But that happens very rarely. During a more than ten years' stay in the region of the river Tym I heard only once that a woman died during the delivery.

Among the Gilyak the first childbirth is considered to be the hardest. It is especially hard and painful for very young women who are not fully developed physically.

845 784 Girls are strictly forbidden to laugh when people talk of delivery or confinement, and they are supposed to stay serious during the act of birth. If they fail to do so, in the future they will go through very hard deliveries and suffer exceedingly great labor pains.

844 In order to speed up the discharge of the placenta chiplings of a certain wood (sambucus racemosa) are put into the mouth of the woman in labor. The bitter disgusting taste of the wood causes vomiting which, according to the belief of the Gilyak, should accelerate the discharge of the placenta (ehlaud cuind, that is: the child's food). But, if the placenta nevertheless is not discharged after a while the woman dies. This [758] happens rarely but does occur once in a while among the Gilyak. The placenta is wrapped in a towel and hung up on a tree in the wood not far from the house.

845 777 If a child is born with a caul which, however, happens very rarely, the caul is not thrown away but is carefully dried and kept with other household articles. For the Gilyak believe that this caul which in the language of their tribe, is called ehlan ok (the suit of the child) brings luck to the whole family.

844 553 The newly born child is not simply called a boy or a girl. If a girl was born it is, for the time being, called mukin ehlan, that is: tailless child (mukind usually is the name for a dog with a very short tail). But if a boy was born his relatives say: moi ivend panend, that is: one who has a penis was born.

834 864 a way that every discussion of the fact is precluded. If the baby was born in the summer, the children ar told that it was taken from under the roots of a tree or trunk; if a baby was born in winter, one pretends have found it in the snow.

845 Twin births.

163 No tribe on Sakhalin Island has reported the birth of triplets to any woman at any time. That is why there are no legends about such an event either.

Not infrequently twin births take place among the natives. They contend that in each one of these case both children are of the same sex. I personally cam to know two living twins of the Gilyak tribe who were between forty and forty-five years old. In regions rather well known to me there occurred three twin births in a population of more than 300 persons within a decade, but all these twins died immediatel after birth. When I left in 1905 there were five mont old twins living in the family of a Gilyak friend of

845 539 mine. Only in a single old Gilyak song which I wrote down are twins of different sex mentioned. The

776 brother is in love with his sister and, in this song, asks her to take his heart into her hands, or else he will die.

The Gilyak are convinced that one of the twins is the son of the god of the woods and mountains, pal-ni-rookh (mountain man), a mighty deity now benevolent, now malevolent towards the poor, weak Gilyak. [761] (1) That is why the child of the pal-ni-

1. I was, however, given another explanation by a Gilyak: one of the twins is said to be an offspring of the mountains, the other one an offspring of the sea.

rookh, should be given back to his father right away But, not being certain which of the children is not a offspring of human beings one prefers to treat them both equally.

845 It is a custom among the majority of the Gilyak to

766 cremate dead bodies (2), but twins are not allowed t

2. In general, only those Gilyak tribes

be cremated after their death. If that were done all those present at the ceremony would be punished with the loss of their eyesight. Even the parents of twins have to be buried in the earth, because they too have become relatives of the god of the mountains. The children of twins, however, are considered to be ordinary members of the tribe, and at their funeral there is no deviation from the custom.

If twins stay alive and grow up they remain, for the rest of their lives, the object of awe for all their neighbors and friends although they may be enough proof that they lack every kind of supernatural power. At every meeting, either in friendship or in hostility, the others remind them of their unusual pregnancy and everybody attributes to them that mysterious innate power. Each of the twins bears the name he gave himself as a child. The custom of giving the child the name of a dead ancestor is not followed in the case of twins. The names of the twins are neither given to another child in the same family nor to another child in the tribe. Here too we see a deviation from the general custom of giving children the names of dead ancestors.

The greatest awe is felt for those twins who die in childhood. The offspring of the spirits of the mountains who, while living among ordinary human beings for a short time, who did not get used to them and did not feel he was one of them, has especially the power to do harm to people; that is why they are hard to win his favor. The family who had harbored the unwelcome offspring of the mountains constructs a little model of a Gilyak yurt and puts it either on a little board inside the house or outside in the open. A little figure carved in wood which represents the dead child is put into that little hut. The members of the family consider it necessary to give some of the food they eat themselves to that little figure every day. This rule is strictly followed not only by the parents of the twins but also by the two following generations. Only the great-grandchildren, observing ceremonial rites, carry the little figure with its

845 dwelling to the top of a near-by mountain; there, for
766 the last time, choice food is offered to the figure.
782 Next to the sacrificial objects a one to two meter long
775 stick carved in curly design is dug into the ground;
they call it nga. From this moment on the whole tribe
is safe [762] from being haunted by the dead child,
tonkr chlan, without further prayers or sacrifices.
753 If the relatives neglect to follow these rules, which
845 are designed to appease the awe-inspiring spirits of
776 the mountains and to win their favor, they evoke their
anger. Several diseases which attack the parents and
relatives of the twins are considered to be symptoms
of their revenge (tohr chlan). These usually are
certain diseases like deformation of the jaw-bone,
squint-eyes, stiffening of the neck or any kind of
convulsions. The appearance of such diseases is
considered to be a consequence of the mountain
spirit's displeasure. In such cases people say
"tonkr chlan singrund", that is "the twin child is
tormenting".

The Gilyak are so afraid of these dangers that
845 young women and girls are strictly forbidden to listen
777 to reports about such happenings; by these precautions,
they believe, they will be able to prevent the birth of
twins. Women are neither allowed to borrow house-
hold articles nor to accept gifts from friends who had
given birth to twins. In this case old objects are
considered to be the most dangerous ones. Hard
objects, however, especially tools made of metal, do
not transfer the bad luck of the former owner to the
new one.

842. It is altogether a trait characteristic of this northern
777 tribe that they always insist on the possibility of the
transference of physical peculiarities from one man
to another man by way of his tools. This gives us an
explanation for the superstitious remedies they use
for overcoming a woman's sterility. The woman who
cannot bear children must ask another very fertile
woman to lend her the waistband of her trousers and
she has to wear it up to the moment of the desired
success. A Gilyak told me that fertility can be
transferred from one person to another like a
contagious disease, for example by way of a vessel
which had been used by the sick person.

845 POTNATAL CARE.--care of postpartarient mother during period of recupera-
tion (e.g., rest, isolation, medication, sex and food taboos); duration of
taboo and its disposal; ... of child (e.g., ceremonial washing, ... gradual, after lapse of a specified time); puerperal rites; special care of
child between birth and beginning of ... ; circumcision and dis-
position of umbilical cord; treatment and disposition of mother's ... ; ...
special behavior of father (e.g., couvade); etc. See also:

Adoption . . . . . 837 Infant feeding 882

/305 cont./
84 mother has her own fire. After childbirth a woman washes herself
for three days and then moves to her yurt, but for seven days
she sits apart and eats from a separate kettle. For ten days after
childbirth, it is not permitted to drink cold water or to eat raw
fish, but if twins were born, then it is permissible. When a child
is born, they bring in two sticks, put them into his hands and lift
him up. Similarly, sticks will be placed in the infant's hands
[765] when he falls ill, and he will be compelled to lift himself up (1).

[790]

1. On another page of the same notebook,
we find the following notation: "These sticks
are: nyngyd (kyl) -- to sleep, lack,, and
nyngdz -- to seek)," which probably refers
to the above-mentioned stick.

845 /306/ If two children were born, they make two pairs of
[790] ... , two kong z'kkh, two sticks made of rose-willow, cut as
strips (pring z'kkh), two small bows (pudz) and arrows of a special
shape (mrlerlar), and attachments for the cradle -- pitur', when
they prepare bed, these trees -- olz' Nitur' -- must be fed
(settlement of Kal'nna).

While a child is growing up, his umbilical cord -- kylmyr
is kept at home, and then he himself must carry it into the forest
[846] (1) on a tree. [2] After childbirth it is necessary that they make
when a child is suddenly frightened during his sleep, ... shaman
is the figure made when a person himself, without the shaman,
510 does that which he dreams.

The child's excrement is poured out near a fir tree (both
/ male and female); after being cut, hair is also thrown here (it is
not permissible to cut the hair of twin). One must watch care-
fully to see that no female blood drops on the urine or the refuse,
[761] for then the child is lost. [3] The child will die if the tree growing
there is broken. This tree is called pila sigf, and the place
is called ki markf -- literally -- "urine pouring out place."

/305 cont./
832 In Tenga a girl firmly refused to marry her bridegroom
who had been engaged to her in her childhood, but when okht
was made, she married him.

684 If one sleeps with another's wife by force, he is beaten for
it and his dogs are taken away.

843 /307/ When a woman is pregnant, firewood must not be
845 cut on her footprints; she must not be struck in the face, even
[782] in jest. Chuhh-chugynd (a sacrifice) must not be made in the
langraf (a shed for childbirth), and as soon as the child is born,
the woman returns to yut yurt. From the seventh month of
pregnancy, the husband of a pregnant woman is not allowed to go
846 hunting or to travel far to set up nooses, but he can go into the
langraf. Broth may not be brought from the yurt to the female
parent, and when she returns from the langraf, she cannot eat
food prepared on the common fire until the umbilical cord (kyr)
of the baby falls away, and they make her a fire in the comer.
[782] When (the umbilical cord) falls away, then they feed the fire,
chuhh-chugyn-tugr, and have a feast. After that she stops being
unclean -- akilaf pach-kyr -- and becomes ek uilend ponying --
clean, and her husband can cut firewood on her footprints. From
the day of the birth of the child until the falling away of the
umbilical cord -- kyr vakhind -- none of the people living in the
843 yurt or even the guests spending the night may leave the house.

For a month before childbirth one must not bind anything
845 tightly or mend anything for another. With difficult births, one
[789] must open up boxes, rip open patches, and unscrew the rifle.

A woman must not shriek during childbirth, otherwise the
844 will not deliver for a long time. If the stomach is pointed, pro-
845 truding, a boy will be born, if flat -- a girl. After four girls,
a boy will unfailingly be born (1).

[846]
[791]

1. Among the Orok a woman is in the

erected for this purpose near the house, where a small fire can
844 also be kept going. Nevertheless, with the low winter tempera-
[120] tures and the severe snowstorms in the Gilyak country, this is still
[145] a health demand for mother and child, and I do not doubt that
the high mortality among Gilyak children and the generally
small population of the Gilyak are caused in large part by this
bad custom. I am unable to say what conceptions gave rise to it.
It is not likely, however, that it is based upon the supposition
846 that there is something inherently unclean about the woman during
delivery, for, as Dr. Seeland (2) and Deniker (3) note, the is

[113]

2. "Die Ghiliaken, eine ethnographische
Skizze /The Gilyak, an Ethnographic
Sketch/," (Russische Revue, edited by Carl
Röttger, Vol. XXI, St. Petersburg, 1882.

[113]

3. Cf. Dr. H. Flous, das Weib in der Natur- und Völkerkunde /Woman in Natural Science
and Ethnology/, 3d ed., edited and published
by Dr. Max Bartels, Leipzig, 1891, Vol. II,
p. 43.

subjected to no special purification after it, but, on the contrary,
after about 8-12 days may return to the house without further ado.
The first-named thinks rather that this /642/ custom may be
114 linked with the Gilyak belief that misfortune will befall a house
[76] if the child dies outside the house, and that it has to be torn
[143] down, for this reason they also have dying persons carried out of
the house and left to lie there until they are dead (1). It is

1. Dr. Seeland, op. cit., p. 223.

possible that they have such a notion, but it still has to be
substantiated that they actually tear down or at least abandon a
house in which someone has died, which still seems very doubtful,
particularly with respect to the large and complex Chinese

844 The mouth of the newly born child is cleaned of the
853 mucus with the help of a finger, whereupon the child
is given the mother's breast for nursing immediately.
The next day the mother washes the child with cold
water, but she does not pour it directly on the body
of the child, but takes it into her mouth first and only
then applies it to the child, which, of course, raises
the temperature of the "bath". In this way the child
is washed twice a day for two years.

856 If the newly born child has a defective limb nobody
tries to mend the damage. It is also not a custom
among the Gilyak to form the soft head of the child.
846 It is recommended that young women walk around a
844 great deal after they have given birth to a child, while
262 sitting is recommended for older women. Women of
273 all ages are advised to move around as much as
possible before they give birth to a child.
Women are actly forbidden to drink cold water
during a period of ten days before and after the
delivery. If there is no tea at hand the sick woman is
given cooled boiled water if she is thirsty. During
that period she is not allowed to eat red-meat-fish
(salmon); salted food is forbidden as well as eating
a black berry that grows in the tundra (rengetrum
nigrum). Drinking hard liquor before giving birth to a
child is considered harmful, but later on it is
considered to be healthy. In general liquor is
consumed very freely, and the Gilyak on Sakhalin
consume very little alcohol compared to other
inhabitants of this island.

843 Infanticide.

Natural miscarriages (ryrrnd) occur very frequently
among the Gilyak; they are considered quite harmless
and not even looked at as an illness. I was told that
there was scarcely a woman who had not experienced
one or two miscarriages in the course of her life. But
not a single inhabitant with whom I discussed it knew
of a woman who always miscarried and was not able
to carry the fetus in her abdomen throughout the
normal period of pregnancy. I do not intend to state
the causes of the frequent miscarriages among the
Gilyak for lack of sufficient [759] data. I will,
therefore, leave the answer to this question to the

843 medical profession. It is possible that the Gilyak
belong to a race which is constitutionally inclined to
miscarriages. I believe, however, that in this respect
it is of great importance that the woman is worn out
from perpetual heavy work and that there is a
complete lack of consideration for the pregnant
woman. Among the Gilyak the immense burden of
domestic work is at no time alleviated for the woman
during her pregnancy. No man deems it necessary to
protect his wife while she is carrying the baby to be
born. The eventual miscarriage he attributes without
compunction to the woman's lack of care. The Gilyak
believe, for instance, that a miscarriage takes place
if a child hits his pregnant mother's face with a strap
or a long wooden object, such as a spoon, an arrow,
a toy, a wooden knife or a fishing hook. Hitting a
pregnant woman with a twig or a little stick recently
cut off a tree or bush is considered harmless. A
violent blow or a fall can cause a miscarriage too.

844 Behavior of the husband.

The Gilyak have a strange way of expressing his
worries about his wife during her labor pains; he
unties everything that can possibly be untied. First
on himself: he undoes the braids in which his hair is
plaited and he unties his shoelaces and top sleeves.
Next, he unties or loosens whatever might, at that
time, be tied up in the house or in its neighborhood.
In the yard, he takes the axe out of the block; he
loosens the boat if it is tied to a tree; he takes the
cartridges out of the gun and the arrows out of the
cross-bow. An image of pity without a belt, he creeps
from one corner to another or he lies around
pondering what else he might unite or loosen some-
where, for he is convinced that the labor pains and
their duration depend upon whether he has overlooked
and missed loosening something.

846 Only after the navel of the child is healed is the
man allowed to start working or to go hunting, to
leave the house on business and visit his relatives or
friends. Neither at this period nor later on is the
birth of the child celebrated by a festivity in the
house or by a meal.

General remarks.

Throughout this period of time the woman who has

846 given birth to a child does not leave her place, the
hut; only during the most severe spells of frosty
weather is she allowed to go to the dwelling place, in
case she herself is the housewife. If she is not the
housewife she cannot expect to be taken into the house
846 by another woman. Mishaps occurring to weak women
776 in confinement who were left to themselves in the hut
are attributed to evil spirits. In order to keep these
spirits out of the "house of birth", in which one of the
most important and mysterious natural events takes
place, a large axe is placed at the entrance of the
hut designed to banish the evil spirits. But this
convenient and easy way of protection is not always
sufficient. I recall a Gilyak called Kan coming
hurriedly to me for help [760] because his wife, who
was completely cut off in the hut in the narrow and
disgusting hut, even to sewing and chopping wood,
is, inadvertently, hurt his newly born son's hand.
On another occasion, the hut in which the wife of a
Gilyak friend of mine was in confinement caught fire
when she had started a fire in order to warm her
chilled limbs. The fact that such mishaps do not occur
as frequently as one should expect is due to the
admirable strength of character and fortitude of the
Gilyak woman who, even worn out and sick, never
loses her presence of mind and her ability to work.
It is the might of her motherly love which, in such
moments, increases her will power and her fortitude
to a degree unknown and incomprehensible to men.
847 Unmarried Gilyak women, fearing the disgrace
163 which they would have to suffer, sometimes effect
artificial miscarriages; they use the same means
which are said to cause natural miscarriages. But
their skill in committing abortion is not great, for
there are many cases of infanticide.

Once in a while it happens that a Gilyak woman
gives birth to a dead child, but that happens so
infrequently that I could not be shown a single woman
to whom that had happened.

864 The Gilyak very much dislike talking about sexual
matters and about facts connected with them. That
is probably the reason why the appearance of a new
member of the family is explained to children in such

/34 cont./

835 The Gilyak youths were often perplexed about why I so
836 earnestly asked about these relations between wives and the
brothers of their husbands, strange to us and perfectly natural to
them. and asked in amazement: "Could it be that among you,
among the Russian. it is no so? You mean one could not live
with the wife of one's brother?" And upon receiving a negative
answer, they would dolefully shake their heads. saying "Well,
that is a very bad law!" And they would look with disbelief at
one another.

Human nature, of course. is the same everywhere; even
in primitive conditions it is natural for jealousy. with regard to groups of
permitted categories. jealousy never expresses itself in any kind
of acute measure of repression -- in extreme cases a jealous brother
will kill an intruder; it is more usual for another house to arise in the village.

Legitimate sexual intercourse naturally gave rise to a general light-minded attitude toward questions of chastity: it is, of
course, very difficult to find a man or a married woman that is retaining his reciprocal fidelity. Even the maidens do not especially
value chastity. and only considerations of an external nature force
them to be modest and to preserve the appearance of virginity. Playing a role here is the fear that the daughter will become in-
837 creasingly more and more unsuitable with regard to his property
status. and. besides. that the child born to her will be outside the
given clan and so will have to be killed.

Another more substantial reason, however. there is no moral
838 prohibition against the violation of chastity. And yet it is the
greatest injustice to say that among the Gilyak sexual looseness
prevails and sexual rotativity is absent. If by rotativity /33/ we
understand an obedience to certain rules generally accepted in a
given society. the Gilyak are distinguished by an ideal sexual
rotativity. for. with regard to persons who are outside of the group
sexual relationship. their chaste steadfastness is simply amazing.
The most frivolous Gilyak woman will never allow herself to have
intercourse with a relative of her husband if he is not of the
category of her go. even though the seducer is younger than her
husband and she likes him.

/199 cont./

There is no need for a man to abduct that which belongs
583 to him through a religious imperative, so powerfully active
584 in primitive society. Abduction can only arise under special
circumstances, when there are no women in the marriage
group, while other groups are obligated in turn to give their
women to definite groups. Individual cases of abduction
have led to the institution of mock abduction. For the side
which is giving its women in marriage in violation of the
prohibition, this is a means of deceiving the gods, the gods-
ancestors, to whom marriages with persons of alien blood are the gravest sin. By this means we explain the
wide distribution of this otherwise inexplicable institution
among primitive peoples. Only by this pious deception of the
gods can we explain those frightful rites which are
practiced in connection with mock abduction, although both
parties are joined in wedlock with the willing consent of the
mother of the bride and groom. It is sufficient to take the
example of the Kurnai tribe, among whom there exists the
institution of marriage, analogous to that of the
Gilyak. In this tribe, the kinsmen of the girl, fearing of
their own free will allowed the bride to run away with her
lover, that said to be pursued by him, and, when they have
caught her, they pierce her leg with a spear and beat her
half to death. And in many tribes even the abductor con-
sidered it his obligation to beat his beloved on his return
than her parents, desiring to show the gods-ancestors that
it was not at all love, the intention to marry, which
prompted him to abduct her.

An insufficiency of males or females can lead also to
another institution, likewise not uncommon among primitive
peoples in the course of a long time inevitably encounters a
time when it cannot do so. And so it has been with the
Gilyak. No matter how much the Gilyak prize the primordial
ideals of their forefathers, economic conditions force individual persons, individual families, and sometimes even a whole

/200 cont./

584 murdering the girls are possible. Such examples are well-
585 known among the Gilyak tribes, in spite of the fact that the
number of males is greater than the number of females.

10. Likewise, with this arrangement the institution of
586 bride price is impossible; instead of the bride price present
for the bride is not permitted; otherwise the obligation of
marriage would be merely fictitious. This is still to be seen
among the Gilyak today; no matter how avid the Gilyak may
be for bride price, it is not permitted in cases of marriage to
the sister of the groom's brother.

In order that such an essentially exogamous system might
be preserved and function in all its purity, a whole series of
favorable circumstances is necessary. First of all, a very
complex of favorable economic, social and sanitary conditions is required in order that, on the one hand, in propagating
themselves the number of marriages should not be so large
to maintain themselves on the common territory, and, on the
other hand, that the increase should exceed the losses of the
tribe in such a way that there is no cases of extinction of
entire clans constituting links in the phratry. Furthermore,
some degree of uniformity in the sanitary conditions is
necessary, so that the religious imperative of obligatory
marriages within the phratry may be preserved in all its rigor.
Finally, it is necessary that there be no extraordinary conditions under which, on the one hand, the social equality of the
members of the phratry would remain more or less the usual
phenomenon, and, on the other hand, there would be no influence of new economic conditions there should not be
engendered one or another temptation to make woman the
object of purchase and sale.

The preservation of all these conditions among primitive
peoples in the course of a long time inevitably encounters a
time when it cannot do so. And so it has been with the
Gilyak. No matter how much the Gilyak prize the primordial
ideals of their forefathers, economic conditions force individual persons, individual families, and sometimes even a whole

/336 cont./

The importance of the role of love in the life of the
Gilyak can be judged by the wealth of song material. Not
number of males is greater than the number of females.
every Gilyak can relate a story or poem, but everyone
knows love songs. Songs play a quite exceptional role in
Gilyak love. The song is the means of wooing. Lovers of their
antagonism lovers sing improvised songs to each other in
place of conversation, and, if they find it impossible to
meet, they send each other songs, composed ad hoc, through
a third person. Special terms have even been made up for
such songs.

An idea of the intensity of love among the Gilyak may
be gained from the reaction of lovers in cases where their
love encounters some obstacle. In such case the only
solution is suicide. Obstacles in the Gilyak environment
are of a twofold nature. Most frequently the obstacle is
presence of the parents, who have their own matrimony
motives or from an unwillingness to violate /555/ the child-
ren's agreement of betrothal, force a marriage, or when a
woman is violently carried away. In mild cases, lovers
frequently take place quite a long time after the involuntary
separation of the lovers, and, finding no other way to save
herself from the unloved man by flight and, in the event
of failure, ends with suicide. I remember one such charac-
teristic case. A girl from the village of Nivkhi was betrothed
given in marriage against her will. Soon she ran away from
her husband to her father, who handed her over to her father,
emigrant, who then taken a milk and second high born face,
tier first husband would not reconcile himself to this and
utilized a favorable moment to take her back by force.
Half a year the unhappy woman lasted herself.
There have been instances where a woman, fleeing from
her unloved husband, has slain the children that she had
by him, in order to defend their rights against the father.
Ordinarily they seek to carry the woman away by force with
the aid of clansmen, but they will not stop at slaying the
husband of their beloved. I noted one very outstanding

/337 cont./

Gibel'ka's wife gave birth to twins; one of the twins was
a bear.

A representation of twins -- tongchi -- is placed in a little
storehouse. If one of the twins dies, they place one tongchi, while
if both die, then two joined together on the sides. Chaka-chogyne
gives to them at the full moon and at the new moon. Kinsmen
and strangers sacrifice down to the third generation.

When a twin dies, he goes to his father, Pal'-g'gyrn, who
gave birth to him, appearing to his mother in a dream.

A dead twin is not cremated, but is seated in Turkish fashion
in a specially built little house, in which a wedge is driven to
support him.

He is dressed in a white shirt and trousers and is surrounded
with shavings. The mother of the twin is considered as if she has
married after death, but is dressed in white and buried, also with
insap placed around. According to B. Pilsudski, the same is done
with the dead twin.

The tongchi helps catch bears and in hunting in general.
The tongchi: is fed in case of sickness, especially tuberculosis
(khayvyn).

Infanticide. Infanticide is committed sometimes in secret or
even upon the order of the father of the underage husband of a
girl.

A woman who was accused by a shaman of poisoning a boy,
a member of another woman, was beaten, and after they cut off
given in marriage against her will. Soon she ran away from
her husband to her father, who handed her over to her father,
emigrant, who then taken a milk and second high born face,
tier first husband would not reconcile himself to this and
utilized a favorable moment to take her back by force.
Half a year the unhappy woman lasted herself.
There have been instances where a woman, fleeing from
her unloved husband, has slain the children that she had
by him, in order to defend their rights against the father.
Ordinarily they seek to carry the woman away by force with

/338 cont./

569 shocking scenes. Violations of chastity, particularly among
570 married women, are, of course, not impossible, but are
571 more severely punished by the parents of the girl who has
572 been seduced and has given birth to a child. According to
573 the Gilyak, in case the girl's mother remains at
574 corporal punishment to her daughter, while the father tries
575 to eliminate the scandal by killing the newborn child and
576 throwing it into the sea. This is always done if the child
577 is a girl, whereas a boy is shown mercy in certain circum-
578 stances, and the girl's chances suffer less in this case.

579 Children are sold by purchase, and in part because
580 of this, as is clear from what has been said, the marriages
581 of the Gilyak usually take a happy or at least a satisfactory
582 character. Sometimes, however, the husband, as the Gilyak
583 jealously guards the fidelity of his wife, especially while
584 she is young, and the latter is on her guard against giving
585 her husband cause for mistrust and suspicion and arousing his
586 anger. One very salutary influence checking and curbing
587 the passions on both sides is the circumstance that the husband,
588 if he cam out his wife for any reason and returns her to her
589 parents does not by any means thereby gain any right to a re-
590 fund of the money he paid for her, and that, on the other hand,
591 he may claim such a refund if the wife leaves him on her
592 own accord. In this case she may by no means count on a
593 friendly reception by her parents. Therefore, simply for

/338 cont./

594 this is another reason why their possession seems so enviable to
595 the Gilyak, and their purchase price is so high among them. A
596 Gilyak, by the way, also asked how much I paid for my wife. He
597 will never fail to count in his female slave, and all the more
598 because he has paid more for her than for his wife or any of his
599 wives and has the same relations with her as with his wives. This is
600 easily lead to mistaken ideas about the extent of polygamy
601 among them, and therefore the further questions, how many of
602 the wives are his much (wives) or ohanai-munch-wyn (lawful women or wives) and how many are merely hryghyn-umgo
603 (female slaves) are always necessary in order to obtain a proper
604 understanding of his marital situation.

As severely as the practice of sexual intercourse with a
605 female slave is condemned by the Gilyak, the fact that a man
606 not always observed, especially by the younger and unmarried
607 men. If a female slave gives birth to a child, a Gilyak will
608 not suffer any inconvenience from the fact of his child, and
609 nobody, of course, will believe the words of the slave. The
610 child, then, is regarded as belonging to the tribe of the mother
611 and likewise, as hryghyn, becomes the property of her owner,
612 who let it grow up with the mother and, when it has grown up,
613 sold it to another. If the child is a girl, then, as much ever case
614 happens, that a Gilyak girl has intercourse with a slave and
615 brings a child into the world, the father is ignored, but the
616 mother, who is usually offered, as a daughter-in-law, to him
617 and done away with. On the other hand, the Gilyak not un-
618 happily permits a marriage between his male and female
619 hryghyn, if he has a female slave, he will, of course, probably
620 also buy a male slave and have them marry, since any children
621 they might have will be his hryghyn and, as such, can be
622 turned to good account. Then, the Gilyak has nothing against
623 assimilation with the neighboring peoples through mixed
624 marriages, but his national pride decidedly objects to such
625 mixing with the aborigines, and he considers the offspring
626 of such from his own caste, and, on the other hand, strongly
627 supported by covetousness, enjoys the possession and exploitation
628 of slaves from the neighboring tribes.

846 given birth to a child does not leave her place, the
hut; only during the most severe spells of frosty
weather is she allowed to go to the dwelling place, in
case she herself is the housewife. If she is not the
housewife she cannot expect to be taken into the house
846 by another woman. Mishaps occurring to weak women
776 in confinement who were left to themselves in the hut
are attributed to evil spirits. In order to keep these
spirits out of the "house of birth", in which one of the
most important and mysterious natural events takes
place, a large axe is placed at the entrance of the
hut designed to banish the evil spirits. But this
convenient and easy way of protection is not always
sufficient. I recall a Gilyak called Kan coming
hurriedly to me for help [760] because his wife, who
was compelled to do all the work in the narrow and
disgusting hut, even to sewing and chopping wood,
had, inadvertently, hurt his newly born son's head.
On another occasion, the hut in which the wife of a
Gilyak friend of mine was in confinement caught fire
when she had started a fire in order to warm her

/34 cont./

835 829 The Gilyak youths were often perplexed about why I so earnestly asked about these relations between wives and the brothers of their husbands, strange to us and perfectly natural to them, and asked in amazement: "Could it be that among you, among the Russians, it is no so? You mean one could not live with the wife of one's brother?" And upon receiving a negative answer, they would dolefully shake their heads, saying: "Well, that is a very bad law!" And they would look with disbelief at one another.

835 152 Human nature, of course, is the same everywhere; even the Gilyak has attacks of jealousy, but, with regard to persons of permitted categories, jealousy never expresses itself in any kind of acute measure of repression -- in extreme cases a jealous brother will insist that his rival move to another house or to another village.

83 Legitimate sexual intercourse naturally gave rise to a general light-minded attitude toward questions of chastity; it is, of course, very difficult to find a man or a married woman not violating his reciprocal fidelity. Even the maidens do not expecially value chastity, and only considerations of an external nature force parents to look askance at the frivolous behavior of their daughters. [848] [847] Playing a role here is the fear that the daughter will become involved with a man who is unsuitable with regard to his property status, and, besides, that the child born to her will be outside the given clan and so will have to be killed.

83 577 Apart from these considerations, however, there is no moral prohibition against the violation of chastity. And yet it is the greatest injustice to say that among the Gilyak sexual looseness prevails and sexual morality is absent. If by morality /35/ we understand an obedience to certain rules generally accepted in a given society, the Gilyak are distinguished by an ideal sexual morality, for, with regard to persons who are outside of the group sexual relationship, their chaste steadfastness is simply amazing. The most frivolous Gilyak woman will never allow herself to have intercourse with a clansman of her husband if he is not of the category of her pu, even though the seducer is younger than her husband and she likes him.

/84 cont./

*614 587 768 his death as well. One of his brothers, according to the of the clan, will replace him in the rights and obligatio husband and father, and even where the deceased has no brothers, the supporter of his family will be one of the " Such is the immutable law of the clan.

*614 848 Such are the advantages which the clan union offe virtue of the single principle of kinship and the marriage norms which directly issue from it. It is completely nat that these blessings can be enjoyed only by those who ha right to them by virtue of kinship. The fact of being bo a clansman is the only justus /85/ titulus to being counte the clan. Ytk-khavrnd -- a man without a father, i.e., out of wedlock, not knowing who his father is -- is a ma without a clan, a pariah, a burden to himself and others. who does not know the identity of his father and conseque does not know to which clan he belongs, therefore does n know which women can be his wives and which are forbi and, unbeknownst to himself and others, may violate the sexual norms, incurring incalculable disasters upon all. nately, there are in fact no persons who do not know thei fathers. If a girl becomes pregnant out of wedlock, they pel her to name the father of the future child. Having le who he is, they compel him to marry the seduced girl, w he is only too glad to do, because in such a situation the fewer difficulties about paying the bride price. In the ev of disavowal on the girl's part, they slay the newborn chi and the clan is saved from sin and unhappiness.

*614 597 The Gilyak clan, however, did not succeed in reta the principle of kinship inviolate and in perfect purity. the clan unions of all other peoples, it had to make a de and reconcile itself with the institution of adoption, with acceptance into its bosom from time to time of individua from other clans.

/171 cont./

835 same words with which authors describe the relations between "kumi" and "kroki" in Australia: throughout the whole extent of his territory, wherever the Gilyak finds his an'g:ej, there he also finds a conjugal bed. For this, it is only necessary that the Gilyak remember the kinship terms. I had many chances to convince myself of this during the time of my travels on Sakhalin. Again and again I appeared with my Gilyak companions in settlements where neither they nor their fathers had ever been before. Nevertheless, after the exchange of a few sentences the bonds of kinship were revealed, and from their first encounter pu and an'g:ej who were formerly unknown to each other engaged in mimic negotiations about a fleeting conjugality.

835 836 848 Among the categories of women with whom the Gilyak has a legitimate opportunity for sexual intercourse, it is necessary to distinguish the unmarried from the married. Maidens, even among the Gilyak, are more restricted in their sexual relations than the married women. The prospect of pregnancy [614] and bearing children does not appeal to the Gilyak maiden; [851] the birth of a child by an unknown father, according to the clan views of the Gilyak, is a dangerous business solely from the fact that the sexual, marital, and clan rights, and even more the religious rights, determined by the father are completely uncertain, and this can lead to violations of taboos, which the Gilyak fears most of all. Therefore, a pregnant maiden is subjected to severe reproaches on the part of her father, who demands either that she name the seducer, or the destruction of the fetus, or the killing of the newborn infant. However hard the moral position of individual women is in such cases, in practice the business /172/ is much simpler. In the first place, many women, as we have seen, are married from childhood on, and the others never sit for very long; there are so few women that every girl is already married by the 835 time seductions become dangerous for them. Finally, those 836 who are not married and freely indulge in sexual intercourse with men extremely rarely have an affair with just their

/183 cont./

831 group sexual cohabitation is legitimately practiced on a large
831 scale. When reproaches were sometimes directed by older
861 persons at younger ones for sexual excesses, it was only on account of economic considerations, since sexual diversions
831 frequently distract youths from work at home. Reproaches were
*835 also directed at pregnant maidens, but here the considerations
● 848 were of a special nature, about which we spoke above: 1) the danger of a connection with persons of the forbidden categories, and principally, 2) the anonymity of the father of the
831 child. But ordinarily the adventures of the youth are no
574 secret and do not give rise to reproach. It is a perfectly
883 ordinary phenomenon for young men to set out for a visit of several months' duration to the settlements of their "fathers-in-law," where there are so many an'g:ej maidens at their disposal, and the older generation not only does not oppose this, but is very happy about it. As we have already said, an unmarried ymg:i (son-in-law /zyat'/) is a most desirable guest in the house. "One is obliged to feed an "ymg:i" (son-in-
831 law)" (see p. 249). Women and even maidens yield little to
562 the men in laxness of attitude toward what we call sexual
834 morals. It is only necessary for them to be more careful
*[835] (especially when the matter concerns persons who are not of the class pu), and for this reason they always affect an appearance of the sternest inaccessibility, but in reality they are
831 just as loose as the men. And yet, in view of all this, to say
834 that the Gilyak is devoid of a feeling of sexual morals would be the greatest injustice. Actually the Gilyak give free rein to their instincts only within socially permitted limits. And, on the other hand, what the norms do not allow, for example, reactions of jealousy with respect to one's tuvn, and especially sexual intercourse with persons of forbidden categories, is observed with a very great rigorousness completely unknown to us, and this notwithstanding the fact that the prohibitions on sexual intercourse often have in their favor neither physiological, nor psychic, nor any other kind of reasonable basis, such as, for example, the prohibitions between the
ooo most distant agnate male and female cousins. During

/638 cont./

834 The moral austerity of the Gilyak also appears in the
577 altogether decent behavior of the two sexes toward each other and in the modesty of their women and girls. One living with them in their houses never sees indecent physical exposure, such as occurs so frequently among the Ainu (2), or any other

[113] 2. N. Busse, Ostr. Sakhalin" i Eksped. 1853-54 gg. /Sakhalin Island and the Expedition of 1853-54/, St. Petersb., 1872, pp. 55, 56, 70.

577 shocking scenes. Violations of chastity, particularly among
836 unmarried persons, are, of course, not impossible, but are
848 most severely censured by the parents of the girl who has
847 been seduced and has given birth to a child. According to the Gilyak, in such a case the girl's mother metes out corporal punishment to her daughter, while the father tries to eliminate the scandal by killing the newborn child and
[562] secretly doing away with it. This is always done if the child is a girl, whereas a boy is shown mercy in certain circumstances, and the girl's chances suffer less in this case.

837 Although contracted by purchase, and in part because
593 of this, as is clear from what has been said, the marriages
[581] of the Gilyak usually take a happy or at least a satisfactory course. Marital fidelity is strictly observed. The husband jealously guards the fidelity of his wife, especially while she is young, and the latter is on her guard against giving her husband cause for mistrust and suspicion and arousing his
586 anger. One very salutary influence checking and curbing the passions on both sides is the circumstance that the husband, if he casts out his wife for any reason and returns her to her parents does not by any means thereby gain any right to a refund of the articles paid for her, and that, on the other hand, he may claim such a refund if the wife leaves him on her own accord. In this case she may by no means count on a friendly reception by her parents. Therefore, simply for

/648 cont./

569 this is another reason why their possession seems so enviable to
the Gilyak, and their purchase price is so high among them. A
569 Gilyak, by the way, when asked how many wives (umgu) he has,
595 will never fail to count in his female slave, and all the more
192 because he has paid more for her than for his wife or any of his
wives and she also contributes more to his prestige. This can
easily lead to mistaken ideas about the extent of polygamy
among them, and therefore the further questions, how many of
the women are his wanch (wives) or dshangi-mutsch-umgu (law-
ful women or wives) and how many are merely kryghryys-umgu
(female slaves), are always necessary in order to obtain a proper
understanding of his marital situation.

569 As severely as the practice of sexual intercourse with a
[836] female slave is condemned by the Gilyak, nevertheless this is
not always observed, especially by the younger and unmarried
men. If a female slave gives birth to a child, a Gilyak will
(851) never under any circumstances admit that he is the father, and
nobody, of course, will believe the words of the slave. The
child, then, is regarded as belonging to the tribe of the mother
and likewise, as kryghryys, becomes the property of her owner,
who lets it grow up with the mother and, when it has grown up,
sells it as kryghryys. If, on the other hand, the much rarer case
• [848] happens, that a Gilyak girl has intercourse with a slave and
[849] brings a child into the world, the father is ignored, but the
mother is punished, and the child, as illegitimate, is killed
and done away with. On the other hand, the Gilyak not un-
happily permits a marriage between his male and female
kryghryys; in fact, if he has a female slave, he will probably
also buy a male slave and have them marry, since any children
they might have will be his kryghryys and, as such, can be
[563] turned to good account. Thus, the Gilyak has nothing against
assimilation with the neighboring peoples through mixed
marriages, but his national pride decidedly objects to such
mixing with slaves coming from these peoples and the creation
of such from his own ranks, and, on the other hand, strongly
supported by covetousness, enjoys the possession and exploitation
of slaves from the neighboring tribes.

851

851 SOCIAL PLACEMENT--assignment of infant to a male parent (e.g., under polygamy), in case of a posthumous child; Public announcement of birth, formal acceptance of infant into a social group (e.g., by family head or chief); alignment with the supernatural (e.g., baptism), changes in marital status and social relationship wrought by birth of a child, etc. See also:

/31 cont./

601 periods in the evolution of marriage. and, although they could
191 have influenced one another. they basically belong. speaking in
174 the language of geology. to different formations. It is sufficient
595 to say that among the Tungus tribes sexual intercourse with wives of
835 individuals of ascending generations is allowed, for example, with
the wife of the father's younger brother. while among the Gilyak
this is regarded as incest.

595 At first sight the Gilyak institution of marriage does not
587 seem to be anything special. A Gilyak will generally buy one or
583 rarely two or three wives. who come over into his clan and are re-
garded before the world as his personal wives and the mothers of
• 851 his children. The children belong exclusively to the father and
611 succeed him after his death. When a Gilyak becomes a father. he
551 is no longer called by his former name. but is called the father
681 of the born child. The exclusive possession of his wives expresses
614 itself in the stern custom of blood vengeance against the disturber
586 of marital harmony. The clan is based on the principle of agna-
tion. and marriage is exogamous.

593 One can travel over the entire territory of the Gilyak. live
620 in their yurts. and observe their family life for a long time. and
592 not notice anything peculiar in the structure of their family. In
558 large winter yurts the inhabitants occupy their plank beds by
families. each living in relation to its own particular interests.
Complete harmony and tender relations prevail among husband.
(*65) wife. and their children. That is not all. One may frequently
encounter instances of striking loyalty and love between spouses.
When one of them dies. the other frequently lays hands on himself
or dies from grief. In a word. to all appearances we are dealing
with the type of family which is generally called patriarchal.
Actually. however. it is not. First of all. one is struck by the
strange kinship nomenclature. A whole group of women call a
whole group of men their husbands (pu, ivn), and the latter call
them their wives (an'gej). Likewise. a whole group of men call
[114] a group of women their mothers (ymk) and a group of men their
fathers (ytk). and these call the former their children.

/130 cont./

58 agnates, the father or her brothers; she makes her permanent
[891] residence in his home, follows him in his journeyings and emi-
grations, and before all the world is considered the personal
wife of the Gilyak who purchased her and the mother of his
59 children. The children belong exclusively to the father and
• [851] succeed him after his death. After the birth of the first child,
561 husband and wife cease to call themselves by their former
563 names and begin to be called by the name of the newborn
("the father of so-and-so, the mother of so-and-so" —
[684] teknonymy). The exclusive rights of the husband to his wives
apparently are sanctioned by the right of retribution, even
bloody retribution, upon the infringer on his conjugal rights.
[614] The clan is based on the principle of agnation, exogamous
marriage. One can travel over the whole territory of the
Gilyak, live in their yurts, long observe their family life,
and note nothing extraordinary. In the large winter yurts, the
inhabitants occupy their places by families, each living with
regard to its own particular interests. Between husband and
wife or wives and their children, harmony and tender /131/
relations prevail. Cases of a striking attachment between
spouses are not infrequent; when one of them dies, the other
sometimes lays hands on himself or dies of grief.

*601 In a word, to all appearances we are dealing here with a
121 type of individual family which is generally accepted as being
125 patriarchal and in any case not polyandrous. Such were my
[591] own personal impressions at first. But my first inquiries in the
realm of kinship nomenclature awoke serious doubts in me,
and I therefore determined first of all to make a detailed study
of this aspect of their relations. The study of the kinship
nomenclature, it appeared to me, could be most successfully
accomplished by a systematic census of the population. With
[114] this objective, I undertook during the winter of 1891 my first
census of the Gilyak villages on the western shore of northern
Sakhalin, and as a result I discovered their complex classificatory
system of kinship and their peculiar form of group marriage (1).

[113] 1. At the time the account of this was

1: Shternberg:--256 E-5 (1890-1897, 1910)1933 RX2 Gilyak RX2

/171 cont./

* 835 same words with which authors describe the relations between
"kumi" and "kroki" in Australia; throughout the whole extent
of his territory, wherever the Gilyak finds his an'gej, there he
also finds a conjugal bed. For this, it is only necessary that
the Gilyak remember the kinship terms. I had many chances
to convince myself of this during the time of my travels on
Sakhalin. Again and again I appeared with my Gilyak com-
panions in settlements where neither they nor their fathers had
ever been before. Nevertheless, after the exchange of a few
sentences the bonds of kinship were revealed, and from their
first encounter pu and an'gej who were formerly unknown to
each other engaged in mimic negotiations about a fleeting
conjugality.

Among the categories of women with whom the Gilyak
* 835 has a legitimate opportunity for sexual intercourse, it is neces-
837 sary to distinguish the unmarried from the married. Maidens,
848 even among the Gilyak, are more restricted in their sexual re-
lations than the married women. The prospect of pregnancy
[614] and bearing children does not appeal to the Gilyak maiden;
• [851] the birth of a child by an unknown father, according to the clan
views of the Gilyak, is a dangerous business solely from the
fact that the sexual, marital, and clan rights, and even more
the religious rights, determined by the father are completely
uncertain, and this can lead to violations of taboos, which
the Gilyak fears most of all. Therefore, a pregnant maiden
is subjected to severe reproaches on the part of her father,
who demands either that she name the seducer, or the destruc-
tion of the fetus, or the killing of the newborn infant. How-
ever hard the moral detention of individual women is in such
cases, in practice the business /172/ is much simpler. In the
first place, many women, as we have seen, are married from
childhood on, and the others never sit for very long; there
are so few women that every girl is already married by the
* 835 time seducters become dangerous for them. Finally, those
836 who are not married and freely indulge in sexual intercourse
with men extremely rarely have an affair with just their

/648 cont./

569 this is another reason why their possession seems so enviable to
the Gilyak, and their purchase price is so high among them. A
569 Gilyak, by the way, when asked how many wives (umgu) he has,
595 will never fail to count in his female slave, and all the more
192 because he has paid more for her than for his wife or any of his
wives and she also contributes more to his prestige. This can
easily lead to mistaken ideas about the extent of polygamy
among them, and therefore the further questions, how many of
the women are his wanch (wives) or dshangi-mutsch-umgu (law-
ful women or wives) and how many are merely kryghryys-umgu
(female slaves), are always necessary in order to obtain a proper
understanding of his marital situation.

569 As severely as the practice of sexual intercourse with a
[836] female slave is condemned by the Gilyak, nevertheless this is
not always observed, especially by the younger and unmarried
men. If a female slave gives birth to a child, a Gilyak will
• (851) never under any circumstances admit that he is the father, and
nobody, of course, will believe the words of the slave. The
child, then, is regarded as belonging to the tribe of the mother
and likewise, as kryghryys, becomes the property of her owner,
who lets it grow up with the mother and, when it has grown up,
sells it as kryghryys. If, on the other hand, the much rarer case
• [848] happens, that a Gilyak girl has intercourse with a slave and
[849] brings a child into the world, the father is ignored, but the
mother is punished, and the child, as illegitimate, is killed
and done away with. On the other hand, the Gilyak not un-
happily permits a marriage between his male and female
kryghryys; in fact, if he has a female slave, he will probably
also buy a male slave and have them marry, since any children
they might have will be his kryghryys and, as such, can be
[563] turned to good account. Thus, the Gilyak has nothing against
assimilation with the neighboring peoples through mixed
marriages, but his national pride decidedly objects to such
mixing with slaves coming from these peoples and the creation
of such from his own ranks, and, on the other hand, strongly
supported by covetousness, enjoys the possession and exploitation
of slaves from the neighboring tribes.

/942 cont./

552 Immediately, or at least very soon after its birth, the child
• 852 is given a name, usually toward evening of the same day or in the morning of the following day, depending on whether it was born in the daytime or during the night. This takes place without any ceremony; the father simply names the name desired by him or the mother, or /943/ a Gilyak who happens to be present may propose a name, and the father approves it and adopts it for his child. It must be expressly stressed that no shamanistic arts are
[850] practiced either in connection with the birth or the name-giving. In most cases the birth of a child is not the occasion for a special
[852] celebration. Well-to-do people, however, occasionally express their joy over the family increase by a feasts which they share with a few villages and friends.

When the child has grown a bit, it is placed in a cradle
851 (Gilyak uchjakk). This has a very peculiar nature: it consists of
[192] a canoe-shaped or fluted, hollowed-out piece of wood of such a
[850] length and width that the upper body of the child, up to its head, can be fitted into it comfortably. While its upper end, usually pointed, remains open, the lower end is closed with a crossboard which is provided with several grooves emptying into a central hole. The child, wrapped in blankets except for its naked buttocks, is set on this board so that the upper body rests in the hollow, whereupon a couple of straps are drawn from one edge of it to the other to prevent the child from falling out. A small basket half filled with moss or fine wood-shavings is fastened below the opening in the little seat-board, and then the cradle is hung on a crossbeam of the house, above the sleeping bench (cf. Pl.XII /see p. 992/). But in order to prevent the latter from being soiled by excrement that might seep through the basket, a longish board (Gilyak mu, Pl. XXXIV, Fig. 9 /see p. 1014/), provided with raised rims and several grooves lengthwise and crosswise, is put on it below the cradle. The long straps by which the cradle is suspended are so skillfully drawn and lashed that the latter can be put in a higher or lower, vertical, oblique, or horizontal position as desired. To quiet or to amuse the child, a bundle of various small objects (wood or metal) is hung on the back of the cradle and,

844 The mouth of the newly born child is cleaned of the
• 853 mucus with the help of a finger, whereupon the child is given the mother's breast for nursing immediately. The next day the mother washes the child with cold water, but she does not pour it directly on the body of the child, but takes it into her mouth first and only then applies it to the child, which, of course, raises the temperature of the "bath". In this way the child is washed twice a day for two years.

856 If the newly born child has a defective limb nobody tries to mend the damage. It is also not a custom among the Gilyak to form the soft head of the baby.

846 It is recommended that young women walk around a
844 great deal after they have given birth to a child, while
262 sitting is recommended for older women. Women of
273 all ages are advised to move around as much as possible before they give birth to a child.

Women are strictly forbidden to drink cold water during a period of ten days before and after the delivery. If there is no tea at hand the sick woman is given cooled boiled water if she is thirsty. During that period she is not allowed to eat red-meat-fish (salmon); salted food is forbidden as well as eating a black berry that grows in the tundra (empetrum nigrum). Taking hard liquor before giving birth to a child is considered harmful, but later on it is considered to be healthy. In general liquor is consumed very rarely, and the Gilyak on Sakhalin consume very little alcohol compared to other inhabitants of this island.

843 Miscarriages.

Natural miscarriages (ryrnnd) occur very frequently among the Gilyak; they are considered quite harmless and not even looked at as an illness. I was told that there was scarcely a woman who had not experienced one or two miscarriages in the course of her life. But not a single inhabitant with whom I discussed it knew of a woman who always miscarried and was not able to carry the fetus in her abdomen throughout the normal period of pregnancy. I do not intend to state the causes of the frequent miscarriages among the Gilyak for lack of sufficient [759] data. I will, therefore, leave the answer to this question to the

/336 cont./

A newborn baby is washed with his mother's milk for 15 days
• 854 (847) and then with cold water from the mouth. For the first year the whole body is washed twice a day, and then only the face.

854 Protecting the child. A stick on which the cradle is hung --
[789] chhl-chugirr(?). Sometimes a Japanese saber in birch bark is used instead of a stick for frightening away evil spirits. If a child dies, they preserve everything, along with the amulets, for the next child, whom they again serve; if another child is not born, they preserve them until their old age.

845 If a child dies during childbirth, the woman must not ride
[784] along a stream or on the sea for a whole year; there would be no fish. Chhhnaj -- weapons, a little ax, a knife, a bow and arrows,
854 are hung over the child's bedding on both sides. Over the head of
[785] a little girl's bed is hung a piece of fish net. All this is hung up
[787] at the first sickness of the child.

842 /337/ If a woman does not have children, the wife of her husband's brother gives her her belt (chik) and, secretly -- a piece of her husband's belt.

553 Names. Names are given after the grandfather, but if there are too many grandsons, a new name is thought up. One must not take names from an alien khal; otherwise one must give the latter the names from his own.

845 Twins. Twins -- tongch: -- ekhlaag (tongch: means "twins" and
[876] the god who gives birth to twins). Tongch: may be from Pal-n'igvyn, i.e., the master of the forest, and Tol-n'igvyn -- the master of the sea.

845 When twins are born, chukh-chugynd must be arranged for
[882] Pal-n'ivukh; mos', saranka, puchka, rare fish, etc., in small quantities; they first set them in place and then eat them themselves.

The place where the chukh-chugynd is made is called chauf. If twins die young, then they make chhhnaj -- two or one depending on how many died. A little balagan it made under the chhhnaj. Chukh-chgynd is made here also before setting out on a journey or a hunt, and also upon one's return and when the children are ill.

A small basket ha filled with moss or fine wood-shavings is fastened below the opening in the little seat-board, and then the cradle is hung on a crossbeam of the house, above the sleeping bench (cf. Pl.XII p. 992/). But in order to prevent the latter from being soiled excrement that might seep through the basket, a longish board (Gilyak mu, Pl. XXXIV, Fig. 9 /see p. 1014/), provided with raised rims and several grooves lengthwise and crosswise, is put on it below the cradle. The long straps by which the cradle is suspended are so skillfully drawn and lashed that the latter can put in a higher or lower, vertical, oblique, or horizontal positi as desired. To quiet or to amuse the child, a bundle of variou small objects (wood or metal) is hung on the back of the cradle

/643 cont./

when swung, strike one another and the cradle producing noise and a clanking sound. The same purpose is in part served by a second bundle of similar knickknacks which is hung in front of the cradle so that the child can reach for it. Underneath I also saw in the village of Wassj a bundle of fine shavings, a so-called zach, which evidently had a special purpose, namely, that of protecting the child against the influence of evil spirits. Finally, in a spot visible to the child in the cradle, a tschaltscha-tschngai, or, more precisely, matscherlagu (children)-tschaltscha-tschngai, that is, a wooden figure with movable joints throughout (Pl. LV, Fig. 1 /see p. 1255/), carved at the time of its birth, is hung so that the child, by looking at it, may remain sound of limb and agile.

The great movability of the cradle enables the mother to give the child the breast without lifting it out of the cradle. Gilyak mothers suckle their children a very long time, up to four or five, and even longer, and then do not stop all at once, but permit the children, even after they have become accustomed to a different diet, to come back to the mother's breast from time to time, whenever it strikes their fancy. In Nyi I saw a boy, who allegedly was five years old, but who, judging by his size and behavior, /644/ could have been almost seven, and wore both pants and the pouch underneath customary for the male sex among the Gilyak, suddenly stop his activities and run to his mother. She was sitting on the sleeping bench and was sewing; the rascal remained standing on the floor in front of her and by his impetuous demands succeeded in having her give him the breast. This reminded me of what La Pérouse experienced among the Orochi in de Castries Bay: there he saw a boy draw a bow, shoot an arrow very well, hit a dog with the stick, and then throw himself at his mother's breast and behave like a child of five or six months (1).

1. La Pérouse, Voyage aut. du monde /Voyage around the World/, Vol. III, p. 68. The Siberian peoples, too, suckle their children up to the age of four or five; the Ostyak, for instance (Sujef, in Pallas' Reise durch versch.

Child's cradle.

The Nivkhi clans could split up and settle in different places; they could also accept (adopt) people of other clans and tribes. When a clan divided, the Nivkhi broke the flint which was kept by the eldest in the clan (the flint was used to obtain ritual fire, such as the fire for cooking bear meat), and gave a piece to the part that split off.

Long ago, the Nivkhi had the institution of vendetta. All members of a clan were bound to avenge a murder upon all the men of the murderer's clan. Later, vendetta began to be replaced by blood-money (tkhusind). In reconciling clans through the payment of blood-money, the principal role was played by intermediaries of a neutral clan (khlay-nivkh): it was their duty to negotiate the size of the blood-money and to persuade the enemy

out somewhere in the taiga for a whole year, the consensus usually favors them and the first husband must abandon his claims. In recent years many Gilyak have resorted to a special ruse in order to make sure of their wives. Such chaps who are probably not of the best and who may thus be faced with the prospect of eventually being deserted by their wives, have themselves baptized by a Russian priest, because they know that, according to the Greek religion, marriage must be permanent, and they would consequently, in case of desertion, be entitled to the ispravnik's protection. However, it is doubtful whether this maneuver will help them much in the long run, for such baptized individuals who later have no intention of keeping their Christianity alive, are soon forgotten in official circles. No one knows who or where they are, the wilderness is vast, and looking for them is more than troublesome.

If the abducted woman had had children by her first marriage, these usually remain with the father. [129]

Child training. Toward the end of her pregnancy, a woman is taken out of the house for 10 (1) days and brought to

1. The duration of this exile is not the same everywhere. From some Gilyak I learned that eight days sufficed; on the island of Sakhalin, however, 12 days were given.

a hut made of birch bark, in which a small fire is burning. This custom which is known to exist among other primitive peoples, for instance among the Ostyaks, is, up to the present, very strictly observed by the Gilyak even in winter during the most severe cold, as a result of which the newly-born child often freezes to death. Conceivably a child which survives such a test must be strong. The mother also proves by this what rigors these people are capable of enduring. During her entire stay in the hut only women are permitted to come to her, often she must be her own mid-wife. No one could tell me the actual meaning of this custom: most probably it cannot be explained on the basis of "impurity" of the woman, but it is related to another superstition of which we shall speak later, and which was originally perhaps some hygienic regulation. That no mystical idea of "impurity" underlies it may be seen from the fact that when the woman returns to her house she undergoes no "purifying" ritual.

The bathing of the newly-born is also done in the improvised lying-in establishment, and it is given its other baths there.

13: Seeland--32 E-5 (no date) 1882 Gilyak

854 Nursing infants are bathed twice daily, but, on the other
515 hand, larger children are seldom bathed. Adult Gilyak
302 consider bathing a luxury, some never do it and leave it to chance, if they are caught in the rain or fall in the water; some, however, wash occasionally, even with soap which they buy from the Russians. They comb their hair with a wooden (Chinese) comb and at the same time rub it with fat and hunt for lice. They do not by any means comb their hair every day.

854 Children nurse for about two years. Tiny babies are kept in a cradle which stands on the floor, but as soon as they are three to four months old they are placed in a trough-like bed. The little trough is open at one end and somewhat pointed; on the other end it has a hole in the bottom. The [130] child is laid with its back against the bottom, its head against the open end; it is tied down and the whole thing is hung up slantwise. The hole serves as a conduit. When the mother leaves the house for a longer time, she ties this cradle to her back.

868 When the Gilyak lad no longer needs his mother's care,
276 he begins to accompany his father on trips and thus gradually
147 learns what he needs for his life. Many children even smoke but all fathers do not permit this. (1)

1. The disciples of a one-sided etiology of disease might cite the Gilyak as living examples of the harmlessness of tobacco:this race is on the average healthier than civilized man, their teeth are white and strong, and yet both sexes smoke from childhood. Nevertheless, this would be a false inference: a single given cause always has a different effect according to the mode of living in general. Thus, for instance, the effect of a strong cigar is very different if one smokes outside in cold weather or sitting in a warm room doing head work. In the latter case it will soon lead to nervous palpitation. Furthermore, the organic constitution with which a person is equipped must be taken into consideration. Civilized man would have to live through the tests which the Gilyak endures at birth in order to be compared with him.

855 The parents are tender and indulgent with their children.
524 The children are kissed by their mothers, licked with saliva,

116, 854

"At or near one end of the shed was a babe, tightly bandaged in a wooden box or cradle, something like those used by our American Indians, but with its little legs from the knees downward unfettered. This cradle was suspended from the ridge-pole, in an upright position, by four leather thongs, which were just long enough to enable the little one to reach the ground with its feet, by which it swung itself back and forth without assistance."

855

855 CHILD CARE--supervision, care, and support of children from earliest independence (e.g., walking, talking) to puberty; distribution of responsibility among parents and other relatives; institutionalized care (e.g., day nurseries); beliefs and standards concerning proper clothing, feeding, and housing of children; provisions for physical and mental health; protection from physical and social dangers (e.g., confinement, removal of dangerous objects); attitude of adults toward children (e.g., indulgent, indifferent, censorious); spoiling and coddling; mistreatment and neglect of children; etc. See also:

*614 /112 cont./
clan, and which we see even now, for example, among the Buryat, the Kirgiz, the Caucasian peoples, etc., is absolutely lacking among the Gilyak and in general among peoples on a level of development similar to theirs. It is not found even in
[562] the family. True, a certain despotism is practiced with respect to the women, who are at first subordinate to their fathers and brothers and, after marriage, to their husbands, but this is a despotism that has nothing in common with the despotism of the Roman patria potestas. Instances of slaying wives and daughters or selling them into slavery are impossible.

562 True, there are not infrequent cases of girls forced to marry,
593 which is to a considerable degree tied up with the religiously sanctioned custom of marriage between the children of brothers and sisters, but in general the attitude toward daughters is one of the greatest tenderness, both before and after marriage. Between
[606] the families of the father-in-law and son-in-law /zyat'/ there are established for their whole life, as we shall see, profound and intimate ties of hospitality and mutual aid, and in the rare cases of bad treatment of a married woman, the woman always receives real protection from her kinsmen. In general, however, the conjugal relationships are very gentle, women are consulted, and the older ones even participate in the councils and assemblies of the clansmen.

561 There is absolutely no trace of despotism with regard to the
● 855 representatives of the male sex. To be convinced on this point, it is enough to witness the attitude of the adults toward children. It is difficult for the civilized man even to imagine what a feeling of equality and respect prevails here with regard to the youth. Male children of ten to twelve feel themselves to be members of society with completely equal rights. The wisest and most honored oldsters listen with the most serious attention to their remarks and reply with the same seriousness and courtesy that they display toward their own /113/ contemporaries. No one feels any
[86] difference of years or social status. True, the Gilyak male child of ten to twelve usually is already an accomplished gentleman. He has not only mastered all the techniques of his day-to-day

/113 cont./
561 labors, he is not only a skillful shot, fisherman, oarsman, etc.,
● 855 but he is already in fact a worker, like all the others. Moreover,
86 to a considerable degree he has already mastered the whole sum of spiritual learning. He already knows from practice all the clan customs, all the religious rites, he remembers all the kinship appellations, he knows the legends, tales, and songs of his tribe, and, to top it all off, he has that knowledge of men and life that constant presence in the society of adults provides: on journeys, hunting, fishing, festivals, etc. Hence, also, his feeling of his own worth and weightiness of speech, and his ability to conduct himself in society.

561 All these qualities, however, would have no significance if
596 the patriarchal principles existed. The youths of other peoples
855 of low culture also attain self-reliance at an early age, but a special, almost religious veneration of their elders, who purposely train them in submission, is demanded of them. Among the Gilyak there is nothing of the sort. All the more absent is the despotism of the head of the family with respect to its adult members. The sons are completely free to separate from their father, obtaining from him their allotment in the form of implements, sleighs, and such, and when they assist him with a part of their catch, they do this quite freely, with absolutely no compulsion.
596 One encounters large families living in a communal economy, at the head of which stands the elder in the family, the grandfather, father, or one of the brothers, but this is a completely free associa-
[422] tion, from which one may depart at will. And even though he is a
[434] participant in such an economic union, every member can have his own individual economy in the form of sleds and dogs, arms, enjoying the right to individual earnings by means of his personal merits; and what each member shares with his own -- and there is extensive sharing, especially in food supplies, both natural and purchased -- is shared without any compulsion. They bring flour, rice, kumiss, and so on from the city, and all this is cooked in the common kettle for all. Communism and individualism are combined without any friction.

/305 cont./

84 mother has her own fire. After childbirth a woman washes herself for three days and then moves to her yurt, but for seven days she sits apart and eats from a separate kettle. For ten days after childbirth, it is not permissible to drink cold water or to eat raw fish, but if twins were born, then it is permissible. When a child is born, they bring in two sticks, put them into his hands and lift [755] him up. Similarly, sticks will be placed in the infant's hands when he falls ill, and he will be compelled to lift himself up (1).

[777] 1. On another page of the same notebook, we find the following notation: "These sticks kyz′ nyngydz′ (from kyz′ -- risk, luck, and nynydz: -- to seek)," which probably refers to the above-mentioned sticks.

845 /306/ If two children were born, they make two pairs of prung, two k:ong z′akh, two sticks made of rose-willow, cut as strips (pylng z′akh), two small bows (pudz:) and arrows of a special shape (m′erlar), and attachments for the cradle -- pitus′. When they prepare food, these trees -- ola′ bituz′ -- must be fed (settlement of Kal'ma).

855 While a child is growing up, his umbilical cord -- kylmyr
789 is kept at home, and then he himself must carry it into the forest
[846] and hang it on a tree. O′ging chkhnaj is a figure that they make when a child is suddenly frightened during his sleep. The chkhnaj is the figure made when a person himself, without the shaman, does that which he dreams.

514 The child's excrement is poured out near a fir tree (both male and female); after being cut, hair is also thrown here (it is not permissible to cut the hair of twins). One must watch carefully to see that no female blood drops on the urine or the refuse,
[824] for then the child is lost. The child will die if the tree growing
[761] there is broken. This tree is called pila uigf, and the place is called ki markf -- literally -- "urine pouring out place."

/640 cont./

462 would think that for the man, too, there could never be any lack
411 of domestic work. But these objects are by no means made every-
[463] where and by everyone, but rather at only a few places by expert
[439] Gilyak and used for trade (1), so that one need only make a wooden

1. A large portion of them, as was mentioned above (p. 894), are bought in crude form from the Orok and only given the finishing touches by the Gilyak.

handle or shaft and fasten the iron to it in order to produce the
462 complete weapon. The situation is similar with respect to bows,
321 boats, and other implements that are used specifically or chiefly
322 by the men. The domestic activities of the men among the
517 Gilyak, therefore, are not very numerous and are mostly limited to a few manual tasks with the knife or the drill to produce sleds, ski, animal traps, and other implements of wood or bone, and he still has much time left for idleness, smoking, and sleeping.

593 The domestic tasks and accomplishments of the wife, however,
[462] are far from exhausted by what has been presented above, for in addition to all that there are still the maternal duties, the care and tending of the children. The Gilyak, husband as well as wife, find great pleasure in children and not infrequently express it, though they are generally very reserved about expressing their feelings. I never saw a Gilyak give his wife a kiss, not even when he was about to leave on a journey or returned from one.
[855] On the other hand, I have often seen a Gilyak man, not to speak of the women, tenderly caress and kiss small children. Every
593 married Gilyak wants as large a swarm of children as possible,
842 and one who has them prides himself on it. One in Xyi was boasting in front of me about his many children, but to my question as to how many he had, he could only answer: tammlä, tammlä, that is, many, many. Mixed in with this joy, however,
[592] there is also an egoistical, utilitarian viewpoint, for in his growing sons he will soon have helpers in his lucrative hunting, fishing, and trading business, and the daughters promise, /641/ apart from
The help that they give in the household, a fine bride price.

/643 cont./

854 when swung, strike one another and the cradle producing noise and a clanking sound. The same purpose is in part served by a second bundle of similar knickknacks which is hung in front of the cradle so that the child can reach for it. Underneath I also saw
854 in the village of Wassj a bundle of fine shavings, a so-called zach,
789 which evidently had a special purpose, namely, that of protecting the child against the influence of evil spirits. Finally, in a
[856] spot visible to the child in the cradle, a tschaltscha-tschngai, or, more precisely, matscherlagu (children)-tschaltscha-tschngai, that is, a wooden figure with movable joints throughout (Pl. LV, Fig. 1 /see p. 1255/), carved at the time of its birth, is hung so that the child, by looking at it, may remain sound of limb and agile.

855 The great movability of the cradle enables the mother to
give the child the breast without lifting it out of the cradle. Gilyak
862 mothers suckle their children a very long time, up to four or five, and even longer, and then do not stop all at once, but permit the children, even after they have become accustomed to a different diet, to come back to the mother's breast from time to time, whenever it strikes their fancy. In Nyi I saw a boy, who allegedly was five years old, but who, judging by his size and behavior, /644/ could have been almost seven, and wore both pants and the pouch underneath customary for the male sex among the Gilyak, suddenly stop his activities and run to his mother. She was sitting on the sleeping bench and was sewing; the rascal remained standing on the floor in front of her and by his impetuous
855 demands succeeded in having her give him the breast. This re-
862 minded me of what La Pérouse experienced among the Orochi in
171 de Castries Bay: there he saw a boy draw a bow, shoot an arrow very well, hit a dog with the stick, and then throw himself at his mother's breast and behave like a child of five or six months (1).

[113] 1. La Pérouse, Voyage aut. du monde /Voyage around the World/, Vol. III, p. 68. The Siberian peoples, too, suckle their children up to the age of four or five: the Ostyak, for instance (Sujef, in Pallas' Reise durch versch.

855 862 145

Among the Gilyak it not infrequently happens that, in addition to the actual suckling, several older children drink from the mother (2). The excessively long nursing of the children is un-

2. Among the Tungus, according to Middendorff (op. cit.), it even happened that "a ten-year-old urchin quite calmly sucked from the mother the remains of the milk left by his youngest brother."

doubtedly the main reason that the Gilyak women age and decline so early. I have seen some among them who, judging by their wrinkled and ruined appearance, one would say were at least 50 to 60 years old, and yet who still nursed their children and therefore presumably were only about 30 to 40 years old. And undoubtedly this is one of the reasons for the small number of people and the slow increase of the Gilyak population.

855 Children at a later age, just as in the cradle, are not kept very clean; in fact, when they have outgrown the cradle and run about freely, the little cleanliness and hygienic care that came their way up to that time usually cease altogether. It is extremely rare to see a mother wash a somewhat older child, and, to be sure, in the manner I witnessed and described above (3) in the

k796 on it raw and cooked bear-meat and several strips of bear fat, as
574 well as a small heap of fine wood-shavings (zach). This was the
762 first bear meat that was eaten. The portions were very ample, and
[562] gradually everybody present in the house or newly arrived partici-
[855] pated in the meal, indeed, even the women and children re-
[415] ceived their share of it, in that a few young people walked among the diners with bowls of a special shape (Pl. L /p. 1250 /, Fig. 5, and Pl. LI /p. 1251 /, Fig. 1-- called ans-tymyk (2) in Gilyak)

[104] 2. The s in this word is to be pronounced soft, like the French z. The bowl is called ans-tymyk because of its similarity to a hand (tymyk).

and collected contributions to be divided among the women and children. The quantity of bear meat and fat consumed that day w therefore very great. What was left over of the portions /722/ that the guests had, they wrapped up in the fine wood-shavings and fir branches and took home -- a package that the Gilyak are said to call möps (1).

[114] 1. A designation which I myself did not hear.

The gnawed bones, on the other hand, were put back into the kettle from which the cooked meat had been distributed. As the meal came to a close, an old man with a fir branch in his hand stationed himself at the door of the house and, gently striking each one, drove out everyone passing through it who had eaten bear meat and fat -- an act which was supposed to be a sort of
[857] punishment for the misdeed committed against the bear. Once
[533] outside, however, those who came out were less gently treated, for here they were greeted with a cross fire of snowballs with which the boys pelted them, while the women drummed vigor-
[184] ously on the suspended beams. An identical meal with a similar aftermath also took place in the house where the owner of the third bear lived. Here, too, just as before, quantities of small individual heaps of food -- sturgeon, mossj, etc. -- were put out

854 Nursing infants are bathed twice daily, but, on the other
515 hand, larger children are seldom bathed. Adult Gilyak
302 consider bathing a luxury, some never do it and leave it to chance, if they are caught in the rain or fall in the water; some, however, wash occasionally, even with soap which they buy from the Russians. They comb their hair with a wooden (Chinese) comb and at the same time rub it with fat and hunt for lice. They do not by any means comb their hair every day.

854 Children nurse for about two years. Tiny babies are kept in a cradle which stands on the floor, but as soon as they ar three to four months old they are placed in a trough-like bec The little trough is open at one end and somewhat pointed; on the other end it has a hole in the bottom. The [130] chilc is laid with its back against the bottom, its head against the open end; it is tied down and the whole thing is hung up slant wise. The hole serves as a conduit. When the mother leaves the house for a longer time, she ties this cradle to her back.

868 When the Gilyak lad no longer needs his mother's care,
276 he begins to accompany his father on trips and thus graduall
147 learns what he needs for his life. Many children even smok but all fathers do not permit this. (1)

> 1. The disciples of a one-sided etiology of disease might cite the Gilyak as living examples of the harmlessness of tobacco:this race is on the average healthier than civilized man, their teeth are white and strong, and yet both sexes smoke from childhood. Nevertheless, this would be a false inference: a single given cause always has a different effect according to the mode of living in general. Thus, for instance, the effect of a strong cigar is very different if one smokes outside in cold weather or sitting in a warm room doing head work. In the latter case it will soon lead to nervous palpitation. Furthermore, the organic constitution with which a person is equipped must be taken into consideration. Civilized man would have to live through the tests which the Gilyak endures at birth in order to be compared with him.

855 The parents are tender and indulgent with their children.
524 The children are kissed by their mothers, licked with saliva

855 and deloused. They are never cuffed, it seems, or punished
524 with the rod. Nor can it be said that boys take priority in their parents' affections. The play and activity of the children consists of bathing (in summer), of scuffling and romping about in the sand and snow, and of imitating their elders, especially in archery. Occasionally their mother sews them a leather ball which they knock about with a stick on the flat ground or on the ice. The children also make themselves willow whistles.

674 [222] XI. Morality and Crime.

Crimes are rare and neither manifold nor refined. This negative side of morality is less developed among these natural people than the positive side, that is, moral traits of character. Some of these we touched on in previous chapters; we should now like to consider them in detail.

152 First of all, the Gilyak are a brave people. Not everyone, it is true, decides to attack the bear single-handed with his lance, but for two people to set out against the bear, armed with rifles- this is a very common thing. The seal hunt on Sakhalin is often linked with great danger because of the floating ice. Even traveling along the coast of the Amur in windy weather with the kind of vessels the Gilyak have is certainly not without danger, especially if one remembers what poor swimmers the Gilyak are.

It cannot be said that resignation and patience in the endurance of bodily pain falls entirely within the realm of morality, for it can also be a result of insensitivity of the nervous system; nevertheless, a certain self-effacement in such instances is not to be denied. And the Gilyak bear suffering extremely well. Not only hunger and physical pain, but the ailments connected with the latter, they endure steadfastly. Loss of eye-sight, paralysis of the limbs. etc., do not call forth lamentations or complaints. [223]

592 The quiet way in which several families live in one house,
578 or more accurately, in one room, already points to
888 peaceableness and forbearance. I repeatedly heard neighboring peasants praise the Gilyak for these characteristics; and they marveled particularly that the "women folk got along together". The house usually belongs to one owner, but the occupants do not pay him anything, they merely help him with repairs, wood cutting, etc. The old people of both sexes in the house are sometimes called the "masters of the house". In general, old people are respected. They are not permitted to work, they are given all they need, and their advice is followed.

Goldi RX3
Olcha
Southwest Siberia RX1

/409 cont./

As is seen from the above description, the clothing of the Amur peoples, to be sure, offers much that is significant and original, but in no way such pervasive peculiarities and differences for the individual tribes that on the basis of it one could immediately /410/ recognize the affiliation of single individuals to this or to that people. The Gilyak, for instance, fundamentally different in origin and language from all the other Amur peoples, cannot be distinguished by their dress from their neighbors, the Olcha, and the latter in turn imperceptibly lead over to the Goldi, etc. Like climatic situations, like conditions with respect to food and subsistence, like ways of life, like cultural influences, and constant reciprocal intercourse have also in the course of time had a leveling effect on the clothing of these peoples and in part reduced and in part wiped out completely the differences that presumably were formerly present.

This is not the case with regard to another aspect of their appearance, the hair style. In this respect, quite the contrary, out of the uniformity that most probably formerly prevailed there developed in the course of time, as a consequence of certain political events, differences which today to a certain extent separate even closely related peoples of the Amur region and make it possible to recognize immediately the affiliation of single individuals to one or another of them.

The Gilyak wear long hair parted in the middle and plaited in one braid for the men or two for the women, which hang down over the back. If it is too short or too sparse to be plaited, it hangs down loosely from the head, which gives the individuals concerned an untidy appearance, and old women a witchlike appearance. A luxuriant growth of hair and a long braid are regarded as adornment, but I did not see the Gilyak artificially lengthen the braid, as the Chinese do, by plaiting in black silk. Baldness, on the other hand, is subject to ridicule. In order to promote the growth of hair, children are shorn from time to time, and occasionally, especially in the case of boys, a tuft of hair is left standing somewhere on the front of the head, tied or plaited, and at the tip provided with a beaded rosette hanging down over the forehead (1). Adults, however,

/643 cont./

when swung, strike one another and the cradle producing noise and a clanking sound. The same purpose is in part served by a second bundle of similar knickknacks which is hung in front of the cradle so that the child can reach for it. Underneath I also saw in the village of Wassj a bundle of fine shavings, a so-called zach, which evidently had a special purpose, namely, that of protecting the child against the influence of evil spirits. Finally, in a spot visible to the child in the cradle, a tschaltscha-tschngai, or, more precisely, matscherlagu (children)-tschaltscha-tschngai, that is, a wooden figure with movable joints throughout (Pl. LV, Fig. 1 /see p. 1255/), carved at the time of its birth, is hung so that the child, by looking at it, may remain sound of limb and agile.

The great movability of the cradle enables the mother to give the child the breast without lifting it out of the cradle. Gilyak mothers suckle their children a very long time, up to four or five, and even longer, and then do not stop all at once, but permit the children, even after they have become accustomed to a different diet, to come back to the mother's breast from time to time, whenever it strikes their fancy. In Nyi I saw a boy, who allegedly was five years old, but who, judging by his size and behavior, /644/ could have been almost seven, and wore both pants and the pouch underneath customary for the male sex among the Gilyak, suddenly stop his activities and run to his mother. She was sitting on the sleeping bench and was sewing; the rascal remained standing on the floor in front of her and by his impetuous demands succeeded in having her give him the breast. This reminded me of what La Pérouse experienced among the Orochi in de Castries Bay: there he saw a boy draw a bow, shoot an arrow very well, hit a dog with the stick, and then throw himself at his mother's breast and behave like a child of five or six months (1).

1. La Pérouse, Voyage aut. du monde /Voyage around the World/, Vol. III, p. 68. The Siberian peoples, too, suckle their children up to the age of four or five; the Ostyak, for instance (Sujef, in Pallas' Reise durch versch.

1-4. Gilyak idols for various illnesses. 5. Gilyak amulet.

The mouth of the newly born child is cleaned of the mucus with the help of a finger, whereupon the child is given the mother's breast for nursing immediately. The next day the mother washes the child with cold water, but she does not pour it directly on the body of the child, but takes it into her mouth first and only then applies it to the child, which, of course, raises the temperature of the "bath". In this way the child is washed twice a day for two years.

If the newly born child has a defective limb nobody tries to mend the damage. It is also not a custom among the Gilyak to form the soft head of the baby.

It is recommended that young women walk around a great deal after they have given birth to a child, while sitting is recommended for older women. Women of all ages are advised to move around as much as possible before they give birth to a child.

Women are strictly forbidden to drink cold water during a period of ten days before and after the delivery. If there is no tea at hand the sick woman is given cooled boiled water if she is thirsty. During that period she is not allowed to eat red-meat-fish (salmon); salted food is forbidden as well as eating a black berry that grows in the tundra (empetrum nigrum). Taking hard liquor before giving birth to a child is considered harmful, but later on it is considered to be healthy. In general liquor is consumed very rarely, and the Gilyak on Sakhalin consume very little alcohol compared to other inhabitants of this island.

Miscarriages.

Natural miscarriages (ryrnnd) occur very frequently among the Gilyak; they are considered quite harmless and not even looked at as an illness. I was told that there was scarcely a woman who had not experienced one or two miscarriages in the course of her life. But not a single inhabitant with whom I discussed it knew of a woman who always miscarried and was not able to carry the fetus in her abdomen throughout the normal period of pregnancy. I do not intend to state the causes of the frequent miscarriages among the Gilyak for lack of sufficient [759] data. I will, therefore, leave the answer to this question to the

683 and other objects. In the second case the adversaries fight it out
[411] with cudgels until one side admits defeat. The Gilyak are most
[868] proficient at wielding cudgels. The Gilyak study this art from
[857] childhood, and the children give themselves up with passion to
this noble exercise, even by moonlight on frosty winter nights.
628 In their civil relationships, as a general rule, the Gilyak display
648 veracity, fidelity to their word, and conscientiousness. /384/
177 Unfortunately, the destructive influence of the rascally population of the Amur region has begun to extend even to the most remote Gilyak settlements. A few individuals imbibe wisdom at Nikolayevsk, and it is enough to enmesh whole settlements in deceit and to breed imitators and a whole mass of interminable lawsuits. The court and mediation of the clansmen, still exerting authority within the clan, are becoming powerless when the quarrel is between members of different clans. The Gilyak have the custom of turning to a mixed assembly of "khlay-nivukhi" of different clans for the resolution of mutual disputes. But at the
[178] present time this institution is losing its strength, since the Russified Gilyak, who are simultaneously the chief culprits of dissension and lawsuits, deny to it respect and competence. The Russian administration is going to impart authority to this court of "wise" and honorable men by sanctioning the "khlay-nivukhi" by election, regulating the time of their meetings, the area of their authority, etc. And a first condition is that the "khlay-nivukhi" be of various clans. Observation has shown that the Gilyak are able to elect men intelligently and to appreciate the importance of the elected court sanctioned by the Russian administration.

128 ber of Sakhalin Gilyak and to present their economic status more

/645 cont./

524 and entertainment of the children, for instance, those of the carp (Gilyak pilengat, Pl. LX, Fig. 5 /see p. 1260/), bear a quite different character, because they reveal an attempt to give a really
• 857 similar picture of the animal. As soon as the boys are able to
868 romp about freely, they amuse themselves by shooting with small bows and arrows at a target or at imaginary animals, by traveling on small sleds with the whelps, or by faithfully imitating all the manipulations that they see the adults execute with bears, for which one boy represents the bear and behaves like it, but the others try to pull it, subdue it and lead it away, etc., precisely as is done during the processions with the animal at the bear festivals. Very soon they are also taken along by the father or older brother to set up or inspect the animal traps in the woods, for fishing, and the like, and they learn from them the pertinent techniques and in general what to do or to avoid. No less do the girls in their games and occupations imitate their mothers and older sisters and are soon capable of helping them in the handicrafts and all the operations in the household.

595 In a polygamous marriage all the wives live in the same house with the husband, and each of them has a certain section of the sleeping benches for herself and her children. Legally the wives are completely equal and are obliged to care for the
[593] household jointly. But as a rule the division of labor is not completely equal among them, since one or another of the wives is almost always favored by the husband, and only the lighter work falls to her, while all the heavier work must be performed by the others. It is by no means the case, however, that the last-purchased or the youngest wife is always the favorite, for sometimes, as Jutschin and other Gilyak told me, the man may take a second or a third wife simply in order to make life easier for the first wife or for one of the two he already has /646/ by placing a new and able worker by her side. Whether he achieves his goal depends, however, on whether and how the wives accommodate themselves to the new arrangement and get along with one another. For no matter how little jealous they may be, the peaceful

/707 cont./

*796 bear did not leave or enter Judin's house until after it had been
231 led back and forth through the door four times. Again the bears had to be led through all the houses in the village and treated everywhere with mossj and crushed ice. Twice they came into
*796 Judin's house and received the same treatment. The Gilyak espe-
• 857 cially like to see their boys, even if they are very small, partici-
231 pate in the feeding of the bears; they bravely step up to the animal and offer it the spoon filled with mossj, which is sometimes held and supported by several small hands; many a little fellow who can hardly stand on his legs, not to speak of holding a nichyr, must be helped by the father or older brother, who lifts up the
[825] little one. Perhaps this is done for pedagogical reasons, but more probably for superstitious reasons, namely, in the belief that through this the children will continue to have the good will of the mighty animal even after they are grown. As soon as the bears have again been taken out of the house, however, the children use the free space to romp about in and to perform an exact duplicate of what they have seen during the leading of the bears, during the changing of the bands on them, etc., most faithfully imitating all the movements, positions, and demeanors of the adults, as has been described above (pp. 1136 ff.). Thus they learn how to deal with the bears long before they can lend a helping hand.

*796 In the evening, in bright moonlight, the bears were led
231 beyond the village and all the way around Cape Tebach on the river ice. It was a long procession that started moving down toward the river, for, in addition to the three bears, who were led in the same order as /708/ always, a great number of idle boys followed them. Since the bank is high and slopes rather steeply down to the river, it was interesting to see how the procession moved down the slippery hill without falling into disorder even for a moment: while those standing at the front rope ran down at top speed, the ones busy on the rear rope had to hold back with all their might in order to prevent the bear from running down just as quickly and causing damage below; by their combined efforts, however, they succeeded in letting all three bears slide down the hill slowly and evenly. It was much easier going back, for those

/710 cont./

*796 bears, volunteered to do this. The day before he had already per-
231 formed a feat on the large bear that /711/ brilliantly proved his
156 bold and resolute courage. When this bear was led out of the house, it seized so firmly with its claws the front Gilyak goading it that the latter could not free himself any more and was pulled close to the furious animal. At that moment, Chusisin, who stood immediately behind the bear, jumped over the animal's back and landed directly in front of its snout; the startled bear, infuriated anew, dropped its first prey and bit at the second, but fortunately without success. Now, for the small bear, Chusisin took the precaution of wearing his dog-fur coat reversed, with the fur on the inside, and over it he put on a reindeer-fur coat with the fur on the outside and the back part turned to the front, at the same time tying his belt around himself in such a manner that the fur coat projected out in front of him lump-like and stuck out far from his body. So equipped, he waited for the moment when the bear, goaded with sticks, showed its teeth in a roar; now he stepped up to it with chest thrust forward and let it bite into the puffed-out fur-coat over it. Then he threw himself around the animal's neck, seized its head at the ears, and bent it down. The men standing around were ready at this moment to muzzle it, to press its paws down, etc., as I have already described above.

After this was taken care of, the bears set out on their
*796 last walk: in the same order as before, the procession, accom-
231 panied by the loud drumming of the women, went down the high bank to the river. Having reached there, it circled at a distance of several steps the hole in the ice where the women scoop water (see Plate XLVIII /p.1248 /), and returned up the hill. The bears passed close to Judin's house and the one where the owner of the third animal lived: the doors were open, and the procession involuntarily came to a halt because the bears made the greatest effort to get back in. But they were no longer permitted to do this. The procession halted at the entrance to the kadhra. Boys
•[857] came running from all sides in order to shoot their small, but not always harmless arrows at the animals, which the leaders, visibly amused, permitted them to do.

576 /721 cont./

*796 on it raw and cooked bear-meat and several strips of bear fat, as
574 well as a small heap of fine wood-shavings (zach). This was the
962 first bear meat that was taken. The portions were very ample, and
[562] gradually everybody present in the house or newly arrived partici-
[855] pated in the meal, indeed, even the women and children re-
[415] ceived their share of it, in that a few young people walked among the diners with bowls of a special shape (Pl. L /p.1250 /, Fig. 5, and Pl. LI /p. 1251 /, Fig. 1-- called ans-tymyk (2) in Gilyak)

[104] 2. The s in this word is to be pronounced soft, like the French z. The bowl is called ans-tymyk because of its similarity to a hand (tymyk).

and collected contributions to be divided among the women and children. The quantity of bear meat and fat consumed that day was therefore very great. What was left over of the portions /722/ that the guests had, they wrapped up in the fine wood-shavings and fir branches and took home -- a package that the Gilyak are said to call möps (1).

[114] 1. A designation which I myself did not hear.

The gnawed bones, on the other hand, were put back into the kettle from which the cooked meat had been distributed. As the meal came to a close, an old man with a fir branch in his hand stationed himself at the door of the house and, gently striking each one, drove out everyone passing through it who had eaten bear meat and fat -- an act which was supposed to be a sort of punishment for the misdeed committed against the bear. Once
•[857] outside, however, those who came out were less gently treated,
[533] for here they were greeted with a cross fire of snowballs with which the boys pelted them, while the women drummed vigor-
[184] ously on the suspended beams. An identical meal with a similar aftermath also took place in the house where the owner of the third bear lived. Here, too, just as before, quantities of small individual heaps of food -- sturgeon, mossj, etc. -- were put out

*614 /112 cont./
clan, and which we see even now, for example, among the Buryat, the Kirgiz, the Caucasian peoples, etc., is absolutely lacking among the Gilyak and in general among peoples on a level of development similar to theirs. It is not found even in
[562] the family. True, a certain despotism is practiced with respect to the women, who are at first subordinate to their fathers and brothers and, after marriage, to their husbands, but this is a despotism that has nothing in common with the despotism of the Roman patria potestas. Instances of slaying wives and daughters or selling them into slavery are impossible.

562 True, there are not infrequent cases of girls forced to marry,
593 which is to a considerable degree tied up with the religiously sanctioned custom of marriage between the children of brothers and sisters, but in general the attitude toward daughters is one of the greatest tenderness, both before and after marriage. Between
[606] the families of the father-in-law and son-in-law /zyat'/ there are established for their whole life, as we shall see, profound and intimate ties of hospitality and mutual aid, and in the rare cases of bad treatment of a married woman, the woman always receives real protection from her kinsmen. In general, however, the conjugal relationships are very gentle, women are consulted, and the older ones even participate in the councils and assemblies of the clansmen.

561 There is absolutely no trace of despotism with regard to the
855 representatives of the male sex. To be convinced on this point, it is enough to witness the attitude of the adults toward children. It is difficult for the civilized man even to imagine what a feeling of equality and respect prevails here with regard to the youth. Male children of ten to twelve feel themselves to be members of society with completely equal rights. The wisest and most honored oldsters listen with the most serious attention to their remarks and reply with the same seriousness and courtesy that they display toward their own /113/ contemporaries. No one feels any
[86] difference of years or social status. True, the Gilyak male child of ten to twelve usually is already an accomplished gentleman. He has not only mastered all the techniques of his day-to-day

/183 cont./

831 group sexual cohabitation is legitimately practiced on a large
831 scale. When reproaches were sometimes directed by older
●861 persons at younger ones for sexual excesses, it was only on
account of economic considerations, since sexual diversions
831 frequently distract youths from work at home. Reproaches were
*835 also directed at pregnant maidens, but here the considerations
848 were of a special nature, about which we spoke above: 1)
the danger of a connection with persons of the forbidden cate-
gories, and principally, 2) the anonymity of the father of the
831 child. But ordinarily the adventures of the youth are no
574 secret and do not give rise to reproach. It is a perfectly
883 ordinary phenomenon for young men to set out for a visit of
several months' duration to the settlements of their "fathers-
in-law," where there are so many an'g:ej maidens at their
disposal, and the older generation not only does not oppose
this, but is very happy about it. As we have already said, an
unmarried ymg:i (son-in-law /zyat'/) is a most desirable guest
in the house. "One is obliged to feed an "ymg:i" (son-in-
831 law)" (see p. 249). Women and even maidens yield little to
562 the men in laxness of attitude toward what we call sexual
834 morals. It is only necessary for them to be more careful
*[835] (especially when the matter concerns persons who are not of
the class pu), and for this reason they always affect an ap-
pearance of the sternest inaccessibility, but in reality they are
831 just as loose as the men. And yet, in view of all this, to say
834 that the Gilyak is devoid of a feeling of sexual morals would be
the greatest injustice. Actually the Gilyak give free rein to
their instincts only within socially permitted limits. And,
on the other hand, what the norms do not allow, for example,
reactions of jealousy with respect to one's tuvn, and especially
sexual intercourse with persons of forbidden categories, is
observed with a very great rigorousness completely unknown
to us, and this notwithstanding the fact that the prohibitions
on sexual intercourse often have in their favor neither
physiological, nor psychic, nor any other kind of reasonable
basis, such as, for example, the prohibitions between the
000 most distant agnate male and female cousins. During

/644 cont./

855 case of a small boy; but the obstinacy that the latter showed and the
howls that he emitted proved all too clearly how unfamiliar and an-
noying the whole procedure was for him.

In spite of their unwashed faces and often also uncombed hair,
855 the Gilyak children are, as a rule, dressed well and in winter very
291 fully. In their garments, made for them as a copy of those of the
adults, often down to the smallest detail and with all the ornaments
and embellishments on a reduced scale, one can see that in this respect
the mothers spare no toil or effort for the sake of their children and are
probably not lacking in motherly vanity. The fact, however, that one
524 sees on many a small boy the fur coat and apron-skirt held together by
293 a belt on which hang all the numerous implements carried by an adult,
ngawla- and yi-dshakko, fire steel, tinder box, pipe cleaner, etc., ex-
cept that they are all carved out of wood in miniature, shows that the
fathers, too, in their leisure hours, do not disdain giving some time
to their children and involuntarily arousing their imitative instincts.
855 Otherwise, one cannot speak of any education /645/ for the children,
861 of any training in obedience, in respect toward the parents, and the
like for them; they simply grow up, following the patterns that they
have set before their eyes by parents, siblings, and others, without any-
one paying any attention to them.

524 The Gilyak children, like all children, enjoy imitating and
mimicking in their games the activities; work, and amusements of
parents and adults. One of the earliest, most common, and most
popular games of Gilyak children is the moving back and forth of
wooden figures which are supposed to represent dogs. It is noteworthy
that these figures, which do not remotely resemble a dog, are quite
stereotyped among the Gilyak (see Pl. LX, Fig. 6 /see p. 1260 /) and
only now and then vary in size. Whether they are made by the parents
or by older brothers of the little ones, a copy of the shape of a dog is
obviously never intended in producing them. The legs of the animal,
for instance, are not in the least even indicated -- rather it is simply
the conventionally assumed representation of a dog as a toy. Or could
it perhaps be, as one might almost suspect from its general usage among
the Gilyak, a fragment of an old conventional picture language among
them? Other animal figures allegedly likewise carved for the delight

862

862 WEANING AND FOOD TRAINING--adult beliefs, standards, and aims concern-
ing weaning and appropriate eating habits for children; special reasons for
weaning (e.g., insufficient lactation, illness or pregnancy of mother); normal
age at weaning (e.g., from breast, from bottle); abruptness or gradualness
of transition; method of weaning (e.g., separation from mother, ridicule,
application of bitter substances to nipple); reactions of children to weaning;
imposition of rules about eating; teaching of table manners; resistance of
children to food training; etc. See also:

Diet	262	Etiquette	876

854 when swung, strike one another and the cradle producing noise and a clanking sound. The same purpose is in part served by a second bundle of similar knickknacks which is hung in front of the cradle so that the child can reach for it. Underneath I also saw 854 in the village of Wassj a bundle of fine shavings, a so-called zach, 789 which evidently had a special purpose, namely, that of protecting the child against the influence of evil spirits. Finally, in a spot visible to the child in the cradle, a tschaltscha-tschngai, or, [856] more precisely, matscherlagu (children)-tschaltscha-tschngai, that is, a wooden figure with movable joints throughout (Pl. LV, Fig. 1 /see p. 1255/), carved at the time of its birth, is hung so that the child, by looking at it, may remain sound of limb and agile.

855 The great movability of the cradle enables the mother to give the child the breast without lifting it out of the cradle. Gilyak 862 mothers suckle their children a very long time, up to four or five, and even longer, and then do not stop all at once, but permit the children, even after they have become accustomed to a different diet, to come back to the mother's breast from time to time, whenever it strikes their fancy. In Nyi I saw a boy, who allegedly was five years old, but who, judging by his size and behavior, /644/ could have been almost seven, and wore both pants and the pouch underneath customary for the male sex among the Gilyak, suddenly stop his activities and run to his mother. She was sitting on the sleeping bench and was sewing; the rascal remained standing on the floor in front of her and by his impetuous 855 demands succeeded in having her give him the breast. This re- 862 minded me of what La Pérouse experienced among the Orochi in 171 de Castries Bay: there he saw a boy draw a bow, shoot an arrow very well, hit a dog with the stick, and then throw himself at his mother's breast and behave like a child of five or six months (1).

[113] 1. La Pérouse, Voyage aut. du monde /Voyage around the World/, Vol. III, p. 68. The Siberian peoples, too, suckle their children up to the age of four or five; the Ostyak, for instance (Sujef, in Pallas' Reise durch versch.

/644 cont./

855 862 113 1. (cont.) Prov. des Russ. Reichs, Vol. III, p. 53), the Kalmuck (Pallas, Samml. histor. Nachrichten über die Mongolischen Völkersch. /Collection of Historical Reports on the Mongolian Peoples/, St. Petersb., 1776, Vol. I, p. 167), the Tungus (Middendorff, Reise, etc., Vol. IV, p. 1496), and others.

855 Among the Gilyak it not infrequently happens that, in addition 862 to the actual suckling, several older children drink from the 145 mother (2). The excessively long nursing of the children is un-

2. Among the Tungus, according to Middendorff (op. cit.), it even happened that "a ten-year-old urchin quite calmly sucked from the mother the remains of the milk left by his youngest brother."

doubtedly the main reason that the Gilyak women age and decline so early. I have seen some among them who, judging by their wrinkled and ruined appearance, one would say were at least 50 to 60 years old, and yet who still nursed their children and therefore presumably were only about 30 to 40 years old. And undoubtedly this is one of the reasons for the small number of people and the slow increase of the Gilyak population.

855 Children at a later age, just as in the cradle, are not kept very clean; in fact, when they have outgrown the cradle and run about freely, the little cleanliness and hygienic care that came their way up to that time usually cease altogether. It is extremely rare to see a mother wash a somewhat older child, and, to be sure, in the manner I witnessed and described above (3) in the

3. See above, p. 222 /untranslated/.

864

864 SEX TRAINING--adult beliefs, standards, and aims concerning sex behavior in children and methods of sex training; incidence of specifically sexual behavior in infants and children (e.g., masturbation, fingering of genitals, exhibitionism, sex play); rules for the control of such behavior (e.g., imposition, inculcation, enforcement); training in sexual modesty; imparting of knowledge and beliefs about sex and reproduction; reactions to curiosity of children about sex; normal age for each aspect of sex training; reactions of children to sex training; etc. See also:

en birth to a child does not leave her place, the
; only during the most severe spells of frosty
ather is she allowed to go to the dwelling place, in
e she herself is the housewife. If she is not the
sewife she cannot expect to be taken into the house
another woman. Mishaps occurring to weak women
confinement who were left to themselves in the hut
attributed to evil spirits. In order to keep these
rits out of the "house of birth", in which one of the
st important and mysterious natural events takes
ce, a large axe is placed at the entrance of the
designed to banish the evil spirits. But this
venient and easy way of protection is not always
ficient. I recall a Gilyak called Kan coming
riedly to me for help [760] because his wife, who
compelled to do all the work in the narrow and
gusting hut, even to sewing and chopping wood,
, inadvertently, hurt his newly born son's head.
another occasion, the hut in which the wife of a
yak friend of mine was in confinement caught fire
en she had started a fire in order to warm her
lled limbs. The fact that such mishaps do not occur
frequently as one should expect is due to the
nirable strength of character and fortitude of the
yak woman who, even worn out and sick, never
es her presence of mind and her ability to work.
s the might of her motherly love which, in such
ments, increases her will power and her fortitude
degree unknown and incomprehensible to men.
Unmarried Gilyak women, fearing the disgrace
ch they would have to suffer, sometimes effect
ificial miscarriages; they use the same means
ch are said to cause natural miscarriages. But
ir skill in committing abortion is not great, for
re are many cases of infanticide.
Once in a while it happens that a Gilyak woman
es birth to a dead child; but that happens so
requently that I could not be shown a single woman
whom that had happened.
The Gilyak very much dislike talking about sexual
tters and about facts connected with them. That
robably the reason why the appearance of a new

593 inheritance. Only with relation to the daughters does the father
594 enjoy a despotic authority, regarding them as commodities to be disposed of as dearly as possible, although in practice this authority is considerably relaxed by the natural attachment of the father
593 to his children. The considerable independence of the sons is
594 determined by the forms of acquiring the means of existence.
476 For fishing with the small nets used by the Gilyak, the co-operation
[226] of only two men is required; consequently, in this respect the
[866] existence of large family households is not caused by necessity.
[224] Likewise, the hunting of the Gilyak at the present time does not
[225] require collectivism, while for the spring and fall seasons of seal hunting the Gilyak join in temporary artels, whose composition is
594 completely accidental. The practice of going to Nikolayevsk for
593 work undoubtedly has assisted in the dissolution of the large
178 family, although among the Gilyak, as among our own peasantry,
464 such employment for one of them is frequently one of the kinds of division of labor within the family. Those who go away for such work are either bachelors or members of a large family, leaving their father and brothers at home to prepare fish for the winter. In
594 any case, the separation of adult, married sons from the family
591 of the father is far from being a predominant phenomenon, espe-
178 cially in northern Sakhalin. Evidently it is of very recent origin.
[768] But at the same time the separation of the adult brothers after the death of the father is a customary phenomenon, although we should not think of this phenomenon in our sense. The brothers continue to live in one yurt, they frequently use the same equipment, but they eat apart; frequently this is the only sign of the division of the household.

593 We shall say more later concerning the economic relations of the members of a family.

It is pertinent to point out that in many respects mutual aid, as well as the feeling of kinship and attachment between members of a family in general, is more extensive and constant among these barbarians than in a civilized family.

833 daytime the favorite place for "catching" one's an'g:ej is lo-
* 835 cations where berries are gathered; in the evening -- anywhere outside of the settlement, near the well. In the winter, in the yurt: in the daytime, in the absence of strangers; at
* 835 night, after all have gone to sleep. Finally, there are periods
221 when the group spouses are free from any restrictions. The married men go for several weeks into the taiga to their hunting territories, while in the summer and winter they continually travel about on visits or to festivals. At these times
* 835 there is complete freedom for the group spouses. Only one
[521] thing is most strictly demanded: neither the participants themselves nor any strangers who have chanced to be witnesses to the relations of group spouses have the right, under the penalty of sinning, to tell anyone, no matter who, and especially the persons concerned, about such relations publicly. But these demands of non-publicity, established in the interests of peace between group spouses, with the aim of preventing possible fits of jealousy, have in no way diminished the publicity of the institution of group marriage itself, the publicity of the conjugal rights themselves. These rights
[671] have been nationally formulated in legal theses which have
• [867] come to be common property (the formulas themselves are given below in the chapter on the relations of brothers to their wives) -- theses which each father and each mother consider their obligation to impart to their children with religious solicitude from very earliest childhood. Publicly, the group spouses not only behave with unconstrained familiarity, but address each other with none other than the tender words "my
[764] dear little husband," "my dear little wife." But the publicity of group relations /170/ is manifested best of all in the case of the death of a man who is not joined in an individual marriage. In such cases, before the burning of the body, one of the group wives (usually the wife of an older brother) steps out on the funeral platform and in the hearing of all mourns for
* 835 him as for her beloved, as for her husband. It is curious to
832 note that during the negotiations between the pu and the
585

Contrib. to the Smithsonian Institute, 1885), pp. 12 passim.

intercourse are legalized, in contrast to the Gilyak marriage system, with the differentiated terms noa and piruari. According to this system, every woman is joined in individual marriage to one man, and the spouses call each other noa; but at the same time she is joined in a group marriage to a whole category of men, who mutually call each other piruari, with the characteristic distinction that persons of this category are solemnly affirmed by the high council of the tribe.

/182/ The object which these measures pursue is evidently the following: 1) to strengthen in the social consciousness the lawfulness of sexual relations for a certain group of persons; 2) to make commonly known the names of the persons of this group of spouses. Among the Gilyak the matter
[867] has not gone so far -- the tribe is too small, and every person from childhood knows very well from the words of his parents the names of his group pu and an'g:ej, and, consequently, all the rights connected with these names. Under other conditions the Gilyak would probably have developed the procedure practiced among the Dieri. The following characteristic analogies between the marriages of the Gilyak and the Dieri are also curious: 1) "a woman becomes the noa of a man, having been married to him when she was still a child" (1).

1. Howitt, op. cit., p. 811, Table IV.

2) Judging by the kinship terminology, piruari (i.e., group husbands and wives) are not arbitrarily designated by the great council, but from a definite circle of kinsmen, specifically, for the women the brothers of her husband are piruari, while for a man -- the sisters of his wife. So, by one and the same term, apiri waka, the piruari designate

/185 cont./

35 marriage, and without the instinct of sexual repulsion or indifference for persons of the forbidden categories, the majority of the prohibitive norms would lose their strength.

How were these powerful instincts, or at least semi-instincts, able to develop?

35 In the development of these instincts a powerful influence
867 was exerted by the classificatory system of kinship. From earliest childhood the little boys and girls know exactly whom they should designate by what term, and what sexual rights-obligations are bound up with those terms; thus from childhood they begin to regard certain relationships with certain individuals as something established by nature itself and as immutable. Just as our training develops sexual indifference toward parents, children, and own brothers and sisters, in the same way among the Gilyak, owing to the class terminology and the prohibitions mastered at an early age, there is developed a similar feeling with respect not only to own father and mother, but also toward all "fathers" and "mothers," toward all the brothers of the father, toward all "sisters" and "brothers," sisters of the mother, agnate cousins, etc. And in just the same way a baby knows from childhood the rights of the pu category to its an'g:ej; once he knows from childhood that every tuvn has the right to his individual an'g:ej, then when he is an adult he will be able to look indifferently enough on the sexual relations of his own wife with his tuvn and her pu. But at the same time
35 he is far from indifferent when such relations take place with
864 outsiders. Then his wrath knows no bounds: /186/ he kills an adulterer in flagrante delicto, and in other cases he furiously fights a duel with his rival. And moreover, if even his own tuvn allows himself to break the established etiquette -- non-publicity -- in his relations with his wife, he does not remain indifferent, but forces the offender to withdraw from the settlement.

/254 cont./

832 It is noteworthy that they do not evaluate beauty only
826 from their own racial viewpoint. Men and women both
609 liked /255/ Russian women. Of male Europeans, the Gilyak women even liked types unfamiliar to them, such as redheads or blonds. Thus, for example, my friend Bronislaw Pilsudski, reddish-blond, enjoyed great admiration among the Gilyak, not only because of his sympathetic attitude toward them, but in particular on account of his attractice appearance. They referred to him only as poch urakhrà -- "handsome man," literally -- "beautiful in face," and when he left Sakhalin, the Gilyak women as a farewell present dictated to him songs of declarations of love.

832 In their love songs they sing not only about beauty, but
826 also about "white skin, like the bark of a birch tree,"
533 luxuriant hair (a braid reaching to the waist, hair made sleek), gracefulness of gait ("with her head inclined to the side, smiling she walks," "with a six-foot stride he walks"), physical strength or size (his trunk is an arm-spread, "his legs go into the ground up to the shin").

832 Of course, elegance in clothing also plays no minor
291 role in the aesthetic appreciation of one's sweetheart. In
533 their love songs they sing about women's clothing embroidered with finery, about a great number of copper rattles sewn on, and so forth; they sing about men's black dog-skin fur coats, shirts made out of variegated sealskins, rich headbands of fine squirrel skins, etc. Women's summer clothing that is black in color is considered the most beautiful; men play the dandy in shirts that are sewed half of red and half of white or dark blue material. But along with outward beauty, moral qualities are also valued.

832 Women like in men the traits of manliness and reliability
577 ("thy voice is like the voice of an urdla n'ívukh'a, i.e., respected man"), or the talents of a conversationalist -- jester, singer, Aside from outer beauty, men admire in women the
[867] traits of femininity, which Gilyak women possess to a great degree both by nature and also due to early training; from

/255 cont./

832 childhood a little girl is taught to speak with a soft melodic
577 quality and to give her face a dreamy coquettish appearance.
867

A woman not infrequently succeeds through her talent for
832 singing. In their songs the women are capable, not only of
533 expressing their love with great delicacy, but also of ridiculing
626 unwanted suitors most maliciously. In her sarcasm the woman does not stop at any hyperbole. In one song the nose of the undesired one is compared to open patches of water in a frozen surface, to an open door, and his clothing, his dogs, his harness, etc. are described in similar tones.

839 /256/ Sexual Abnormalities and Perversions. I asked the Gilyak many times if such sexual perversions as pederasty and bestiality were practiced among them. No one, apparently, had ever heard of any cases of pederasty. As for
[158] bestiality, only in one village on the Tym' was I told, and then with disgust, of one psychically sick Gilyak who had
839 copulated with a dog. The attitude of the Gilyak to these
529 perversions is made clear by the following legend, which I wrote down on the Amur. The tiger, the panther, and even the lion (?) were once men. Once, by chance, the god Kur saw that they were copulating through the rear orifice. Then in indignation he said: "Well, since you copulate like beasts, henceforth be ye beasts forever." Thus, in the view of the Gilyak, the above-mentioned perversions are acts which make a man like a beast.

143 The Gilyak have an extremely simple attitude toward
826 hermaphrodites (miskund in the eastern dialect, miskij -- in the western dialect), in whose peculiarities they apparently see a plain anomaly, but feel no abhorrence for them and
[588] are glad to have sexual intercourse with them. Marriages of hermaphrodites are a common event.

/257 cont./

143 that he began to wear men's clothing, got married, and now
826 is the foremost hunter of the vicinity. Normally he lives
588 with his wife, but sometimes copulates with men. He considers the latter more pleasurable and speaks of himself with pleasure: "I have two chances, two joys." All treat him as an urdla n'ivukh. In all I was able to count five such cases among the Gilyak, the number that Bogoraz found among the Chukchee.

881 The Gilyak have no special rites at the time of attain-
[302] ing sexual maturity. The only outward sign for a maiden who has attained sexual maturity is that she begins to plait her hair in two braids. The moment of the onset of sexual maturity for a maiden is considered the menstrual period, which ordinarily begins in the thirteenth or fourteenth year.

881 This moment is considered the beginning of marriageable
826 age, although the proper term for a woman who has attained sexual maturity is the expression -- "a woman who has seen her body," i.e., whose breasts have grown to the point when she can see them. A similar term exists for men -- "a man
[302] has seen his body," but in this case the word "body" refers to the mustache.

881 Some time before the onset of menstruation the mother
867 prepares her daughter for the approaching change in her life and instructs her in all the necessary rites and taboos con-
881 nected with blood. The Gilyak, both men and women,
585 fully recognize the significance of menstruation as the mark
833 of sexual maturity and do not have sexual intercourse before its onset. Adult Gilyak frequently marry little girls and from the first day sleep with them under one covering, but do not begin sexual intercourse until the wife informs her husband of the onset of the first menstruation.

VII.

Miscellanea

148 The exploitation of the Sakhalin natives by the Russians (Gibel'ka's
149 story). The merchant Ivanov sorely abused the Gilyak, Ainu, Orochon, the Amur Gilyak; he ruined the Tymovsk Gilyak and others. He forced people to buy packages of tobacco and then took two or three sables per package. /342/ He collected debts by force, breaking into the storehouses, breaking trunks, holding in one hand a revolver and a dagger. He used to give some kind of okht to women (see above, p. 480, "Women, Childbirth, and Children"), and they slept with him. Then he became rich.

But the god did not forget all his deeds. Once his son went boating on the Amur and drowned. The Gilyak in Pronga recognized the cast-up body and informed the mother. But when she arrived the body was gone; she saw only the tracks of a bear. By these footprints she reached the place where the bear dealt with its prey. Only a gold ring was left at the scene of the feast. The mother cried and cried and went back. Ivanov himself, not yet an old man, began to pine and to lose weight; no medicines helped. Finally he died. The Yakut Semenchuk was one of those who dug him a grave on the cemetery hill. But the hole filled with water, and, no matter how they dug, the water kept increasing. This was the tears of those people whom he had abused. These tears do not disappear. Alongside of it a grave was dug for another, a poor person, and it was without water.

● 867 A good father teaches his son not to abuse anybody, not to laugh at anybody.

567 Slaves -- krygrys (1896). In Kuklyakh (?) a krygrys was exchanged for a woman. In Vaydakh -- a krygrys, Khyumik, a limping woman; she was beaten and beaten, everyone ordered her about, "She did not have time to eat"; one could not sleep with her, for no one wanted to have krygrys children. There were krygrys also in Tengakh, Tevakh, Kutr. The atx (see p. 222, IV) of Gibel'ka had krygrys.

814 is a basic and inviolable principle of the clan. However broad the marital rights of the Gilyak are with regard to women of the categories mentioned, however broad the views of the Gilyak are on the relationship of men and women in general ("love forgives everything"), within the clan neither marriage nor adultery is encountered, even as an exception.

3. The wife of a deceased Gilyak is transferred, following
614 the decision of the clan, to one of the nuvn of the deceased,
580 generally to a younger one; even though she be assigned to a nuvn who is older than the deceased, he is obliged to support her, although he cannot live with her as with a wife. But under no circumstances can the wife of the deceased pass to the persons in the ascending or descending line of kinship from the deceased, i.e., to his khal'-ytk, atk, ola. Generally speaking, as a rule, a woman living as a wife (de facto), with someone may under no circumstances belong to anyone in the ascending or descending line of kinship with her first husband. This rule is observed as strictly as the prohibition against internal marriage. Therefore,
614 it is easy to understand why a Gilyak looks on many marriages
[324] concluded among us between near relatives as incest. From this it follows that it is of the utmost necessity for a Gilyak to know all his clansmen, who are often very numerous and, in addition, scattered over the most distant parts of Gilyak territory. This knowledge of his own clan constitutes one of the elements of the mental upbringing of a Gilyak. This knowledge passes from
● [867] father to son, it is renewed with life, and is the possession of the
[323] whole clan. In doubtful cases of kinship, the questions are decided by the elders in the clan.

614 4. The khal' supports all the old people, the sick, the in-
173 capacitated, and other helpless persons. Generally this is done by the nearest kinsmen, but, in the absence of such, the person is supported by that yurt of the khal' where he wants to live. "We do not have any beggars," one Gilyak told me, "if someone is poor, he is fed by the khal'."

/304 cont./

685 for your master!" And thus /305/ they go around the entire vil-
754 lage, meanwhile pulling on the tendon. Then the thief begins to suffocate from fright and confesses. A shout goes up; it happens that the thief dies from it.

687 An oath is taken also in controversial matters. Before the
695 court, in a balagan where the khlaj-niŷukh sits, nothing is allowed to be boiled; they eat raw yukola.

A stick (kyt) -- about an arshin in length with a human chkhnaj.

If the matter reaches the point of breaking the stick, then they pay more -- double. Both big and little assemble in the balagan of the khlaj-n'ŷukh'a (the settlement of Karga, 1896).
● 881 Women, Childbirth, and Children. A maiden who has reached
30 sexual maturity makes two braids. Women pierce both ears in
178 order to put in earrings (mer'kh); formerly men also pierced their
881 ears. A wife who is a minor can be slept with only after she be-
585 gins to menstruate. During menstruation the woman puts on her
841 oldest clothes and does not sleep with her husband. Women wash
[302] themselves, but not with hot water, for otherwise the tŷgurmam (the mistress of the fire) takes offense.

171 Among the Kekhal (Orochi) a man who has two wives ac-
834 commodates a guest under one blanket.

842 A pregnant woman must not look at the Amur when it be-
842 gins to break up, in order not to slow up the opening of the river.

They give birth in the balagan (midwife -- langyv-mam)
844 in winter the mother spends one and a half days in it, in summer -- three days.

84 One must not cry out during delivery -- a sin. The husband at this time does not go anywhere. If a child has died during birth, the woman must not travel on the river or sea for a whole year -- there would not be any fish. For a month before childbirth, it is not permissible to bind anything tightly or to drive in stakes; it is not permissible to repair anything for an alien.
[789] During difficult deliveries they open up boxes, tear off patches, and unscrew their rifles. The newborn baby is washed with cold water. The midwife is not paid. Until the umbilicus heals, the

882 STATUS OF ADOLESCENTS--cultural definition of adolescence (e.g., age limits); beliefs and attitudes about adolescents; prerogatives and disabilities of adolescents; relaxing or tightening of social control for each sex; residence shifts at puberty (e.g., removal of boys to men's house or to home of a grandparent or maternal uncle); readjustment of social relationships, etc. See also:

831 words signifying "my man, my woman," -- n'az'mych,
[192] n'arr'kh. The Gilyak themselves consider love a normal stage of life which everyone must experience in his youth. This view is very well conveyed in a song which I noted down on the Amur, in which a girl, complaining of her mother's nagging about her passion, sings:

[539] Mother, mother, dear mother,
Has thou forgotten thine own youth?

(Literally: "Thou hast forgotten thine own past time, let me be!")

831 Parents, however, never reproach their children for their
● 882 amorous passions. When the youth do hear the grumbling of
573 their elders, it is most often due to purely economic considerations, since during the period of passion the young people neglect their work and become careless and inaccurate. In general it is not even permissible to react in any way to the sexual passion of the children, maidens included. If the
[684] father or brother finds out about the fornication of his daughter or sister, he not only may not use force against the seducer, but it is even forbidden to summon him to a duel, and he may not even be angry with the daughter. They treat the amorous passions of the children as a perfectly natural phenomenon. The mother in particular is often even the confidante of the amorous secrets of her children. In many
[533] songs which I noted down on the Amur, sons constantly address their mother, sharing with her their amorous suffer-
ings, seeking advice on how to find their beloved. Serious remonstrances by the parents, active remonstrances
[835] going to the point of pitilessness, are encountered only in
[762] the case of love for a person of a forbidden category. In such cases, the parents themselves urge their daughter to
584 commit suicide. Often the pitilessness of the parents, mainly
573 of the father, becomes manifest when love frustrates an advantageous marriage, one which has been agreed on since

883 ADOLESCENT ACTIVITIES--behavior patterns characteristic of adolescents (e.g., dating, loitering); economic activities expected of adolescents; adolescent organizations (e.g., work groups, cliques, bachelors' clubs); adolescent recreations (e.g., expeditions, picnics); adolescent problems (e.g., reactions to social pressures for adult behavior); etc. See also:

/183 cont./

83 group sexual cohabitation is legitimately practiced on a large
83 scale. When reproaches were sometimes directed by older
86 persons at younger ones for sexual excesses, it was only on account of economic considerations, since sexual diversions
83 frequently distract youths from work at home. Reproaches were
*835 also directed at pregnant maidens, but here the considerations
843 were of a special nature, about which we spoke above: 1) the danger of a connection with persons of the forbidden categories, and principally, 2) the anonymity of the father of the child. But ordinarily the adventures of the youth are no
83 secret and do not give rise to reproach. It is a perfectly
● 883 ordinary phenomenon for young men to set out for a visit of several months' duration to the settlements of their "fathers-in-law," where there are so many an'g:ej maidens at their disposal, and the older generation not only does not oppose this, but is very happy about it. As we have already said, an unmarried yŋgıl (son-in-law /yŋat'/) is a most desirable guest in the house. "One is obliged to feed an "yŋgıl" (son-in-
85 law)" (see p. 249). Women and even maidens yield little to
842 the men in laxness of attitude toward what we call sexual
83 morals. It is only necessary for them to be more careful
*[835] especially when the matter concerns persons who are not of the class pu, and for this reason they always affect an appearance of the strictest inaccessibility, but in reality they are
83 just as loose as the men. And yet, in view of all this, to say
836 that the Gilyak is devoid of a feeling of sexual morals would be the greatest injustice. Actually the Gilyak give free rein to their instincts only within socially permitted limits. And, on the other hand, what the norms do not allow, for example, reactions of jealousy with respect to one's nuvn, and especially sexual intercourse with persons of forbidden categories, is observed with a very great rigorousness completely unknown to us, and this notwithstanding the fact that the prohibitions on sexual intercourse often have in their favor neither physiological, nor psychic, nor any other kind of reasonable basis, such as, for example, the prohibitions between the
880 most distant agnate male and female cousins. During

VII.

Miscellanea

648 199 The exploitation of the Sakhalin natives by the Russians (Gibel'ka's story). The merchant Ivanov sorely abused the Gilyak, Ainu, Orochon, the Amur Gilyak; he ruined the Tymovsk Gilyak and others. He forced people to buy packages of tobacco and then took two or three sables per package. /342/ He collected debts by force, breaking into the storehouses, breaking trunks, holding in one hand a revolver and a dagger. He used to give some kind of okht to women (see above, p. 480, "Women, Childbirth, and Children"), and they slept with him. Then he became rich.

But the god did not forget all his deeds. Once his son went boating on the Amur and drowned. The Gilyak in Pronga recognized the cast-up body and informed the mother. But when she arrived the body was gone;. she saw only the tracks of a bear. By these footprints she reached the place where the bear dealt with its prey. Only a gold ring was left at the scene of the feast. The mother cried and cried and went back. Ivanov himself, not yet an old man, began to pine and to lose weight; no medicines helped. Finally he died. The Yakut Semenchuk was one of those who dug him a grave on the cemetery hill. But the hole filled with water, and, no matter how they dug, the water kept increasing. This was the tears of those people whom he had abused. These tears do not disappear. Alongside of it a grave was dug for another, a poor person, and it was without water.

● 867 A good father teaches his son not to abuse anybody, nor to laugh at anybody.

567 Slaves -- krygrys (1894). In Kuklyakh (?) a krygrys was exchanged for a woman. In Vaydakh -- a krygrys, Khyumik, a limping woman; she was beaten and beaten, everyone ordered her about," "she did not have time to eat"; one could not sleep with her, for no one wanted to have krygrys children. There were krygrys also in Tongakh, Tevakh, Kutr. The atk (see p. 222,IV) of Gibel'ka had krygrys.

/354 cont./

614 2. Marriage within the clan is absolutely forbidden. This is a basic and inviolable principle of the clan. However broad the marital rights of the Gilyak are with regard to women of the categories mentioned, however broad the views of the Gilyak are on the relationship of men and women in general ("love forgives everything"), within the clan neither marriage nor adultery is encountered, even as an exception.

614 587 3. The wife of a deceased Gilyak is transferred, following the decision of the clan, to one of the ruvn of the deceased, generally to a younger one; even though she be assigned to a ruvn who is older than the deceased, he is obliged to support her, although he cannot live with her as with a wife. But under no circumstances can the wife of the deceased pass to the persons in the ascending or descending line of kinship from the deceased, i.e., to his khal'-ytk, atk, ola. Generally speaking, as a rule, a woman living as a wife (de facto), with someone may under no circumstances belong to anyone in the ascending or descending line of kinship with her first husband. This rule is observed as strictly as the prohibition against internal marriage. Therefore, 614 [829] it is easy to understand why a Gilyak looks on many marriages concluded among us between near relatives as incest. From this it follows that it is of the utmost necessity for a Gilyak to know all his clansmen, who are often very numerous and, in addition, scattered over the most distant parts of Gilyak territory. This knowledge of his own clan constitutes one of the elements of the ● [867] mental upbringing of a Gilyak. This knowledge passes from father to son, it is renewed with life, and is the possession of the [623] whole clan. In doubtful cases of kinship, the questions are decided by the elders in the clan.

614 173 4. The khal' supports all the old people, the sick, the incapacitated, and other helpless persons. Generally this is done by the nearest kinsmen, but, in the absence of such, the person is supported by that yurt of the khal' where he wants to live. "We do not have any beggars," one Gilyak told me, "if someone is poor, he is fed by the khal'."

868

868 TRANSMISSION OF SKILLS--acquisition of language; teaching children to walk and swim; techniques for inculcating manual dexterity and technological skills; teaching and learning of economic skills appropriate to each sex; informal instruction in occupational skills; acquisition of artistic skills (e.g., playing of musical instruments); relative importance of imitation, practice, and instruction in the transmission of skills; etc. See also:

respectful attitude toward the bear which I mentioned earlier.
796 Furthermore, with regard to the fact of the ad hoc feeding of
23 the bear, this at first sight may not at all appear to an ele-
ment of a religious nature. In hunting, the Gilyak on some
occasions may catch young animals, and whenever he finds
it profitable, he feeds them; thus, he feeds the fox for its fur,
and young eagles for their feathers. Similarly, it is disad-
vantageous for the Gilyak to kill a bear cub, and he prefers
to feed it in order to obtain later a huge carcass of meat and
an enormous skin. Furthermore, there is nothing more
natural than the need to use the killing of the bear for
a solemn occasion like the celebration of the funeral feast
[826] for a close person. By the way, the feeding and the killing
[826] of a bear is an excellent means of education for the youth.
who from childhood become accustomed to the most terrible
animal of their taiga, learn not to fear it, and study its dis-
position, its strength, and its weaknesses. The procedure for
getting the bear out of its cage is a simple rehearsal for getting
it out of its lair.

796 Nonetheless, it is not these crude, utilitarian motives that
825 play the major role in the Gilyak's expensive, wearisome,
and prolonged care in feeding a bear. He is governed here by
other motives, perhaps also utilitarian, but of a quite differ-
ent order. As we have already seen, in the eyes of the Gilyak,
the bear is a creature sui generis. No matter what creature is
concealed under the hairy covering of the bear, a divine
clansman of the master of the mountains, a mountain man, or
a real animal sent as a present to the Gilyak by its master, in
any case he is a creature of a higher order, more powerful,
and superhuman strong. The presence of such a being for a
long stretch of time in their native settlement, according to
the view of the Gilyak, who is convinced of the constant
conspiracies of crowds /69/ of evil spirits eternally threaten-
ing his life and health, must be extremely beneficial. The
presence of this mighty creature, like a very strong disinfectant,
must kill and drive away any insidious spirit. It is not by

Kreinovich--6 E-5 (1931) 1934 Gilyak

25 but the better one among them sits at the bow. The hunters
76 must often get out on the floes for it is not always convi-
54 ient to get within shooting distance of the seals in a boat.
61 If there is an extra man in the boat, if, for instance, there
25 are five oarsmen, one pila:and one other man, then the pila:
76 -if he is the oldest man in the boat - sits at the stern without
61 doing anything, and his junior takes over the rudder. The
85 Gilyaks illustrated this point to me by the following example:
if Xitkun and Kaun are among the hunters in the boat and if
both are older than the rest of the hunters, than Xitkun, as the
oldest, would sit at the stern and do nothing except for giving
orders and Kaun, who is Xitkun's junior, would take over the
rudder. If, on the other hand, Tujun, Xitkun, Pi:skuk and
Kaun and younger hunters set out in a boat then Pi:skuk and
Kaun, who are younger than Tujun and Xitkun, are at the oars,
Xitkun takes over the rudder and Tujun, as the oldest of them
all sits at the stern. It happens that the pila: is younger than
the extra man in the boat. In that case the pila: tends the
rudder and the extra man sits at the stern. I personally know
of such a case. Pila: Norp took along with him in the boat
old man Onkan who sat at the stern and did nothing while
Norp tended the rudder. When Norp was at the bow shooting
at the seals and:t, to whom Norp had turned over the steering
oar, tended the rudder, Onkan again sat at the stern. Jesting
about his work Onkan said to me: "I was sitting with-
out doing a thing, but I got my share." I found out from others
that during the hunt he helped build the campfire and prepare
food. He also seems to have helped with some other things;
which is why he was taken along. Unfortunately, I was unable
to clarify this point to any great extent. I simply had no time
in which to do that. It seems that Onkan performed a number
of functions which did not tax his strength and, in this manner,
he made the rather heavy work of the hunters easier.

Incidentally, the facts given above illustrate with a sufficient
degree of clarity the role of older people among the Gilyaks.

5 [82] As mentioned above the pila: performs mu-ziv:d
9 and t-ka:.

Mu-zi:d is performed at the stern of the boat. Two short
1 sticks, the thickness of a match are driven into the stern
board. The distance between them is approximately two fin-
gers. Then they tie a thin thread made of nettle fibres
around the sticks. The Gilyaks usually perform this on hands
of children. They believe that a thread made of hair of a dog
and nettle fibre and tied around a child's hand protects the
child from illness. The fact that the Gilyaks perform

and other objects. In the second case the adversaries fight it out
with cudgels until one side admits defeat. The Gilyak are most
[868] proficient at wielding cudgels. The Gilyak study this art from
[859] childhood, and the children give themselves up with passion to
this noble exercise, even by moonlight on frosty winter nights.
628 In their civil relationships, as a general rule, the Gilyak display
248 veracity, fidelity to their word, and conscientiousness. /384/
197 Unfortunately, the destructive influence of the rascally popula-
tion of the Amur region has begun to extend even to the most
remote Gilyak settlements. A few individuals imbibe wisdom
at Nikolayevsk, and it is enough to ensnare whole settlements in
deceit and to breed imitators and a whole mass of interminable
lawsuits. The court and mediation of the clansmen, still exerting
authority within the clan, are becoming powerless when the
quarrel is between members of different clans. The Gilyak have
the custom of turning to a mixed assembly of "khlay-nivukhi"
of different clans for a resolution of mutual disputes. But at the
present time this institution is losing its strength, since the Russified
[878] Gilyak, who are simultaneously the chief culprits of dissension
and lawsuits, deny to it respect and competence. The Russian
administration is going to impart authority to this court of "wise"
and honorable men by sanctioning the "khlay-nivukhi" by election,
regulating the time of the meetings, the area of their authority,
etc. And a first condition is that the "khlay-nivukhi" be of vari-
ous clans. Observation has shown that the Gilyak are able to elect
men intelligently and to appreciate the importance of the elected
court sanctioned by the Russian administration.

V

Statistical Data

12 In conclusion, in order to provide some idea of the num-
28 ber of Sakhalin Gilyak and to present their economic status more

/645 cont./
521 and entertainment of the children, for instance, those of the carp
(Gilyak pilengat, Pl. LX, Fig. 5 /see p. 1260/), bear a quite dif-
ferent character, because they reveal an attempt to give a really
857 similar picture of the animal. As soon as the boys are able to
868 romp about freely, they amuse themselves by shooting with small
bows and arrows at a target or at imaginary animals, by traveling
on small sleds with the whelps, or by faithfully imitating all the
manipulations that they see the adults execute with bears, for
which one boy represents the bear and behaves like it, but the
others try to pull it, subdue it and lead it away, etc., precisely
as is done during the processions with the animal at the bear
festivals. Very soon they are also taken along by the father or
older brother to set up or inspect the animal traps in the woods,
for fishing, and the like, and they learn from them the pertinent
techniques and in general what to do or to avoid. No less do the
girls in their games and occupations imitate their mothers and
older sisters and are soon capable of helping them in the handi-
crafts and all the operations in the household.

595 In a polygamous marriage all the wives live in the same
house with the husband, and each of them has a certain section
of the sleeping benches for herself and her children. Legally the
wives are completely equal and are obliged to care for the
[593] household jointly. But as a rule the division of labor is not com-
pletely equal among them, since one or another of the wives is
almost always favored by the husband, and only the lighter work
falls to her, while all the heavier work must be performed by
the others. It is by no means the case, however, that the last-
purchased or the youngest wife is always the favorite, for some-
times, as Junchin and other Gilyak told me, the man may take
a second or a third wife simply in order to make life easier for
the first wife or for one of the two he already has /646/ by giving
a new and able worker by her side. Whether he achieves his goal
depends, however, on whether and how the wives accommodate
themselves to the new arrangement and get along with one another.
For no matter how little jealous they may be, the peaceful

784 from young hunters and women the fact that the old hunters
225 who play a leading part in the hunt appropriate the tastiest
183 parts of the quarry under the guise of religious interdictions.
125 Taboos regulate the relations between the old and young
252 784 hunters as well as the relations between the male and female
552 parts of the clan.

Thus, in the very same year of 1931, in the village Ch'arvak
848 (Charbakh), the old Gilyak Kozin and Ch'isk (Agiska) informed
883 me of interesting taboos pertaining to a number of objects
526 used by children in their games.

A boy must not play with a yoke or with a board used by
women in cutting leather and cloth (tans-k-i:mr). Also, a child
must not play with a woman's cutting knife (ian-dagd).

"When I was little Kozin told me, old men would not permit
to put a yoke on a boy's shoulders. That was Uit ('taboo,'
'sin'). If a boy hit the legs of another boy with a yoke or a
cutting board, then when he grew up and went hunting in the
taiga, he might not be able to walk well." Agiska told me that
he will have no luck in hunting.

Agiska told me that a girl should not play with arrow, bow,
or spear, for these implements will not bring luck (in local
Russian - farta). If a woman or a girl were to step in-
advertently over a spear or arrow, the arrow will not go deep
into the body of the bear and will not stick. That is why girls
are not supposed to play with those implements.

These taboos indicate that already at an early age children
are prepared for definite tasks; that boys must not - if only in
play - have anything to do with implements used by women in
their tasks and that, conversely, girls must use implements
used in their tasks by men. These taboos are seen to legiti-
mize for both men and women, virtually from the time of
birth, the distribution of labor existing among the Gilyaks.

462 [88] The women of a clan perform the most onerous work which
614 from the point of view of men, is least respectable. Until
recently it was the slaves who did this work for the Gilyak
rich. The women must carry water, chop wood, feed the dogs,
row (notwithstanding his wife's advanced stage of pregancy,
the husband tends the rudder; the man is supposed to tend the
rudder and the woman to row; the opposite would be disreput-
able and inadmissible for a Gilyak hunter), prepare food,
make clothes, shoes and perform a number of other onerous
tasks some of which are regarded as detrimental to the dig-
nity of a hunter.

The males of a Gilyak clan are hunters, providers of food.
They procure food for the whole clan. They procure fish, bear

854 Nursing infants are bathed twice daily, but, on the other
515 hand, larger children are seldom bathed. Adult Gilyak
302 consider bathing a luxury; some never do it and leave it to
chance, if they are caught in the rain or fall in the water;
some, however, wash occasionally, even with soap which
they buy from the Russians. They comb their hair with a
wooden (Chinese) comb and at the same time rub it with fat
and hunt for lice. They do not by any means comb their
hair every day.

854 Children nurse for about two years. Tiny babies are kept
in a cradle which stands on the floor, but as soon as they are
three to four months old they are placed in a trough-like bed.
The little trough is open at one end and somewhat pointed;
on the other end it has a hole in the bottom. The [130] child
is laid with its back against the bottom, its head against the
open end; it is tied down and the whole thing is hung up slant-
wise. The hole serves as a conduit. When the mother
leaves the house for a longer time, she ties this cradle to
her back.

● 868 When the Gilyak lad no longer needs his mother's care,
276 he begins to accompany his father on trips and thus gradually
147 learns what he needs for his life. Many children even smoke
but all fathers do not permit this. (1)

1. The disciples of a one-sided etiology of disease might cite the Gilyak as living examples of the harmlessness of tobacco:this race is on the average healthier than civilized man, their teeth are white and strong, and yet both smoke from childhood. Nevertheless, this would be a false inference: a single given cause always has a different effect according to the mode of living in general. Thus, for instance, the effect of a strong cigar is very different if one smokes outside in cold weather or sitting in a warm room doing head work. In the latter case it will soon lead to nervous palpitation. Furthermore, the organic constitution with which a person is equipped must be taken into consideration. Civilized man would have to live through the tests which the Gilyak endures at birth in order to be compared with him.

855 The parents are tender and indulgent with their children.
524 The children are kissed by their mothers, licked with saliva,

Playing a wooden percussion instrument.

The wooden religious sculpture was akin to that of the Orochi, Ulchi 532
and Nanay. The figurines of bears on dippers and spoons used in the 525
bear festival were finely made and realistic in style. The bear dippers 101
were often remarkable in their craftsmanship. Some of them were carved
with pictographs, relating the history of the hunt or rearing of a given
bear. The carvings on the dipper handles were also symbolic; they
indicated the sex of the whole village, if the bear was killed in a hunt
or reared in captivity, whether it was killed in the summer; and so
forth.

The musical culture of the Nivkhi was very poor. They played a 534
primitive one-string instrument (ngyrgyd) and a jew's-harp (kazagyd). 796
During the bear festivals they used, instead of musical instruments, an 871
ordinary log, which the women struck with sticks. ● 842

Education was entirely lacking among the Nivkhi before the Revolu-
tion. The Nivkhi-Nanay alphabet written in the 1880's by the missionary,
Protof'yakonov, was not used by the Nivkhi.

In 1895 an elementary school was opened in the city of Maritisk; two
others were opened in 1905. By 1908 they were closed for lack of funds.
Only a few individual Nivkhi attended Russian schools.

871 EDUCATIONAL SYSTEM--degree of development and elaboration of formal education; prevalent types of educational specialization (e.g., schools, tutors, apprenticeship); source of support of teachers and educational institutions (e.g., fees from students, ecclesiastical aid, private gifts and endowments); systematization of education (e.g., local school boards, state educational agencies, voluntary organizations of educational administrators); degree of standardization as to levels, policies, and curricula; primary objectives of formal education (e.g., piety, morality, citizenship, vocational skills, intellectual leadership); diffusion of education (e.g., educational statistics), etc. See also:

2; Schrenck--1156 E-5 (1854-1856) 1881-1895 RX2 Gilyak RX2

/715 cont./ At this window,
*796 after the bear's head has been carried through, a representation
552 of a toad (Gilyak mintuch), cut out of birch bark, is pasted from
826 the outside onto the thin fish-skin pane that replaces the glass (see
the woodcut, p. 1157), while in the interior of the house, on the
adjacent bench of honor, there sits a figure which is supposed to
represent a bear in Gilyak clothing (Plate LVIII /p. 1258 /, Fig.
3) (2). The significance of this symbolic act seems to me to be

somewhat as follows. The toad, an animal that has the worst
reputation among the Gilyak and is often represented independently
as well as in connection with the bear and the bear festival (3),

3. See, among others, Plates LI /p. 1251 /, LIX /p. 1259/, LX /p.1260 /, LXI /p.1261 /, which will be discussed in the text.

is regarded as an evil spirit and the actual instigator of all the mis-
fortune that happens to the bear through its capture, death, and
finally, consumption. It is the scapegoat upon which the Gilyak
heap all guilt and responsibility for their actions against the bear,
and it is therefore not admitted into the festively decorated house,
but remains /716/ outside of it stuck to the window, where it may
witness its misdeeds. The bear, on the other hand, is greeted as a
welcome guest by the participants at the festival and, as an equal
(hence the clothing) is given a place on the bench of honor. Fur-
ther proof of the correctness of this interpretation, which I can ex-
press only as a conjecture, will be given in the following. /Illustra-
tion appears here./

*796 Immediately after the feeding of the dogs, which even on this
252 day takes place in the house in spite of the festive decorations, the
work of the day begins -- the cooking of the bear meat in the
[838] hearth concerned. This work is given to only the oldest men, the
[839]

/716 cont./

Toad made out of birch bark.

*796 graybeards, as a high port of honor; the women and girls, the boys
252 and youths are excluded, and it therefore proceeds very slowly,
[838] deliberately, and, so to speak, solemnly. First the kettle in the
[839] fireplace was surrounded with a thick wreath of wood shavings, and a
similar half-wreath was spread in front of the vent hole. Then the
[789] kettle was filled with snow for it is plain to see water for cooking
bear meat, and the fire under the kettle was kindled with shaving and
fir branches, with the latter also used for incense from time to time.
Simultaneously a large wooden trough was hung on straps directly
under the bears' snouts so that it hung about three feet above the floor.
[832] The trough was richly decorated with all sorts of arabesques and
figures and in particular on one side showed a bear carved in relief and
on the other side a toad likewise executed.

[839] The work of the old men proceeded so slowly that it was not
until toward evening that they began to cut up the meat of the legs
and feet. Each leg was first placed upon the fir branches in front of
the bears, as though to ask first for their permission to prepare it; only
then was it cut up and put in the kettle. The cooked pieces were
fished out of the kettle with an iron hook and transferred to the trough

2: Schrenck--1158 E-5 (1854-1856) 1881-1895 RX2 Gilyak RX2

/716 cont./
*796 hanging in front of the bears so that they taste them first. Besides
252 the elders, only a dog remained in the house, and, to be sure, so
it appears, only to lick clean the implements used in the cooking
and the transfer to the trough.

Early in the morning on the following day (January 28) the
*796 old men started their work of cutting up and cooking the meat.
412 which was interrupted only by the usual feeding of the dogs in the
[252] house and a race beforehand with specially decorated animals
[887] dragging behind them only the tail of a fox or dog, as was men-
tioned above. Next, a number of articles were brought in from
the storehouses, /717/ all of which were hung or otherwise attached
to the bear rack in colorful confusion: pieces of fur and the skins
of paws of bears killed bears; the skins of chains with which they were
led while alive, dried bear-penes wrapped in birch bark, knives
which at the point of attachment of the blade have a bundle of
hair from the bear's penis region around them, the so-called uing-
dthakko of the Gilyak, with which it is ulisch to cut anything other
than bear meat and fat (see Plate LI /p. 1251/, Fig. 3), and a
number of nicely carved spoons and peculiarly shaped bowls. The
[415] latter were put to use immediately, being filled with the broth ob-
[264] tained from the bear meat, which was sipped either directly or with
the help of the spoons. This service, used by the Gilyak only when
consuming bears, is very interesting and deserves a more detailed
discussion.

*796 The bowls called nichvy-ngir or nichyy-ngith, i.e., bear-
412 spoon bowls, are made in Gilyak after the bear (nichvy), are always
[415] carved out of a single, often quite long piece of wood, which about
[264] in the middle or near the one or the other end has either a rather
deep or only a shallow oval hollow (Plate L /p. 1250/, Figs. 1 and
2). The former are specifically intended for eating the bear-meat
broth, the latter (the same piece, Fig. 3) for the bear meat or fat.
What makes these bowls especially interesting, however, is that
sometimes the one, sometimes the other end of the piece of wood,
and sometimes both the front and the handle ends, are provided
with various carvings referring to the bears and the bear festival.
The latter are also found in profusion on the handles and sometimes

2: Schrenck--1160 E-5 (1854-1856) 1881-1895 RX2 Gilyak RX2

/718 cont./
*796 just as it would be extremely uitsch if one wanted to fry, not only
259 bear meat, but any meat at the one or the other hearth, for the
[789] bear would hear the sizzling of the frying meat and would be
[263] frightened. When it was thought that the bear meat was done, the
broth was scooped out in a forementioned bowls and drunk, but
the meat was placed upon fir branches under the étagère and
covered with the same. Not until evening was it put into the
trough hanging in front of the bears' heads. Moreover, toward
[782] evening, six of the largest sturgeon and hausen, one of which was
about eight feet long, were brought into the house and placed in
front of the bears; they were offered to them as a sacrifice and
were intended for the forthcoming feast.

In the morning of the following day (January 29) the old
*796 men resumed their work in front of the bear hearth. The young
[887] people were likewise busy, with some of them bringing in addi-
[851] tional firewood, others going into the nearby mountain forest in
order to bring from a storehouse for bilberries, which the women
had erected there in the fall, the supply required for the festival.
*796 In the meantime the dogs were fed, except for those 14 animals
22 which Judin had selected for a bravura ride on the river. They
541 were decorated with the above-mentioned red-tasselled collars
and harnessed to a small, prettily decorated sled which was driven
by its owner himself. The drive, amid loud drumming by the
women, proceeded at top speed, first down the steep bank to the
river and then on a leveled course along the latter, and ended
without a mishap amid the wild applause of the assembled throng.
Only then were these dogs given their meal in the house, while
the people enjoyed the bear-meat broth.

*796 In the afternoon, the old men began to cut the bear fat
252 into long strips which, decorated with wood shavings (zach) and
fir branches, they likewise hung in front of the bears' heads,
and not until shortly before complete darkness did they take them
down again to put them in a small trough decorated in the same
way and placed on the floor in front of the bears. In the mean-
time, more life and commotion had entered into these prepara-
tions for the feast: some young men began to cut up the six

4; Ivanov et al. E-4 (no date) 1964 RX2 Gilyak RX2

225 of a small boord equipped with a harpoon-tip, attached to a stick from 10 to
30 meters long. The lykh was lowered into the water; the hunter had himself
nearby in his boat or on the shore. When he caught sight of his quarry, the
hunter carefully directed the lykh at it and quickly drove it into the animal.
As compared with its role among other Amur peoples, hunting played a
smaller part among the Nivkhi. The hunting season began in autumn, after
the end of the fish-runs. At this time bears came down to rivers to treat
themselves to the delicacy of fish, and the Nivkhi availed them with bows or
guns. Sometimes they set crossbows for them. In winter, they hunted bears
with spears. The bear season was followed by the sable-hunting season.
Sable and certain other fur animals (otter, lynx and marten) played an im-
portant part in the Nivkhi economy. The Amur Nivkhi went out every autumn
in their large, heavy boats made of boards, to hunt sable in Sakhalin, returning
from there only in early spring. This was due to the abundance of sable
on Sakhalin. The Nivkhi set numerous traps along rivers and on fallen trees
which served the sables as crossings.

The main weapon in hunting was the gun, which in the early 20th century
204 replaced the compound Nivkhi bow with its horn covering. However, the bow
[187] was preserved in the bear festival and in children's games. Squirrel and
[178] foxes were hunted with dogs. Crossbows were set for both small and large
[184] animals.

214 Agriculture already began to appear among the Nivkhi at the middle of
the 19th century, when they first learned to plant potatoes. Individual Nivkhi
had carried goods in the past and hired out for work in other capacities.
326 Already, before the advent of the Russians, there were expert smiths in
some of the villages, who refurbished Japanese, Chinese, and later Russian
metal articles for their own needs; they made knives, straight and curved,
adapted to wood-carving; arrowheads, tips for harpoons, spears, and so
forth. The smiths used double bellows, an anvil and hammer. Pieces of
massive chains preserved from the past speak of the high skill of the old
smiths.

326 The Nivkhi widely employed silver and copper inlay on spear-tips. The
● 887 old men wore robes from bast and nettle, bulk sleds and made dog-harness.
Brow's work included fishing, hunting, making the tools required in these
462 occupations, including tackle and means of transportation, the preparation
and tanning of skins, sewing and embroidery. The women processed the
skins of fish, seal and dogs, prepared birchbark for various uses, sewed and
ornamented clothing, made wooden vessels, gathered plant products, did
the housework and took care of the dogs.

By the time the Far East Revolutionary Committee, commodity relations were quite
179 strongly developed among the continental Nivkhi. The old forms of collective
433 production and distribution had almost entirely disappeared under the impact
of the increasing property differentiation. Many fishermen and hunters who
lacked the necessary gear were compelled to hire out as lumberjacks and
other hired laborers, transport goods, etc. The smallness of the income
from fishing made the Nivkhi turn to agriculture. Fur-hunting played an in-
significant role among the Amur Nivkhi. The catch of seal, white whale and
sea lion went mainly to fill the needs of the hunters and their families. Fish-
ing was done by cooperative parties usually consisting of 4 to 7 persons.
Workers were also hired, on a half-share basis. Some Nivkhi worked during
the fishing as hired laborers, processing the fish.

Fishing was also highly important among the Sakhalin Nivkhi; but in
194 addition, they widely engaged in hunting sea animals, bears, sable, etc.
22 The food staple of the Nivkhi was always fish, most often jerked; pikeia
262 took the place of bread. Meat was eaten rarely. Food was prepared with

/68 cont./

respectful attitude toward the bear which I mentioned earlier. Furthermore, with regard to the fact of the ad hoc feeding of the bear, this at first sight may not at all appear to an element of a religious nature. In hunting, the Gilyak on some occasions may catch young animals, and, whenever he finds it profitable, he feeds them; thus, he feeds the fox for its fur, and young eagles for their feathers. Similarly, it is disadvantageous for the Gilyak to kill a bear cub, and he prefers to feed it in order to obtain later a huge carcass of meat and an enormous skin. Furthermore, there is nothing more natural it would seem than to use the killing of the bear for a solemn occasion like the celebration of the funeral feast for a close person. By the way, the feeding and the killing of a bear is an excellent means of education for the youth, who from childhood become accustomed to the most terrible animal of their taiga, learn not to fear it, and study its disposition, its strength, and its weaknesses. The procedure for getting the bear out of its cage is a simple rehearsal for getting it out of its lair.

Nonetheless, it is not these crude, utilitarian motives that play the major role in the Gilyak's expensive, wearisome, and prolonged care in feeding a bear. He is governed here by other motives, perhaps also utilitarian, but of a quite different order. As we have already seen, in the eyes of the Gilyak, the bear is a creature sui generis. No matter what creature is concealed under the hairy covering of the bear, a divine clansman of the master of the mountains, a mountain man, or a real animal sent as a present to the Gilyak by its master, in any case he is a creature of a higher order, more powerful, and superhumanly strong. The presence of such a being for a long stretch of time in his native settlement, according to the view of the Gilyak, who is convinced of the constant conspiracies of crowds /69/ of evil spirits eternally threatening his life and health, must be extremely beneficial. The presence of this mighty creature, like a very strong disinfectant, must kill and drive away any insidious spirit. It is not by

/383 cont./

and other objects. In the second case the adversaries fight it out with cudgels until one side admits defeat. The Gilyak are most proficient at wielding cudgels. The Gilyak study this art from childhood, and the children give themselves up with passion to this noble exercise, even by moonlight on frosty winter nights. In their civil relationships, as a general rule, the Gilyak display veracity, fidelity to their word, and conscientiousness. /384/ Unfortunately, the destructive influence of the rascally population of the Amur region has begun to extend even to the most remote Gilyak settlements. A few individuals imbibe wisdom at Nikolayevsk, and it is enough to enmesh whole settlements in deceit and to breed imitators and a whole mass of interminable lawsuits. The court and mediation of the clansmen, still exerting authority within the clan, are becoming powerless when the quarrel is between members of different clans. The Gilyak have the custom of turning to a mixed assembly of "khlay-nivukhi" of different clans for the resolution of mutual disputes. But at the present time this institution is losing its strength, since the Russified Gilyak, who are simultaneously the chief culprits of dissension and lawsuits, deny to it respect and competence. The Russian administration is going to impart authority to this court of "wise" and honorable men by sanctioning the "khlay-nivukhi" by election, regulating the time of their meetings, the area of their authority, etc. And a first condition is that the "khlay-nivukhi" be of various clans. Observation has shown that the Gilyak are able to elect men intelligently and to appreciate the importance of the elected court sanctioned by the Russian administration.

V

Statistical Data

In conclusion, in order to provide some idea of the number of Sakhalin Gilyak and to present their economic status more

/645 cont./

and entertainment of the children, for instance, those of the carp (Gilyak pilengat, Pl. LX, Fig. 5 /see p. 1260/), bear a quite different character, because they reveal an attempt to give a really similar picture of the animal. As soon as the boys are able to romp about freely, they amuse themselves by shooting with small bows and arrows at a target or at imaginary animals, by traveling on small sleds with the whelps, or by faithfully imitating all the manipulations that they see the adults execute with bears, for which one boy represents the bear and behaves like it, but the others try to pull it, subdue it and lead it away, etc., precisely as is done during the processions with the animal at the bear festivals. Very soon they are also taken along by the father or older brother to set up or inspect the animal traps in the woods, for fishing, and the like, and they learn from them the pertinent techniques and in general what to do or to avoid. No less do the girls in their games and occupations imitate their mothers and older sisters and are soon capable of helping them in the handicrafts and all the operations in the household.

In a polygamous marriage all the wives live in the same house with the husband, and each of them has a certain section of the sleeping benches for herself and her children. Legally the wives are completely equal and are obliged to care for the household jointly. But as a rule the division of labor is not completely equal among them, since one or another of the wives is almost always favored by the husband, and only the lighter work falls to her, while all the heavier work must be performed by the others. It is by no means the case, however, that the last-purchased or the youngest wife is always the favorite, for sometimes, as Jutschin and other Gilyak told me, the man may take a second or a third wife simply in order to make life easier for the first wife or for one of the two he already has /646/ by placing a new and able worker by her side. Whether he achieves his goal depends, however, on whether and how the wives accommodate themselves to the new arrangement and get along with one another. For no matter how little jealous they may be, the peaceful

784 from young hunters and women the fact that the old hunters
225 who play a leading part in the hunt appropriate the tastiest
183 parts of the quarry under the guise of religious interdictions.
626
262 Taboos regulate the relations between the old and young
784 hunters as well as the relations between the male and female
462 parts of the clan.

868 Thus, in the very same year of 1931, in the village Čarvax
183 (Charbakh), the old Gilyak Kozin and Ōisk (Agiska) informed
626 me of interesting taboos pertaining to a number of objects used by children in their games.

A boy must not play with a yoke or with a board used by women in cutting leather and cloth (tans-kəlmr). Also, a child must not play with a woman's cutting knife (tan-dago).

"When I was little Kozin told me, old men would not permit to put a yoke on a boy's shoulders. That was Uit ('taboo,' 'sin'). If a boy hit the legs of another boy with a yoke or a cutting board, then when he grew up and went hunting in the taiga, he might not be able to walk well." Agiska told me that he will have no luck in hunting.

Agiska told me that a girl should not play with arrow, bow, or spear, for these implements will not bring luck (in local Russian - farta). If a woman or a girl were to step inadvertantly over a spear or arrow, the arrow will not go deep into the body of the bear and will not stick. That is why girls are not supposed to play with those implements.

These taboos indicate that already at an early age children are prepared for definite tasks; that boys must not - if only in play - have anything to do with implements used by women in their tasks and that, conversely, girls mustnot use implements used in their tasks by men. These taboos are seen to legitimize for both men and woman, virtually from the time of birth, the distribution of labor existing among the Gilyaks.

462 [88] The women of a clan perform the most onerous work which
614 from the point of view of men, is least respectable. Until recently it was the slaves who did this work for the Gilyak rich. The women must carry water, chop wood, feed the dogs, row (notwithstanding his wife's advanced stage of pregancy, the husband tends the rudder; the man is supposed to tend the rudder and the woman to row; the opposite would be disreputable and inadmissible for a Gilyak hunter), prepare food, make clothes, shoes and perform a number of other onerous tasks some of which are regarded as detrimental to the dignity of a hunter.

The males of a Gilyak clan are hunters, providers of food. They procure food for the whole clan. They procure fish, bear

854 Nursing infants are bathed twice daily, but, on the other
515 hand, larger children are seldom bathed. Adult Gilyak
302 consider bathing a luxury, some never do it and leave it to chance, if they are caught in the rain or fall in the water; some, however, wash occasionally, even with soap which they buy from the Russians. They comb their hair with a wooden (Chinese) comb and at the same time rub it with fat and hunt for lice. They do not by any means comb their hair every day.

854 Children nurse for about two years. Tiny babies are kept in a cradle which stands on the floor, but as soon as they are three to four months old they are placed in a trough-like bed. The little trough is open at one end and somewhat pointed; on the other end it has a hole in the bottom. The [130] child is laid with its back against the bottom, its head against the open end; it is tied down and the whole thing is hung up slantwise. The hole serves as a conduit. When the mother leaves the house for a longer time, she ties this cradle to her back.

868 When the Gilyak lad no longer needs his mother's care,
276 he begins to accompany his father on trips and thus gradually
147 learns what he needs for his life. Many children even smoke but all fathers do not permit this. (1)

> 1. The disciples of a one-sided etiology of disease might cite the Gilyak as living examples of the harmlessness of tobacco:this race is on the average healthier than civilized man, their teeth are white and strong, and yet both sexes smoke from childhood. Nevertheless, this would be a false inference: a single given cause always has a different effect according to the mode of living in general. Thus, for instance, the effect of a strong cigar is very different if one smokes outside in cold weather or sitting in a warm room doing head work. In the latter case it will soon lead to nervous palpitation. Furthermore, the organic constitution with which a person is equipped must be taken into consideration. Civilized man would have to live through the tests which the Gilyak endures at birth in order to be compared with him.

855 The parents are tender and indulgent with their children.
524 The children are kissed by their mothers, licked with saliva,

871

871 EDUCATIONAL SYSTEM--degree of development and elaboration of forma
education; prevalent types of educational specialization (e.g., schools, tu
apprenticeship); source of support of teachers and educational institutions
(e.g., fees from students, ecclesiastical aid, private gifts and endowment
systematization of education (e.g., local school boards, state educational
agencies, voluntary organizations of educational administrators); degree o
standardization as to levels, policies, and curricula; primary objectives o
formal education (e.g., piety, morality, citizenship, vocational skills, in
tellectual leadership); diffusion of education (e.g., educational statistics)

ay the Nivkhi are served by an extensive network of diverse medical ions; in addition, specialist physicians visit the most remote ive-farm villages. One of the initial tasks of the Soviet government bring the children into the schools and to liquidate illiteracy among lts. Schools were opened in Sakhalin during the very first years after ablishment of the Soviet government there. A group of Nivkhi young were sent to school on the continent, and adults were taught at cen- r the liquidation of illiteracy.

177 648 871 212

Nivkhi alphabet was created in 1931. In 1932, the first schoolbooks ublished. During the 1933-34 school year, some 300 children were at school in the Sakhalinskaya Oblast, which meant 86% of all Nivkhi n of school age. It was possible to assure daily attendance only after ablishment of dormitories. Today all children attend school. In the of Kal'ma there is an elementary seven-year school; in Noglíki there -year school. A part of the Nivkhi youth (boys) attend trade schools osol'sk and factory schools in Komsomol'sk and Nikolayevsk-on- ur.

73 them that the old people had told him that one part of the
81 Gilyak came across the ocean, the other, from above, that
21 is, from approximately there where the city of Blagoveshchensk lies. May we not understand this to mean that they crossed over from Sakhalin and that the first immigrants mingled with the Goldi who were already to be found on the Amur?

53 If one asks how intelligent the Gilyak are, it may be said that for savages they are rather intelligent. In the arts, however, they are very backward. They know how to draw or carve various animals. The figures are coarse, but nevertheless [246] recognizable. Music and poetry are absolutely embryonic, but at least they like to hear music. Their memory for places and persons is astonishing. If a Gilyak meets a stranger somewhere, he recognizes him instantly after many years, and at the same time recalls all kinds of minor circumstances accompanying the original meeting. In languages, too, their memory is not bad, at least many of them speak Russian, but the reverse is not true. It is, however, doubtful whether the Gilyak's memory would be adequate for systematic instruction. In instruction the different facts cannot be directly understood but must be interpreted from the words of another, and thus a certain
212 imagination and judgment are needed. For a time there was
872 a school in the village of Mikhaylovskoye where Gilyak children were taught to read and write. This they learned very well, but nothing else was taught. The Gilyak, of course, do not have their own writing.

53 Curiosity and a desire for knowledge are average. The
09 former I judge in comparison with other uncultivated peoples whom I had the opportunity of observing, especially the Bashkir. The latter are so intrusive in their curiosity that they give the traveler no peace. Of course, the Gilyak also gather around a stranger who stops at their yurts, but not in great numbers; they keep at a certain distance and soon disperse. If they come into the house of a Russian, they look about them with curiosity but they do not immediately reach for everything that strikes them and do not ask for presents. In this, as in many other respects, they are decorous people.

53 If I must praise them in this connection, I must also say
21 that their desire for knowledge is not sufficiently matured
77 that they would be interested in the main springs of culture. It seldom occurs to them to ask a Russian about a machine, about economic questions, nature, institutions, religion,

873

873 LIBERAL ARTS EDUCATION--existence, number, and variety of institutions on the secondary and college levels devoted to instruction in the liberal arts; special objectives (e.g., inculcation of aristocratic ideals, preparation for democratic leadership, refinement of personal tastes, preparation for rational choice of careers); sources of financial support; administration; scholarships; curricula; courses and terms; educational aids (e.g., libraries); grading and advancement; degrees; ceremonial (e.g., commencement); student organizations; extracurricular activities (e.g., sports, politics, debating); special institutions (e.g., finishing schools, adult education); etc. See also:

4:Ivanov et al. E-4 (no date) 1964 RX2 Gilyak RX2

177 Many Nivkhi with secondary schooling enter higher educational institu-
648 tions. In 1953, 2 Nivkhi attended Leningrad State University, and 10 studied
873 at the A. I. Herzen Pedagogical Institute. At present, 16 Nivkhi are attending the institute. Among the students there are also women. In 1953, Liza Dekhal' of the village of Pad on the Amur graduated successfully from the A. I. Herzen Institute in Leningrad. The Nivkhi Chuner Taksami of the
[463] village of Kal'ma is today doing graduate work at the Institute of Ethnography of the USSR Academy of Sciences. Nivkhi with special training are working today as captains, enginemen on cutters, teachers, librarians and club directors.

177 The political activity of Nivkhi workers has grown tremendously. Many
648 have risen to leading posts on collective farms and in various institutions;
474 many work as instructors with rayon Party committees and executive committees.

[641] Wide educational work among the Nivkhi has been conducted and is conducted today by the cultural bases established on their territory. The first of these was founded in 1928-29 in the village of Nogliki, at the mouth of the Tym' River in Vostochno-Sakhalinskiy Rayon. The second cultural base of the peoples of the North was founded on Sakhalin in 1946, in the village of Yukovo. These bases have libraries, reading rooms, clubs, seven-year schools for Nivkhi and Evenk children, and also dormitories and boarding schools.

[52] At the amateur concerts on the collective farms, both men and women entertain, singing and performing native and Russian dances. Frequently the songs are created on the spot, impromptu. The collective-farm youth also participate in regional Olympic games.

[545] Theatre arts are also developing among the Nivkhi. In the beginning, the Nivkhi, who had never seen a theatre before the Revolution, were merely spectators at performances organized by Russians. Soon, however, dramatic clubs were organized in the collective-farm clubhouses, and the Nivkhi began to present plays in their own language.

[526] The Nivkhi are great lovers of sports. In former times they did not know how to swim and feared the water. Today the Nivkhi young people enthusiastically engage in water sports. There are now special sports omorochki (canoes) with a single oar, in which young men and women hold speed races. The Nivkhi have also preserved native sports, such as rope-jumping.

[182] The changed working, living and cultural conditions of Nivkhi life—the collectivization of their economy, their participation in industry, the unification in collective-farm villages of people who had formerly belonged to different clans, and the general rise in their cultural level—all these factors have completely destroyed the old ties and rules, based on the numerous remnants of clan relations which had survived until the Revolution. The old
177 religious ideas, holidays and rituals have lost all their meaning. The
648 greatest change has occurred in the position of women. In former times, the
562 Nivkhi woman was timid and oppressed, and knew only the narrow circle of her domestic duties. She could be bought and sold, or turned out of the house. When she met men, she had to cover her face and turn her back to them. During the early post-Revolutionary years, a great deal of effort had to be applied toward the elimination of survivals of the past. When they attempted to study, many young women ~~and girls~~ were ridiculed by their fathers, husbands and mothers. Some were unable to withstand the pressure and discontinued their studies. It proved especially difficult to overcome the ancient custom of placing a woman in childbed in a special hut, built near the dwelling. This tent was usually cold and damp. The woman had to remain under these conditions for several days without any help,

596 Finally -- and this is particularly necessary to note -- it is not at all obligatory that at the head of large families with a common economy there should be elders in years; most frequently, on the contrary, they are young people who have distinguished themselves by their activity, resourcefulness, and zeal, in a word, by their personal talents. Old men enjoy /114/ authority only with regard to special questions, as the preservers of traditions, as experts in the rituals and history of the family-clan relations. They are consulted on confusing questions of kinship and in the giving of names; it is they who must supervise the ritual aspect of festivals, but this does not give them any power or advantages.

596 ●888

* 614 622 And that which is absent in the family -- the despotism of the eldest, the head -- is also lacking in the clan. It knows neither despotic elders-patriarchs nor any permanent authorities in general, collective or individual, neither elected ones nor any by right of birth and inheritance.

* 614 The clan is not a fiction, however; it is a complicated institution, surrounding the Gilyak with a thick net of regulations, prohibitions, and obligations, but at the same time providing him with all the benefits, material and spiritual, of a firm social union.

We thus return to the question that we raised at the end of the preceding section. Where are the driving forces of the mechanism of this almighty institution -- the clan, where is the secret of the amazing combination of the closest community with a complete absence of despotism, of all-embracing wardship and regulation with the absence of compulsion and the maintenance of individual freedom?

This secret is contained in two conditions: 1) the simplicity of economic conditions and relations, which offers a broad scope to the comprehensive development of the powers and abilities of the individual and their free application to the wide-open gifts of nature equally free to all; and, secondly, the entire socio-religious world-outlook, which quite spontaneously, without any external pressure, directs the will and activity of each toward the harmony of the common interest, substituting for external compulsion the force of the inner consciousness of each.

/715 cont./ At this window,

* 796 532 825 after the bear's head has been carried through, a representation of a toad (Gilyak mipitsch), cut out of birch bark, is pasted from the outside onto the thin fish-skin pane that replaces the glass (see the woodcut, p. 1157), while in the interior of the house, on the adjacent bench of honor, there sits a figure which is supposed to represent a bear in Gilyak clothing (Plate LVIII /p. 1258 /, Fig. 3) (2). The significance of this symbolic act seems to me to be

> 2. In order to be seated, the figure concerned is movable in the hip and knee joints; the clothing, of course, is only very crudely and rudimentarily realized.

somewhat as follows. The toad, an animal that has the worst reputation among the Gilyak and is often represented independently as well as in connection with the bear and the bear festival (3),

> 3. See, among others, Plates LI /p. 1251 /, LIX /p. 1259/, LX /p.1260 /, LXI /p.1261 /, which will be discussed in detail later.

is regarded as an evil spirit and the actual instigator of all the misfortune that happens to the bear through its capture, death, and finally, consumption. It is the scapegoat upon which the Gilyak heap all guilt and responsibility for their actions against the bear, and it is therefore not admitted into the festively decorated house, but remains /716/ outside of it stuck to the window, where it may witness its misdeeds. The bear, on the other hand, is greeted as a welcome guest by the participants at the festival and, as an equal (hence the clothing) is given a place on the bench of honor. Further proof of the correctness of this interpretation, which I can express only as a conjecture, will be given in the following. /Illustration appears here./

* 796 252 Immediately after the feeding of the dogs, which even on this day takes place in the house in spite of the festive decorations, the work of the day begins -- the cooking of the bear meat in the hearth concerned. This work is given to only the oldest men, the

Toad made out of birch bark.

716 graybeards, as a high post of honor; the women and girls, the boys
252 and youths are excluded, and it therefore proceeds very slowly,
888 deliberately, and, so to speak, solemnly. First the kettle in the
887 fireplace was surrounded with a thick wreath of wood shavings, and a
784 similar half-wreath was spread in front of the vent hole. Then the
kettle was filled with snow for it is ulïtsch to use water for cooking
bear meat, and the fire under the kettle was kindled with shavings and
fir branches, with the latter also used for incense from time to time.
Simultaneously a large wooden trough was hung on straps directly
under the bears' snouts so that it hung about three feet above the floor.
532 The trough was richly decorated with all sorts of arabesques and
figures and in particular on one side showed a bear carved in relief and
on the other side a toad likewise executed.

The work of the old men proceeded so slowly that it was not
887 until toward evening that they began to cut up the meat of the legs
and feet. Each leg was first placed upon the fir branches in front of
the bears, as though to ask first for their permission to prepare it; only
then was it cut up and put in the kettle. The cooked pieces were
fished out of the kettle with an iron hook and transferred to the trough

281 (the work of stretching the hides on frames and of cutting
462 straps is performed by men). Finally, the heads have to be
cooked and prepared for throwing out into the sea.

281 I watched the two wives of Xitkun work after he returned
from the hunt. The younger of the two was busy peeling suet
from hides. In this she was helped by a woman, the wife of
one of Xitkun's kinsmen. The job of peeling suet from hides
is very hard. Most of the time the woman has to work in a
bent position. I saw Xitkun's wife lift a hide in the process
of cleaning it of suet by seizing a part of the cleaned hide
with her mouth. At the same time she held the peeled suet
with her left hand and continued the peeling process using a
large narrow and somewhat curved knife which she held with
her right hand.

237 The Gilyaks prepare thin seal fat in the following manner.
415 They cut the suet (ŋɔ̃χ) into pieces. They put the pieces into
251 a barrel (in the past they used to put them into a large, deep
trough) which they then place in a warm spot. There the suet
begins to decompose and to melt (I am not in a position to
give a more detailed account of the process which takes
place in the suet). This yellow fat (tõm) flows out of the
suet. Depending on the age and variety of the seal the fat is
either light or dark and turbid. The Gilyaks pour the melted
fat into dried seal stomachs. They give the leavings of the
melted suet (taχ) to the dogs. Stomachs of seals are used by
the Gilyaks for storing seal fat. Having killed a seal the
Gilyaks empty out its stomach, blow air into it and hang it up
to dry. The fat can be stored for a long time in such a bladder.
Once the bladder is filled with fat, it is hung in the barn.

●888 While one of Xitkun's wives was busy peeling suet from
252 hide, the other wife, Hemanχ, 'old woman,' was preparing
the heads for cooking. It was certainly no accident that it
was Hemanχ, Xitkun's older wife, who was preparing the
heads for cooking. Preparing of the heads requires a
certain knowledge of religious ceremonies the guardians of
which are the old people.

193 [93] À propos the interpretation of the words hemanχ
197 old woman' and hemar 'old man'. Both words have in common
the sound combination hem and differ in their respective
endings ar and anχ. Ar means in the Gilyak language male
and anχ - female. What then is hem? In the village Chayvo
where a certain form of the Sakhalin dialect is spoken, they
call an old man hajmŋar. In comparison with the Amur dial-
ect the Sakhalin dialect has retained a great many ancient
forms. The etymology of the word hajmŋar can be easily

9: Hawes--258-259 T-3 (1901) 1903 Gilyak
116, 574, 577, 888

"The Gilyak expects and finds a welcome almost everywhere, since he has relations, members of his khal, at every other village. Hospitality is not a virtue, but an obligation, and few there are who take unfair advantage of it. The guest of to-day may be the host of to-morrow. Those who are too aged to hunt are supported by the exertions of the younger generation, and even they can slice and [259] clean fish in the season. There was one notable exception to these old people, who did travel, and who having no relations nearer than the mainland went about begging. Of him the Gilyaks were very much ashamed, and I feel almost guilty of a breach of confidence in making public this skeleton in their cupboard. His proper name was Poeikan, but he can no longer be called by that, for he has disgraced it, and so he goes by the title Pillanütsich, or the 'Grand Old Beggar.' "

and deloused. They are never cuffed, it seems, or punished with the rod. Nor can it be said that boys take priority in their parents' affections. The play and activity of the children consists of bathing (in summer), of scuffling and romping about in the sand and snow, and of imitating their elders, especially in archery. Occasionally their mother sews them a leather ball which they knock about with a stick on the flat ground or on the ice. The children also make themselves willow whistles.

[222] XI. Morality and Crime.

Crimes are rare and neither manifold nor refined. This negative side of morality is less developed among these natural people than the positive side, that is, moral traits of character. Some of these we touched on in previous chapters; we should now like to consider them in detail.

First of all, the Gilyak are a brave people. Not everyone, it is true, decides to attack the bear single-handed with his lance, but for two people to set out against the bear, armed with rifles- this is a very common thing. The seal hunt on Sakhalin is often linked with great danger because of the floating ice. Even traveling along the coast of the Amur in windy weather with the kind of vessels the Gilyak have is certainly not without danger, especially if one remembers what poor swimmers the Gilyak are.

It cannot be said that resignation and patience in the endurance of bodily pain falls entirely within the realm of morality, for it can also be a result of insensitivity of the nervous system; nevertheless, a certain self-effacement in such instances is not to be denied. And the Gilyak bear suffering extremely well. Not only hunger and physical pain, but the ailments connected with the latter, they endure steadfastly. Loss of eye-sight, paralysis of the limbs. etc., do not call forth lamentations or complaints. [223]

The quiet way in which several families live in one house, or more accurately, in one room, already points to peaceableness and forbearance. I repeatedly heard neighboring peasants praise the Gilyak for these characteristics; and they marveled particularly that the "women folk got along together". The house usually belongs to one owner, but the occupants do not pay him anything, they merely help him with repairs, wood cutting, etc. The old people of both sexes in the house are sometimes called the "masters of the house". In general, old people are respected. They are not permitted to work, they are given all they need, and their advice is followed.
